LIFELINE SERVICE

A. General Regulations

Lifeline Service is a government benefit program established by the Federal Communications Commission (FCC) and Missouri Public Service Commission (Commission) and is available to qualifying low-income subscribers for certain residential telecommunications services. The terms and conditions of Lifeline service, including monthly discount amounts, are set forth in rules established by the FCC and Commission and available at the Company's office.

In addition, the terms and conditions of Lifeline service are available on the Company's website as follows: <http://www.pvbroadband.com/Lifeline.html>.

Disabled Service

Disabled Service is a government benefit program established by the Missouri Public Service Commission (Commission) as part of the Missouri Universal Service Fund (MoUSF). It is a residential retail service that offers a qualifying disabled customer reduced charges for certain telecommunications services. The terms and conditions of disabled service, including monthly discount amounts, are set forth in rules established by the Commission and available at the Company's office.

In addition, the terms and conditions of Disabled Service are available on the Company's website as follows: <http://www.pvbroadband.com/Lifeline.html>.

Service Restrictions

NOV 19 1997

Toll Access Restriction

MO. PUBLIC SERVICE COMMISSION

- A. Toll Access Restriction provides a means of restricting access to the Long Distance Message Telecommunications Network. Available to the customer is the option of restricting 1+ calls and 0+ and 0- (operator handled) calls, except 8XX IN-WATS.
- B. Restriction of 0+ and 0- operator handled calls prevents the customer from dialing a long distance telephone number or telephone operator for any purpose including for emergency or telephone assistance purposes. The Company shall not be liable to the customer or any third party for any and all claims, losses or damages caused by the restriction to any toll service.
- C. Customers must apply in writing for the establishment of Toll Access Restriction.
- D. The appropriate non-recurring charges will apply to establish service.
- E. Rates

The rate for this service will be charged on a monthly basis.

General Services

*Custom Calling Service

MO. PUBLIC SERVICE COMM

A. General

1. Custom Calling Service consists of one or more of the following features which provide special kinds of customer-controlled communications features on individual service lines. Custom Calling Service is available only through central offices which, at the Company's option, are appropriately equipped. Operating specifics may vary by central office equipment type but can be described generally as:
 - a. Call Waiting--Provides a signal to a customer using the telephone that another call is being attempted to his number. The customer can "hold" the original call to answer the incoming call.
 - b. Cancel Call Waiting--Allows customer to dial an access code to cancel call waiting for the duration of the call in progress.
 - c. Call Forwarding--Permits all calls directed to a customer number to be routed on to another dialable number, predetermined and activated by the customer.
 - d. Remote Call Forwarding--A customer can have calls forwarded to a directory number in another toll area. Normal Direct Distance Dialing toll charge will be applied to your bill if call is answered at the forwarded number.
 - e. Call Forward Remote Access--Supports call forwarding activation and deactivation from a location other than the subscriber's home station.

RECEIVEDGeneral Services continued**SEP - 2 1997****MO. PUBLIC SERVICE COMM**

- f. Three-Way Calling--Allows for the addition of a third number to a connection made between two numbers without the assistance of a company operator. (See Note)
- g. Speed Calling-Short List--Permits customer calling to other telephone numbers through the dialing of a code rather than an entire telephone number. Capacity is 8 numbers dialable by speed calling code.
- h. Speed Calling-Long List--Same as Item (g) above except capacity is for 30 numbers dialable by speed dialing code.
- i. Ring Again--Allows a subscriber who reaches a busy station to receive a special ring indicating that a previously busy line has become idle within a prescribed time period.
- j. Teen Service--Allows a customer to have two directory numbers on the same single-party line so that a subscriber can receive calls dialed to separate numbers without installing a second line.
- k. Line Hunting--An arrangement which allows for the selection of the end user's next available line when the line associated with the called number of the end user is busy.

Note: Transmission on calls forwarded and three way calling may vary upon the distance and routing required to complete such calls; therefore the normal grade of end to end calling cannot be guaranteed on such calls.

CLASS Service

Custom Local Area Signaling Services (CLASS) are a set of advanced call management features which will only be offered on one-party service and will not be activated on multi-party lines, certain FX lines, and pay per call telephone lines. CLASS features may be offered in conjunction with Enhanced Business Service (EBS) and consist of one or more of the following features:

A. Feature Descriptions:

1. Call Return

Call Return permits the subscriber to place a call to the telephone number associated with the most recent incoming call whether or not the call was answered or the telephone number is known by the subscriber. If the called line is available, the call is immediately completed. If the called line is not available, a queuing process, which may last up to thirty minutes, takes place. When both lines are available, the calling subscriber is notified via a distinctive ring that the network is ready to place the call. When the subscriber picks up the telephone, the call is automatically placed.

2. Automatic Recall

Automatic Recall allows the subscriber to automatically redial the last number dialed from the subscriber's telephone regardless of the completion status of the last number dialed. If the called line is available, the call will be placed immediately. If the redialed line is busy, the network will queue the request for thirty minutes and process the call when both the called and calling party lines are idle. When the call can be completed, a distinctive ring will be provided to the caller's line to alert the subscriber that the requested callback is ready. When the subscriber picks up the telephone, the call is automatically placed.

This feature cannot be activated for calls originating from a line that is forwarded.

REC'D OCT 25 1999

A. Feature Descriptions: (Cont'd)

3. Calling Number/Name Delivery

Calling Number/Name Delivery (also known as "Caller ID" or "Caller ID Deluxe")¹ allows the subscriber, with the use of a display phone or adjunct display device, to view the directory number of an incoming call before answering. During the time that the incoming call is placed, the calling number is forwarded from the central office to a compatible customer provided Customer Premises Equipment (CPE) Display Unit associated with the customer's local exchange service. The calling telephone number is then delivered to the display device during the first silent interval of ringing.

The calling number is also not available when incoming calls have been handled by an operator or charged to credit cards. Number delivery for calls originating from a PBX will display the main PBX number only. If the caller's number is not part of the CLASS network, is a multi-party line, or is blocked, the number will not be displayed.

Subscription to Calling Number/Name Delivery on EBS access lines is only available on the customer group level and not on a per line basis. Rates and charges, however, will apply on a per line bases.

Telephone numbers transmitted via Calling Number/Name Delivery may not be sold or given to another party without the caller's consent. Calling Number/Name Delivery information may only be used for: a) routing or completion of calls, b) billing of calls, c) account management purposes, d) services directly related to the call or transaction, e) verification of calling party identity and f) marketing products or services that are directly related to those previously acquired by the customer from the number delivery services subscriber. Calling Number/Name Delivery customers failing to comply with any of these conditions will have their service terminated.

¹ Caller ID refers to delivery of the calling number only while Caller ID Deluxe refers to delivery of the calling party name as well as the number.

GENERAL SERVICES

Missouri Public
Service Commission

CLASS Service (Cont'd)

REC'D OCT 25 1999

A. Feature Descriptions: (Cont'd)

4. Calling Number/Name Delivery Blocking

Calling Number/Name Delivery Blocking allows the subscriber to prevent the delivery of the subscriber's directory number/name on a per call basis (per call block) or per line basis (per line block.). Per line block is available only to the agencies specified below.

Per call block will block the delivery of the subscriber's number/name for one call only and may be activated by dialing an activation code (*67 from a Touch-Tone telephone or 1167 from a rotary telephone) immediately prior to placing a call. The activation code will initiate per call block, which is available at no charge.

If the calling party activates blocking, the directory number/name will not be transmitted across the line. Instead, Calling Number/Name Delivery customers will receive an anonymous indicator. This anonymous indicator notifies the Calling Number/Name Delivery customer that the calling party has elected to block the delivery of the telephone number/name.

Per line block will automatically block delivery of the subscriber's telephone number/name on all calls. Line blocking for the delivery of the calling number/name is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers, where an executive officer of the agency registers with the Company a need for blocking: (a) private, nonprofit, tax-exempt, domestic violence enforcement agencies and (b) federal, state and local law enforcement agencies. The calling number/name will not be transmitted from a line equipped with this capability.

The blocking of the directory number/name will not be provided on calls originating from pay per call telephone lines.

REC'D OCT 25 1999*

CLASS Service (Cont'd)

A. Feature Descriptions: (Cont'd)

5. Customer Originating Trace

Customer Originating Trace enables the customer to initiate an automatic trace of the incoming call received, regardless of the time lapse since that call, providing there have been no intervening outgoing calls. To initiate the trace, the customer must dial an activation code, then dial a "1". Upon activation by the customer, the network automatically sends a message to the Telephone Company indicating the calling number, the time the call was received, and the time the trace was activated. The customer using this feature would be required to contact the local telephone company business office for further action. The customer is not provided the traced number.

