A. SERVICE CONNECTION CHARGES

The term "Service Connection Charges" is used to define the non-refundable charge made for the establishment of a class of telephone service or subsequent additions to that service and are in addition to any other scheduled rates and charges normally applying under the Tariffs.

Service Connection Charges may be payable at the time application is made for the particular service or facility, and prior to establishment of service, or upon presentation of a bill.

Service Connection Charges do not apply to:

1. "Public Pay Stations" established for the use of the general public (but not including Coin-Box Service at locations which are classed as Semi-Public.)
2. Directory Listings
3. Service changed from a residence to a business classification, or vice versa.
4. Service re-established after the destruction or partial destruction of the subscriber's premises by means beyond the control of the subscriber whether at the same or another location. However, if service is established at a new location and the subscriber later moves back to the old location, the Service Connection Charge is applied in connection with the re-established service at the old location.

Notes:

New Installations and Outside Moves receive the same treatment for charge purposes. An Outside Move is where the subscriber's equipment or service is changed from one premises to another, including the change from one trailer house to another placed at an identical location.

"Instrumentalities in place" shall mean that the telephone instruments and inside wire, necessary in the subscriber's premises to furnish the subscriber the service applied for are in place.

- 1. Installation of Telephone charges apply where service is established to the subscriber and instrumentalities are not in place. - - - \$ 7.50
- 2. Installation of Extension Telephone, Bell, Gong or Horn. - - - NC
- 3. Connection or Name Change where Telephone is in Place charges apply where instrumentalities in place are taken over by a new applicant and no change is made at the applicant's request in:
 - (a) the type or location of the instrument or,
 - (b) the wiring or equipment on the applicants premises. - - - 3.75

Booths for the housing of semi-public telephones are available as described under the Miscellaneous and Special Equipment Charges section of this tariff.

Subscribers to semi-public telephone service are entitled to regular listings in the Telephone Company's official directory and may advertise such numbers for incoming calls and business purposes subject to rules and regulations otherwise specified in this tariff.

Local Messages from Semi-Public Telephones are charged for at the rate shown above. Toll Messages are charged for at the rates applicable as approved by the Missouri Public Service Commission and the FCC.

LOW INCOME CONNECTION ASSISTANCE PROGRAM-LINK UP MISSOURI NOV 19 1997

A. General Regulations

*
MO PUBLIC SERVICE COMMISSION

The Link Up Missouri Service Connection Program is a Federal Lifeline assistance program applicable to eligible residential subscribers, as defined below, and designed to promote subscribership to the telephone network among low income residential households.

1. Service Connection Charges, as set forth in this tariff¹, for initial installation of the main residential service access line, will be discounted at a rate of 50 percent or \$30.00, whichever is less. These reduced charges shall be assessed only for a single residential telephone line per eligible household at the principle place of residence.
2. The customer may defer payment on up to \$200 of the above charges without interest for a period not to exceed one year. The deferred charges do not include any permissible security deposits required. Payments shall be equally paid over a twelve month period.
3. A qualifying low-income customer may choose either a or b, or both a and b as described above.
4. Link Up assistance is available for a second or subsequent time only for a principal place of residence with an address different from the residence address where assistance was previously provided.
5. The premises at which the residence service is requested must be the applicant's principal place of residence.
6. There is only one telephone line serving the residence premises. The residence premises household (dwelling unit) shall consist of that portion of an individual house or building or one flat or apartment occupied by a single family or individuals functioning as one domestic establishment.
7. Link Up will not be furnished on a Foreign Exchange service.

¹These do not include other charges that may be required at the initiation of service such as security deposit, contributions in and of construction, customer advances, etc.

LOW INCOME CONNECTION ASSISTANCE PROGRAM-LINK UP MISSOURI

A. GENERAL

1. The Low Income Connection Assistance Program-Link Up Missouri is a plan to assist qualified low income applicants by providing a credit to the service connection charges applicable to the provisioning of a single telephone line per household at the applicant's principal place of residence. The rules and regulations contained herein are in addition to all other applicable rules and regulations located in other parts of this company's tariff.

B. ELIGIBILITY REQUIREMENTS

To be eligible for assistance, an applicant must:

1. Not have had telephone service in the applicant's home for at least three months immediately prior to the date of the application;
2. Not have received federally sponsored service connection assistance within the last two years;
3. Not be a dependent for federal income tax purposes unless the applicant is more than 60 years of age;
4. Either be income eligible, or receiving Medicaid/Medical Assistance benefits from the State of Missouri, and have provided their Department of Social Services Client Number (DCN) to the company.

