---

The following rate elements provide for digital CSV/CSD transport through central office switching equipment and are in lieu of the local exchange access rates. These rate elements cover local exchange access usage only. The local loop is included in the rates for the digital services provided in the remaining sections of this tariff. These CSV/CSD local service transport options are offered only in conjunction with services provided under this tariff and are not available on a stand-alone basis. Each CSV/CSD transport rate element shall constitute a local exchange access arrangement and is offered with identical local usage options and calling scopes as defined in the Local Exchange Tariff, unless otherwise noted in this tariff.

Section 1  
Original Sheet 1  
**RECEIVED**

INTEGRATED SERVICES DIGITAL CIRCUIT-SWITCHED VOICE (CSV) **APR 28 1992**  
CIRCUIT-SWITCHED DATA (CSD) TRANSPORT OPTIONS

The following rate elements provide for digital CSV/CSD transport through central office switching equipment and are in lieu of the local exchange access rates. These rate elements cover local exchange access usage only. The local loop is included in the rates for the digital services provided in the remaining sections of this tariff. These CSV/CSD local service transport options are offered only in conjunction with services provided under this tariff and are not available on a stand-alone basis. Each CSV/CSD transport rate element shall constitute a local exchange access arrangement and is offered with identical local usage options and calling scopes as defined in the Local Exchange Tariff.

1.5 PROMOTIONS

1.5.1 A promotional period will begin March 18, 2003 and end March 17, 2003 for eligible business customers who order SmartTrunk service. Business customers who order new SmartTrunk service or who add additional SmartTrunk Interfaces and/or Ports to their existing service during this promotional period will receive a discounted monthly rate for CSV/CSD Transport, Business Trunk Equivalent Flat Rate Usage of \$27.00. This discounted rate will apply to all rate groups for qualifying SmartTrunk Interfaces and/or Ports added during the promotional period. The discounted rate will apply only during the promotional period as stated above.

To be eligible for this promotion, the business customers must not: 1) have had service disconnected for nonpayment; or 2) currently have any past due bills for regulated service owed to the Company.

This promotion is only available where facilities permit and it may not be combined with other SmartTrunk promotional offers.

- (CT) 1.5.2 A promotional period will begin June 15, 2003 and end August 15, 2003 for eligible business customers who order SmartTrunk Service and who commit to a 12-month Service Term. Business customers who order new SmartTrunk Service or renew SmartTrunk Service, or who add additional Interfaces and/or Ports to their existing SmartTrunk Service will receive a discounted monthly rate of \$16.00 for CSV/CSD Transport, Business Trunk Equivalent Flat Rate Usage. The discounted rate will apply for the duration of the 12-month Service Term commitment. Additionally, the SmartTrunk Interface and/or Port nonrecurring Installation Charge as set forth in Section 2 of this tariff will be waived for all qualifying orders placed during this promotional period. Service must be installed by October 15, 2003.

In the event of early termination of this service as provided under the 12-month Service Term, the customer will be liable for any and all waived Installation Charges, in addition to termination charges as set forth in Section 2 of this tariff.

This promotion is available only where suitable facilities and equipment permit. This promotion may not be combined with any other SmartTrunk promotional offers.

To be eligible for this promotion, the business customer must not currently have any past due bills for regulated service owed to the Company.

**2.1 GENERAL**

All rates, charges, terms and conditions set forth herein provide for the furnishing of service where suitable facilities and equipment are available in the customer's serving office and do not create an obligation for the Company to construct such facilities or equipment especially for the provisioning of this service.

(RT)

(RT)

**2.2 SERVICE DESCRIPTION**

SmartTrunk Service provides access to and from the Public Switched Telephone Network (PSTN) for Circuit-Switched Voice (CSV) and Circuit-Switched Data (CSD) communications. SmartTrunk Service is provided using Integrated Services Digital Network (ISDN) architecture. ISDN services available with SmartTrunk Service use Primary Rate Interface (PRI) technology. SmartTrunk Service employs a 1.544 Mbps facility typically divided into twenty-three B channels and one D channel. B channels are used for voice and data communications while the D channel provides out-of-band signaling.

