GENERAL RULES AND REGULATIONS NOV 30 1987 SERVICE CONNECTION CHARGES (Cont.)	
A. General (Cont.)	<p>Public Service Commission</p> <p>3. Service Connection Charges are in addition to any other scheduled rates and charges normally applying under the tariffs. They apply in addition to and not in lieu of Mileage Charges or Construction Charges made because of unusual costs in establishing service.</p> <p>4. Service Connection Charges may be payable at the time application is made for the particular service or facility, and prior to the establishment of service, or upon presentation of a bill. Service may be established in advance of payment in the case of Service Connection Charges for additions to the service of existing subscribers and in the case of any service for Departments, Administrations, and Agencies of the Federal, State, County, Township, or Municipal Governments.</p>
B. Service Connection Charges Do Not Apply To:	<p>1. "Public Pay Stations" established for the use of the general public (but not including Coin-Box Service at locations which are classed as semi-public).</p> <p>2. Service changed from a residence to a business classification, or vice versa, without change in the identity of the subscriber or his listing.</p> <p>3. Service re-established after the destruction or partial destruction of the subscriber's premises by means beyond the control of the subscriber whether at the same or another location. However, if service is established at a new location and the subscriber later moves back to the old location, the Service Connection Charge is applied in connection with the re-establishment of service at the old location.</p>

Public Service Commission

F. DEFINITIONS OF SERVICE CONNECTION CHARGES: (Continued)

2. Switching Office Setup Charge: The charge applied for each customer request for work performed by the Telephone Company in connection with establishing or altering service arrangements within the central office switching and other related equipment.
3. Plant Facilities Connection Charge: The Charge applied for each customer request for work performed by the Telephone Company which requires Telephone Company personnel to visit the customer's premises. Such visits may be needed in connection with the initial placement of buried or aerial cable and/or the placement or change in placement of demarcation devices, over-voltage protectors and associated hardware.
4. Demarcation Point: The point of connection, provided and maintained by the telephone utility to which the inside station wiring becomes dedicated to an individual customer's use. For an individual customer dwelling, this point of connection will generally be immediately adjacent to the protector or the customer's side of the protector. The drop and block, including the protector, will continue to be provided by and remain the property of the telephone utility.

SERVICE CONNECTION CHARGES (Continued)

F. DEFINITIONS OF SERVICE CONNECTION CHARGES: (Continued)

- 2. Central Office Line Connection Charge: The charge applies for arranging an exchange line to provide service between the central office and the customer's premises. The charge applies for work including but not limited to:
  - (a) Making and changing connections in the central office.
  - (b) Making and changing connections in distribution facilities between the central office and the customer's premises, including necessary cross connection and line and station connection transfers.
- 3. Trip Charge: The charge that applies for a visit to the customer's premises to perform work, other than disconnect work, requested by the customer. When more than one visit is necessary, for Telephone Company reasons, to complete the work, only one Trip Charge applies. Additional charges apply for repeated trips requested or necessitated by the customer.
- 4. Premises Wiring Charge: The charge that applies for installing, moving or changing inside wire on the customer's premises to provide service at the location requested. The premises wiring charge applies for each location on the customer's premises where the customer desires inside wiring for either an item of terminal equipment to be connected or a suitable outlet to be placed as a provision for future connection of terminal equipment, where suitable inside wiring is not already in place. The premises wiring charge applies for either pre-wiring or post-wiring. One charge will apply for each telephone or other item of terminal equipment.
- 5. Jack Charge: The charge for installation of a Federal Communications Commission approved jack or other special connector at a customer's premises during initial installation of telephone service or as a replacement for an existing connector block. A Charge is made for each jack installed.
- 6. Station Handling Charge: The charge that applies for delivery to the subscriber premises by Telephone Company personnel and connecting or changing of a telephone or other item of terminal equipment. Telephones reconnected

A. GENERAL (Continued)

- 2. For definition of the term "Premises" see Definitions section under General Rules and Regulations, Part I.
- 3. Except as otherwise provided herein, the maximum charge for a move or change on the same premises is the sum of the termination charges for the existing service plus the service connection charges and any installation charges which would apply if the facilities involved in the move or change were installed anew or the services were established anew.