C. APPLICATION FOR PROGRAM

1. An applicant for service shall request connection assistance through completion of a form provided by the Telephone Company.

D. VERIFICATION OF ELIGIBILITY

1. The Telephone Company will verify that an applicant has not had telephone service for the prior three months or has not received connection assistance within the last two years. If the information to provide verification is unavailable, the applicant shall provide proof that he or she is participating, or is eligible to participate, in a public assistance program or that the applicant's total household income from all sources qualifies him or her to participate in the Low Income Connection Assistance Program-Link Up Missouri.

E. CHARGES AND DEFERRED PAYMENTS

1. All tariffed charges applied in initiating telephone service to residential customers shall either be reduced by one half of the amount required to connect the customer to the local telephone network or thirty dollars (\$30), whichever is less.¹
2. The applicant may participate in a deferred monthly payment schedule of four months for payment of remaining state tariffed connection charges, plus any security deposit, with a minimum payment of \$5 per month. When the total deferred payment is less than \$20 the minimum period may be less than four months. No interest charges shall apply for charges incurred on a deferred payment schedule.

LIFELINE SERVICE

A. General Regulations

1. Lifeline service is available to qualifying low-income subscribers for single-party residence service.
2. The monthly discount will be the maximum amount allowed by the Missouri Public Service Commission and the Federal Communications Commission; however, this discount will not exceed the sum of the federal subscriber line charge and the recurring charges for voice telephony service. The monthly discount will be the same for Lifeline customers solely subscribing to voice telephony service and for Lifeline customers subscribing to a bundle of services.
3. Lifeline will not be furnished on a Foreign Exchange service.
4. Lifeline service shall not be disconnected for non-payment of toll charges.
5. Toll blocking provides a means of restricting access to the Long Distance Message Telecommunications Network. Toll blocking for the purposes of lifeline service will restrict 1+, 0+ and 0- (operator handled) calls.
 - a. If the customer chooses "toll blocking" the company will not charge a service deposit.
 - b. Toll blocking is offered to Lifeline subscribers at no charge.

LIFELINE SERVICE

Service Commission

A. General Regulations

- 1. Lifeline Service is available to qualifying low-income subscribers for single party residential service.
- 2. Lifeline service is a reduction in the monthly local service charges normally paid by qualifying low-income consumers. Eligible Lifeline subscribers will receive a baseline credit equal to 100% of the Federal End User Subscriber Line Charge as specified in the Company's Interstate Access Tariff and a supplemental reduction of their residential access line rate for one party service of \$1.75. The components of the reduction to basic residential one-party rates are as follows:

State reduction in local rate: \$1.75

Federal baseline Lifeline reduction: *

The federal baseline lifeline reduction shall be used to waive the consumers Federal End User Common Line charge.

- 3. Lifeline will not be furnished on a foreign Exchange service.
- 4. Lifeline service shall not be disconnected for non-payment of toll charges.
- 5. Toll blocking provides a means of restricting access to the Long Distance Message Telecommunications Network. Toll blocking for the purposes of lifeline service will restrict 1+, 0+ and 0- (operator handled) calls.
 - a. If the customer chooses "toll blocking" the company will not charge a service deposit.
 - b. Toll blocking is offered to Lifeline subscribers at no charge.

*Baseline amount of Federal Credit is Equal to 100% of the Federal End User Subscriber Line Charge as specified in the Company's Interstate Access Tariff.

B. Eligibility Requirements

1. An applicant must meet all of the following criteria in order to qualify for Lifeline Service.

a. To qualify for Lifeline the consumer must participate in one of the following programs:

- 1) Mo HealthNet (f/k/a Medicaid) (T)
- 2) Food stamps
- 3) Supplemental Security Income (SSI)
- 4) Federal Public Housing Assistance or Section 8
- 5) Low Income Home Energy Assistance Program
- 6) National School Free Lunch Program (T)
- 7) Temporary Assistance for Needy Families, or (T)
- 8) The customer's income, as defined in 47 CFR §54.400(f), is at or below 135% of the Federal Poverty Guideline (eff. June 1, 2012). (N)

2. The customer must sign, under penalty of perjury a document certifying:

- a. He/she is receiving benefits from one of the programs in 1.a. above.
- b. Name of the program(s) from which they are receiving benefits.
- c. That he/she will notify the company if he/she no longer participates in the program(s) named in a. preceding.

3. The premises at which the residence service is requested must be the applicant's principal place of residence.

4. There is only one telephone line serving the residence premises. The residence premises household (dwelling unit) shall consist of that portion of an individual house or building or one flat or apartment occupied by a single family or individuals functioning as one domestic establishment.