**2.3 SERVICE COMPONENTS**

2 B-Channel Transfer - Allows, in certain central offices, the SmartTrunk to connect two calls, transfer the call together and then release the parties from the SmartTrunk.

Backup D-Channel (BD-C) - Allows, in certain central offices, enhanced survivability of SmartTrunk links by providing automatic takeover for a failed D-Channel.

Calling Line Identification (CLID) - Allows the number and name (where technically capable) of the calling party to be delivered to the called party as part of the called party set up message. Blocked calling name and/or number will be delivered to certain qualifying entities as described in FCC Memorandum Opinion and Order, CC Docket No. 91-281, January 4, 2002. Such entities must certify to the Company compliance with the Memorandum Opinion and Order's eligibility requirements.

2.2 Service Description

SmartTrunk Service provides access to and from the Public Switched Telephone Network (PSTN) for circuit-switched voice (CSV) and circuit-switched data (CSD) communications. SmartTrunk Service can also be configured to provide packet switched data (PSD) capability. This capability provides access to Southwestern Bell's Public Packet Switched Network (PPSN). SmartTrunk Service is provided using Integrated Services Digital Network (ISDN) architecture. ISDN services available with SmartTrunk Service use Primary Rate Interface (PRI) technology. SmartTrunk Service employs a 1.544 Mbps facility typically divided into twenty-three B channels and one D channel. B channels are used for voice and data communications while the D channel provides out-of-band signaling.

2.3 Service Components

Backup D-Channel (BD-C) - Allows, in certain central offices, enhanced survivability of SmartTrunk links by providing automatic takeover for a failed D-Channel.

Calling Line Identification (CLID) - Allows the number and/or name (where technically capable) of the calling party to be delivered to the called party as part of the called party set up message, i.e., before ringing begins. Blocked calling name and/or number will be delivered to certain qualifying entities as described in FCC Memorandum Opinion and Order, CC Docket No. 91-281, January 4, 2002. Such entities must certify to the Telephone Company compliance with the Memorandum Opinion and Order's eligibility requirements.

Public Service Commission  
ARTTRUNK<sup>SM</sup>

2.3 Service Components-(cont'd)

(MT)

Closed User Group - A packet switched data feature that provides a mechanism for creating a private network that restricts packet data communications between group members and non members. It includes the following features: Closed User Group with Incoming Access and Closed User Group with Outgoing Access.

Closed User Group with Incoming Access - A packet switched data feature that enables terminals belonging to a closed user group to receive incoming calls from terminals outside of the closed user group.

Closed User Group with Outgoing Access - A packet switched data feature that enables terminals belonging to a closed user group to originate outgoing calls to terminals both within and outside of the closed user group.

(MT)

Common Line 800 Service Option - Provides the customer with the capability to complete Common Line 800 Service calls over a SmartTrunk Interface or Port.

Dynamic Channel Allocation (DCA) - Allows a customer to designate the quantity of call types to be allocated within previously provisioned criteria for either DID or DOD services. In equipped central offices, this feature will also include FSO, Common Line 800, Outward WATS, tie line and FX services. (This feature is also known in the industry as call-by-call service selection.)

Enhanced Alternate Route - Allows incoming voice or data calls to overflow on a disaster and busy basis to a line side connection designated by the customer. Available where technical capabilities exist. A route may be limited in the number of simultaneous calls that can be routed.

Flow Control Parameter Negotiation - A packet switched data feature that permits the customer's CPE and central office switch to communicate and agree upon what fundamental PSD language will be used during a data transmission. This feature allows the calling data transmission equipment to select a window or packet size in the call request packet and the called data transmission equipment to accept the transmitted values, reject the call or select new transmission values. The action occurs automatically with each call.

Hunt Group for PSD - A packet switched data feature that allows an incoming call to terminate on any line within a designated group of lines. The sequence in which the search for the terminating line is conducted is determined by the type of hunting (linear or uniform) feature chosen by the customer.

Incoming Calls Barred - A packet switched data feature that prohibits a data terminal from accepting incoming calls.

