Original Sheet 1

ANNOUNCEMENT DISTRIBUTION SERVICES

1.1 GENERAL

- 1.1.1 Announcement Distribution Services enable customers to provide specific information to the general public.

Announcement Distribution Services accessible by the general public will hereafter be referred to as Public Announcement Distribution Services. Examples of such service include Time and Temperature, Weather and Dial-A-(_____).

- 1.1.2 Announcement Equipment

In compliance with the Federal Communication Commission Computer Inquiry II decision, Docket No. 20828 adopted October 7, 1981, and released October 30, 1981, the Announcement Services using Telephone Company-provided equipment located in a Telephone Company central office was discontinued effective January 1, 1983. Therefore, those customers who were served by Telephone Company-provided announcement equipment located in a Telephone Company central office have disconnected such service and have secured announcement equipment from another supplier and arranged for announcement distribution services from the Telephone Company.

- 1.1.3 In addition to rates and charges, following, for Announcement Distribution Services, Service and Equipment Charges as specified in the Local Exchange Tariff are applicable.

Issued: December 29, 1983

Section 1
Original Sheet 2

ANNOUNCEMENT DISTRIBUTION SERVICES

1.2 DESCRIPTION OF SERVICE

1.2.1 Public Announcement Distribution Service provides facilities to enable completion of Public Announcement Distribution Service calls. Following are the types of distribution methods offered:

A. Facilities Delivery

Facilities Delivery provides announcement facilities and, when required, network traffic load protection for customers whose announcement equipment requires individual access line termination. Public Announcement Distribution Service calls are delivered to the customer-premises announcement equipment. Charges for such service are as specified in Paragraph 1.4.1, following.

B. Dedicated Subcenter Distribution Network

The Dedicated Subcenter Distribution Network provides facilities and inherent network traffic load protection for customers whose announcement equipment provides a continuous announcement to the Telephone Company Subcenter Network. Public Announcement Distribution Service calls are delivered to the Telephone Company subcenter. This distribution method is obsolete to existing customers at existing locations. Charges for such service are as specified in Paragraph 1.4.2, following.

1.3 PUBLIC ANNOUNCEMENT DISTRIBUTION SERVICE - REGULATIONS

1.3.1 The Telephone Company will furnish, where facilities are available, all facilities to customers for their use in providing prerecorded public announcements under the following conditions:

A. In order to assure satisfactory service to parties calling prerecorded announcements and to protect the telecommunications network for use of the general public, Public Announcement Distribution Service customers are required to subscribe to facilities sufficient to prevent a call overflow exceeding 5 percent in more than 40 days of a continuous 12-month period and sufficient to prevent call overflow exceeding 15 percent in more than 15 days of a continuous 12-month period.

General Exchange Tariff
Section 1
Original Sheet 3

ANNOUNCEMENT DISTRIBUTION SERVICES

1.3 PUBLIC ANNOUNCEMENT DISTRIBUTION SERVICE - REGULATIONS-(Continued)

1.3.1 (Continued)

- B. Upon applying for service, the customer may be required to designate the nature of the prerecorded announcement for which the distribution facilities are to be used (e.g., news, sports, inspirational messages, weather, time and temperature, etc.). In addition, the customer may be required to provide expected call volumes and announcement duration based on reliable market research or analysis which can be reviewed by the Telephone Company. Once service has been established, the customer must give advance notice to the Telephone Company of any change to be made in the kind of announcement provided over Telephone Company facilities and must supply new calling volumes and announcement duration data to allow the Telephone Company to determine if a change in the number of facilities to accommodate the new announcement will be required.
- C. The furnishing of facilities for Public Announcement Distribution Service contemplates that the customer's use of such facilities will be such that the call volumes received at any time will not cause impairment, disruption or deterioration of the quality of other exchange telephone service or Long Distance Message Telecommunications Service furnished by the Telephone Company for use by its customers. In the event that the use of a Public Announcement Distribution Service causes such impairment, disruption or deterioration, as described more particularly in 1.3.1, A., preceding, the following options are available to customers:
1. Subscribe to additional access lines to continue to maintain an acceptable level of service as described in 1.3.1, A., preceding, or
 2. The addition of network traffic load protection which makes it unnecessary to provide additional access lines to handle abnormal call volumes.

In the event of the Public Announcement Distribution Service customer's refusal to subscribe to the options described above, the Telephone Company shall have the right to discontinue such service without prior notification to the customer.

ANNOUNCEMENT DISTRIBUTION SERVICES

1.3 PUBLIC ANNOUNCEMENT DISTRIBUTION SERVICE - REGULATIONS-(Continued)

1.3.1 (Continued)

- D. The Public Announcement Distribution Service customer indemnifies and saves the Telephone Company harmless against claims for libel, slander or infringement of copyright arising from the material transmitted over facilities furnished hereunder and against all other claims arising out of any act or mission of the customer in connection with facilities provided by the Telephone Company.
- E. The customer assumes all risk for damages arising out of mistakes, omissions, interruptions, delays, errors or defects in transmission, failures or defects in equipment and facilities furnished by the Telephone Company occurring in the course of furnishing telephone service or other communication services furnished him by the Telephone Company except as follows: If service is interrupted other than by negligence or willful act of the customer, an allowance at the rate for that portion of the customer's service affected by the interruption shall be made for the time such interruption continues after the fact is reported by the customer or after detected by the Telephone Company, and the interruption is for more than 24 hours. No other liability shall be, in any case, attached to the Company in consideration of such interruptions. The Telephone Company will not be responsible for any loss or damage nor for any impairment or failure of the service arising from, or in connection with, the use of customer-owned facilities or equipment and not caused solely by the negligence of the Telephone Company.
- F. The customer may not transmit over the facilities furnished hereunder any material which is prohibited by law.
- G. The Telephone Company reserves the right to assign the telephone number or numbers to be used with any Announcement Distribution Service provided.
- H. Announcement Distribution Service is provided solely for the benefit of the customer, and the provision of such service shall not be interpreted, construed or regarded as being for the benefit of, or creating any Telephone Company obligation toward or any right of action on behalf of, any third person or other legal entity.
- I. One directory listing will be furnished without additional charge for each Announcement Distribution Service telephone number.

(AT) OBSOLETE CENTREX SERVICE(1)

2.1 GENERAL REGULATIONS

2.1.1

The Telephone Company will provide, subject to the availability of facilities, Centrex Service which is an arrangement of exchange access switching equipment, attendant positions and other facilities in accordance with the provisions of this Tariff.

Facilities will be considered to be available if:

- Central office capacity is adequate to provide service to the customer without prematurely necessitating an addition in that central office, and
- Outside facilities exist so that major additions are not required in order to provide service to the customer.

At the customer's request, service may be provided if facilities are not available. If the requested service is provided, additional charges covering the costs incurred by the Company will apply based on the necessary additions.

The Telephone Company will determine and provide the necessary network access lines, switching equipment and other facilities required for exchange and other services furnished by the Telephone Company. Provision of optional features is limited to the capabilities of the serving office. Attendant positions and related equipment are rated separately.

2.1.2 Additional equipment or facilities required as a result of seasonal business requirements or for customer-owned facilities will be charged for on an individual-case basis.

2.1.3 The following terms as used in this Section apply to Centrex II and Centrex III Service and shall mean:

Primary Centrex location - Any customer location designated as the main service location. Attendant positions will normally be situated at the primary location. However, within transmission limitations, the attendant positions may be situated at a location other than the primary.

Secondary Centrex location - Customer location other than the primary, but is served by the same Centrex System as the primary.

Centrex station line - A main station line of the Centrex System which has full in-out dialing privileges and access to or from the attendant.

(AT) OBSOLETE CENTREX SERVICE(1)

2.1 GENERAL REGULATIONS-(Continued)

2.1.13 The assignment of telephone numbers for Centrex Systems shall be in accordance with Section 17 of this Tariff.

2.1.14 When a customer requests a special service offering or modification of a standard service offering, it will be furnished whenever possible if not detrimental to any of the services or equipment of the Telephone Company. Such special service offering or modification of standard service offerings will be furnished at additional charges.

2.1.15 Private line charges as specified in Section 2 of the Private Line Service Tariff apply to station lines extending outside the same building or beyond the same premises at both primary and secondary locations. Such station lines must be provided from the location from which they are measured.

Customer locations meeting the minimum station line requirements for secondary location rate treatment, but served by switching equipment serving another primary or secondary location may be rated as secondary locations in lieu of mileage charges as specified above. Such locations must be in the same serving office area as the related primary or secondary and must be served by switching equipment located on Telephone Company premises.