If the customer makes or receives another call before activating the trace, or if the Call Waiting feature (described in other sections of this tariff) is activated prior to activating the trace, the Customer Originated Trace feature will not record the correct number. Customer Originated Trace will trace only those calls which are originated from a location served by the CLASS network. A separate charge applied to each successful activation of this feature.

6. Distinctive Ringing

Distinctive Ringing provides a distinctive ringing pattern to the subscribing customer for specific telephone numbers. The customer creates a screening list of telephone numbers through an interactive dialing sequence. When a call is received from one of the predetermined telephone numbers, the customer is alerted with a distinctive ringing pattern. Calls from telephone numbers not included on the screening list will produce a normal ring.

If the called customer subscribes to Call Waiting (described in other sections of this tariff) and the call arrives while the line is busy, the Call Waiting tone has the same distinctive patterns. For calls from a dial tone line with multi-line hunting, the distinctive signal is only produced when the main telephone number has been entered in the screening list.

CLASS Service (Cont'd)

REC'D OCT 25 1999

A. Feature Descriptions: (Cont'd)

7. Selective Call Acceptance

Selective call acceptance provides the customer the ability to select (a maximum of 12) customer telephone numbers from which calls are to be received. Through an interactive dialing sequence, the customer creates a screening list of telephone numbers in the CLASS Network. When a call is placed to the customer's number from a number on the screening list, the call is completed. When a call is placed to the customer's number that is not on the screening list, the calling party receives an announcement indicating that the call cannot be completed to the called party at this time.

For calls from a line within multi-line hunting, the call is completed only when the main telephone number has been entered in the screening list.

8. Selective Call Forwarding

Selective Call Forwarding allows the customer to transfer selected calls to another telephone number. A screening list of numbers is created by the customer and placed in the network memory via an interactive dialing sequence. This list can only be created from CLASS serving area telephone numbers. Only calls from those telephone numbers on the screening list may be forwarded to the designated telephone number.

For calls from a line within multi-line hunting the call is selectively forwarded only when the main telephone has been entered in the screening list.

As with call forwarding options discussed below, if the forwarded number is a toll, then appropriate toll charges will be billed to the customer initiating the call forwarding procedure.

9. Selective Call Rejection

Selective Call Rejection provides the customer the ability to prevent incoming calls from certain telephone numbers. Through an interactive dialing sequence, the customer creates a screening list of telephone numbers in the CLASS network. When a call is placed to the customer's number from a number on the screening list, the calling party receives an announcement indicating that the call cannot be completed to the called party at this time.

For calls from a line within multi-line hunting the call is blocked only when the main telephone number has been entered in the screening list.

10. Call Forward – Busy

Call Forward – Busy provides the ability to forward calls to a selected number if the line is busy. The customer through dialing specified programming codes can activate this feature and set the forwarding number.

11. Call Forward – No Answer

Call Forward – No Answer provides the ability to forward calls to a selected number if there is no answer. The customer through dialing specified programming codes can activate this feature and set the forwarding number.

12. Controlled Toll Access

Controlled Toll Access provides the ability to restrict 1+ calling. An access code must be dialed before 1+ calls will be completed

CLASS Service (Cont'd)

B. General Regulations:

1. CLASS features can be provided on a stand alone basis or may be enhanced by use with Custom Calling service features as described in other sections of this tariff.
2. CLASS features are provided from specially equipped Telephone Company Central Offices and enable customers to access various features by dialing a specific code on either a rotary-dial or Touch-Tone calling basis.
3. The customer of record will be responsible for all rates and charges associated with the CLASS features as described in Rates and Charges. The customer of record will be charged for all features activated on his/her service and charged the applicable monthly subscription rate for each line on which a CLASS feature is provided.
4. CLASS features are available to customers who have rotary or Touch-Tone service for calls within the CLASS Calling Service area. Customers with rotary service can access CLASS features by dialing "11" instead of "*".
5. A CLASS customer may employ available CLASS features only under the following conditions:
 - When both the CLASS customer and the other party involved in the call are served from the same central office, even if the other party does not subscribe to a CLASS feature.
 - When both the CLASS customer and the other party involved in the call are served from different central offices which are linked by facilities that can handle the delivery of the calling number, even if the other party does not subscribe to CLASS.

CLASS Service (Cont'd)

B. General Regulations (Cont'd)

6. Customer Originated Trace will be billed the activation charge shown in the Rates and Charges section only when the attempt to trace and record the calling telephone number is successful. The results of a successful trace will only be provided to legal authorities with proper authorization. The Telephone Company will not be liable for damages if, for any reason, an attempt is not successful.
7. The liability of the Telephone Company is as specified in the General Rules and Regulations section of this tariff. In addition to the provisions of the General Exchange Tariff, the calling party of customer releases and holds the Company harmless from any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a Calling Number/Name Delivery of a telephone number which the calling party has requested to be omitted from the telephone directory or has requested not to be disclosed to any person.
8. CLASS features will only be offered with one-party service, compatible PBX equipment and EBS. CLASS features cannot be activated for multi-party lines, certain FX line, COCOT lines, and pay per call telephone lines.

Calling Number/Name Delivery is the only feature currently available on PBX equipment.

Selective Call Acceptance, Selective Call Forwarding, Selective Call Rejection and Distinctive Ringing are not available on EBS lines.

9. CLASS features will only be offered in exchanges which meet the necessary technical specifications. In addition, the Company reserves the right to offer CLASS only where technologically feasible.

C. Nonchargeable CLASS Features:

1. Calling Number/Name Delivery Blocking - Per Call: temporarily allows the subscriber, when placing outgoing calls, to label his or her telephone number as private, thus restricting its availability to the called party. This feature is accessed by dialing (*67), or 1167 for rotary phones, before dialing the phone number of the called party.
2. Called Number Delivery Blocking - Per Line: allows the subscriber, when placing outgoing calls, to permanently label his or her telephone number as private, thus restricting its availability to the called party. This service is available only to established shelters of domestic violence intervention agencies, state and county departments of human resource shelters, law enforcement agencies and other such agencies, their employees and volunteers, or individuals where it is certified that the personal safety of these employees or individuals will be jeopardized without Per Line Blocking.

Integrated Services Digital Network

REC'D OCT 25 1999*

A. Overview

Today's communications network involves many special networks, physical transmission facilities, and controllers of various types, including computer. ISDN provides integrated access to circuit-switched networks in which all the various needs of the independent networks can be accommodated by a single transport network that handles both voice and data traffic. This single transport network is designed to provide a single communication interface for the customer so that terminal equipment can be plugged into an outlet as easily as a plain old telephone service (POTS) telephone is plugged in.

ISDN is an integrated digital network providing end-to-end connectivity, and supporting a wide range of services. These services include voice and non-voice (i.e., data), accessed by users through a set of standard multipurpose user-network interfaces.

Typically two interfaces define the connectivity between switching equipment and customer equipment:

Basic Rate Interface (BRI)
Primary Rate Interface (PRI)

Both interfaces allow voice and data services simultaneously, and are designed to support both circuit-switched connections.

B. Definitions

B (Bearer) Channel

An ISDN B-Channel is a bi-directional synchronous channel capable of supporting digitized circuit-switched voice (CSV) and/or data (CSD) communications at speeds up to 64 Kbps, between the customer's premises and the Company's central office.

B-Channel Circuit-Switched Data

Circuit-switched data provides the capability of placing data calls over the public switched network. Information is transmitted in the same manner as digitized voice. Like a voice call, a circuit-switched data call ties up network/system resources for the duration of the call. Calling Line Identification functionality is provided on circuit-switched data calls.

B-Channel Alternate Circuit-Switched Voice/Data

Allows the user to originate and receive either voice calls or data calls over a single circuit-switched B Channel, but not simultaneously.

BRI - Basic Rate Interface

The ISDN BRI combines two 64Kbps B channels and one 16Kbps D channel (2B*D) over one Digital Subscriber Line (DSL).

Channel

The electrical path provided by the Company between two or more points for the transmission of voice or data communications.

Missouri Public
Service Commission

FILED NOV 25 1999

GENERAL SERVICES

Missouri Public
Service Commission

Integrated Services Digital Network

REC'D OCT 25 1999 *

B. Definitions (Cont'd)

Clear Channel Capability

The capability to transport 64 Kbps over a channel with no constraint on the quantity or on the sequence of bits. When a clear channel call is switched through non-ISDN offices, the call may be subrated to 56 Kb digital or analog service

D (Delta) Channel

The Packet-switched channel on a DSL at 16 Kbps, or a PRI at 64Kbps that carries signaling messages and packet-switched user data.