(RT)

Inform 911 - An optional upgrade feature which allows the Calling Party Number of the station to be sent to the E911 database rather than the Billed Telephone Number. It is the customer's responsibility to provide station number updates to the 911 database. Available where technical capabilities exist.

(RT)

Integrated Services Digital CSV/CSD Transport Option - Provides for the local use of the PSTN. Only Integrated Service Digital CSV/CSD Transport Options, noted as "SmartTrunk Service Compatible" in Section 1 of this tariff, can be associated with SmartTrunk Service. This component is not required with tie line services.

(CT)

Link Extension - Provides the additional central office hardware and facility required to provide SmartTrunk Service to a customer located in an exchange outside the non-optional local calling scope of the SmartTrunk-equipped serving office. Application of this rate element is dependent upon the customer's location and the fact that the customer is served from the SmartTrunk serving office designated by the Company.

(RT)

(RT)

Network Ring Again (NRA) - Allows, in certain central offices, the customer to automatically complete calls made to busy stations of a different PRI connected PBX system served by the same central office switch.

- 2.6.1 The following regulations apply in addition to other regulations stated in this and the other tariffs of the Company, including but not limited to, the General Exchange Tariff, Section 17. For the purposes of this service, where such other regulations apply on a "per line" basis, they shall be interpreted, in this instance, to apply on a "per channel" basis.
- 2.6.2 SmartTrunk Service is offered only for use with compatibly equipped FCC Part 68 registered PBX equipment. The customer will be required to select a service term for the SmartTrunk Interface consisting of 36 or 60 continuous months. Once selected, the customer may not change the service term. All service components, except the SmartTrunk Interface, have a minimum service term of one month.
- 2.6.3 SmartTrunk Service is offered only in conjunction with the CSV/CSD local service transport SmartTrunk Service compatible option and is not available on a stand-alone basis.
- 2.6.4 Other ancillary tariff offerings requested by the customer and compatible with this offering may be furnished in accordance with the regulations and at the rates and charges specified in the applicable section of this tariff or other tariffs of the Company. Should such ancillary services normally be applied on a "per line" basis, they will, in this instance, apply on a "per channel" basis.
- A. Touch-Tone Calling Service is not applicable for DOD local exchange services associated with this offering, therefore, not chargeable.
- B. The central office switching equipment (trunk termination) portion of DID Service is not applicable for DID local exchange service associated with this offering, therefore, not chargeable.
- 2.6.5 In addition to the rates and charges contained in this tariff, the customer is responsible for the payment of all related charges for exchange services, miscellaneous and supplemental service as specified in this and other tariffs of the Company.

2.3 Service Components (cont'd)

Permanent Virtual Circuit - This feature allows the transfer of packet switched data without the need for call setup and clearing procedures to occur. A logical channel is permanently assigned to this circuit, and data may be passed at any time. Call set-up charges are not applicable to Permanent Virtual Circuits.

Recognized Private Operating Agency (RPOA) Selection - Allows the customer to use a packet inter-network provider other than the preselected primary provider by dialing a specific code on a per call basis.

(AT)

Redirected Number - Provides, in certain central offices, the redirected number (i.e., the directory number to which the call was last presented) to the CPE, as well as the calling number in cases such as call forwarding. If during the call establishment phase, the call is redirected to another directory number by call forwarding, both the calling party number and the redirected number are delivered to the called party. If a call is redirected multiple times, only the first and the last redirecting numbers are delivered.

(AT)

Reverse Charge - A packet switched data feature that allows a user to assign billing (on a per-call basis) charges to the called party rather than the calling party.

Reverse Charge Acceptance - A packet switched data feature that allows the data communications equipment to accept incoming calls which have requested the reverse charging facility. The charges for this call will be billed to the terminating party.

2.3 Service Components-(Continued)

Permanent Virtual Circuit - This feature allows the transfer of packet switched data through a permanent virtual circuit. No call setup and clearing procedures to occur. A logical channel is permanently assigned to this circuit, and data may be passed at any time. Call set-up charges are not applicable to Permanent Virtual Circuits.