Urban mileage charges for circuits extending beyond the base rate area apply at a primary location as specified in Section 12 of this Tariff. Such charges do not apply to secondary locations.

2.1.16 Mileage charges applicable to secondary locations are measured from the primary location. In the case of off-premises station lines, mileage is measured from either the primary or secondary location, whichever is closer, however, service must be provided from the location from which it is measured.

OBSOLETE CENTREX SERVICE(6)

2.3 STANDARD FEATURES

2.3.1 Centrex II and III Standard Features include: direct outward calling direct inward calling, station-to-station calling, station hunting, call transfer-attendant, restriction from outgoing calls, station restriction(3), reserve power, busy verifications, night service, identified outward calling, call interception, call transfer-individual, consultation hold, add-on and trunk answer from any station. (1)(2)(4)(5)

(C) Touch-Tone Calling is a standard feature of Centrex III service.

The station line rate does not include attendant positions and related equipment.

- (1) The reserve power feature provides an alternate independent source of power to maintain telephone service (excluding certain attendant supervisory functions and key telephone arrangements) during a commercial power failure. The Telephone Company agrees to make every reasonable effort to assure continued operation until such time as commercial power is restored.
- (2) Busy verification will be provided subject to the operating limitations of the equipment or facilities selected by the Telephone Company and provided no unusual expense is involved.
- (3) Does not include toll restriction.
- (4) Call transfer-individual, consultation hold and add-on will function only on an incoming call from the telecommunications network.
- (5) Add-on provided for a maximum of one additional station line being added at one time to an existing incoming call from the telecommunications network.
- (6) Available only to existing customer.

Issued: December 8, 1994

2.7.1 Tie Lines--(Continued)

MISSOURI

D. Advanced Private Line Termination (APLT)

Public Service Commission

1. The APLT unit is used to terminate tie lines, private line facilities and access lines from switched private line services, such as Enhanced Private Switched Communications Services (EPSCS) and access lines furnished by Other Common Carriers to the Centrex dial switching equipment where facilities permit.
2. The following rates apply for Advanced Private Line Termination Service:

	<u>Monthly Rate</u>	<u>Complex Installation/ Move Charge</u>	<u>Service and Equipment Charge</u>
Advanced Private Line Termination Units, each (PLS)(1).	\$143.50	\$38.25	(CR)\$6.75

2.7.2 Out-WATS Terminations

When an outward WATS line is terminated in the switching equipment of a Centrex System, the following Out-WATS Termination Charge is applicable. This termination provides dial access to WATS lines so equipped.

	<u>Monthly Rate</u>	<u>Complex Installation/ Move Charge</u>	<u>Service and Equipment Charge</u>
Out-WATS Termination Charge, per WATS line (WLA)	\$15.35	(2)	(CR)\$6.75

CANCELLED

JUN 21 1993
BY 3rd R.S. #, 8
Public Service Commission

- (1) A Service Establishment Charge of \$540.00 is only applicable the first time the APLT feature is activated for a customer.
- (2) A Complex Installation/Move Charge of \$50.00 is applicable if installed subsequent to the initial installation of the Centrex System.

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Footnotes:

- (1) The first number group is provided as part of Centrex Service. A second listed number group is included in the rate for a third listed number group, etc.
- (2) No distinctive identification is provided for additional listed number groups with the trunk answer any station feature.
- (3) This is an attendant-controlled conference arrangement. This conferencing equipment provides for the simultaneous connection of several Centrex station lines on the same premises. Connection of lines, other than as stated above, is subject to the limitations of the equipment, and where such equipment can be connected to Telephone Company Exchange Service, Private Line Service or Long Distance Message Telecommunications Service, the responsibility of the Telephone Company shall be limited to the furnishing of facilities suitable for Exchange Service, Private Line Service or Long Distance Message Telecommunications Service and to the maintenance and operation of such facilities in a manner proper for such services.
- (4) The number of controlled access codes is determined by the customer.
- (5) In addition, apply standard Tariff rates for the following:
 - Control channel extending from the serving central office to the customer's premises for each key required, specified in the Private Line Service Tariff.
- (6) A Complex Installation/Move Charge of \$45.00 is applicable for changes or rearrangements in controlled access codes.
- (7) A Complex Installation/Move Charge applies only when the feature is installed subsequent to the initial Centrex Service.
- (8) A Complex Installation/Move Charge of \$45.00 applies if installed subsequent to initial installation of Attendant Control of Facilities.
- (9) A Service Establishment Charge of \$410.00 applies.
- (10) The Service and Equipment Charges for optional features apply only to changes or additions to existing systems.
- (11) A maximum of \$4.00 applies per station line when installing any three or fraction thereof noted optional features with the initial installation of the station line or on subsequent additions of these features to an existing station line.
- (12) Available only to existing customer.

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Automatic Route Selection-(Continued)

Definitions for terms used in this Tariff are as follows:

CODE - is either the Numbering Plan Area (NPA) Code or Central Office (NNX) Code of the dialed telephone number. In 312-555-1212, 312 is the Numbering Plan Area Code and 555 is the Central Office Code.

FACILITY - denotes a specific FX, CCSA - Off-Net, WATS, Tie Line or OCC access line compatible with Automatic Route Selection and has senderized operation and uniform numbering that is consistent with the Message Telecommunications Network.

ROUTE - refers to an access path group of like facilities which are used to complete seven- or 10-digit calls between the same points. Examples of facility groups would be seven FX trunks to Chicago or one Band 5 WATS. A route may be used in one or more patterns.

ROUTE SELECTION PATTERN - is a group of up to four (4) routes arranged in a sequence determined by the customer.

SCREENING - is a process of scanning over Numbering Plan Area Codes (NPA screening) or over Numbering Plan Area and Central Office Codes (NPA/NNX screening). NPA screening also provides scanning over those NNX codes which are in the home NPA.

Regulations

All route and pattern assignments will be designated by the customer. The customer is responsible for notifying the Telephone Company of any changes required in his Automatic Route Selection feature.

All rates and charges for Automatic Route Selection are in addition to the rates and charges for the associated facilities. OCC services may be terminated in Automatic Route Selection by the use of the universal tie line terminal at applicable Tariff rates in addition to the Automatic Route Selection rates and charges.

(AT)

OBSOLETE CENTREX SERVICE(27)

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Footnotes:

- (1) When Call Forwarding - Busy Line and Don't Answer are provided on the same station, both must forward to the same address (either station line or attendant).
- (2) The customer must specify whether he wants Centrex intercom calls to be forwarded in addition to incoming calls.
- (3) Applies on initial installations and subsequent operational changes. Examples are: change of the forwarding address, change from DID only to DID and intercom.
- (4) A maximum of \$4.00 applies per station line when installing any three or fraction thereof noted optional features with the initial installation of the station line or on subsequent additions of these features to an existing station line.
- (5) These features are provided as a group per station line equipped; however, a station line must be equipped for Call Hold before it can be equipped for Call Pickup. When one station line in a Dial Pickup group is equipped for Call Pickup, all station lines in that same group are automatically equipped with the same feature; therefore, the above rate and Complex Installation/Move Charge will apply to each station line in the Dial Pickup group.
- (6) This feature is available to all station lines in a system and is provided only on a system basis.
- (7) This feature and rate includes Call Waiting - Terminating.
- (8) This Complex Installation/Move Charge applies only when the station line has not been previously equipped with Call Waiting -Terminating.
- (9) Complex Installation/Move Charge applies only to each Circle Hunt group established, not to each terminal within that group.
- (10) Regulations covering the provisions of this service are applicable as provided in Section 4 of this Tariff.
- (11) This is a station line controlled conferencing arrangement. This conferencing equipment provides for the simultaneous connection of several Centrex station lines on the same premises. Connection of lines, other than as stated above, is subject to the limitations of the equipment, and where such equipment can be connected to Telephone Company Exchange Service, Private Line Service or Long Distance Message Telecommunications Service, the responsibility of the Telephone Company shall be limited to the furnishing of facilities suitable for Exchange Service, Private Line Service or Long Distance Message Telecommunications Service and to the maintenance and operation of such facilities in a manner proper for such service.