D-Channel Packet-Switched Data

An X.25 logical circuit which allows users to originate and receive X.25 data calls over their ISDN D-Channel. Multiple data calls can be active simultaneously on a single D-Channel.

Device (also referred to as Terminal)

An ISDN device is an ISDN telephone or computer with ISDN interface equipment that is attached to an ISDN line. An ISDN device is classified as customer premises equipment (CPE). It is the responsibility of the customer to obtain and operate the ISDN device.

DSL – Digital Subscriber Line (See BRI or PRI Descriptions)

Integrated Services Digital Network (ISDN)

ISDN provides end-to-end digital communications and gives the ability to transmit voice and data over the same telephone line simultaneously. A customer can send information from a computer and talk to the person on the other end of the line at the same time. This functionality is provided by channelized transport facilities.

NT-1 Interface

Equipment installed at the customer's location that converts data in ISDN line format to a format that can be utilized by the customer's ISDN telephones and ISDN computer interface equipment. One NT-1 is required per SLI. The NT-1 may be a separate piece of equipment, or may be integrated into the ISDN telephone set or computer interface equipment. The NT-1 Interface is classified as network terminating equipment, and is the property of the Company.

Primary Directory Number (PDN)

The first telephone number that is assigned to one DSL. Only one PDN is allowed on a DSL.

PRI-Primary Rate Interface

The ISDN PRI combines 23 b-channel and one 64Kbps D-Channel on a single line. Also called the extended Digital Subscriber Line.

Secondary Directory Number (SDN)

Telephone numbers that can be dialed by customers that are assigned to one DSL in addition to the first telephone number

FILED NOV 25 1999

GENERAL SERVICES

REC'D OCT 25 1999

Integrated Services Digital Network

C. Service Description

ISDN is offered in two different channel structures. The first is Basic Rate Interface (BRI), and the second is Primary Rate Interface (PRI). Both use channels called "B" or Bearer channels and "D" or Delta channels. The B channel provides a transmission path for user information, such as voice and data, while the D channel carries signaling information and packet data.

Each B channel is a 64 kilobit per second (Kbps) clear channel connection. The D channel is a 16 Kbps packet channel that is used to send and receive call set-up and signaling messages to the terminal equipment (customer premises equipment), and carry limited packet data.

1. BRI – Basic Rate Interface

The BRI normally includes two B channels and one D channel (2B*D), however it can be configured to only include a D channel, or one D channel and one B channel. The BRI supports the following:

- Simultaneous data and voice communications
- Data channel rates up to 64 Kbps
- Message-based signaling, separate from the voice/data channels
- Reliable packet switched data transmission.

B-Channel

- 64 Kbps per channel
- Voice or data
- Circuit or packet switched

D-Channel

- 16 Kbps
- Signaling messages and packet data
- Packet-switched
- Defined for customer usage

2. PRI – Primary Rate Interface

The basic PRI includes twenty three B channels and one D channel (23B*D), However it can be configured to include multiple D channels, and up to a maximum of 479 B channels. The PRI supports the following:

GENERAL SERVICES

Missouri Public
Service Commission

Integrated Services Digital Network

REC'D OCT 25 1999

C. Service Description (Continued)

2. PRI – Primary Rate Interface (Continued)

- Non-Facility Associated Signaling (NFAS) – allows multiple DSI facilities to be controlled by a single PRI D channel.
- PRI D-Channel Backup (DCBU) – this capability can only be assigned to a NFAS group and allows a customer access to the network even if the “active” D-channel were to fail. This is accomplished by transferring signaling information to the “standby” D-channel
- Fractional DSI Switching (N x DS0) Via PRI – allows a multi-bearer service capability by switching multiple rates of 64Kbps (i.e., N X DS0 – where N is greater than 2 and less than or equal to 24).
- Dedicated – the entire trunk group is dedicated to a specific service (data, 800 service, DID, etc.)
- Call-by-call – Different types of service can be included in the same trunk group (IXC access, OUTWATS, DOD, etc.) Any call can be used for any service as long as there are available facilities (both B channels and service type) for the call.

B-channel

- 64 kbps per channel
- Voice or data
- Circuit-switched
- Up to 479 channels per PRI (using multiple physical connections) defined as required for customer usage where facilities permit.

D-channel

- 1 is required, 2 if optional back-up selected and more than one physical link is used.
- 64 Kbps per channel
- Control and signaling messages

PRI ISDN is usually provisioned using one or more T-1 facilities

D. Terms and Conditions

1. General

- a. The customer or customer's authorized agent will be responsible for the procurement of associated customer designated premises equipment and will ensure compatibility with the ISDN digital switch serving the customer.
- b. Reserved for Future use
- c. The Company shall terminate ISDN Service at the Company network interface (NT-1).
- d. Should any change in CPE or inside wiring not owned by the Company require the Company to redesign ISDN service, the customer shall reimburse the Company for all costs incurred by the Company in making such a change. Should ISDN service fail due to CPE, inside wiring (including riser cable) not owned by the Company, or power failure the responsibility for failure shall be solely that of the customer and the Company shall have no liability of any kind.
- e. The customer is responsible for placement, installation, operation, maintenance, repair and replacement of all CPE and inside wire not owned by the Company that the customer uses in connection with this service. CPE and premises wiring must be compatible with the Company's provision of ISDN Service. The customer is responsible for programming all features and functions into the ISDN CPE. The company will perform this service on a Time and Charges Basis at the customer's request.
- f. If an ISDN service interruption, disconnection, error, performance failure, or out-of-service condition occurs, and lasts for more than 24 consecutive hours after the customer notifies the Company of the condition, an out-of-service credit will be applied to the customer's bill. Should the condition be caused by actions of the customer, CPE, inside wiring and/or interface no credit will be applied. This service will be based on a 30 day month and shall be calculated by dividing the monthly rate for the service affected by 30 days and then multiplying that daily rate by the number of days, or major fraction thereof, that the service was interrupted. This will be the customer's sole remedy.
- g. The minimum service period for ISDN Service is six months. If a customer terminates service prior to the completion of the greater of six months of his/her contract period, the customer shall remain liable for payment of the contract period or six full months of service as appropriate. PRI service may be purchased at a discount by signing a 3 or 5 year contract.

D. Terms and Conditions (Cont'd)

2. Availability

- a. The rates and charges for ISDN Service are applicable only to customers in those areas that have been designated by the Company as having ISDN Service available. Customers in those areas where the Company has not designated that ISDN service is available may be eligible to obtain ISDN service, subject to Company approval, at rates and charges determined on an individual case basis (ICB). The Company reserves the right not to provide ISDN Service to any location in which it is not equipped to do so.
- b. ISDN Service may be provided to customers from a central office other than their normal serving office depending on the availability of facilities.
- c. Some services are not available and/or compatible with ISDN.

3. Indemnification

- a. It is the customer's responsibility to indemnify and hold harmless the Company against any and all claims, losses, liabilities, damages and lawsuits brought by any nonparty and arising, in whole or in part, out of the customer's material breach of this tariff. Indemnification shall include, but is not limited to, costs and attorney's fees.
- b. The customer is responsible for the content of communications. Where the customer's negligence or wrongful actions in using CPE, inside wire not owned by the Company, or customer's communications result in any claim or legal action brought by a nonparty, the customer shall indemnify and hold the Company harmless.

4. Protection of the Network

- a. The Company has the right and option to check the output of any equipment used in the transmission of signals, to or from the customer premises, for this service. This includes Company-provided facilities or other companies' facilities used in connection with the provision of ISDN capabilities, such as customer-provided equipment.
- b. The Company will notify the customer of any deviation from the authorized transmissions or specifications established in provision of the service.

- * Indicates new rate or text
- + Indicates change

**Missouri Public
Service Commission**

FILED NOV 25 1999

GENERAL SERVICES

REC'D OCT 25 1999 *

Integrated Services Digital Network

D. Terms and Conditions (Cont'd)

4. Protection of the Network (Cont'd)

- c. Upon notification by the Company that unauthorized transmissions are present due to customer equipment or facilities, the customer or customer's authorized agent will correct the situation on an expeditious basis. If the correction is not forthcoming on an expeditious basis, the Company may, at its sole discretion, disconnect service to protect the network. The Company shall not be liable for and disclaims liability for losses which might be incurred as a result of disconnecting the service and disclaims any and all implied warranties, including, without limitation, warranties of merchantability and fitness for a particular purpose. With respect to such equipment or service, the Company shall not be liable for any incidental or consequential damages, including but not limited to loss, damage, or expense directly or indirectly arising from the customer's use of or inability to use this service or equipment, either separately or in combination with other services or equipment.

