3. SWITCHED ACCESS SERVICE

3.1 GENERAL

Switched Access Service provides a physical or logical transmission path for the routing, transport, origination and/or termination of Customer traffic between End Users and a third-party's access tandem (or functional equivalent) by utilizing the services, facilities or equipment owned or controlled through contract or other means, by the Company.

T
T

3.2 TRAFFIC TYPE DESIGNATION

The Company affirms that all of its interconnected VoIP traffic either originates from or terminates to a VoIP end user and is therefore, VoIP-PSTN traffic, within the meaning of FCC regulations governing such traffic (FCC 11-161).

Issued: March 12, 2014

Effective Date: April 14, 2014

3. SWITCHED ACCESS SERVICE

3.3. SWITCHED ACCESS RATE CATEGORIES (CONT'D)

3.3.2 TANDEM TRANSPORT

The Tandem Transport service rate category provides for the transmission of communications between an access tandem, or the functional equivalent thereof, and the Company's End Office, Trunk Gateway, or functionally equivalent facility, service or location. Individual rate elements for this service include:

A. Tandem Switched Transport Termination

The Tandem Switched Transport Termination rate element includes the non-distance sensitive portion of the Tandem Transport service and is assessed on a per access minute-of-use basis.

B. Tandem Switched Transport Facility

The Tandem Switched Transport Facility rate element includes the distance sensitive portion of Tandem Transport and is assessed on a per access minute-of-use, and per mile basis. Transport Mileage will be calculated based on the airline mileage between the access tandem (or functional equivalent) and the Company's End Office, Trunk Gateway, or functionally equivalent location within the applicable LATA.

C. Tandem Switching

The Tandem Switching rate element applies on a per minute-of-use basis for the switching functions provided when the call passes between two other carriers.

D. Shared/Common Multiplexing

The Shared/Common Multiplexing rate element includes providing the capability of channelizing Tandem Transport facilities to individual services that require a lower capacity or bandwidth and is assessed on a per minute-of-use basis.

E. Interconnection Charge

The Interconnection Charge recovers the costs associated with tandem transport that are not recovered by the tandem switched transport termination or tandem switched transport facility rate elements and applies to tandem switched transport access minutes on a per minute-of-use basis.