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Footnotes:

(CP)

- (1) When Call Forwarding - Busy Line and Don't Answer are provided on the same station, both must forward to the same address (either station line or attendant).
- (2) The customer must specify whether he wants Centrex intercom calls to be forwarded in addition to incoming calls.
- (3) Applies on initial installations and subsequent operational changes. Examples are: change of the forwarding address, change from DID only to DID and intercom.
- (4) A maximum of \$4.00 applies per station line when installing any three or fraction thereof noted optional features with the initial installation of the station line or on subsequent additions of these features to an existing station line.
- (5) These features are provided as a group per station line equipped; however, a station line must be equipped for Call Hold before it can be equipped for Call Pickup. When one station line in a Dial Pickup group is equipped for Call Pickup, all station lines in that same group are automatically equipped with the same feature; therefore, the above rate and Complex Installation/Move Charge will apply to each station line in the Dial Pickup group.
- (6) This feature is available to all station lines in a system and is provided only on a system basis.
- (7) This feature and rate includes Call Waiting - Terminating.
- (8) This Complex Installation/Move Charge applies only when the station line has not been previously equipped with Call Waiting - Terminating.
- (9) Complex Installation/Move Charge applies only to each group established, not to each terminal within that group.
- (10) Regulations covering the provisions of this service are applicable as provided in Section 4 of this Tariff.
- (11) This is a station line controlled conferencing arrangement. This conferencing equipment provides for the simultaneous connection of several Centrex station lines on the same premises. Connection of lines, other than as stated above, is subject to the limitations of the equipment, and where such equipment can be connected to Telephone Company Exchange Service, Private Line Service or Long Distance Message Telecommunications Service, the responsibility of the Telephone Company shall be limited to the furnishing of facilities suitable for Exchange Service, Private Line Service or Long Distance Message Telecommunications Service and to the maintenance and operation of such facilities in a manner proper for such service.

2.9.1 Centrex Optional Features-(Continued)

Footnotes:-(Continued)

- (12) No guarantee of transmission is provided when using this feature from a secondary location. Improved transmission may be provided on a Special Service Arrangement if necessary.
- (13) Includes 75 feet of multiconductor wiring between the dial dictation recording terminal equipment and the recording equipment.
- (14) Private Facility applies to CCSA, WATS, and tie lines arranged for senderized operation, and the local and toll message network. Call Forwarding to EPSCS and ETS is not presently available.
- (15) Incoming local and toll message network and In-WATS calls to main station lines arranged for Call Forwarding Over Private Facilities routing are subject to the appropriate charges for such calls and a common recorded announcement is furnished to inform the caller that the call is being forwarded.
- (16) A Service Establishment Charge of \$399.00 applies.
- (17) No Complex Installation/Move Charge applies when furnished with the initial installation of Call Forwarding Over Private Facilities feature.
- (18) Service Establishment Charge of \$120.00 applies.
- (19) Dial Call Waiting and Call Waiting - Originating cannot be provided on the same line.
- (20) This feature is offered independent of Call Pickup.
- (21) The Split Service Offering optional feature is also required in systems equipped with the fully restricted station lines.
- (22) Not applicable to those customers served by No. 2 Electronic Switching System.
- (23) Applies per system on initial feature installation and on any subsequent additions, deletions or rearrangements.
- (24) Obsolete-applicable to existing installations at existing locations for existing customers.
- (25) The Service and Equipment Charge for optional features apply only to changes or additions to existing systems.
- (26) Cancel Call Waiting capability is also provided with this feature where available in 1A ESS central offices. A Complex Installation/Move Charge of \$104.50 applies per system for one non-standard Centrex Cancel Call Waiting Access Code.
- (27) Available only to existing customer.

2.9.1 Centrex Optional Features-(Continued)

Electronic Tandem Switching-(Continued)

B. Regulations-(Continued)

1. Explanation of Terms-(Continued)

b. Automatic Route Selection - Deluxe (ARS-D)

ARS-D provides for the origination of only ten-digit off-network calls to a public network telephone number, after the Centrex ARS-D access code, (e.g., "8"), automatically scans the digits and selects a first choice completing route when available, or subsequent route if the first choice route is not available. Routes may include Foreign Exchange Trunk lines, Wide Area Telecommunications Service lines, exchange trunk lines to the toll network and access lines to Common Control Switching Arrangements or other arrangements where compatible with senderized operation and uniform numbering.

The final completing route may be the toll network or, at the option of the customer, the call attempt is routed to overflow tone if a Facilities Restriction Level (FRL) is insufficient to complete the call.

When ARS-D is provided in conjunction with Uniform Numbering/Automatic Alternate Routing (UN/AAR), incoming tie lines from other Centrex or PBX Systems connected directly to the Centrex System may be arranged to have automatic access to the ARS-D and UN/AAR features. When such arrangements are provided, the tie lines to the ARS-D become "dedicated" tie lines and separate tie lines are required from the distant Centrex or PBX System if access is to be provided to other Centrex functions at the ARS-D equipped Centrex System. In addition, when ARS-D is provided in conjunction with UN/AAR, routes may include tie lines to a distant Centrex or PBX System equipped with an ARS-D like capability for subsequent access to the toll network.

(AT) (1) Available only to existing customer.

(AT) OBSOLETE CENTREX SERVICE(1)

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Electronic Tandem Switching-(Continued)

B. Regulations-(Continued)

1. Explanation of Terms-(Continued)

b. Automatic Route Selection - Deluxe (ARS-D)-(Continued)

The ARS-D feature provides all number translation and supervision necessary to route the call. "More Expensive Route" (MER) Tone is supplied, at the option of the customer, as a function of the route selected for a particular call.

Time-of-Day (TOD) Routing is an ARS-D option which permits pre-programmed selection of alternate routing pattern groups for off-network calls (up to three sets of ARS-D routing pattern groups) on a time-of-day and day-of-week basis. Manual override is available with the Facility Administration and Control feature. The maximum number of programmed changes per week is 16.

c. Facilities Restriction Levels (FRL)

FRL is required in connection with ARS-D and is provided on each station and incoming or two-way tie line to determine both the types of calls and types of facilities within the privileges of the associated user. When the FRL is transmitted over a tie line to a distant PBX or Centrex System equipped with ARS-D (for call screening at the distant point), it is identified as a Traveling Class Mark (TCM).

Authorization Codes are an FRL option which provide for a station user to dial a code which overrides the FRL associated with that station line or incoming tie line. The Centrex requests dialing of the authorization code when the default FRL (i.e., the FRL associated with the station line or incoming tie line) has insufficient privileges to complete the call. The Authorization Code is also inspected for validity as a security check. The Authorization Code is recorded in the Station Message Detail Recording to Premises record of the call when the SMDR-P feature is provided.

(AT) (1) Available only to existing customer.

B. Regulations-(Continued)

1. Explanation of Terms-(Continued)

d. Deluxe Queuing

Deluxe Queuing permits station users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available:

- A Ring-back Queue (RBQ), in which case the calling station goes on-hook and is called back when a facility becomes available.
- An Off-hook Queue (OHQ), in which case the calling station remains off-hook and is held in queue until a facility becomes available.

Calls held in queue beyond a predetermined time limit will be removed from the queue and be routed, at the option of the customer, via either subsequent route choices or to overflow tone.

e. Station Message Detail Recording to Premises (SMDR-P)

SMDR-P provides a record on magnetic tape equipment located at the customer's premises of calls originating from Centrex station lines to locations outside the same Centrex System. Facility groups may also be designated as requiring originating and/or terminating records.

B. Regulations--(Continued)

1. Explanation of Terms--(Continued)

d. Deluxe Queuing

Deluxe Queuing permits station users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available:

- A Ring-back Queue (RBQ), in which case the calling station goes on-hook and is called back when a facility becomes available.
- An Off-hook Queue (OHQ), in which case the calling station remains off-hook and is held in queue until a facility becomes available.

Calls held in queue beyond a predetermined time limit will be removed from the queue and be routed, at the option of the customer, via either subsequent route choices or to overflow tone.

e. Station Message Detail Recording to Premises (SMDR-P)

SMDR-P provides a record on magnetic tape equipment located at the customer's premises of calls originating from Centrex station lines to locations outside the same Centrex System. Facility groups may also be designated as requiring originating and/or terminating records.

Calls held in queue beyond a predetermined time limit will be removed from the queue and be routed, at the option of the customer, via either subsequent route choices or to overflow tone.

e. Station Message Detail Recording to Premises (SMDR-P)

SMDR-P provides a record on magnetic tape equipment located at the customer's premises of calls originating from Centrex station lines to locations outside the same Centrex System. Facility groups may also be designated as requiring originating and/or terminating records.

Account Codes are an SMDR-P option which permit a station user to dial a series of digits (code) which will appear in the SMDR-P record for that particular call. The Account Code can be used by the customer for account or project identification. Adding an Account Code to a call, where arrangements have been made to provide this capability, is at the discretion of the station user. Each customer's Account Codes must contain the same number of digits, not to exceed eight, and must not conflict with on-network code assignments.