E. Standard Features and Functions

Description

Two sets of features are being offered with ISDN Service; one set for voice and one set for data. Because of CPE selected by the customer or the customer's agent, some of the features offered may function differently, may not be available, or may be required to be offered via an access code. The standard features and functions support two devices per Digital Subscriber Line (DSL). Any ISDN feature may be activated by depressing a button on the ISDN set or by dialing an access code. The customer can assign how each feature is activated. The feature sets are as follows:

1. Voice Features

- a. Analog Call Appearance - enables analog station users to share their call appearance on a DSL ISDN Service user's device. All Analog Call Appearances must be provisioned from the same serving central office as the DSL ISDN Service. One appearance, per number, per device is allowed. Some analog services are not compatible with DSL ISDN Service.
- b. Additional Call Offering - allows the user to be notified of an additional call when the telephone set is busy. Similar to conventional Call Waiting, multiple incoming calls to a directory number or secondary directory number (if purchased) can be terminated to the telephone.
- c. Call Appearance - is the position on the device to which numbers are assigned. A Directory Number can be shared by more than one ISDN device. The quantity and/or position of Primary Directory Number (PDN), Secondary Directory Numbers (SDN), Analog Call Appearance (ACA) and Shared Call Appearances (SCA) are limited by the configuration of the ISDN CPE. A total of four call appearances per device are included in the standard package.

E. Standard Features and Functions (Cont'd)

1. Voice Features (Cont'd)

d. Call Exclusion - This feature has two options:

Automatic Exclusion - allows a user to restrict other users that share a Directory Number from bridging onto an active call or retrieving a held call. This option is automatically invoked whenever the user goes off hook to receive or place a call.

Manual Exclusion - allows a user to restrict other users, which share a Directory Number from bridging onto an active call or retrieving a held call. This option is activated by pressing a feature button or dialing a code before dialing a call or during a call.

e. Call Forwarding Busy Line - All Calls (Pre-programmed) - allows all calls to a busy Primary Directory Number to be forwarded to another number.

f. Call Forwarding - Don't Answer (Pre-programmed) - allows all calls terminating to an idle Primary Directory Number to be forwarded to another number when the called PDN does not answer after a predetermined number of seconds.

g. Call Forwarding Variable - All Calls - allows a user to forward all Primary Directory Number calls to another number by pressing the Call Forwarding-Variable feature button or dialing a code. The forward-to number is customer changeable. The user must activate or deactivate the forwarding function by using either an access code or a feature button. The standard configuration provides for this feature on a feature button.

h. Call Hold - allows the user to place a call on hold by depressing a button or dialing a code.

i. Call Transfer - enables the user to transfer a call to a third party by depressing a button or dialing a code.

E. Standard Features and Functions (Cont'd)

1. Voice Features (Cont'd)

- j. Clear Channel Capability - a characteristic of the transmission paths on the B Channels that allows the full bandwidth of 64 Kbps to be available to the customer. It is also possible to bridge two B Channels together to achieve data transmission speeds of 128 Kbps. However, ISDN interconnection to or through non-ISDN equipped central offices will potentially be subjected to analog transmission or sub-rated to 56 Kbps per channel.
- k. Conference (3 way)- allows a user to establish a three-way conference call by depressing a button or dialing a code.
- l. Display - Provides the ISDN terminal a display of the time and date, calling number, call appearance identification, called number, incoming call identifier and feature activation operation.
- m. Drop - allows a user to drop the last party added to a conference call or to disconnect a two-party call by depressing a button or dialing a code.
- n. Intercom - allows a user to establish a dedicated priority call to any other station that is a member of the same intercom group within the same central office. Special alerting, depending on CPE, is provided for an incoming intercom call. Intercom is only available with multi-line service.
 - 1) Auto Intercom - when deployed with multi-line service, allows two members to be part of an intercom group, which enables intercom calls to be completed by depressing the feature button. Dialed digits are not required.
 - 2) Dial Intercom - allows a user to establish a call to any other station that is a member of the same intercom group. This is done by pressing the Intercom button and dialing one or two digits. Special alerting, depending on CPE, is provided for an incoming Intercom call.

E. Standard Features and Functions (Cont'd)

1. Voice Features (Cont'd)

- o. Primary Directory Number (PDN) - Each ISDN line is assigned one PDN.
- p. Ringing Options - allows ISDN customers to establish flexible call handling arrangements for answering incoming calls that terminate on the shared Call Appearances of a Directory Number. The ringing options available on a per-device basis for a shared Directory Number are as follows:
 - 1) Abbreviated Ringing - assigned for a user who wants the device to begin ringing immediately for an incoming call and to stop ringing after "N" seconds.
 - 2) Delayed Ringing - assigned for an incoming call to be delayed for "N" seconds, however, the Call Appearance indicator or "status" lamp begins flashing immediately.
 - 3) No Ringing - assigned for a user who desires no ringing for an incoming call that terminates on a Call Appearance of that Directory Number.
 - 4) Normal Ringing - Ringing begins immediately for an incoming call and continues until the call is forwarded, answered, or abandoned.
- q. Secondary Directory Number (SDN) - is any directory number other than the Primary Directory Number assigned to an ISDN device. If more than one SDN is assigned to a device, additional charges will apply.
- r. Shared Call Appearance - allows several devices to share one or more call appearances for a particular directory number. Origination of and termination of calls on one terminal will affect all terminals sharing the call appearance. This service is only available with multi-line ISDN service.
- s. Speed Calling - permits a user to dial pre-programmed numbers using fewer digits than normally required. A speed call list allows for up to thirty preprogrammed numbers per terminal.
- t. Standard Configuration Group - the standard arrangement which associates a button of an ISDN station set to a feature.
- u. Visual Message Waiting Indicator - is available on PDNs and notifies the user of a message waiting by lighting a lamp on the customer's phone. Messages may be retrieved by calling the message service center or by accessing a voice mail system. The feature is dependent on the serving ISDN equipped central office and the customer's equipment

* Indicates new rate or text

+ Indicates change

Missouri Public
Service Commission

FILED NOV 25 1999

GENERAL SERVICES

Integrated Services Digital Network

REC'D OCT 25 1999

E. Standard Features and Functions (Cont'd)

2. Data Features

- a. Call Forwarding Busy Line For Circuit-Switched Data - permits all circuit-switched data calls attempting to terminate to a busy Primary Directory Number to be redirected to another customer-specified directory number. A busy line condition exists when a circuit-switched data B-channel is unavailable. This feature can either be assigned to the user on an active basis or it can be assigned to a feature button or feature code that can be activated or deactivated by the user. If the feature is assigned to a feature button or feature code, the forward-to directory number can be changed by dialing an access code and programming the new forward-to directory number.
- b. Call Forwarding Don't Answer For Circuit-Switched Data - permits all circuit-switched data calls attempting to terminate to an idle Primary Directory Number to ring a specified number of seconds prior to being forwarded to a previously specified directory number. This feature can either be assigned to the user on an active basis or it can be assigned to a feature button or feature code that can be activated or deactivated by the end user. If the feature is assigned to a feature button or feature code, the forward-to directory number can be changed by dialing an access code and programming the new forward-to directory number.
- c. Call Forwarding Variable-All Calls For Circuit-Switched Data - allows circuit-switched data calls attempting to terminate to a line to be redirected to another specified line. The user must activate or deactivate the forwarding function by either using a feature code or a feature button. If the feature is assigned to a feature button or feature code, the forward-to directory number can be changed by dialing an access code and programming the new forward-to directory number.

3. D-Channel Packet-Switched Data Features

- a. X.25 Flow Control Parameter Negotiation - permits negotiation on a per-call basis of the flow control parameters associated with a given virtual call, such as packet size and window size for each direction of data transfer. The data window size and the maximum packet size is negotiated automatically during an X.25 data call.
- b. X.25 Logical Channels - virtual circuits rather than physical circuits are used to establish packet switch calls. When a virtual circuit is established, a logical channel is assigned at the CPE and the switch for the duration of the call. A virtual circuit does not use any capacity of the facility unless data is actually being transferred. Two logical channels are provided per DSL.
- c. X.25 Throughput Class Negotiation - permits negotiation on a per-call basis of the throughput class for each direction of data transfer associated with a virtual call. The data terminal can negotiate the throughput class for an X.25 data call.