**GENERAL EXCHANGE SERVICE
LIFELINE SERVICE (Continued)**

C. Missouri Universal Service Fund

1. Low-Income Assistance

a. General

A low-income customer is any customer who requests or received residential essential local telecommunications service and who has been certified by the Department of Social Services (DSS) as economically disadvantaged. Qualified individuals will receive discounted services under either the low-income assistance or the disabled assistance program.

b. Regulations

Low income assistance is available to all residential customers who demonstrate, by self certifying with the company under penalty of perjury, that they are eligible for support by participation in:

1. Mo HealthNet (f/k/a Medicaid) (T)
2. Food Stamps
3. Supplemental Security Income (SSI)
4. Federal Public Housing Assistance or Section 8
5. Low Income Home Energy Assistance Program
6. National School Free Lunch Program (T)
7. Temporary Assistance for Needy Families, or (T)
8. The customer's income, as defined in 47 CFR §54.400(f), is at or below (N)
135% of the Federal Poverty Guideline (effective June 1, 2012). (N)

c. Eligible Services

Essential local telecommunications service is defined as two (2) way switched voice residential service within a local calling scope as determined by the commission, comprised of the following services and their recurring charges:

1. Single line residential service, including touch-tone dialing and any applicable mileage or zone charges
2. Access to local emergency service, including, but not limited to, 911 service established by local authorities
3. Access to basic local operator services
4. Access to basic local directory assistance
5. Standard intercept service
6. Equal access to Inter-Exchange Carriers consistent with rules and regulations of the FCC
7. One (1) standard white pages directory listing
8. Toll blocking or toll control for qualifying low-income customers

7. One (1) standard white pages directory listing
8. Toll blocking or toll control for qualifying low-income customers.

LIFE LINE SERVICE (Continued)

C. Missouri Universal Service Fund (Continued)

d. Support Amount

Customers eligible under the established criteria can receive a discount from their bill for essential local telecommunications service equal to the amount approved by the Missouri Public Service Commission and the Federal Communications Commission. The amount of combined federal and state lifeline support for any customer will not exceed the sum of the Federal subscriber Line Charge (SLC) and the recurring charges for essential local telecommunications services (including the basic service rate, Touch-Tone calling charge, extended area service additive, and mileage additives, if any).

2. Disabled Assistance

a. General

A disabled customer, or a dependent, is a customer who request or receives residential essential local telecommunications service, as defined in section 1 (c) Of this tariff, and meets the eligibility requirements set forth in this tariff.

b. Regulations

Disabled assistance is available to all residential customers who demonstrate, by self certifying with the company under penalty of perjury, that they, or a dependent, are totally and permanently disabled or blind and receiving any of the following:

1. Federal Social Security Disability benefits
2. Federal Supplemental security income benefits
3. Veterans Administration benefits
4. State blind pension pursuant to Section 209.010 to 209.160, RSMo
5. State aid to blind persons pursuant to Section 208.030 RSMo, Section 660.100.2 RSMo 2000.

LIFE LINE SERVICE (Continued)

C. Missouri Universal Service Fund (Continued)

2. Disabled Assistance (Continued)

c. Support Amount

Customers eligible under the established criteria can receive a discount equal to the amount approved by the Missouri Public Service Commission from their bill for essential local telecommunications service. The amount of state lifeline support for any customer will not exceed the recurring charges for essential local telecommunications service (including the basic service rate, Touch-Tone calling charge, extended area service additive, and mileage additives, if any).

(N)

3. "Missouri Universal Service Fund"

- a. Company will place on each retail end-user customer's bill, a surcharge equal to the Missouri Universal Service Fund percentage assessment ordered by the commission.
- b. The surcharge will appear as a separate line item detailed as "Missouri Universal Service Fund".
- c. The surcharge percentage will be applied to the total of each customer's charges for intrastate regulated telecommunications services that meet the definition of net jurisdictional revenues at 4 CSR 240-31.0101(12).