B. Regulations-(Continued)

1. Explanation of Terms-(Continued)

f. Facilities Administration and Control

Facilities Administration and Control permits customer control of parameters which determine user calling privileges, i.e., Authorization Code and associated FRL. In addition, FRL associated with stations, tie lines and Authorization Codes may be collectively upgraded or downgraded by invoking a predetermined set of FRL's identified as Controlled Alternate FRL's. Manual control (override) to TOD pattern groups and activation or deactivation of queuing is also provided.

g. Traffic Data to Customer (Pollable)

Traffic Data to Customer (Pollable) permits the customer to poll the switching equipment on a daily or hourly basis to obtain certain traffic measurements. Equipment must be provided at the customer's premises to record the traffic data.

Facility Assurance Reports (FAR) provide the customer the ability to obtain automatic circuit assurance data via the same equipment utilized to record traffic data. FAR includes, for example, the identity of facilities not accessed or facilities constantly off-hook during a specified period of time.

(AT) (1) Available only to existing customer.

h. Uniform Numbering/Automatic Alternate Routing (UN/AAR)

UN permits station users to place calls via tie lines using a uniform dialing plan. The user dials an access code followed by a seven-digit number which uniquely identifies a specific on-network station line. The number consists of a three-digit location code and a four-digit station line code. (When the same access code is followed by a ten-digit public network number, the call is routed via the ARS-D feature.) The feature provides the number translation and supervision necessary to route the call.

AAR provides automatic routing of on-network calls to alternate tie line routes when primary tie line routes are busy.

Automatic Overflow to DDD provides completion of on-network calls via the toll network when all primary and alternate tie line routes are busy.

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Electronic Tandem Switching-(Continued)

B. Regulations-(Continued)

7. Uniform Numbering/Automatic Alternate Routing (UN/AAR)

- a. All calls must consist of a seven-digit called number, after the access code or after the access code and Account Code (where this option is provided).
- b. The customer must specify the first choice route and each subsequent route to each Centrex or PBX System involved.
- c. The customer must notify the Telephone Company when any change in route or routing sequence is desired.
- d. The maximum number of routes in a pattern is four.
- e. The maximum number of patterns is 180.
- f. Where calls are routed via the toll network, the rates and charges specified for Automatic Overflow to DDD, PBX Exchange Trunks and toll messages are applicable.
- g. The rates and charges specified in C. Rates, following, apply per tie line facility terminated in UN/AAR, and Automatic Route Selection - Deluxe patterns apply once per facility, whether terminated in one or both patterns.

(AT) OBSOLETE CENTREX SERVICE(24)

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Footnotes:

- (1) Applicable where facilities permit.
- (2) This feature can only be provided to serve customer stations excluding the attendant) that are co-located in the same ESS Centrex as the WATS-simulated facilities.
- (3) Priority Queuing is available with initial Complex Installation/Move Charge at no additional charge.
- (4) Customer may specify the length of time a call is held in queue (threshold time limit) before overflowing to the MTS Network or to overflow tone.
- (5) Applicable only when adding or removing WATS bands in queue.
- (6) Regulations covering the provisions of this service are applicable as provided in Section 4 of this Tariff.
- (7) A Preferential Hunt list may have a maximum of 18 terminals included.
- (8) These rates are additive to Circle Hunt rates if the customer requires both.
- (9) The Complex Installation/Move Charge applies when initially equipping a Multiline Hunt group with at least one Preferential Hunt list. This charge also applies each time a Multiline Hunt group has at least one Preferential Hunt list addition, deletion or change.
- (10) Apply the appropriate Complex Installation/Move Charge per arrangement when changing or rearranging the Speed Calling arrangement.
- (11) The maximum number of 30-code arrangements is 100 per customer in No. 1 Electronic Switching Systems and 64 in No. 2 Electronic Switching Systems per customer.
- (12) Each station equipped may have access to only one 30-code arrangement and only one six-code arrangement.
- (13) The first common block of a Centrex System and one additional common block required for Centrex Dormitory Service are not considered an optional feature and do not require these additional charges for Split Service Offering.
- (14) Not applicable to those customers served by No. 2 Electronic Switching System.
- (15) Obsolete-applicable to existing installations at existing locations for existing customers.
- (16) The Inhibit Inflow/Outflow optional features require separate control channel(s) between the central office and the customer premises, one per queue.
- (17) The Service and Equipment Charges for optional features apply only to changes or additions to existing systems.
- (18) The Inhibit/Inflow/Outflow optional features require separate control channels between the central office and the control key at the customers premises, one per queue.
- (19) In addition, apply rates and charges for a signal grade channel between the serving central office and the customer's premises.

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Footnotes (Continued):

- (20) Where available in #1A ESS central offices only.
- (21) Message Desk stations must be in the same Centrex group as the stations accessing the Message Desk. This feature also allows a Message Desk attendant to activate/deactivate an audible message waiting indication (stutter dial tone) for the Message Desk's client stations. Message Desk client stations must have at least one of the following: call forwarding-variable, call forwarding-busy line, call forwarding-answer, or night service-make busy arrangement, in order to forward calls to the Message Desk center. The rates and charges for these features apply in addition to the Simplified Message Desk Interface rates and charges. A 420-type data channel is also required for this service. Apply the appropriate rates and charges as specified in Section 2 of the Private Line Service Tariff. Customer-provided, modem, answering equipment, and Message Desk controller conforming to the technical specifications of the Company are also required. A Service Establishment Charge of \$680.00 applies (USOC: (SESVM).
- (22) A Service Establishment Charge of \$1300.00 applies (USOC: SESCL).
- (23) A maximum of \$4.00 applies per station line when installing any 3 or fraction thereof noted optional features with the initial installation of the station line or on subsequent additions of these features to an existing station line.
- (AT) (24) Available only to existing customer.

CENTREX SERVICE

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Remote Access Capability

Definitions of terms used in this Tariff:

Incoming Facility - The means by which the remote caller gains access to Centrex Services. This incoming facility may be a Centrex station or other tariffed exchange access line (e.g., 800 Service).

Outgoing Facility - This will always be a Centrex station line. The line class of service assigned to this station will determine what Centrex features/services can be accessed by the remote caller.

Remote Access Path - The combination of one incoming facility and one outgoing facility constitutes a remote access path.

A. Description:

Remote Access is an arrangement that will permit a remote caller access to the features and/or service facilities of a C.O. Centrex. Access is gained by dialing the number associated with the incoming facility. Optionally, the remote caller may be required to input a customer-specified security code. This code must be transmitted in the form of a TOUCH-TONE Signal.

The quality of transmission is not assured when this service is provided. If the customer requests additional equipment to improve the quality of transmission, and it is feasible, additional charges are applicable based upon costs.

Liability for charges incurred as a result of the use of this service is as provided for in this and other applicable tariffs of the Telephone Company.

CENTREX SERVICE

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Remote Access Capability

B. Features:

Standard features of this service include:

Remote Flash - Permits the calling party to generate a switchhook flash thereby allowing the user to activate Centrex system features.

Remote Retrial - Permits the calling party to originate additional calls through the system without disconnecting and redialing the associated incoming facility and authorization code.

In addition to the standard features shown above, the following feature is provided on an optional basis:

Security Code - Permits the customer to require that the remote caller input a three-digit code before gaining access to the Centrex. This number is specified by the customer and administered by the Telephone Company.

C. Rules and Regulations:

All security code assignments will be specified by the customer. The customer is responsible for notifying the Telephone Company of any required security code change or rearrangement. Charges for such charge or rearrangement are as specified in Paragraph 29.9.1, preceding.

In addition to charges for Remote Access Capability, appropriate tariff rates and charges for the incoming and outgoing facilities also apply.

OBSOLETE CENTREX SERVICE (1)

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Routed Numbers

This feature routes calls to a Centrex C.O. System telephone number to an answering point at the customer location. Routed Numbers include the Centrex C.O. telephone number and the routing facility. Calls must be routed within the customer's common block. Customers may request Routed Numbers in quantities that do not exceed either 1) the customer's current in service Centrex C.O. station capacity or 2) the customer's Centrex C.O. station capacity that is in service 6 months following installation of a new Centrex C.O. system. Customers must convert 50% of their Routed Numbers to Centrex C.O. stations within 36 months of when they were first established as Routed Numbers. Customers must convert 80% of their Routed Numbers to Centrex C.O. stations within 60 months of when they were first established as Routed Numbers. Customers who do not meet these percentages will have the Routed Numbers, that exceed the percentages listed previously, disconnected and made available for other customer's use. Centrex C.O. station numbers can only be assigned as Routed Numbers once and can not be reinstated as Routed Numbers following disconnection.