Recognized Private Operating Agency (RPOA) Selection - Allows the customer to use a packet inter-network provider other than the preselected primary provider by dialing a specific code on a per call basis.

Reverse Charge - A packet switched data feature that allows a user to assign billing (on a per-call basis) charges to the called party rather than the calling party.

Reverse Charge Acceptance - A packet switched data feature that allows the data communications equipment to accept incoming calls which have requested the reverse charging facility. The charges for this call will be billed to the terminating party.

SmartTrunk Interface (SI) - Provides the PRI termination and a digital multichannel transmission path between the central office and the customer's premises.

(AT) | SmartTrunk Port - A PRI connection that does not include the facility between the customer's premises and the SmartTrunk Serving Office. The connection is made using a SWBT facility purchased separately. This facility must be at a minimum of DS1 level and must conform to technical specifications listed in Paragraph 2.5 of this tariff.  
(AT)

Station Record Detail - An optional feature that will provide the customer with the station number of all originating calls on the customer bill so that call information can be tracked at a station level. Available where technical capabilities exist.

Throughput Class Negotiation - A packet switched data feature that allows the calling data terminal to negotiate a lower throughput class other than the preassigned standard network default.

Throughput Class Selection - A packet switched data feature that allows a user to select one of the following speeds in bits per second: 75, 150, 300, 600, 1200, 2400, 4800, 9600 and 19200.

(AT) Universal Termination - Provides continuity between the SmartTrunk Interface or Port and the PSTN using central office equipment for Foreign Exchange (FX), Foreign Serving Office (FSO), and tie line services.

2.4 Standards Compliance

SmartTrunk Service is designed to all relevant International Telephone and Telegraph Consultative Committee (CCITT) and Bellcore standards.

2.6 REGULATIONS

(RT)

- 2.6.1 The following regulations apply in addition to other regulations stated in this and the other tariffs of the Company, including but not limited to, the General Exchange Tariff, Section 17. For the purposes of this service, where such other regulations apply on a “per line” basis, they shall be interpreted, in this instance, to apply on a “per channel” basis.
- 2.6.2 SmartTrunk Service requires compatible registered customer-provided equipment (CPE) under FCC Part 68.
- 2.6.3 The SmartTrunk Interface or Port is not available on a standalone basis. At a minimum, the SmartTrunk Interface or Port is offered with the CSV/CSD local service transport SmartTrunk Service compatible option.
- 2.6.4 Other ancillary tariff offerings requested by the customer and compatible with this offering may be furnished in accordance with the regulations and at the rates and charges specified in the applicable section of this tariff or other tariffs of the Company. Should such ancillary services normally be applied on a “per line” basis, they will, in this instance, apply on a “per channel” basis. The central office switching equipment (trunk termination) portion of DID Service is not applicable for DID local exchange service associated with this offering, and is therefore, not chargeable.
- 2.6.5 In addition to the rates and charges contained in this tariff, the customer is responsible for the payment of all related charges for exchange services, miscellaneous and supplemental service as specified in this and other tariffs of the Company.

2.6 REGULATIONS (cont'd)

(MT)

2.6.6 Unique requests for special or modified service arrangements will be accepted, whenever possible, if not detrimental to this or other services of the Company. Such requests will be based upon cost.

(CP)  
(CP)

2.6.7 In certain central offices, the additional services of Private Line Service and Special Access Service may be associated with SmartTrunk Service.

2.6.8 Upon subscribing to SmartTrunk Service, the customer may be required to change telephone numbers.

(CT)

2.6.9 The Company will designate the SmartTrunk-equipped central office(s) used to physically provision SmartTrunk Service to customers in each exchange. In many cases, a customer's designated SmartTrunk serving central office will be different from the normal serving office designated for basic local exchange service.

(FC)  
(RT)

A. If the customer's normal serving office is within the non-optional local calling scope of the designated SmartTrunk serving office, Link Extension charges will not apply.

