- A. **Sheet Numbering** - Sheet numbers appear in the upper right corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. **Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of the various suspension periods and deferrals the Commission follows in its tariff approval process, the most current sheet number on file with the Commission is not always the tariff sheet in effect. Consult the check sheet for the sheet currently in effect.
- C. **Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2
- 2.1
- 2.1.1
- 2.1.1.A
- 2.1.1.A.1
- 2.1.1.A.1.(a)

- D. **Check Sheets** - When a tariff filing is made with the Commission an updated check sheet accompanies the filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There shall be no other symbols used on this sheet if these are the only changes made to it. The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the Commission.

3.1 Availability of Service

Carrier offers resold interexchange telecommunications service to any person or company within its service area who desires to be a Customer, subject to the terms and conditions of this tariff. Service is available twenty-four (24) hours per day, seven (7) days per week.

3.2 Timing of Calls

3.2.1 Usage sensitive charges are based on the actual usage of Carrier's network. Such charges are measured in Conversation Minutes.

3.2.2 Chargeable time for Customer shall begin when the called party answers, as determined by hardware answer supervision, provided that such capabilities are available from the local telephone company. If hardware answer supervision is not available, then Carrier will employ software answer supervision, and up to sixty (60) seconds of ringing will be allowed before billing. Chargeable time for a call shall end upon disconnection by either party.

3.2.3 The initial period (minimum call duration) for billing purposes varies by service offering and is indicated in Section 4.2.

3.2.4 Unless otherwise specified in this tariff, usage for billing purposes is measured and rounded to the next higher six (6) second increment after the initial period.

3.2.5 No charges apply for incomplete calls. If Customer believes it has been incorrectly billed for an incomplete call, Carrier shall, upon notification, investigate the circumstances of the call and issue a credit when appropriate.
