- A. Because the customer has exclusive control of its communications over the services furnished by the Company, and because interruptions and errors incident to these services are unavoidable, the services, functions, and products the Company furnishes are subject to the terms, conditions, and limitations specified in this tariff and to such particular terms, conditions, and limitations as set forth in the special rules and regulations applicable to the particular services, functions, and products furnished under this tariff. These limitations shall not limit any right the Company may have to be indemnified, defended, or held harmless against any amounts payable to a third person, including any losses, costs, fines, penalties, criminal or civil judgments or settlements, expenses (including attorney's fees), and consequential damages of such third persons.
- B. The liability of the Company for damages arising directly or indirectly out of the furnishing of these services, functions, or products, including but not limited to mistakes, omissions, interruptions, delays, or errors, or other defects, representations, or use of these services, functions, or products or arising out of the failure to furnish the service, function, or product, whether caused by acts of commission or omission, shall be limited to the extension of allowances, if any, for interruption. The credit will be equal to a prorated portion of the monthly recurring charge for all services interrupted. 4. Residential Local Exchange Service

**MISSOURI PUBLIC
SERVICE COMMISSION**

Local Exchange Service consists of furnishing switched communication in connection with one-way and/or two-way information transmission points within a Local Calling Area offered pursuant to this tariff. Local Exchange Services provide a Customer with a connection to the public switched network which enables the Customer to:

- a. receive calls from other stations on the public switched telephone network;
- b. access the Company's Local Calling Area as set forth in this tariff;
- c. access (at no additional charge) the Company's operator and customer service center for service related assistance; access toll-free telecommunications services such as 800, 888, 877 NPA; and access 9-1-1 service for emergency calling.

The Company's service cannot be used to originate calls to other telephone companies' caller-paid information services (e.g., 900, 976). Calls to these numbers and other numbers used for caller-paid information services will be blocked by the Company's switch.

Local Exchange Service provides an individual access line with touch tone calling for the transmission of one-way or two-way switched voice or data communication within a Local Calling Area. The individual access line is the connecting facility between a Customer's premises and a serving central office that provides Customer access to the switched network for placing and receiving calls. The individual access line also enables the Customer to access the service of long distance carriers.

This feature permits the Customer to place the first call on hold, answer the second call, and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) Customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the Customer disconnects from the call. In areas where Caller ID with Name is not available, Caller ID, which only displays the caller's telephone number, will be substituted.

(T)

C. Three-Way Calling

Permits the Customer to add a third party to an established connection on both outgoing and incoming calls without operator intervention. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party.

D. Speed Dial 8

Permits the Customer to place calls to up to eight telephone numbers by dialing a code rather than the complete telephone number.

Call Waiting with Caller ID with Name provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in and allows a Customer to see a caller's name and number previewed on a display screen allowing a Customer to prioritize and/or screen incoming calls. This feature permits the Customer to place the first call on hold, answer the second call, and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) Customer to disable CW for the duration of an outgoing telephone call.