GENERAL EXCHANGE SERVICE

E. MISCELLANEOUS AND SPECIAL EQUIPMENT (continued)

8. OFF-PREMISE EXTENSION (OPX) SERVICE

(N)

1. Off-premise extension circuits are provided to allow the customer the option of extending his telephone service to a second location within the wire center using the company's cable or fiber distribution facilities. Off-premise extension circuits are furnished subject to the availability of circuits and provided when no unusual expense is involved. Distances for determination of rates shall be based on airline miles between the normal location and the location of the off-premise extension.
2. If a customer requests an OPX line at the same premise and: (a) the line goes back to the pedestal, and (b) a cable pair from an additional premise cable to a separate location is used, then the following OPX charges apply.
 - a. Mileage Charges*. Customers will be billed \$0.70/ per ¼ mile of cable if cable is installed by and belongs to GRM Networks.
 - i. Mileage is calculated by measuring the distance between the stations that are ringing the same number or the distance from pedestal to second location, whichever is applicable.
 - ii. If a customer pays for the materials and labor to have cable buried between two buildings on the same premise, OPX mileage is not charged. This is a customer owned OPX, and the maintenance of same is the customer's responsibility.
 - b. Additional Local Service Charges and Simultaneous Ring Charges. If a customer requests an OPX line and a second cable pair or fiber is needed, then the customer will be billed for an additional local service line at the rates described elsewhere in this tariff. Simultaneous Ring Service may also be required at each additional location.

(N)

*Rates shown on this tariff sheet are for informational purposes only and are not subject to the jurisdiction of the Missouri Public Service Commission.

17. Fire Alarm Reporting System: (continued)

The system will function as follows:

In case of fire, the person wishing to report same, dials a listed connector terminal. This will cause all firemen's lines to ring with continuous generator except those that are busy. A distinctive tone is applied to each busy firemen's line to inform him of the fire call. When a busy line is made free, the fire alarm equipment rings in continuously until answered or until all other firemen hang up, freeing the fire line. When one or more firemen answer a fire call, the calling party may report the location of the fire and then may disconnect. As long as one fireman keeps his telephone off-hook, the line will continue to ring at other firemen's locations and any firemen on the line may discuss the situation.

If the fire is reported from one of the firemen's lines connected to this circuit, the calling party will receive the distinctive tone after dialing the listed fire number. The free firemen's lines will be rung continuously and the busy lines will also receive the tone. To remove the tone from the calling line, the calling party momentarily disconnects, whereupon his telephone will start ringing continuously. By again removing his handset, the calling party is connected to the regular firemen's line access.

Company liability is limited to refund of charges paid by customer for period of failure. Customer will be responsible for periodic testing of the equipment to assure proper operation.

18. Joint User rate is to be applied where a telephone is installed as an extension from an existing main station telephone and serves a different identity. The same telephone number will be used for both parties and a directory listing will be furnished each party.

The monthly rate will equal three-fourths of the main station rate plus extension station line mileage where applicable. Regular installation of telephone charge will apply.

The subscriber with the existing main station line to which the joint user is added will be responsible for payment of all charges accruing to the joint user subscriber in the event the joint user subscriber fails or refuses to pay for such services as provided for elsewhere in this schedule.

19. Seasonal and Vacation Rate service is provided to residence customers whose requirements for telephone service are less than that which might normally be provided in any 12 month period. Customer's line will be placed on intercept for the period of such service and no changes will be made in the customer's listing in the local directory or in the equipment on the customer's premises. No service either to or from the customer is contemplated during the interval this rate applies.

3. Non-Recurring Charges

- a. For the first 90 days that custom calling services are offered in an exchange, non-recurring Installation Charges for those services will not apply.
- b. After the first 90 days that Custom Calling Services are offered in an exchange, the applicable service ordering charge and a non-recurring C.O. Access Charge will apply. C.O. Access Charge.....\$ 6.00

C. CONDITIONS

- 1. Call Waiting - By means of a tone signal a customer who is using his telephone is alerted when another caller is trying to reach that station. This permits putting the first call on hold so that a second call can be answered.
- 2. Call Forwarding - Permits a customer to transfer all incoming calls to another dialable telephone number. The customer pre-selects a second telephone number to which he wants all incoming calls to be automatically transferred. Calls may be transferred to a long distance message telecommunications point subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. Call Forwarding shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part, of message toll charges that would regularly be applicable between the station originating the call and the station to which the call is transferred. Customers utilizing Call Forwarding service are responsible for the payment of charges for each toll call between the telephone to which the call was transferred.
- 3. Three Way Calling - Enables a customer to add a third party to an existing call without operator assistance, thereby establishing a three-way conversation. The transmission may vary depending on the distance and routing necessary; therefore, transmission may not meet normal standards.