Footnotes:

- (1) Customer supplied 110 Volt AC power supply required.
- (2) Maximum capacity for the first primary common equipment is dependent upon the type of console. With the 27A-type console, the primary common equipment accommodates a maximum of four consoles when a single primary common equipment is required for the same system. With the 47A-type console, the primary common equipment accommodates a maximum of three consoles. Additional primary common equipment accommodates four consoles, regardless of type.
- (3) Also apply rates and charges for a Type 323 private line per primary common equipment as specified in the Private Line Service Tariff.
- (4) Required for the second and third 47A-type consoles associated with the first primary common equipment and for the third and fourth 47A-type console associated with subsequent primary common equipment. Also required for the third and fourth 27A-type console associated with single or subsequent primary common equipment. See Footnote 9.
- (5) Includes lamp field of six Incoming Call Identification and 12 Trunk Group Busy keys.
- (6) Includes lamp field of 24 Incoming Call Identification and 60 Trunk Group Busy keys.
- (7) Maximum of six attendant access lines can be terminated on each console.
- (8) Applicable when more than one primary common equipment is required.
- (9) When lamp multiple unit is provided, the first primary common equipment capacity is reduced to three consoles, and the additional common equipment is applicable for the second and third console.
- (10) Also apply rates and charges for a Type 311 private line as specified in the Private Line Service Tariff, per console.
- (11) Position Busy is not applicable to single console systems.
- (12) One unit per system required for 47A-type consoles. Not applicable with 27A-type consoles.
- (13) Applicable to systems equipped with 27A-type or 47A-type consoles.
- (14) Available only to existing customer.

CONFERENCE TELEPHONE SERVICE-LOCAL

3.1 DEFINITION

3.1.1 Local Conference Service is the furnishing of simultaneous connection between three or more exchange access arrangements. If Long Distance Message Telecommunications Service rates would apply on a connection between any two of the exchange access arrangements so connected, conference service will be furnished in accordance with the Long Distance Message Telecommunications Service Tariff.

3.2 CONDITIONS UNDER WHICH SERVICE IS FURNISHED

- 3.2.1 Service is furnished where and to the extent that facilities permit.
- 3.2.2 The connections will be established on either a person-to-person or station-to-station basis.
- 3.2.3 The Telephone Company will, upon request, attempt to establish the conference connections at a specified time.

3.3 RATES

The total charge for the conference connection is the sum of the set-up charge and the usage charge for total conversation time.

- A. Set-up charge is \$1.60 for each Exchange Access Arrangement included in the conference call.
- (CT) B. The charge for conversation time will consist of the total minutes of conversation multiplied by the appropriate usage charge per minute applying to the conference call.
- (AT) C. The appropriate usage charge for each exchange access arrangement is as follows:
- (CT)

Mileage Between The Two Most Distant Service Points	Initial Minute Rate	Each Additional Minute Rate
0-14	\$.04	\$.01
15-28	.05	.02
Over 28	.06	.03

- 1. The method of applying usage charges:
 - initial period rates indicated in Paragraph 3.3, B., preceding, are for connections of one minute or any fraction thereof.

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.1 GENERAL PROVISIONS

A. General

Terminal equipment and communications systems may be connected at the customer's premises to telecommunications services furnished by the Telephone Company where such connections are made in accordance with the provisions of this section. Telecommunications services, as used herein, include exchange service, Long Distance Message Telecommunications Service (LDMTS) and Wide Area Telecommunications Service (WATS).

B. Responsibility of the Customer

1. The customer shall be responsible for the installation, operation and maintenance of any terminal equipment or communications system. No combinations of terminal equipment or communications systems shall require change in or alteration of the equipment or services of the Telephone Company, cause electrical hazards to Telephone Company personnel, damage to Telephone Company equipment, malfunction of Telephone Company billing equipment or degradation of service to persons other than the user of the subject terminal equipment or communications system, his calling or called party. Upon notice from the Telephone Company that terminal equipment or a communications system is causing such hazard, damage, malfunction or degradation of service, the customer shall make such changes as shall be necessary to remove or prevent such hazard, damage, malfunction or degradation of service.
- (CT) 2. The customer shall be responsible for the payment of a Customer-Owned Equipment Trouble Isolation Charge, as provided in the Restoration of Service Section of this Tariff, for visits by a Telephone Company employee to the customer's premises when a service difficulty or trouble report results from the use of terminal equipment or a communications system.
- (CT) 3. The customer who provides the premises wiring of communications systems subject to the Federal Communications Commission's Rules and Regulations shall be responsible for the payment of an Institutional Program for Premises Wiring Charge as provided following for activities performed by Telephone Company employees at the customer's premises when the premises wiring in question has failed acceptance tests monitored by, or participated in by, the Telephone Company and/or has been revealed to be not in conformance with the information provided in the related affidavit which was provided and/or has resulted in a harm to the network.

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.1 GENERAL PROVISIONS-(Continued)

B. Responsibility of the Customer-(Continued)

3. (Continued)

The Institutional Program for Premises Wiring Charge provided for pre-ceding is comprised of the first, or a combination of both rate elements described below, as appropriate:

Element 1 - for the first 15 minutes, or fraction thereof, of total time spent by Telephone Company employees in related monitoring or participation in acceptance tests and/or in related inspection of customer-provided premises wiring for Communications Systems subject to the Federal Communications Commission's Rules and Regulations and for administrative expenses including the visit to the customer's premises - USOC: EPC1E (CR) \$57.50

Element 2 - for each additional 15 minutes, or major fraction thereof, of total time spent by Telephone Company employees in performing the related customer premises activities described in Element 1, preceding - USOC: EPCAE (CR) \$11.75

C. Responsibility of the Telephone Company

- 1. The Telephone Company shall not be responsible for the installation, operation or maintenance of any terminal equipment or communications system. In addition to the provisions contained in the Rules and Regulations Applying to All Customer's Contracts Section of this Tariff, telecommunications services are not represented as adapted to the use of terminal equipment or communications systems. Where terminal equipment or communications systems are used with telecommunications services, the responsibility of the Telephone company shall be limited to the furnishing of service components suitable for telecommunications services and to the design, maintenance and operation of service components in a manner proper for such services.

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.1 GENERAL PROVISIONS-(Continued)

C. Responsibility of the Telephone Company-(Continued)

1. (Continued)

Subject to this responsibility, the Telephone Company shall not be responsible for (1) the through transmission of signals generated by the terminal equipment or communications systems or for the quality of, or defects in, such transmission, or (2) the reception of signals by terminal equipment or communications systems or (3) address signaling where such signaling is performed by signaling equipment.

2. The Telephone Company will, at the customer's request, provide information concerning interface parameters, including the number of ringers which may be connected to a particular telephone line needed to permit terminal equipment to operate in a manner compatible with telecommunications services.

3. The Telephone Company may make changes in its telecommunications services, equipment, operations or procedures where such action is not inconsistent with the Federal Communications Commission's Rules and Regulations. If such changes can be reasonably expected to render any customer's terminal equipment or communications system incompatible with telecommunications services, or require modification or alteration of such terminal equipment or communications systems, or otherwise materially affect its use or performance, the customer will be given adequate notice, in writing, to allow the customer an opportunity to maintain uninterrupted service.

D. Recording of Two-Way Telephone Conversations

Telecommunications services are not represented as adapted to the recording of two-way telephone conversations. However, voice recording equipment may be directly, acoustically or inductively connected with telecommunications services in accordance with Paragraph 4.1.2 or 4.1.3, following, subject to the following conditions:

1. A distinctive recorder tone that is repeated at intervals of approximately 15 seconds is required to alert all parties when recording equipment is in use and is connected with services of the Telephone Company, or

(AT) The recording party gives verbal notification in a clear, unambiguous manner which is recorded at the beginning and as part of the call, or

and Original Sheet 8

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.2 CONNECTIONS OF REGISTERED EQUIPMENT-(Continued)

A. Registered Terminal Equipment, Registered Protective Circuitry and Registered Communications Systems-(Continued)

1. (Continued)

The Telephone Company may discontinue service or impose other remedies as provided for in the Federal Communications Commission's Rules and Regulations for failure to comply with these provisions.

2. The customer shall notify the Telephone Company of each line to which registered equipment is to be connected in advance of such connection and shall notify the Telephone Company when such registered equipment is permanently disconnected. The customer shall provide the Telephone Company, upon request, the Registration Number and Ringer Equivalence Number for the registered equipment and the Universal Service Order Code (USOC) for the required Telephone Company-provided standard jack. The customer shall also provide, when appropriate, the off-premises station port signaling capability of a PBX system.

