Q.guaranteed - FramePlus

FramePlus frame relay service is a public, fast-packet data network offering. Customers access FramePlus at Qwest's closest Points of Presence (POPs). Within the POP, Qwest designs and installs Network Node connections on the FramePlus network. A Network Node is comprised of a Port Connection and Permanent Virtual Circuits (PVCs) that define the connections between customers' ports. Qwest dynamically allocates capacity across these logically assigned PVCs, supporting multiple customer data networks.

FramePlus supports a variety of simultaneous data applications over a single integrated facility. It is optimal for applications requiring transmission between multiple locations that need high speed connectivity with low latency or delay.

\* An "Operator Surcharge" applies when the caller: (1) enters nothing, defaults to an operator and requests the operator to complete the call; or, (2) has the ability to complete the dialed digits of their call, but chooses to dial the appropriate operator code only (e.g., 0-, 00, 10432), and requests the operator to complete the call. This surcharge will be in lieu of the existing per call surcharge. In addition, this surcharge will apply to all month-to-month customers as well as new term customers who subscribe to Q.guaranteed. Customers who are currently on term plans will not incur this surcharge until their contracts renew.