GENERAL EXCHANGE SERVICES
CUSTOM CALLING AND CUSTOM LOCAL AREA SIGNALING SERVICE

C. DESCRIPTION OF SERVICES: (Continued)

(N)

- 10. Call Transfer: Allows users to transfer a call to another directory number and then drop out of the call, leaving the users connected. Customers must have Three-Way Calling and User Transfer Station Options to use this feature.
- 11. Call Waiting: This feature informs a customer who is on an established call that a third party is trying to call. An incoming call which arrives at a busy line receives audible ringing instead of a busy tone. The called party is alerted by a tone that is only available to the called party.
- 12. Call Waiting-Cancel: This feature allows a customer to prevent, on a per call basis, an incoming call from Call Waiting on their line. Incoming calls to the station receive a busy signal. This feature ensures that Call Waiting indication tones do not interrupt important calls or disrupts data transmissions.
- 13. Calling Name Delivery (CLASS): Calling Name Delivery displays the name associated with an incoming directory number. The name as well as the date and time of the incoming call are displayed after the first ringing cycle.

GENERAL EXCHANGE SERVICES
CUSTOM CALLING AND CUSTOM LOCAL AREA SIGNALING SERVICE

C. DESCRIPTION OF SERVICES: (Continued)

(N)

- 21. Selective Call Acceptance (CLASS): Allows customers to define a list of calling directory numbers that will be accepted. Any number not on the list is routed to announcements and rejected. The calling party not on the acceptance list receives an announcement stating that the call is not presently being accepted by the called party.
- 22. Selective Call Forwarding (CLASS): Allows customers to have certain incoming calls forwarded to a designated remote directory number. Calls not on the SCF screen lists are terminated in the standard manner. The number of calls included on a SCF screening list will be limited based on system parameters.
- 23. Selective Call Rejection (CLASS): Allows customers to define a list of calling directory numbers that are routed to recorded announcements and rejected. All other calls are treated normally. Lists will be limited based on system parameters.
- 24. Teen Service: This feature allows two telephone numbers to be assigned to a single-party line. Each telephone number is assigned a unique ringing pattern so the called party can determine the nature of the call. Only one call may be active on the line at a given time.
- 25. Teen Service with Voice Mail: Teen Service enables two telephone numbers-the primary directory number (PDN) and the secondary directory number (SDN) to be assigned to a single line. Teen Service with Voice Mail forwards the SDN to Voice Mail to allow the SDN to have separate announcements and messages.

C. DESCRIPTION OF SERVICES: (Continued)

(N)

- 26. Three-Way Calling: This feature allows a customer to form a three-way conference with two other parties. The customer that initiated the conference controls the conference and must remain on line for the duration of the call.
- 27. Touch Tone Service: The provision of DTMF signaling through tone pads on the communication instruments.
- 28. Warm Line: This is an Automatic Line feature which gives the subscriber 30 seconds after going off-hook to dial a number before it automatically dials a pre-designated number.

D. CONDITIONS

- 1. Custom Calling Services and CLASS will be provided in connection with individual line residence and business service. Services may not be compatible with key or PABX system lines or trunks.
- 2. CLASS Service cannot be provisioned on an originating basis with Company Provided Public Telephone Service, COCOT Service, Toll Terminals, and some PABX Trunks.
- 3. A non-recurring service ordering charge, found in other parts of this tariff, will apply for the implementation of Custom Calling or Class Services if installed at any time other than the initial installation of a customers access line service with the company, or the installation of additional access line service.

PAYPHONE SERVICE

MISSOURI
Public Service Commission

A. GENERAL REGULATIONS

1. Payphone Service includes lines to which coin, coinless, card reader or a combination of coin/card reader telephones may be attached.
2. Payphone Service is a two-way or, optionally, one-way originating only business exchange access line composed of the serving central office line equipment, all outside plant facilities needed to connect the serving central office with the customer's premises, and the Network Interface Device at the demarcation point. These facilities are Company-provided and maintained and provide access to and from the telecommunications network for long distance service and local calling.
3. In the case of one-way service, intercept treatment will be provided.
4. A maximum of one customer-provided instrument implemented pay telephone may be connected to any one Instrument or CO implemented coin line.
5. General Rules and Regulations found in other sections of this tariff are applicable to the provision of Payphone Service.
6. Directory listings may be provided under the regulations governing the furnishing of listings for business subscribers.
7. A Network Interface Device will be installed at a location mutually agreed upon by the Payphone Service Provider and the Company. The Network Interface Device is a company-provided jack or its equivalent. It is the point of connection between the telephone company owned wiring and wiring owned by the Customer.
8. One directory will be distributed without charge for each payphone business exchange line.
9. Installation Charges and the appropriate Network Interface Device (NID) material charge are applicable for the installation, move or rearrangement of the NID on the customer's premises to establish or reestablish network access.