OPTIONAL SERVICES AND FEATURES

5. Optional Services and Features

Missouri Public
Service Commission

REC'D FEB 08 2000

A. Digital Channel Service (DCS)

1. General

- a. Digital Channel Service (DCS) is an optional packaged service arrangement that is used in conjunction with a customer's business trunks. It packages these trunks with a T-1 transmission facility.
- b. DCS facilities provide an intraexchange connection between a customer's premises and the local serving central office. DCS is based on DS1/DS0 technology, also known as T1 service. This service arrangement uses the DS1/DS0 architecture to provide a 1.544 Mbps connection. The customer is then provided the capability to transmit voice and/or data over channels of that digital facility. Each DS1 facility provides up to 24 DSO channels.

2. DCS Packaging

- a. DCS service arrangement connects a Telephone Company central office switch to Customer Premises Equipment (CPE). Depending on the application, that CPE might be a PBX, a router, a multiplexer, etc. Each DCS provides up to 24 channels.
- b. Digital Channel Service packages the following components:
 - Digital Facility – includes the DS1 facility.
 - Exchange Services (per channel) – defines how each channel is to be used.

3. Technical Specifications

- a. Transmission Specifications – this facility is based on a 1.544 Mbps DS1 carrier (T1 facility).
- b. Customer Premise Equipment and Facilities – compatible customer premise equipment is required for DCS. The company shall not be responsible if changes in any of the equipment, operations, or procedures of the Telephone Company used in the provisioning of DCS render any facilities provided by the customer obsolete or require modification of such equipment or system, or otherwise affect its use or performance.

5. Optional Services and Features (Continued)

**Missouri Public
Service Commission**

A. Digital Channel Service (DCS) (Continued)

REC'D FEB 08 2000

4. Regulations and Conditions

- a. Unless specifically exempted, DCS shall be subject to all general regulations applicable to the provision of service by the Company as stated in this tariff.
- b. DCS is furnished subject to central office switching capacity, capability, as well as the availability and suitability of outside plant facilities.
- c. Payment for service:
 1. The minimum charge period for services provided under this tariff is one year.
 2. Suspension of service is not allowed during the minimum charge period. Disconnecting prior to the completion of the minimum period will result in the balance of the amount due for the period being payable at the time of disconnection.
- d. At the Company's discretion and subject to the Commission rules and regulations, nonrecurring charges may be reduced or waived during promotional campaigns (minimum service periods will apply). All promotions will be subject to prior notification and approval by the Missouri PSC.
- e. Directory Listings – One directory listing is provided without charge for each channel activated. Additional listings may be provided as specified elsewhere in this tariff.
- f. Customer Premises Equipment
 1. This tariff does not include terminal equipment on the customer's premises.
 2. The customer is responsible for providing the power required for any customer premises equipment connected to DCS.
- g. End User Common Line (EUCL) Charges – DCS is subject to Federal Communications Commission (FCC) End User Common Line (EUCL) charges under the rates and application rules specified by the FCC.

4. Regulations and Conditions (Continued)

- h. The Company shall not be liable for any loss or damages arising out of error, interruptions, defects, failure or malfunctions of DCS or associated equipment. Damages arising out of such interruptions, defects, failures, or malfunctions of the services after the Company has been notified, and has reasonable time for repair, shall in no event exceed an amount equivalent to the charges made for the service affected for the period following notice from the customer until service is restored.
- i. The following services will not be provided within the DCS arrangement:
 - 1. Access lines
 - 2. Feature groups A, B, C, or D
 - 3. Other private line/access services and facilities unless specified herein.
- j. Customers are required to provide muxing/demuxing at the customer premises.

c. Subsequent Channel Additions and Changes

When channels are ordered or modified after the initial installation of DCS, the nonrecurring Channel Addition and Change charge reflected below is applied in addition to the normal charges reflected in this tariff. Only one Channel Addition and Change charge will apply when multiple channels are added or changed on a DCS facility as part of the same service order.

	Non-Recurring Charge
Channel Additions and Changes (per DCS facility)	\$35.00
Channel Activation (per channel added)	\$12.00

B. Direct Inward Dialing (DID) Service

1. General

- a. Direct Inward Dialing Service to customer premises located switching systems is furnished subject to the availability of telephone numbers.
- b. The service includes the central office switching equipment necessary for direct inward dialing from the exchange and long distance message telecommunications network directly to terminal equipment associated with customer premises located switching systems.
- c. The service must be provided on all lines in a trunk or network access line group arranged for inward service. Routing of calls to selected numbers within the direct inward dialing number group over a separate trunk or network access line group is not contemplated.
- d. Operational characteristics of interface signal between the Company-provided connecting arrangements and the customer-provided switching equipment must conform to the rules and regulations the Company considers necessary to maintain proper standards of service.

B. Direct Inward Dialing (DID) Service (Continued)

1. General (Continued)

- e. The Company shall not be responsible to the customer or to the customer's patron if changes in protection criteria or in any of the facilities, operations or procedures of the Company render any facilities provided by a customer, or its patrons obsolete or require modifications or alteration of such equipment.
- f. Direct-in-dial Trunks may be provided in the quantity determined by the Company to be sufficient for adequate service, only in exchanges where the Central Office is equipped for such service. When otherwise provided, Direct-in-dial Trunks will be furnished at rates based on cost.
- g. One directory listing is provided without charge for each number used. Additional listings may be provided as specified elsewhere in this tariff.
- h. The customer premises located switching equipment must be arranged to provide for intercepting of unused numbers transmitted to the switching equipment.

2. Rates

	Monthly Rate	Nonrecurring Charge
First 20 Direct Inward Dialing Numbers Assigned, minimum charge	\$20.00	\$100.00
Each additional 20 Direct Inward Dialing Numbers assigned over the first 20	\$10.00	\$100.00
First 100 Direct Inward Dialing Numbers Assigned, minimum charge	\$40.00	\$150.00
Direct Inward Dialing Trunk Termination – per DID trunk, each	\$10.00	

The charges for the service, as provided above, are in addition to Service Connection Charges.

LOCAL EXCHANGE SERVICE		OCT 28 1996
MISSOURI SCHOOL DISCOUNT PROGRAM		MISSOURI
Public Service Commission		
1.	A discount from standard monthly rates for local exchange business service may be allowed in connection with service furnished through the Missouri School Discount Program, pursuant to the Video Instructional Development and Educational Opportunity Program, as enacted by the Missouri State Legislature.	
2.	Upon the customer's request, a discount of twenty percent (20%) from standard monthly access line rates may be allowed to educational institutions within the Company's certified area, as determined in Paragraph 3, following.	
3.	An educational institution shall be defined either as an accredited public school, or an accredited private school which is tax exempt pursuant to 26 U.S.C. § 501(c)(3). Persons operating home schools, as defined in § 167.031 RSMo, shall not be eligible for this school discount program. Private schools must be accredited by either the Missouri Chapter of the National Federation of Non-Public Schools Accrediting Association, Independent Schools Association of the Central States, North Central Association of Colleges and Schools, and/or the University of Missouri-Columbia. Public Schools must be accredited by the Department of Elementary and Secondary Education for the State of Missouri and/or the North Central Association of Colleges and Schools.	
4.	The qualifying discount will be permitted only on the local exchange access line. All other features, ancillary services or options, relative to the particular service, shall continue to be billed at the appropriate tariffed rates.	
5.	The qualifying discount will be permitted only where the predominant use is providing educational and instructional programs and for the educational institutions' administrative use. The discount is not allowed to residential complexes associated with the institution.	
6.	In addition to meeting the qualification specified in Paragraph 3 preceding, an eligible customer must sign an affidavit certifying that the qualification is met. The affidavit will be retained on file with the Company.	
7.	The customer should request to receive the discount on all subsequent additions of eligible services which are ordered. There will be no additional affidavits required. FILED	
8.	The following local exchange services are eligible for a discount under this program: -Flat Rate, business one-party service.

GENERAL EXCHANGE SERVICE TARIFF

REC'D MAY 30 2000

**DISCOUNTS FOR SCHOOLS AND LIBRARIES
PARTICIPATING IN THE FEDERAL UNIVERSAL SERVICE PROGRAM**

1. Discounts on the intrastate services offered through this tariff will be available to eligible schools and libraries. A school or library will be eligible to participate in the discount program if it receives funds from the Federal Universal Service Fund.
2. The level of discount available will mirror the discount percentage level available to the school or library through the Federal Universal Service Fund program. The discount will be applied against the intrastate service rate otherwise applicable under this tariff. The discount only applies to the extent funds are available to the eligible school or library, through the Federal Universal Service Fund.