(FC)

B. If the customer's normal serving office is not within the non-optional local calling scope of a SmartTrunk-equipped central office, the customer will be provided with SmartTrunk Service from the designated SmartTrunk equipped central office and the rates and charges for Link Extension, as specified in this tariff, will apply.

(FC)

C. In cases A. and B. preceding, when there is a change in the central office designated as the SmartTrunk serving office for a customer's location, the customer's SmartTrunk Service will continue to be provided from the original SmartTrunk serving office, if possible. Should the customer subsequently request that their SmartTrunk Service be provisioned from the new designated serving office, the provisions and charges specified in this Tariff for moves and disconnects will apply. The Company may request that the customer, at the customer's option, have the customer's SmartTrunk Service provided from the new designated serving office and, in conjunction therewith, may offer to waive move and/or disconnect charges.

(CT)

2.6.10 If a customer requests that SmartTrunk Service be provisioned from an office other than the SmartTrunk serving office designated by the Company, and if agreed to by the Company, SmartTrunk service may be extended to Company central offices within the same Local Access Transport Area (LATA) through the application of a SmartTrunk Port, and MegaLink 1.5 (DS1) Service, DS3 Service, or other suitable Company services.

2.6.8 Upon subscribing to SmartTrunk Service, the customer may be required to change telephone numbers.

(CT)  
(CT)

2.6.9 The central office from which a customer's SmartTrunk Service is physically provisioned shall be designated the customer's SmartTrunk serving office. The Telephone Company will determine a customer's SmartTrunk serving office as follows:

(AT)

1. If the customer's normal serving office is SmartTrunk equipped, the customer will be provided SmartTrunk Service from the normal serving office.
2. If the customer's normal serving office is not SmartTrunk equipped, the customer may be provided SmartTrunk Service from another SmartTrunk equipped central office located within the customer's exchange at the rates and charges specified in this Tariff.
3. If the customer's exchange is not SmartTrunk equipped, the customer may be provided SmartTrunk Service from a SmartTrunk equipped central office located in a different exchange, if agreed to by the Telephone Company. In such cases, this Tariff is applicable in addition to the rates and charges for interoffice mileage as specified in Paragraph 4.1.4.,B., of the Digital Link Services Tariff.
4. In cases 2 and 3 preceding, when the customer's normal serving office becomes SmartTrunk equipped, their SmartTrunk Service will continue to be provided from their original SmartTrunk serving office. Should the customer subsequently request that their SmartTrunk service be provisioned from their normal serving office, the provisions and charges specified in this Tariff for moves and disconnections will apply.

APR 28 1992

2.6.6 Unique requests for special or modified service arrangements will be accepted, whenever possible, if not detrimental to this or other services of the Company. Such requests will be based on the Missouri Public Service Commission.

2.6.7 In certain central offices, the additional services of Intrastate, IntraLATA Foreign Exchange (FX) Service, Foreign Serving Office (FSO) Service and TIE Service may be associated with SmartTrunk Service. However, Dynamic Channel Allocation is not applicable for these services.

2.6.8 In the event a customer's serving office is not equipped for SmartTrunk Service, the customer may request SmartTrunk Service from an FSO/FX serving office that is appropriately equipped. In such cases, where facilities permit, this tariff is applicable in addition to the rates, charges, terms and conditions for the FSO/FX service pursuant to the Private Line or Access Tariff(s).

**CANCELLED**

2.7 Additions

Any additions of service are subject to current rates and charges.

2.8 Moves

2.8.1 Customer moves which require the SmartTrunk Interface to be provided from a different central office, will be considered a disconnection of service for each SmartTrunk Interface moved. Refer to Paragraphs 2.12.4 and 2.12.5 for applicable charges. Installation charges will also apply.

2.8.2 Customer moves which do not require the SmartTrunk Interface to be provided from a different central office, will not constitute a disconnection of service provided the customer's service continues uninterrupted from the old location to its re-establishment at the new location. Installation charges will apply.

2.9 Supersedure

SmartTrunk Service may be transferred to a new customer at the same premises location upon written concurrence of the Telephone Company. The customer to whom service is transferred will be subject to all past indebtedness, liabilities, minimum term provisions and equipment configurations currently in effect for the previous customer.

