- c. Calculation of Charge. A customer may select a particular Flexible MTS Service plan listed in this Tariff. The plan to which the customer subscribes determines the specific rates which the customer is charged. To determine the appropriate charge, each call is rated by using the following method.

Flex-Call, Flex-Save and Flex-Save Plus.

- (a) The initial whole minute or fraction thereof is subject to the initial minute rate for the appropriate plan to which the customer has subscribed.
- (b) The subsequent seconds beyond the initial minute are rounded in tenth of a minute (6 second) intervals with any remaining seconds rounded to the next higher tenth of a minute interval. Those 6-second increments are subject to the precise billing factor for the appropriate plan to which the customer has subscribed.
- (c) The charge calculated for the initial minute plus the charge calculated for the subsequent 6-second increments determine the precise billing charge for the call. The total amount of the call is rounded up to the nearest whole cent.