1.1

INSTALLATION OF TELEPHONE LINES WITHIN SUB-DIVISION (1). TELEPHONE LINES CONSTRUCTED, INSTALLED AND OWNED BY UTILITIES IN SUBDIVISIONS SHALL BE INSTALLED UNDERGROUND.

1.1.1

The following definitions are used in this section of the tariff:

APPLICANT: The developer, builder, or other person, partnership, association, firm, private or public corporation, trust, estate, political subdivision, governmental agency, or other legal entity recognized by law, applying for the construction of a telephone distribution system in a subdivision.

BUILDING: A single structure roofed and enclosed within exterior walls, built for permanent use, erected, framed of component structural parts and unified in its entirety both physically and in operation for single-family residential occupancy in a subdivision (Definition excludes mobile home).

SUBDIVISION: A lot, tract, or parcel of land divided into two or more lots, plots, sites or other divisions for use for new residential buildings or the land on which is constructed new multiple-occupancy buildings per a recorded plot thereof if such recordation is required by law.

* 1.1.2

The Telephone Company upon receipt of the applicant's proper application will install an underground telephone system with suitable materials to assure that the applicant will receive reasonably safe and adequate telephone service. The

provision of the underground telephone system will be provided at no charge except where a charge is permitted under Paragraphs 1.1.4 and 1.1.6 of this section of the Tariff. Temporary service is provided under Paragraph 1.1.5 of this section of the Tariff.

1.1.3 RIGHTS-OF-WAY AND EASEMENTS

- * A. Within the applicant's subdivision, the Telephone Company will construct, own, operate, and maintain underground telephone lines only along public streets, roads, and highways which the Telephone Company has the legal right to occupy, and on public lands and private property across which rights-of-way and easements satisfactory to the Telephone Company may be obtained without cost or need for condemnation by the Telephone Company.
- * B. Rights-of-way and easements, within the subdivision, satisfactory to the Telephone Company, must be furnished by the applicant in reasonable time to meet construction and service requirements before the Telephone Company shall be required to commence its installation. Such rights-of-way and easements must be cleared of trees, tree stumps, and other obstructions and graded to within six inches of final grade, by applicant, at no charge to the Telephone Company. Such clearance and grading must be maintained by the applicant during construction by the Telephone Company.

ESTABLISHMENT AND MAINTENANCE OF CREDIT

MISSOURI
Public Service Commission

1. Establishment of credit for residence service

The Telephone Company may require an applicant for service to post a deposit if:

- a. The applicant is unable to establish that he had a previous service account with a telephone utility for a period of at least twelve (12) months for which all undisputed charges were satisfactorily paid or,

The applicant has not previously had telephone service for a twelve (12) month period and does not meet at least two of the following criteria:

Has a valid major national charge card

Home ownership, excluding mobil home

Is fifty (50) or more years of age

Has been employed two years or more with the current employer

Has a savings account

Has a local charge card

Has an existing loan from a financial institution not considered delinquent by the creditor

- b. The Telephone Company is not obligated to furnish service to any individual that owes for service furnished by the Telephone Company previously rendered at the same or a different address until arrangements have been made to liquidate such previous indebtedness to the Company.

- c. The Telephone Company may require a deposit or guarantee as a condition of continued service if undisputed charges in two out of the last twelve (12) billing periods become delinquent. The deposit shall not exceed charges for two (2) months service based on the average bill during the preceding twelve (12) months.

ESTABLISHMENT AND MAINTENANCE OF CREDIT (Cont'd)

SEP 25 2000

- d. In lieu of a deposit the Telephone Company may accept a written guarantee. The guarantee shall be limited to an amount not exceeding the cash deposit provided for in these tariffs.
- e. No deposit or guarantee shall be required by the Telephone Company because of race, sex, creed, national origin, marital status, age, number of dependents, source of income, condition of physical handicap or geographical area or residence of the subscriber.

**MISSOURI
Public Service Commission**

A service deposit will not be required for Lifeline Service, if the qualifying low-income customer voluntarily elects toll blocking, where available. If toll blocking is unavailable, a service deposit may be charged.

- f. A deposit shall be subject to the following terms:

It shall not exceed estimated charges for two (2) months service based on the average bill during the preceding twelve (12) months or in the case of new applicants for service the average monthly bill for new subscribers within a customer class.

(C)

The deposit shall bear interest at a rate which is equal to one percent (1%) above the prime lending rate as published in the *Wall Street Journal*. This rate shall be adjusted annually on December 1 using the prime lending rate, as published in the *Wall Street Journal* on the last business day of September of each year, plus one percent (1%). The interest shall be credited annually upon the account of the customer or paid upon the return of the deposit, whichever occurs first. Interest shall not accrue on any deposit after the date on which a reasonable effort has been made to return it to the customer.

Upon satisfactory payment of all undisputed charges during the last twelve (12) billing periods, guarantors will be released or deposits with accrued interest will be refunded or credited against charges on subsequent bills. Payment of charges will be considered satisfactory if received prior to the date on which the charge becomes delinquent provided the charge is not in dispute. The Company may withhold the refund of a deposit pending the resolution of a dispute with respect to charges secured by the deposit.

The deposit shall be credited with accrued interest to the charge stated on the final bill and the balance if any shall be returned to the subscriber within twenty-one (21) days after the rendition of a final bill upon the discontinuance or termination of service.

The Telephone Company shall permit a customer concurrent with the beginning of service, to post a deposit in two (2) equal monthly installments or as otherwise agreed upon by the subscriber and the Telephone Company.

A guarantor as provided for by (G. 1.e.) shall be released upon satisfactory payment of all undisputed charges during the last twelve (12) billing periods. Payment of a charge is satisfactory if received prior to the date upon which the charges become delinquent provided it is not in dispute.

The Company will maintain records of all pertinent information with regard to each deposit held.

(N)

The Company will provide within ten (10) days of a customer request a receipt that contains information pertinent to that deposit.

(N)

g. Deposit not to Affect Regular Collection Practices:

(C)

The fact that a deposit has been made shall in no way relieve the applicant or subscriber from complying with the Telephone Company's regulations as to advance payments and the prompt payments of bills on presentation; nor constitute a waiver or modification of the regular practices of the Telephone Company providing for the discontinuance of the service for non-payment of any sums due the Telephone Company for service rendered. The Company may discontinue service to any subscriber failing to pay current bills without regard to the fact that such subscriber has made a deposit with the Company

RULES AND REGULATIONS
4 CSR 240.33.040 AND 4 CSR 240-33.050

DISCONTINUANCE OF SERVICE

1. Service may be discontinued for any of the following reasons:
 - a. Non-payment of an undisputed delinquent charge for basic local telecommunications service.
 - b. Failure to post a required deposit or guarantee.
 - c. Unauthorized use of the Company's service in a manner which creates an unsafe condition or creates the possibility of damage or destruction to its facilities.
 - d. Failure to comply with the terms of a settlement agreement.
 - e. Refusal after reasonable notice to permit inspection, maintenance or replacement of Company's equipment.
 - f. Material misrepresentation of identity in obtaining Company's service.
 - g. As provided by state or federal law.
2. A written notice shall be sent by first class mail ten (10) days prior to the date of the proposed discontinuance of service.
3. Service may be discontinued during normal business hours on or after the date specified in the notice of discontinuance. Basic local telecommunications service will not be discontinued on a day when the offices of the Company are not open to facilitate reconnection of basic local telecommunications service or on a day immediately preceding such day.
4. The Company will make reasonable efforts to contact the customer via telephone at least twenty-four (24) hours preceding a discontinuance of basic local telecommunications service. The Company will advise the customer of the proposed discontinuance and what action must be taken to avoid it.
5. Discontinuance of service will be postponed for a time not in excess of twenty-one (21) days if the telephone is necessary to obtain emergency medical assistance for a person who is a member of the household where the telephone service is provided and where such person is under the care of a physician. Any person who alleges such emergency shall, if requested, provide the Company with verifiable written evidence of such necessity.
6. Basic local telecommunications service may not be discontinued for customer nonpayment of a delinquent charge for other than basic local telecommunications service. Company may place global toll blocking and eliminate any optional, non-basic calling features and functions for customer nonpayment of delinquent charges for other than basic local telecommunications service.
7. Payment by personal check may be refused if the customer, within the last twelve (12) months, has tendered payment in this manner and the check has been dishonored, except when the dishonor is due to bank error.