2.6 Regulations-(Continued)

REC'D DEC 29 1998

2.6.11 Calling Line Identification (CLID).

- A. CLID Service is offered on a subscription basis which requires the customer to order the service. Where CLID Service is available, any calling party, whether they subscribe to CLID Service or not, has per call blocking capability.

The Southwestern Bell Telephone calling party may prevent the delivery of Calling Party Number (or Name) (CPN) to the called party by dialing an access code (\*67 on their Touch-Tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. CLID subscribers are responsible for providing per line blocking on their own PBX. Southwestern Bell will transmit the anonymous indicator received from the customer. The anonymous indicator is included in the call setup message provided by the customer's equipment, and specified by the presentation indicator in the CPN information element.

If the calling party activates blocking, the CPN will not be transmitted across the line. Instead, CLID customers will receive an anonymous indicator. This anonymous indicator notifies the CLID customer that the calling party has elected to block the delivery of the CPN.

Line Blocking for the delivery of the CPN is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers, where an executive office of the agency registers with Southwestern Bell Telephone a need for blocking: (a) private, nonprofit, tax-exempt, domestic violence intervention agencies and (b) federal, state and local law enforcement agencies. The calling number will not be transmitted from a line equipped with this capability.

- (CT) The blocking of the CPN will not be provided on calls originating from Payphone Exchange Access Service.

In addition to the provisions of the General Exchange Tariff, Section 17, Paragraph 17.8, the calling party and customer indemnifies and saves Southwestern Bell Telephone harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a CLID customer of a telephone number which the calling party has requested to be omitted from the telephone directory or has requested not to be disclosed to any person.

CLID information may not be sold or given to another party without the caller's written permission. CLID information may only be used for: (a) routing or completion of calls, (b) billing of calls, (c) account management purposes, (d) services directly related to the call or transaction, (e) verification of calling party identity and (f) marketing products or services that are directly related to those previously acquired by the customer from the CLID services subscriber. This applies if the CLID service subscriber has an existing relationship with the customer. CLID customers failing to comply with any of these conditions will have their service terminated.

The blocking of the CPN will not be provided on calls originating from Public, Semi-Public and Customer-Owned Pay Telephone Services.

By: 3rd RS# 3.01  
Public Service Commission  
MISSOURI

- B. In addition to the provisions of the General Exchange Tariff, Section 17, Paragraph 17.8, the calling party and customer indemnifies and saves Southwestern Bell Telephone harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a CLID customer of a telephone number which the calling party has requested to be omitted from the telephone directory or has requested not to be disclosed to any person.
- C. CLID information may not be sold or given to another party without the caller's written permission. CLID information may only be used for: (a) routing or completion of calls, (b) billing of calls, (c) account management purposes, (d) services directly related to the call or transaction, (e) verification of calling party identity and (f) marketing products or services that are directly related to those previously acquired by the customer from the CLID services subscriber. This applies if the CLID service subscriber has an existing relationship with the customer. CLID customers failing to comply with any of these conditions will have their service terminated.

Public Service Commission**

**CANCELLED**

(AT) 2.6.11 Calling Line Identification (CLID).

A. CLID Service is offered on a subscription basis which requires the customer to order the service. Where CLID Service is available to the calling party, whether they subscribe to CLID Service or not, the blocking capability.

**NOV 6 1996 #3.01  
BY [Signature] R.S.  
Public Service Commission  
MISSOURI**

The Southwestern Bell Telephone calling party may prevent the delivery of Calling Party Number (CPN) to the called party by dialing an access code (\*67 on their Touch-Tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge.

If the calling party activates blocking, the CPN will not be transmitted across the line. Instead, CLID customers will receive an anonymous indicator. This anonymous indicator notifies the CLID customer that the calling party has elected to block the delivery of the telephone number.

Line Blocking for the delivery of the calling number is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers, where an executive office of the agency registers with Southwestern Bell Telephone a need for blocking: (a) private, nonprofit, tax-exempt, domestic violence intervention agencies and (b) federal, state and local law enforcement agencies. The calling number will not be transmitted from a line equipped with this capability.