B. INSIDE MOVE CHARGES

- 1. An inside move is a transfer of telephone service or equipment from one location to another on the same premises where there is no interruption of the service other than is incident to the work involved.
  - (a) An inside move may be made in either of two ways, the circumstances in each case determining the procedure to be followed.
    - (1) By an actual change in location of the equipment from the old to the new location.
    - (2) By the installation of equipment at the new location and the subsequent disconnection and removal of the equipment at the old location. In such cases where a switchboard or dial branch exchange system is involved, the cost of the move includes the cost of installing equipment at the new location equal in capacity to that at the old location, the cost of removal of the equipment at the old location, and the cost of rearrangement of extensions of wiring.
- 2. Discontinuance of telephone service and equipment at one premises and their installation at another premises is not considered an "Inside move" and is provided for subject to the regular termination charges, and service connection charges and/or any installation charges that may be applicable.

LINK UP MISSOURI SERVICE CONNECTION PROGRAM

RECEIVED

A. General Regulations

NOV 19 1997

The Link Up Missouri Service Connection Program is a Federal Lifeline assistance program applicable to eligible residential subscribers, as defined below, and designed to promote subscribership to the telephone network among low income residential households.

1. Service Connection Charges, as set forth in this tariff\*, for initial installation of the main residential service access line, will be discounted at a rate of 50 percent, or \$30.00, whichever is less. These reduced charges shall be assessed only for a single residential telephone line per eligible household at the principle place of residence.
2. The customer may defer payment on up to \$200 of the above charges without interest for a period not to exceed one year. The deferred charges do not include any permissible security deposits required. Payments shall be equally paid over a twelve month period.
3. A qualifying low-income customer may choose with 1 or 2, or both 1 and 2 as described above.
4. Link Up assistance is available for a second or subsequent time only for a principal place of residence with an address different from the residence address where assistance was previously provided.
5. The premises at which the residence service is requested must be the applicant's principal place of residence.
6. There is only one telephone line serving the residence premises. The residence premises household (dwelling unit) shall consist of that portion of an individual house or building or one flat or apartment occupied by a single family or individuals functioning as one domestic establishment.
7. Link Up will not be furnished on a Foreign Exchange service.

Applicability of Link Up Missouri Service Connection Program

**MISSOURI  
Public Service Commission**

1. The Link Up Missouri Service Connection Program is a Federal Lifeline assistance program applicable to eligible residential subscribers, as defined below, and designed to promote subscribership to the telephone network among low income residential households.
  - a. Service Connection Charges, as set forth in this tariff<sup>1</sup>, for initial installation of the main residential service access line, will be discounted at a rate of 50 percent, not to exceed \$30.00. These reduced charges shall be assessed only for a single residential telephone line per eligible household at the principle place of residence.

2. Eligibility Requirements

The following requirements shall be used by the company to determine the eligibility of a subscriber for Link Up Missouri assistance.

- a. Subscribers must have lived at an address where there has been no telephone service for at least three months prior to the date that assistance is requested.
- b. Eligible subscribers must not have received this assistance within the last two years.
- c. Subscribers must not be a dependent for federal income tax purposes, unless the subscriber is more than 60 years of age.
- d. Subscriber is currently receiving MEDICAID/medical assistance payments from the State of Missouri, and has provided their Department of Social Services Client Number (DCN) to the Company.

**CANCELLED**

Of the eligibility requirements listed above, items a., b., and c., will be certified by the subscriber, and item d. will be State certified by the Department of Social Services.

KEY SYSTEMS

Installation charges for key systems as outlined under 1 below shall be equal to the Applicable Service Connection Charges plus a labor charge of \$13.50 per station.

Installation charges for key systems as outlined under 2. below and PABX Systems will be based on the criteria established under SPECIAL ASSEMBLIES OF EQUIPMENT OR SPECIAL PROJECTS given elsewhere in this Tariff.

- \*\* 1. Key System consists of a basic prewired mounting package designated as a Key Service Unit. It provides means for signalling a subscriber station associated with a Central Office or Private Branch Exchange, for holding that line and for indicating by means of a visual signal whenever the line is being called, held or is busy. It provides for originating and holding out calls, also, a common talking-dial selective signaling inter-communicating system. A Key System shall be provided with a minimum of four (4) stations.