Cancels Original Sheet No. 12.2

RULES AND REGULATIONS
4 CSR 240.33.040 AND 4 CSR 240-33.050

DISPUTES BY RESIDENTIAL CUSTOMERS

- (1) A customer shall advise the Company that all or part of a charge is in dispute by written notice, in person or by a telephone message directed to the Company during regular business hours. A dispute must be registered with the Company prior to the delinquent date of a charge for the customer to avoid discontinuance of service as provided by this tariff.
- (2) When a customer advises the Company that all or part of a charge is in dispute, the Company shall record the date, time and place the inquiry is made; investigate the matter promptly and thoroughly; and attempt to resolve the dispute in a manner satisfactory to both parties
- (3) Failure of a customer to cooperate with the Company in efforts to resolve an inquiry which has the effect of placing charges in dispute shall constitute a waiver of the customer's right to continuance of service under this tariff.
- (4) If a customer disputes a charge, the customer shall pay an amount to the Company equal to that part of the total bill not in dispute. The parties shall consider the customer's prior usage, the nature of the dispute and any other pertinent factors in determining the amount not in dispute. The Company shall not discontinue service for nonpayment of charges in dispute while the dispute is pending.
- (5) If the parties are unable to determine the amount not in dispute, the customer shall pay to the Company, at the Company's option, an amount not to exceed fifty (50) percent of the charge in dispute or an amount based on usage during a like period under similar conditions which shall represent the amount not in dispute. The Company shall not discontinue service to a customer for nonpayment of charges in dispute while that dispute is pending.
- (6) Failure of the customer to pay to the Company the amount not in dispute within four (4) working days from the date the dispute is registered or by the delinquent date of the disputed bill, whichever is later, shall constitute a waiver of the customer's right to continuance of service and the Company may then proceed to discontinue service as provided in this tariff.
- (7) If the dispute is ultimately resolved in favor of the customer in whole or in part, the Company must promptly repay any excess moneys paid by the customer.
- (8) If the dispute cannot be resolved to the satisfaction of the customer, the Company shall notify the customer of its right to make an informal complaint to the Commission, and of the address and telephone number where the customer may file an informal complaint with the Commission.
- (9) After resolution of the customer complaint, the Company may treat a second complaint based on the same facts as already determined.

RULES AND REGULATIONS

Obligation and Liability of Company

REC'D DEC 02 1999

- A. Availability of Facilities - The Company's obligation to furnish telephone service is dependent upon its ability to secure suitable facilities and to provide such service without unreasonable expense.
- B. Interruption of Service - An allowance will be made upon notice and demand to the Company for interruption of service not due to subscriber negligence if the interruption continues for more than forty-eight (48) hours from the time it is reported to or detected by the Company. The allowance will be the prorated portion of the monthly rate for the service made inoperative.
- C. Directory Errors and Omissions - The Company endeavors to correctly list customers, their telephone numbers and other information in the local telephone directory. No liability for damages arising from errors in or omissions of directory listings or listings obtained from Directory Assistance shall attach to the Company. In the case of additional or extra listings for which a charge is made, the Company's liability shall be limited to the monthly rate for each such listing for the charge period during which the error or omission continues.
- D. Transmitting Messages - The Company does not undertake to transmit messages, but rather offers the use of its facilities, where available, for communication between parties subject to the conditions specified in these tariffs.
- E. Defacement of Premises - The Company will make a reasonable effort to leave the customer's property in the same condition as it was found in prior to any Company work. The Company will repair or replace any defacement or damage of property due to installation, existence, or removal of Company property when the damage is the result of negligence of the Company.
- F. Maintenance and Repairs - The Company shall bear the expense of all repair and maintenance of its facilities, except where damage or destruction of its facilities are due to the acts or omissions of the subscriber or other parties. Only the Company or its agents are authorized to rearrange, remove, or disconnect any Company facilities.
- G. Adjustment of Charges - In case of overbilling, a refund will be made by the Company for the amount of excess charges or for an estimate of the overbilling amount. The maximum refund will not exceed a two year period for the actual or estimated overbilling. In case of underbilling, the company reserves the right to backbill for the deficiency charges up to a period of two years.

Obligation and Liability of Company (Cont'd)

REC'D DEC 02 1999

H. Liability of Company

1. The liability of the Company for damages arising out of mistakes, omissions, interruptions, delays or errors or defects in transmission occurring in the course of furnishing service and not caused by negligence of the customer shall in no event exceed an amount equivalent to the proportionate charge to the customer for the period of service during which such mistakes, omissions, interruptions, delays or errors or defects in transmission occur in excess of 48 hours after notification has been made.
2. The customer indemnifies and saves the Company harmless against the following:
 - (a) Acts or omissions of other companies when their facilities are used in connection with the Company's facilities to provide service.
 - (b) Any defacement or damage to the customer's premises, resulting from the existence of the Company's facilities for example, demarcation point and drop on such premises, or from the installation or removal thereof, when such defacement or damage is not the result of the negligence of the Company or its employees.
 - (c) Any accident, injury or death occasioned by its equipment or facilities when such is not due to negligence of the Company.
 - (d) Claims for libel, slander or infringement of copyright arising from the material transmitted or recorded over its facilities; claims for infringement of patents arising from combining with, or using in connection with, facilities of the Company, apparatus and systems of the customer; and all other claims arising out of any act or omission of the customer in connection with facilities provided by the Company.
 - (e) Liability for failure to provide service.
 - (f) Liability for telephone directories except as outlined above.

RULES AND REGULATIONS

Obligation and Liability of Company (Cont'd)

REC'D DEC 02 1999

H. Liability of Company (Cont'd)

2. (Cont'd)

- (g) The Telephone Company will make reasonable efforts to cure any material failure to provide service caused solely by year 2000 defects in Telephone Company hardware, software or systems. Due to the interdependence among telecommunications providers and the interrelationship with non-Telephone Company processes, equipment and systems, the Telephone Company is not responsible for failures caused by circumstances beyond its control including, but not limited to, failures caused by: (1) the Customer; (2) other telecommunications companies as defined by Missouri statute; or (3) customer premises equipment. In addition, the Telephone Company does not ensure compatibility between Telephone Company and non-Telephone Company services used by the customer.
- (h) The Telephone Company will not be liable for any consequential, incidental or indirect damages for any cause of action, whether in contract or tort. Consequential, incidental and indirect damages include, but are not limited to lost projects, lost revenues and loss of business opportunity, whether or not the Telephone company was aware or should have been aware of the possibility of these damages.

ACCESS SERVICE TARIFF CONCURRENCE

Access Services

Access services are those services which are described in the Access Services Tariff of Mark Twain Rural Telephone Company. These services are offered by the Company to intrastate interexchange customers (ICs) in accordance with the rules and regulations specified in the Access Services Tariff of Mark Twain Rural Telephone Company and approved by the Missouri Public Service Commission, and in any amendments thereto and authorized by the Missouri Public Service Commission or applicable law. The Company does not concur in the rates for access services of Mark Twain Rural Telephone Company. Rates for these services are set out in the following pages of this concurrence. (T)

Provision of Services

The Company, to the extent that such services are or can be made available with reasonable effort and after provisions have been made for the Company's telephone exchange services, will provide to an intrastate IC, upon reasonable notice, services of the type offered in Mark Twain Rural Telephone Company's Access Services Tariff pursuant to the terms and conditions specified therein and at the rates specified in the following pages of this concurrence. The Company's concurrence in Mark Twain Rural Telephone Company's Access Services Tariff shall not be construed or deemed a representation that all services and service components described therein are available from the Company. (T)

Cancellation Rights

The Company reserves the right to cancel and make void the above concurrence statement, subject to requirements as may be ordered by the Missouri Public Service Commission, at any and such time as it appears that such cancellation is in the best interest of the Company and/or its customers.