MISSOURI
Public Service Commission

A. GENERAL REGULATIONS (Continued)

- 10. Installation Charges and the appropriate NID material charge apply when a premises visit is made for the sole purpose of installing a customer requested NID.
- 11. The Company shall not be liable for shortages of coins collected and deposited at the subscriber's equipment. The limit of the Company's liability for end user fraud of whatever nature occurring at or in association with the subscriber's equipment shall be governed by provisions of this Tariff and rule or regulations of the Missouri Public Service Commission. In case of conflict between the tariff provisions and Commission rules and regulations, the rule and regulations shall prevail.
- 12. Off-Premise Extensions to a payphone service provider on non-contiguous property are not permitted. Extensions on the same continuous property are permitted.
- 13. Local messages from Payphones are charged at no higher than twenty-five (25) cents for each call. Upon implementation of the FCC rules pre-empting state regulations of payphone rates, this subsection will not apply.
- 14. The Multi-line Business Subscriber Line Charge, found in the interstate access tariff, is applicable to all payphone Instrument and CO Implemented coin lines.

B. RESPONSIBILITY OF THE CUSTOMER

- 1. The Customer for the purposes of this Tariff is defined as the Payphone Service Provider.
- 2. The customer shall be responsible for the installation, operation and maintenance of the customer-provided instrument, plus all ancillary equipment, such as booths, shelves, lighting, directories, etc., used in connection with this service. The customer is responsible to comply with the requirements set forth in the American With Disabilities Act of 1990.

B. RESPONSIBILITY OF THE CUSTOMER (Continued)

- 3. The customer shall be responsible for the payment of charges for all local and toll messages originating from or accepted at this type of service, including any Directory Assistance Calls.
- 4. The customer shall be responsible for obtaining a Certificate of Service Authority (CSA) to provide Payphone Service and for providing proof of said authority prior to installation of service.
The customer-provided instrument must be registered in compliance with Part 68 of the FCC's Registration Program. In addition, the customer must comply with the Missouri Public Service Commission's Rules and Regulations regarding the use of customer-provided pay telephones.
- 5. Each customer must provide instructions, attached or in close proximity to the set, for use including specific instructions for the above requirements; refunds and complaints; one-way calling if so equipped; long distance access; and must prominently display notice in close proximity to the set that the Instrument Implemented phone is not a Company Telephone. Said instructions shall also show the telephone set's working number and include a local or toll free number to allow the public to directly contact the private payphone owner.
- 6. Customers who elect not to subscribe to Selective Class of Call Screening will be fully responsible for all calls billed to customer's exchange access line. The Telephone Company shall have no responsibility to adjust any such charges and/or release customer from paying any such charges. Customer will hold the Telephone Company harmless from and against any liability or loss resulting from all calls billed to customer's exchange access line.
- 7. Any federal, state, or local taxes on the Customer Owned Pay Telephone or calls made from that phone are the responsibility of the customer.
- 8. The customer shall not program or cause to be programmed any such telephone used in connection with this service to limit the duration of a local message.

C. VIOLATION OF REGULATIONS

1. Where any customer-owned pay telephone is in violation of this Tariff, the Company will notify the customer in writing of the violation.
2. The customer shall discontinue use of the customer-owned pay telephone or correct the violation and notify the Company in writing within five (5) days after receipt of such notice that the violation has been corrected.
3. Failure of the customer to discontinue such use or to correct the violation will result in the suspension of the customer service until such time as the customer complies with the provisions of this Tariff.

D. INSTRUMENT IMPLEMENTED PAYPHONE SERVICE

Instrument Implemented Payphone Service is offered for use with a customer provided pay telephone. All attachments of a customer provided instrument to the network must be made pursuant to the rules and regulations set forth in this Tariff and as required by State and Federal commissions.

E. CENTRAL OFFICE (CO) IMPLEMENTED COIN LINE

1. Central Office Implemented Coin Line provides coin signaling. It is a line side connection from the local exchange switch to the point of demarcation at the customer premise.
2. Features are additives to the operation of a flat rate access line that provides for CO Implemented coin line service. The Company offers those features that are provided by the functionality of the Company's switches. These include coin supervision, coin control (collect and return of coins, if applicable), and answer supervision. CO implemented coin line features that are implemented by the functionality of an operator service provider, such as coin rating, coin refund, repair referral, and operator call screening, are the responsibility of the Payphone service provider (Customer).

PAYPHONE SERVICE (Continued)

MISSOURI

E. CENTRAL OFFICE (CO) IMPLEMENTED COIN LINE (Continued) Public Service Commission

- 3. CO Implemented Coin Line features, including coin line signaling, coin collect and return (where applicable) and answer supervision, are provided by the Telephone Company per the technology available from the Company's facilities. It shall be the responsibility of the CO Implemented Coin Line payphone owner to assure technical and operational compatibility with the coin line features offered by the Telephone Company.