3. The customer shall not connect registered equipment to a Telephone Company line if:

- a. The Ringer Equivalence of such equipment in combination with the total Ringer Equivalence of other equipment connected to the same line exceeds the allowable maximum of five or as otherwise determined by the Telephone Company.
- b. The ringer type is not a ringer type designated by the Telephone Company as suitable for that particular line.

4. Unless a specific waiver has been granted by the Federal Communications Commission or except as otherwise provided in 5., following, all connections of registered equipment to services furnished by the Telephone Company will be made through a point of demarcation. In most cases this will be through a Telephone Company provided standard jack. For simple wiring where there is no Telephone Company provided standard jack at the Demarcation Point, customers may make connections by direct attachment to Company installed wiring at points on the customer's side up to and including at the Demarcation Point. In the case of registered communications systems utilizing complex wiring, a method of connection, jacks, terminal strips, etc., will be provided by the Telephone Company.

5. The requirement for the use of a standard jack as described in 4., preceding, is waived for registered equipment which is located in hazardous or inaccessible locations.

The customer shall also provide, when appropriate, the off-premises station port signaling capability of a PBX system.

3. The customer shall not connect registered equipment to a Telephone Company line if:

a. The Ringer Equivalence of such equipment in combination with the total Ringer Equivalence of other equipment connected to the same line exceeds the allowable maximum of five or as otherwise determined by the Telephone Company.

b. The ringer type is not a ringer type designated by the Telephone Company as suitable for that particular line.

4. Unless a specific waiver has been granted by the Federal Communications Commission or except as otherwise provided in 5., following, all connections of registered equipment to services furnished by the Telephone Company shall be made through Telephone Company-provided standard jacks, or, in the case of registered communications systems, through standard jacks wired in other than a standard manner, when such nonstandard wiring of the jack is agreed to by the Telephone Company.

5. The requirement of a standard jack as described in 4., preceding, is waived for registered equipment which is located in hazardous or inaccessible locations.

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.2 CONNECTIONS OF REGISTERED EQUIPMENT-(Continued)

B. Premises Wiring Associated With Registered Communications Systems

1. Premises Wiring is wiring which connects separately-housed equipment entities or system components to one another, or wiring which connects an equipment entity or system component with the telephone network interface, located at the customer's premises and not within an equipment housing.

a. Fully-Protected Premises Wiring is premises wiring which is:

- (1) No greater than 25 feet in length (measured linearly between the points where it leaves equipment or connector and registered as a component of and supplied to the user with the registered terminal equipment or protective circuitry which it is to be used.
- (2) A cord which complies with (1) preceding and once by a registered extension cord. Extension cord be used as a substitute for wiring which for safety reasons should be affixed to or embedded in a building's structure.
- (3) Wiring located in an equipment room with restricted access, provided that this wiring remains exposed for inspection and is not concealed or embedded in the building's structure, and that it conforms to the Federal Communications Commission's Rules and Regulations.
- (4) Electrically behind registered equipment, system components or protective circuitry which assure that electrical contact between the wiring and commercial power wiring or earth ground will not result in hazardous voltages or excessive longitudinal imbalance at the telephone network interface.

CANCELLED
MAY 9 - 1992
BY J.R.S.
Public Service Commission
MISSOURI

b. Protected Premises Wiring Requiring Acceptance Testing for Imbalance is premises wiring which is electrically behind registered equipment, system components or circuitry which assure that electrical contact between the wiring and commercial power wiring will not result in hazardous voltages at the telephone network interface.

c. Unprotected Premises Wiring is all other premises wiring

The Telephone Company may invoke extraordinary procedures specified in the Federal Communications Commission's Rules and Regulations where one or more of the following conditions are present:

1. Information provided in the supervisor's affidavit gives reason to believe that a violation of the Federal Communications Commission's Rules and Regulations is likely.
2. A failure has occurred during acceptance testing for imbalance.
3. Harm has occurred, or there is reason to believe that harm is imminent as a result of wiring operations performed under the Federal Communications Commission's Rules and Regulations.

In addition, the Telephone Company may monitor or participate in acceptance testing for imbalance, or may inspect other than Fully-Protected Premises Wiring installations as set forth in the Federal Communications Commission's Rules and Regulations.

C. Connections Involving National Defense and Security

1. In certain cases, the Federal Communications Commission's Rules and Regulations permit the connection of nonregistered terminal equipment or communications systems to the telecommunications network, provided that:
 - a. The Secretary of Defense; the head of any other governmental department (having requisite Federal Communications Commission approval); or their authorized representative certifies in writing to the Telephone Company that:
 1. the connection is required in the interest of national defense and security;

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.3 CONNECTIONS OF GRANDFATHERED TERMINAL EQUIPMENT AND GRANDFATHERED COMMUNICATIONS SYSTEMS (as defined in the Explanation of Terms Section of this Tariff)-(Continued)

B. Connections Through Connecting Arrangements Provided by the Telephone Company-(Continued)

3. Grandfathered Connections of Communications Systems-(Continued)

- b. The provisions relating to minimum protection criteria set forth in C., following, shall apply to the connection of communications systems.

C. Minimum Protection Criteria for Electrical Connections

1. To prevent excessive noise and crosstalk in the network, it is necessary that the power of the signal at the central office not exceed 12dB below one milliwatt when averaged over any three-second interval. To insure that this limit is not exceeded, the power of the signal which may be applied by the equipment to the Telephone Company interface located on the customer's premises will be specified for each customer location, but in no case shall it exceed one milliwatt.
2. To protect other services, it is necessary that the signal which is applied by the equipment to the Telephone Company interface located on the customer's premises meets the following limits:
 - a. The power in the band from 3,995 Hertz to 4,005 Hertz shall be at least 18dB below the power of the signal as specified in (1) above.
 - b. The power in the band from 4,005 Hertz to 10,000 Hertz shall not exceed 16dB below one milliwatt.
 - c. The power in the band from 10,000 Hertz to 25,000 Hertz shall not exceed 24dB below one milliwatt.
 - d. The power in the band from 25,000 Hertz to 40,000 Hertz shall not exceed 36dB below one milliwatt.
 - e. The power in the band above 40,000 Hertz shall not exceed 50dB below one milliwatt.

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.3 CONNECTIONS OF GRANDFATHERED TERMINAL EQUIPMENT AND GRANDFATHERED COMMUNICATIONS SYSTEMS (as defined in the Explanation of Terms Section of this Tariff)-(Continued)

C. Minimum Protection Criteria for Electrical Connections-(Continued)

3. To prevent the interruption or disconnection of a call, or interference with network control signaling, it is necessary that the signal applied by the equipment to the Telephone Company interface located on the customer's premises at no time have energy solely in the 2450 to 2750 Hertz band. If signal power is in the 2450 to 2750 Hertz band, it must not exceed the power present at the same time in the 800 to 2450 Hertz band.

D. Attested Equipment Connected Prior to July 1, 1980

1. Until July 1, 1980, headsets and nonpowered conferencing equipment which meet the standards and procedures set forth by the Telephone Company in Technical References for Attested Equipment may be connected at the customer's premises to the telecommunications network in accordance with a. through e. following. Such equipment may remain connected and be moved and reconnected in accordance therewith for the life of the equipment unless subsequently modified.
 - a. The connection shall be made through an interface termination (e.g., headset jack) provided by the Telephone Company.
 - b. The Identification Number issued by the Telephone Company to the manufacturer or supplier must appear on each unit of Attested Equipment utilized.
 - c. Customers must notify the Telephone Company of their intention to connect Attested Equipment. Such notification must include the Identification Number of the equipment and the location at which that equipment is to be used.
 - d. Attested Equipment may not:
 - (1) Be connected to a source of electrical power which is external to the telecommunications network;

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.4 CONNECTIONS OF CUSTOMER-PROVIDED COMMUNICATIONS SYSTEMS NOT SUBJECT TO THE FEDERAL COMMUNICATIONS COMMISSION'S RULES AND REGULATIONS

A. Direct Electrical Connection

Customer-provided communications systems not subject to the Federal Communications Commission's Rules and Regulations may be connected with telecommunications services on a direct electrical basis at the customer's premises provided that:

1. The connection is made through:

- a. a connecting arrangement furnished by the Telephone Company, or
- b. registered or grandfathered terminal equipment, protective circuitry or communications system subject to the Federal Communications Commission's Rules and Regulations which, either singularly or in combination, assure that the requirements of the Federal Communications Commission's Rules and Regulations are met at the network interface.

In lieu of these requirements for total hardware protection, an optional, alternative method is available as described in B., following, for the control of signal power only.