CLID subscribers are responsible for providing per line blocking on their own PBX. Southwestern Bell Telephone will transmit the anonymous indicator received from the PBX customer.

The blocking of the CPN will not be provided on calls originating from Public, Semi-Public and Customer-Owned Pay Telephone Services

(AT)

(MT) 2.7 Additions

Any additions of service are subject to current rates and charges.

2.8 Moves

2.8.1 Customer moves which require the SmartTrunk Interface to be provided from a different central office, will be considered a disconnection of service for each SmartTrunk Interface moved. Refer to Paragraphs 2.12.4 and 2.12.5 for applicable charges. Installation charges will also apply.

2.8.2 Customer moves which do not require the SmartTrunk Interface to be provided from a different central office, will not constitute a disconnection of service provided the customer's service continues uninterrupted from the old location to its re-establishment at the new location. Installation charges will apply.

2.9 Supersedure

SmartTrunk Service may be transferred to a new customer at the same premises location upon written concurrence of the Telephone Company. The customer to whom service is transferred will be subject to all past indebtedness, liabilities, minimum term provisions and equipment configurations currently in effect for the previous customer.

SMARTTRUNK<sup>SM</sup>

2.6 REGULATIONS (cont'd)

(RT)

(FC)

2.6.11 Note that special steps are required for SmartTrunk DID stations to have 911 service features consistent with those provided to other end users in the same 911 service area. SmartTrunk Service provides Automatic Number Identification (ANI), but the only Automatic Location Identification (ALI) record is associated with the main number for the service. This can create a situation where the 911 Public Safety Answering Point receives a call from an individual DID station and receives identification of the originating telephone number, but the System provides a “no record found” error instead of customer location information. SmartTrunk Service customers are therefore encouraged to consider implementing Private Switch 911 Service, as described in Section 28 of the General Exchange Tariff. With this service, the SmartTrunk customer can create location information records for every unique DID telephone number associated with the SmartTrunk Service.

2.7 ADDITIONS

Any additions of service are subject to current rates and charges.

2.8 MOVES

(FC)

2.8.1. A Move Charge as specified in this Tariff will apply when the SmartTrunk Interface or Port is moved within the same SmartTrunk serving office or moved to a different SmartTrunk serving office. In addition, installation charges as specified in this Tariff will apply for all service components other than the SmartTrunk Interface or Port.

(FC)

2.8.2. The service term agreement subscribed to by the customer is not affected by moves of the SmartTrunk Interface or Port as described above.

2.9 SUPERSEDURE

(CT)

SmartTrunk Service may be transferred to a new customer at the same premises location upon written concurrence of the Company. The customer to whom service is transferred will be subject to all past indebtedness, liabilities, minimum term provisions and equipment configurations currently in effect for the previous customer.

SmartTrunk<sup>SM</sup> SERVICE

2.10 Suspension and Restoral of Service

Initiated by SWBT - When service is suspended by SWBT, the business restoration charge listed in the Suspension and Restoral section of the General Exchange Tariff applies per B Channel.

Initiated by the Customer (Vacation Service) - Vacation Service is not offered for SmartTrunk Service.

2.11 Service Terms

2.11.1 For each SmartTrunk Interface or Port, the customer is required to select either month-to-month service or a service term agreement of 12, 24, 36, 48, 60 continuous months. Coterminous additions are not permitted during the term of an agreement except if the customer has an agreement with a term of 36 months or greater, coterminous additions are allowed within the first 12 months of the agreement. Customers may opt to convert from the original service term to a longer service term prior to the expiration of the original term.

(AT) There are two categories of service terms for the SmartTrunk Interface and Port: Initial Service Term and Renewal Service Term. Renewal Service Term rates apply only after completion of the Initial Service Term and payment of all nonrecurring charges associated with the Initial Service Term or after completion of one full month of service at Month to Month rates after the Month to Month nonrecurring charge has been paid.