F. FEATURES AND FUNCTIONS

- 1. Answer Supervision provides signaling on the line notifying the line that the called party has answered. This feature is an additive to the Co Implemented Coin Line.
- 2. Coin Collection and Return provides an electrical signal on a CO Implemented Line indicating to the payphone equipment to collect or return coin(s) to the calling party. This feature is an additive to the CO Implemented Coin Line.
- 3. Special Number Assignment is a specific number requested by the customer. This service is available where facilities are accessible and it is technical feasible to provide. This feature is an additive to the CO Implemented Coin Line or to the Instrument Implemented Payphone Service.
- 4. Selective Class of Call Screening will be provided where such facilities are available at the customer's option. Selective Class of Call Screening treatment enables the customer to restrict outgoing operator-handled calls, placed over the Telephone Company's network, from the service point to only those calls which are charged to a called telephone, a third number or a calling card.
- 5. Validation may be performed through Originating-Line Screening (OLS). OLS enables operator service providers to determine whether there are billing restrictions on the exchange access line from which a call originates. OLS service delivers codes on operator assisted calls to identify calls originating from privately owned payphones, inmate locations, and hotel/motels, etc. Rates for this service are found in the appropriate interstate access tariff, when facilities and service are available. The customer has the option to request either Selective Class of Call Screening or OLS.

3.	Local Messages per call \$0.10. Upon implementation of the FCC rules preempting state regulations of payphone rates, this subsection will not apply.		
4.	A "Local Message" from Customer Payphone Service served by a given Exchange, is a completed local call originating at such service and terminating at any service which may be called without a toll charge.		
5.	Installation Charges, as specified elsewhere in this Tariff, apply in addition to other Charges specified for CO Implemented Coin Line or Instrument Implemented Payphone Service.		
6.	Where Customer Calling Service is desired, the charges as specified in the appropriate Sections of this Tariff are applicable for Instrument Implemented Payphone Service.		
7.	Rates and Charges contemplate a normal business exchange access line service installation.

DIGITAL CENTREX SERVICE

MO. PUBLIC SERVICE COMM

(N)

A. GENERAL

1. Digital Centrex Service (CENTREX) is an integrated business network system made up of feature enhanced digital switching software and hardware located in the Telephone Company offices and customer provided equipment located at the customer premises.
2. CENTREX service will be provided to business customers with a minimum of two access lines and may be provided jointly at business and residence locations.
3. CENTREX service will only be available in those exchange areas where Company provided facilities and equipment exist.
4. A standard feature of CENTREX service, Virtual Facilities Group Control, which limits the number of trunks/lines available for outgoing and incoming calling will be provided to determine the number of End User Common Line charges for CENTREX lines as set forth in the NECA Tariff FCC No. 5 and for any other charges assessed on a per line or trunk basis.
5. The minimum lines to be assessed in the Virtual Facilities Control Group will be two (2) per customer group.
6. CENTREX customers will be provided with one directory listing in the alpha section, and one listing in the classified section at no charge. All other additional listings will be at the rates established in other sections of these tariffs.
7. CENTREX lines may be terminated at locations not considered the customers primary business location at the rates established in the RATE section of this tariff following, providing all locations are served by the same Company central office.
8. CENTREX service or lines of a customer which terminate interexchange, where possible, will be provided by agreement on an Individual Case Basis or according to tariffs in effect for the provision of interexchange private line services.
9. CENTREX service is a service provided to individual business and residence customers of the Company and is not for resale or shared use.

CENTREX SERVICE (Continued)

MO. PUBLIC SERVICE COMM

B. CONDITIONS

1. The minimum charge for CENTREX SERVICE is one month.
2. Customer premises equipment will be provided by the customer and must be compatible with the services and equipment provided by the Company.
3. All applicable features as described in following parts of this tariff are available to each CENTREX line of each customer group.
4. Intraexchange and interexchange calling services available to other classes of service within the exchange of the CENTREX customer such as; Extended Area Service, access to 911, access to operator, and Direct Distance Dialing, are available to CENTREX lines unless denied or restricted by the customer.
5. If CENTREX lines or services are ordered in conjunction with PABX or Key System Trunks the appropriate rates for PABX or Key System Trunks as found in other parts of these tariffs will apply as-well-as the rates for CENTREX lines.
6. All applicable Rules, Regulations, Rates and Charges found in other parts of the Tariffs of the Company are applicable to CENTREX Service.
7. Touch tone line charges as described in other parts of the Company's tariff are required on each CENTREX access line to which a 2500 and/or analog type communications device is attached.