2. The connection is:

- a. through switching equipment, or
- b. to a customer-provided communications system not subject to the Federal Communications Commission's Rules and Regulations that is arranged to promptly return the network service to an idle (on-hook) state should the communications system fail. In addition, the customer must notify the Telephone Company when the communications system fails.

Issued: December 29, 1983

Effective: January 01, 1984

General Exchange Tariff
Section 4
Original Sheet 35

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.4 CONNECTIONS OF CUSTOMER-PROVIDED COMMUNICATIONS SYSTEMS NOT SUBJECT TO THE FEDERAL COMMUNICATIONS COMMISSION'S RULES AND REGULATIONS-(Continued)

A. Direct Electrical Connection-(Continued)

3. Minimum protection criteria set forth in 4.1.3, C., preceding, are complied with when the connection is made through equipment or systems that are not registered.
4. When the connection is to WATS service, the customer has a requirement to communicate over a WATS line to or from premises of that customer located in the same rate state as that for which the WATS initial period rate applies. Customer-provided communications systems not subject to the Federal Communications Commission's Rules and Regulations which are not connected through switching equipment must terminate only in that WATS rate state in terminal equipment or communications systems subject to the Federal Communications Commission's Rules and Regulations.

B. Institutional Procedures for Signal Power Control

1. When customer-provided communications systems not subject to the Federal Communications Commission's Rules and Regulations are connected through (a) a Telephone Company-provided connecting arrangement or (b) registered or grandfathered terminal equipment, communications system or protective circuitry which assures that all of the requirements of the Federal Communications Commission's Rules and Regulations are met at the telecommunications network interface, no further action is required. However, when a customer elects to connect such a communications system to the telecommunications network and the registered or grandfathered equipment, system or protective circuitry through which the connection is made does not provide protection for signal power control, the customer must comply with the following institutional procedures:
 - a. The customer-provided communications system must be installed, operated and maintained so that the signal power (within the frequency range of 200-4000 Hertz) at the telecommunications network interface continuously complies with the Federal Communications Commission's Rules and Regulations.
 - b. The operator(s)/maintainer(s) responsible for the establishment, maintenance and adjustment of the voice frequency signal power present at the telecommunications network interface must be trained to perform these functions by successfully completing one of the following:

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.4 CONNECTIONS OF CUSTOMER-PROVIDED COMMUNICATIONS SYSTEMS NOT SUBJECT TO THE FEDERAL COMMUNICATIONS COMMISSION'S RULES AND REGULATIONS-(Continued)

B. Institutional Procedures for Signal Power Control-(Continued)

1. (Continued)

a. (Continued)

- (1) a training course provided by the manufacturer of the equipment used to control voice frequency signal power; or
- (2) a training course provided by the customer or authorized representative, who has responsibility for the entire communications system, using training materials and instructions provided by the manufacturer of the equipment used to control the voice frequency signal power; or
- (3) an independent training course (e.g., trade school or technical institution) recognized by the manufacturer of the equipment used to control the voice frequency signal power; or
- (4) in lieu of the preceding training requirements, the operator(s)/maintainer(s) is under the control of a supervisor trained in accordance with (1) through (3) preceding.

Upon request, the customer is required to provide the proper documentation to demonstrate compliance with the requirements in B.1.b.

c. At least 10 days advance notice must be given to the Telephone Company in the form of a notarized affidavit before the initial connection of the customer-provided communications system. A copy of the affidavit must also be maintained at the customer's premises. The affidavit must contain the following information:

- (1) The full name, business address, business telephone number and signature of the customer or authorized representative who has responsibility for the operation and maintenance of the communications system.
- (2) The line(s) which the communications system will be either connected to or arranged for connection to.
- (3) A statement that all operations associated with establishment, maintenance and adjustment of the signal power present at the telecommunications network interface will comply with the Federal Communications Commission's Rules and Regulations.

1. (Continued)

c. (Continued)

- (4) A statement describing how each operator/maintainer of the communications system will meet and continue to meet the training requirements for persons installing, adjusting or maintaining the communications system.

2. Extraordinary Procedures

- a. The Telephone Company may invoke extraordinary procedures to protect the telecommunications network where one or more of the following conditions are present:

- (1) Information provided in the affidavit gives reason to believe that a violation of the Federal Communications Commission's Rules and Regulations or the Institutional Procedures set forth in B.1., preceding, is likely.
- (2) Harm has occurred and there is reason to believe this harm was a result of operations performed under the Institutional Procedures set forth in B.1., preceding.

- b. The extraordinary procedures which can be invoked by the Telephone Company include:

- (1) Requiring the use of protective apparatus which either protects solely against signal power or which assures that all of the requirements of the Federal Communications Commission's Rules and Regulations are met at the telecommunications network interface. This protective apparatus may be provided by either the Telephone Company or the customer.
- (2) Disconnecting service.

- c. A charge equal to the Maintenance of Service charge, as provided in the Restoration of Service Section of the Tariff, will apply when:

4.2.1 Local Exchange Access Line Charges

A. Application of Business Local Exchange Access Line Charges

1. The PBX trunk rate applies for use in providing access to communication systems which perform switching functions and/or connect with the Local Exchange access lines on a pooled-access basis. Refer to the Local Exchange Tariff for applicable Local Exchange Rates and the Service Connection Charges Section of this Tariff for applicable Service Connection Charges.
2. The multiline rate applies for use in providing access to communication systems which do not perform switching functions and/or connect with the Local Exchange access lines on a pooled-access basis, but do provide for facilitating pick-up of two or more business exchange lines. Refer to the Local Exchange Tariff for applicable Local Exchange Rates and the Service Connection Charges Section of this Tariff for applicable Service Connection Charges.
3. The individual line rate applies for use in providing access in all other cases. See the Local Exchange Tariff for applicable Local Exchange Rates and the Service Connection Charges Section of this Tariff for applicable Service Connection Charges.

B. Application of Residence Local Exchange Access Line Charges

1. The PBX trunk rate applies for use in providing access to communication systems which perform switching functions and/or connect with the Local Exchange access lines on a pooled-access basis. Refer to the Local Exchange Tariff for applicable Local Exchange Rates and the Service Connection Charges Section of this Tariff for applicable Service Connection Charges.
2. The individual line rate applies for use in providing access in all other cases. See the Local Exchange Tariff for applicable Local Exchange Rates and the Service Connection Charges Section of this Tariff for applicable Service Connection Charges.

A. Regulations

1. Telephotograph equipment provided by the press may be connected to lines of the Telephone Company for use by the press for the transmission and reception of pictures and similar material for publication. Telephotograph equipment provided by law enforcement agencies may be connected to lines of the Telephone Company for use by law enforcement agencies for the transmission and reception of fingerprints, ballistic data, identification photographs and similar law enforcement material. Telephotograph equipment provided by the armed forces of the United States may be connected to lines of the Telephone Company for use by the armed forces of the United States for transmission and reception of information of military necessity essential to the national defense. Telephotograph equipment provided by civilian defense agencies may be connected to lines of the Telephone Company for use by civilian defense agencies for the transmission and reception of information essential for the discharge of their responsibilities in emergencies. Telephotograph equipment provided by the United States Weather Bureau may be connected to lines of the Telephone Company for use by the United States Weather Bureau for the transmission and reception of weather information.
2. Customer telephotograph equipment may be connected by direct physical connection by means of protective connection equipment furnished by the Telephone Company. The connection of the telephotograph equipment may be made by the customer only to the terminals of the protective connection equipment, subject to the provisions of 4.1.2 and 4.1.3, B.2.a preceding.
3. Portable protective equipment will be furnished, if desired, for use with portable telephotograph equipment of the customer, subject to the provisions of 4.1.3, A.2. preceding.

B. Facilities of the Telephone Company, when connected with facilities of the customer, will not be used for communications of other than the customer, except that such facilities may be used for the communications of, and be connected with facilities furnished by, the Telephone Company to other companies which:

1. Are operated with the customer as parts of an integrated electric power, oil, oil products or natural gas system or railroad system under direct or common ownership or control; or
2. Own or operate electric power or pipeline or railroad system jointly with the customer; or
3. Own or operate electric power or pipeline or railroad facilities interconnected with those of the customer.

Telephone Company facilities, when so connected, may be used for Exchange or Long Distance Message Telecommunications Service communications of other companies specified in Paragraph 4.6.1, B.1., 2. or 3., preceding, including calls originated by employees of such companies, only under the circumstances set forth in Paragraphs 4.6.1, A.1 a. and b., preceding.