2.11.2 For month-to-month SmartTrunk Interface or Port customers and for all other service components, there is a minimum service requirement of one month.

2.11.3 Upon the expiration of the 12, 24, 36, 48, or 60 month service term, the customer may:

- 1. Continue service without establishing a new service term. The SmartTrunk Interface or Port will be provided on a month-to-month rate, with no additional service commitment. (This rate will be subject to SWBT-initiated rate changes when approved by the Public Service Commission.) Customers whose contract expired before January 15, 1998, and continued service at the 60 month rate will be allowed to continue at that rate until such time as they convert to a new contract or discontinue the service.
- (CT) 2. Continue service by selecting a new Renewal Service Term for the SmartTrunk Interface at the current rate. The new service term will commence on the day following the expiration of the previous service term. The new rate will not be subject to SWBT-initiated rate changes for the duration of the service term.
- 3. Discontinue the service.

SWBT may change any or all renewal options with the approval of the Public Service Commission.

(AT)(MT) 2.11.1 For each SmartTrunk Interface, the customer is required to select either month-to-month service or a service term agreement of 12, 24, 36, 48, or 60 continuous months. Coterminous additions are not permitted for the service term options. Customers may opt to convert from the original service term to a longer service term prior to the expiration of the original term.  
(AT)

(AT) 2.11.2 For month-to-month SmartTrunk Interface customers and for all other service components,  
(AT) there is a minimum service requirement of one month.

(AT)(MT) 2.11.3 Upon the expiration of the 12, 24, 36, 48, or 60 month service term, the customer may:

(CT) 1. Continue service without establishing a new service term. The SmartTrunk Interface will be provided on a month-to-month basis at the current 60-month service term rate, with no additional service commitment. (However, this rate will be subject to SWBT-initiated rate changes when approved by the Public Service Commission.)

(CT) 2. Continue service by selecting a new service term for the SmartTrunk Interface at the current rate. The new service term will commence on the day following the expiration of the previous service term. The new rate will not be subject to SWBT-initiated rate changes for the duration of the service term.

3. Discontinue the service.

(CT) SWBT may change any or all renewal options with the approval of the Public Service Commission.

CANCELLED

2.12 Rate and Charge Applications

2.12.1 Recurring, installation and nonrecurring charges are applicable according to the applicable schedule for the service quoted under this plan.

2.12.2 The monthly rate applicable at the time a customer subscribes or elects an additional service term for the SmartTrunk Interface under this plan is not subject to SWBT-initiated increases during the life of the service term.

2.10 Suspension of Service Initiated by the Customer

Temporary suspension of service initiated by the customer, as provided in the General Exchange Tariff, is not applicable to service furnished under the provisions of this tariff.

MO. PUBLIC SERVICE COMM.

2.11 Options Available Upon Expiration of the Service Term

Upon the expiration of the service term, the customer may:

1. Continue service without establishing a new service term. The SmartTrunk Interface will be provided on a month-to-month basis at the current 60-month service term rate, with no additional service commitment. (However, this rate will be subject to Company-initiated rate changes when approved by the Public Service Commission.)
2. Continue service by selecting a new service term for the SmartTrunk Interface at the current rate. The new service term will commence on the day following the expiration of the previous service term. The new rate will not be subject to Company-initiated rate changes for the duration of the service term.
3. Discontinue the service.

CANCELLED

The Company may change any or all renewal options with the approval of the Public Service Commission.

2.12 Rate and Charge Applications

- 2.12.1 Recurring, installation and nonrecurring charges are applicable according to the specific schedule for the service quoted under this plan.
- 2.12.2 The monthly rate applicable at the time a customer subscribes or elects an additional service term for the SmartTrunk Interface under this plan is not subject to Company-initiated increases during the life of the service term.
- 2.12.3 When requested by the customer prior to installation, installation and/or special construction charges may be deferred and satisfied by making a series of consecutive payments. The installation and/or special construction charge may be deferred over a period of 12, 24, 36, 48 or 60 months, not to exceed the service term selected. Once a deferred charge payment period is selected, it will remain in effect for the duration of the period.