C. DESCRIPTION OF FEATURES AND SERVICES.

1. Standard Features
 - a. Automatic Identification of Outward Dialing (AIOD): Records each outgoing, billable call against the CENTREX line originating the call.
 - b. Automatic Line: This feature provides an automatic connection between a calling station that goes off-hook and a preassigned directory number.
 - c. Call Forward: This feature allows a customer to have incoming calls to a station location automatically forwarded to a predetermined telephone number under any of the following three circumstances:
 1. All Calls: Allows all incoming calls to be automatically forwarded to another preselected line.
 2. Busy: This is a station option that automatically transfers incoming calls directed to a busy subscriber to an alternate subscriber line within the same customer group.

C. DESCRIPTION OF FEATURES AND SERVICES (Continued)

MO. PUBLIC SERVICE COMM

1. Standard Features (Continued)

c. Call Forward (Continued)

- 3. No Answer: This feature is a station option that allows a terminating call to an idle subscriber to be transferred automatically to another line within the group after a predetermined number of ringing cycles.
- 4. Remote Access: This feature allows the activation/deactivation of call forward all calls from a location other than the subscribers base telephone.

d. Call Hold: Allows a subscriber to place a call on hold for any length of time, providing neither party goes on hook.

e. Call Park: This feature allows a subscriber to park a call against their directory number so that the call may be retrieved from any other location within the customer group, and allows the subscriber who parked the call to continue to originate and terminate other calls.

f. Call Pick-up: Allows subscribers to answer incoming calls to another station by dialing a feature activation code.

g. Call Pick-up Groups: Allows the formation of specific call pick-up groups within customer groups.

h. Call Transfer: This feature allows users to transfer a call to another directory number then drop out of the call, leaving the users connected.

i. Call Waiting/Cancel Call Waiting: This feature provides an audible call waiting tone when an incoming call arrives at a busy station. Cancel Call Waiting allows the customer with the Call Waiting feature to have the call waiting tone discontinued on preselected calls by activation of a designated code.

j. Class of Service Restrictions: This feature allows a customer the capability to control calls which may originate or terminate to any line within the customer group and may include any of the following options:

- 1. Deny Originating
- 2. Deny Terminating
- 3. Local Only
- 4. Unrestricted Service

k. Consultation Hold: This feature permits a subscriber, while on an active call, to retrieve a waiting call or to perform a Three-way conference/Call transfer by activation of a hook switch flash. The original call is in a temporary hold state.

l. Direct Inward Dialing: Permits calls from the exchange network to be terminated to a subscribers station directly within a customer group without attendant intervention.

m. Direct Out Dialing: Permits a subscriber to access the exchange network and to have the subscribers directory number identified as the originating party by the Telephone Company recording equipment.

C. DESCRIPTION OF FEATURES AND SERVICES (Continued)

MO. PUBLIC SERVICE COMMISSION

1. Standard Features (Continued)

- n. Directory Number Hunt: This feature allows incoming calls directed to a particular directory number to "hunt" to another customer selected number in a sequence when the called number is busy.
- o. Distinctive Ringing: Allows the customer to have different distinctive ringing patterns for calls which originate within the customer group, or from the exchange network.
- p. Distinctive Call Waiting Tone: This feature is a call management feature which allows the subscribers to define a list of calling directory numbers that have a special incoming Call- Waiting tone when they arrive at a busy station location.
- q. Intercom Groups: This option allows a customer to call other lines within a customer group by using an abbreviated dialing pattern rather than the seven digit directory number.
- r. Manual Line: This feature provides an automatic connection between a calling station that goes off-hook and a predetermined number designated by the customer.
- s. Speed Calling: Allows users to place calls to frequently dialed numbers by using an abbreviated code rather than dialing the complete number.
Abbreviated dialing lists may be assigned as follows:
 - 1. Group Speed Call: The Group Lists consist of a maximum of 30 stored numbers which may be assigned for use by several members within a customer location.
 - 2. Individual Short List: A short list consists of a maximum of eight numbers assigned and programmed by an individual for their personal use.
 - 3. Individual Long List: A long list consists of a maximum of thirty stored numbers assigned, programmed and used by an individual for their personal use, and cannot be shared by a group.
- t. Station to Station Calling: This feature permits stations within a customer group to complete calls to other members within the customers group by dialing less than the seven digit directory number assigned to a station.
- u. Three-way Conference with Transfer: This feature allows a subscriber on an established call, either within the system, or outside the system, to transfer the call to another party or to form a three-way conference.
- v. Virtual Facilities Group Control: This feature allows a customer to limit the number of simultaneous incoming or outgoing trunks therefore, establishing non-physical trunk groups for the customers control and network management.