C. Terminal equipment and communications systems connected to the telecommunications network in accordance with Paragraphs 4.6.1, A. and B., preceding, prior to January 1, 1980, may remain connected and be moved and reconnected for the life of the equipment without registration unless subsequently modified. New installations of terminal equipment and communications systems subject to the Federal Communications Commission's Rules and Regulations must be connected to the telecommunications network in accordance with Paragraph 4.1.2, preceding.

(AT) (1) Obsolete-applicable to existing installations at existing locations for existing customers.

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

(CP) 4.7 CONNECTIONS OF CERTAIN FACILITIES OF THE U.S. ARMY, NAVY AND AIR FORCE(1)

4.7.1 General

- A. Except as otherwise provided in Paragraph 4.7.2, following, facilities of a telephone system of the U.S. Department of the Army, Navy or Air Force which serves an establishment operated and administered under the direction of the Department and commanded by authorities of such establishment may, in lieu of the provisions of Paragraphs 4.1.3 and 4.1.4, preceding, be connected to the telecommunications network where the Secretary of the appropriate Department certifies in writing that reasons of military necessity require that the establishment be served by a telephone system of the Department. In addition, the facilities of a temporary telephone system of such Department located off a permanent establishment of the Department for maneuvers, mobilization tests or technical service tests will be so connected.
- B. Except as otherwise provided in Paragraph 4.7.2, following, telephone facilities of the U.S. Department of the Army, Navy or Air Force, other than those described in Paragraph 4.7.1, A., preceding, may, in lieu of the provisions of Paragraphs 4.1.3 and 4.1.4, preceding, be connected by means of switching or connecting equipment furnished by the Telephone Company to a PBX switchboard or other telephone switching or terminal equipment for communication with stations and private line facilities associated with said switching or terminal equipment where the Secretary of the appropriate Department, or his authorized representative notifies the Telephone Company in writing that such connection is required for reasons of military necessity. Such Department telephone facilities will be connected to the telecommunications network only in cases of emergency involving safety of life or property, unless the aforesaid Department facilities are in locations where it is impracticable for the Telephone Company to furnish its facilities.

4.7.2 Terminal equipment and communications systems connected to the telecommunications network in accordance with Paragraphs 4.7.1, A. and B., preceding, prior to January 1, 1980, may remain connected and be moved and reconnected for the life of the equipment without registration unless subsequently modified. New installations of terminal equipment and communications systems subject to the Federal Communications Commission's Rules and Regulations must be connected to the telecommunications network in accordance with Paragraph 4.1.2, preceding.

4.8 CONNECTIONS OF SERVICE STATION LINES AND FACILITIES FURNISHED BY THE CUSTOMER WHICH INVOLVE HAZARDOUS OR INACCESSIBLE LOCATIONS

- A. Except as otherwise provided in B. following, service station lines, and facilities furnished by the customer which involve hazardous or inaccessible locations, may be connected to the telecommunications network.
- B. Terminal equipment and communications systems connected to the telecommunications network in accordance with A. preceding, prior to January 1, 1980, may remain connected and be moved and reconnected for the life of the equipment without registration unless subsequently modified. New installations of terminal equipment and communications systems subject to the Federal Communications Commission's Rules and Regulations must be connected to the telecommunications network in accordance with 4.1.2, preceding.

4.9 CONNECTIONS OF CUSTOMER-PROVIDED PRIVATE MOBILE SYSTEMS WITH STATIONS OR PRIVATE BRANCH EXCHANGE OR CENTREX SWITCHING SYSTEMS

- A. Customer-provided private mobile systems may be connected with extension stations through manual or dial PBX systems or Centrex systems by means of connecting equipment provided by the Telephone Company, subject to the provisions of 4.1.3, preceding.
- B. The Telephone Company-provided connecting equipment will be located at the attendant's position and will operate on a manual basis only, regardless of the type of PBX or Centrex system.

4.11 CONNECTIONS OF CUSTOMER-PROVIDED TEST EQUIPMENT

A. Totally Protective Connections

Customer-provided test equipment may be connected to the telecommunications network at the premises of the customer through registered or grandfathered terminal equipment, protective circuitry or communications systems subject to the Federal Communications Commission's Rules and Regulations which, either singularly or in combination, assure that all of the requirements of the Federal Communications Commission's Rules and Regulations (total protection) are met at the telecommunications network interface.

B. Program for Connections of Customer-Provided Test Equipment

Customer-provided test equipment may also be connected at the premises of the customer either (a) directly at the telecommunications network inter-face or (b) through terminal equipment, protective circuitry or communications systems subject to the Federal Communications Commission's Rules and Regulations which does not provide protection for signal power control under the following program provided that:

1. The customer-provided test equipment is limited to transmission signal power generating and/or detection devices, or similar devices, utilized by the customer for the detection and/or isolation of a communications service fault.
2. The customer-provided test equipment is of a type that was lawfully directly connected to the telecommunications network as of March 6, 1981. Such test equipment may remain connected, be moved or reconnected during the life of the test equipment unless it has been subsequently modified.
3. Direct connections of customer-provided test equipment are made through Telephone Company-provided jacks or as otherwise authorized by the Telephone Company.
4. Customer-provided test equipment must be operated in accordance with the Institutional Procedures for Signal Power Control as specified in 4.11, C., following.

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.11 CONNECTIONS OF CUSTOMER-PROVIDED TEST EQUIPMENT-(Continued)

B. Program for Connections of Customer-Provided Test Equipment

5. The customer notifies the Telephone Company of each telecommunications network service at each premises to which the customer-provided test equipment will be connected in advance of the initial connection. The customer must also notify the Telephone Company when such test equipment is permanently disconnected at each premises.
6. No customer-provided test equipment or combination of test equipment with terminal equipment, protective circuitry or communications systems subject to the Federal Communications Commission's Rules and Regulations (including but not limited to wiring) may cause electrical hazards to Telephone Company personnel, damage to Telephone Company equipment, malfunction of Telephone Company billing equipment, or degradation of service to persons other than the user of the subject test equipment or the user's calling or called party.

C. Institutional Procedures for Signal Power Control

1. In accordance with 4.11, B.4., preceding, the customer must comply with the following Institutional Procedures:
 - a. The customer must install, operate and maintain the test equipment so that its signal power at the telecommunications network interface complies with the Federal Communications Commission's Rules and Regulations.
 - b. The operator(s)/maintainer(s) responsible for the test equipment signal power present at the telecommunications network interface must be trained to perform these functions by successfully completing one of the following:
 - (1) A training course provided by the manufacturer of the test equipment, or
 - (2) A training course provided by the customer, or authorized representative of the customer, using training materials and instructions provided by the manufacturer of the test equipment, or

b. (Continued)

- (3) An independent training course (e.g., trade school or technical institution) recognized by the manufacturer of the test equipment, or
- (4) In lieu of the preceding training requirements, the operator(s)/maintainer(s) is under the control of a supervisor trained in accordance with 4.11, C.1.b.(1) through (3), preceding.

Upon request, the customer is required to provide proper documentation to demonstrate compliance with the requirement in 4.11, C.1.b.

- c. Advance notice must be given to the Telephone Company in the form of a notarized Affidavit before the initial connection of the customer-provided test equipment at each premises after April 9, 1981. A copy of the Affidavit must also be maintained at the customer's premises. The Affidavit must contain the following information:
 - (1) The full name, business address, business telephone number and signature of the customer or authorized representative who has responsibility for the operation of the test equipment.
 - (2) The line(s) to which the test equipment will be either connected to or arranged for connection to.
 - (3) A statement that all operations associated with the establishment, maintenance and adjustment of the test equipment signal power present at the telecommunications network interface will comply with the Federal Communications Commission's Rules and Regulations.

c. (Continued)

(4) A statement describing how each operator of the test equipment will meet and continue to meet the training requirements for persons installing, connecting, adjusting or maintaining the test equipment.

2. Extraordinary Procedures

a. The Telephone Company may invoke extraordinary procedures to protect the telecommunications network where one or more of the following conditions are present:

(1) Information provided in the Affidavit gives reason to believe that a violation of the Federal Communications Commission's Rules and Regulations or the Institutional Procedures set forth in 4.11, C.1., preceding, is likely.

(2) Harm has occurred, and there is reason to believe this harm was a result of operations performed under the Institutional Procedures set forth in Paragraph 4.11, C.1., preceding.

b. The extraordinary procedures which can be invoked by the Telephone Company include:

(1) Requiring the use of protective apparatus which either protects solely against excessive signal power or which assures that all of the requirements of the Federal Communications Commission's Rules and Regulations are met at the telecommunications network interface.

(2) Disconnecting service.