PRIVATE LINE TARIFF CONCURRENCE

Private Line Concurrence

The Company concurs in the rules and regulations governing intrastate intra-LATA interexchange Private Line Service as set forth in Mark Twain Rural Telephone Company's tariff on file with and approved by the Public Service Commission of the State of Missouri, and in any amendments thereto as authorized by the Missouri Public Service Commission or applicable law. The Company does not concur in the rates for private line service of Mark Twain Rural Telephone Company. Rates for these services are set out in the following pages of this concurrence. (T)

Private Line Cancellation Rights

The Company reserves the right to cancel and make void the above concurrence statement, in whole or in part, subject to requirements as may be ordered by the Missouri Public Service Commission, at any and such time as it appears that such cancellation is in the best interest of the Company and/or its customers. PAYPHONE SERVICE

JAN 15 1997

A. General Regulations

1. Payphone Service includes lines to which coin, coin and card reader or a combination of coin/card reader telephones may be attached.
2. Payphone Service is a two-way or, optionally, one-way originating only business exchange access line composed of the serving central office line equipment, all outside plant facilities needed to connect the serving central office with the customer's premises, and the Network Interface Device at the demarcation point. These facilities are Company-provided and maintained and provide access to and from the telecommunications network for long distance service and local calling.
3. In the case of one-way service, intercept treatment will be provided.
4. A maximum of one customer-provided instrument may be connected to any one Instrument or CO implemented coin line.
5. General Rules and Regulations found in other sections of this tariff are applicable to the provision of Payphone Service.
6. Directory listings may be provided under the regulations governing the furnishing of listings for business subscribers.
7. A Network Interface Device will be installed at a location mutually agreed upon by the Payphone Service Provider and the Company. The Network Interface Device is a company-provided jack or its equivalent. It is the point of connection between the telephone company owned wiring and wiring owned by the Customer.
8. One directory will be distributed to the Payphone Service Provider without charge for each payphone business exchange line.
9. Installation Charges and the appropriate Network Interface Device (NID) material charge are applicable for the installation, move or rearrangement of the NID on the customer's premises to establish or reestablish network access.

PAYPHONE SERVICE

**Missouri Public
Service Commission**

REC'D MAR 11 1999

A. General Regulations (Cont'd)

10. Installation Charges and the appropriate NID material charge apply when a premises visit is made for the sole purpose of installing a customer requested NID.
11. The Company shall not be liable for shortages of coins collected and deposited at the subscriber's equipment. The limit of the Company's liability for end user fraud of whatever nature occurring at or in association with the subscriber's equipment shall be governed by provisions of this Tariff and rule or regulations of the Missouri Public Service Commission. In case of conflict between the tariff provisions and Commission rules and regulations, the rule or regulations shall prevail.
12. Off-Premise Extensions are not permitted.
13. Held for Future Use
14. The Multiline Business Subscriber Line Charge, found in the interstate access tariff, is applicable to all payphone Instrument and CO Implemented coin lines.

B. Responsibility of the Customer

1. The Customer for the purposes of this tariff is defined as the Payphone Service Provider.
2. The customer shall be responsible for the installation, operation and maintenance of the customer-provided instrument, plus all ancillary equipment, such as booths, shelves, lighting, directories, etc., used in connection with this service. The customer is responsible to comply with the requirements set forth in the American With Disabilities Act of 1990.

The customer-provided instrument must be registered in compliance with Part 68 of the FCC's Registration Program. In addition, the customer must comply with the Missouri Public Service Commission's Rules and Regulations regarding the use of customer-provided pay telephones.

**Missouri Public
Service Commission**

FILED APR 15 1999

PAYPHONE SERVICE

JAN 15 1997

B. Responsibility of the Customer (Cont'd)

3. The customer shall be responsible for the payment of charges for all local and toll messages originating from or accepted at this type of service, including any Directory Assistance Calls.
4. The customer shall be responsible for obtaining a Certificate of Service Authority (CSA) to provide Payphone Service and for providing proof of said authority prior to installation of service.
5. Customers who elect not to subscribe to Selective Class of Call Screening will be fully responsible for all calls billed to customer's exchange access line. The Telephone Company shall have no responsibility to adjust any such charges and/or release customer from paying any such charges. Customer will hold the Telephone Company harmless from and against any liability or loss resulting from all calls billed to customer's exchange access line.
6. Any federal, state, or local taxes on the Customer Owned Pay Telephone or calls made from that phone are the responsibility of the customer.
7. The customer shall not program or cause to be programmed any such telephone used in connection with this service to limit the duration of a local message.

C. Violation of Regulations

1. Upon notification from the Company that the customer-provided equipment or inside wire is causing or is likely to cause harm, the customer shall make such change as is necessary to remove such harm. Failure to make such change will result in the disconnection of service until such change is completed to the satisfaction of the Company.

C. Violation of Regulations (Cont'd)

2. The customer may be required, as a condition of service, to pay in full all sums due the Company including, but not limited to, customer activity charges, termination charges, minimum charges, and reimbursement for loss or damage to Company facilities as may apply.

**MISSOURI
Public Service Commission**

D. Instrument Implemented Payphone Service

Instrument Implemented Payphone Service is offered for use with a customer provided pay telephone. All attachments of a customer provided instrument to the network must be made pursuant to the rules and regulations set forth in this Tariff and as required by State and Federal commissions.

E. Central Office (CO) Implemented Coin Line

1. Central Office Implemented Coin Line provides coin signaling. It is a line side connection from the local exchange switch to the point of demarcation at the customer premise.
2. Features are additives to the operation of a flat rate access line that provide for CO Implemented coin line service. The Company offers those features that are provided by the functionality of the Company's switches. These include coin supervision, coin control (collect and return of coins, if applicable), and answer supervision. CO implemented coin line features that are implemented by the functionality of an operator service provider, such as coin rating, coin refund, repair referral, and operator call screening, are the responsibility of the Payphone service provider (Customer).
3. CO Implemented Coin Line features, including coin line signaling, coin collect and return (where applicable) and answer supervision, are provided by the Telephone Company per the technology available from the Company's facilities. It shall be the responsibility of the CO Implemented Coin Line payphone owner to assure technical and operational compatibility with the coin line features offered by the Telephone Company.

PAYPHONE SERVICE

RECEIVED +

F. Features and Functions

JAN 15 1997 +

1. Answer Supervision provides signaling on the line notifying the line that the called party has answered. This feature is an additive to the CO Implemented Line Service.
2. Coin Collection and Return provides an electrical signal on a CO Implemented Line indicating to the payphone equipment to collect coin(s) from or return coin(s) to the calling party. This feature is an additive to the CO Implemented Coin Line.
3. Special Number Assignment is a specific number requested by the customer. This service is available where facilities are accessible and it is technical feasible to provide. This feature is an additive to the CO Implemented Coin Line or to the Instrument Implemented Payphone Service.
4. Selective Class of Call Screening will be provided where such facilities are available at the customer's option. Selective Class of Call Screening treatment enables the customer to restrict outgoing operator-handled calls, placed over the Telephone Company's network, from the service point to only those calls which are charged to a called telephone, a third number or a calling card.
5. Validation may be performed through Originating-Line Screening (OLS). OLS enables operator service providers to determine whether there are billing restrictions on the exchange access line from which a call originates. OLS service delivers codes on operator assisted calls to identify calls originating from privately owned payphones, inmate locations, and hotels/motels, etc. Rates for this service are found in the appropriate interstate access tariff, when facilities and service are available. The customer has the option to request either Selective Class of Call Screening or OLS.

(N)

Operator Verification/Interruption Service

A. Description

1. Customers may obtain assistance in determining if a called line is in use (herein called verification) or in interrupting a conversation in progress due to an urgent or emergency situation (herein called interrupt) by calling the "0" operator.
2. Verification and interrupt service is furnished where and to the extent that facilities permit.
3. The customer shall indemnify and hold the Company harmless against all claims that may arise from either party to the interrupted call or any person.

B. Regulations

1. Verification:

A charge applies each time the operator verifies a called line and hears voice communication.

2. Interrupt:

A charge applies each time an operator interrupts a conversation that is in progress on the called line.

3. If an operator both verifies the condition of the line and interrupts conversation on the same request, the interrupt charge only applies.
4. The charge for interrupt applies whenever the operator interrupts the conversation even though one or the other parties interrupted refuses to terminate the conversation in progress.
5. Charges may not be billed on a collect basis or reversal of charge basis.
6. The charges for verify/interrupt service are in addition to any applicable rates and charges associated with local or Long Distance Message Telecommunications Service.

GENERAL EXCHANGE TARIFF**UNIVERSAL EMERGENCY NUMBER SERVICE (911)****1. Universal Emergency Number Service (911)****1.1 General**

- A. Universal Emergency Number Service, also referred to as 911 Service, is a telephone exchange communication service whereby one or more Public Safety Answering Points (PSAP) designated by the customer may receive telephone calls dialed to the telephone number 911. 911 Service includes a line and equipment necessary (excluding CPE) for the answering, transferring and dispatching of public emergency telephone 911 calls originated by persons within the serving area. 911 Trunking Service involves the provision of interoffice trunks from the Telephone Company Central Office to connect with the PSAP location.
- B. The 911 emergency number is not intended to replace the telephone service of the various Public Safety Agencies which may participate in the use of this number. The 911 customer must subscribe to additional local exchange service at the PSAP for administrative purpose, for the placing of outgoing calls and for receiving other emergency calls, including any which might be related by Company operators.
- C. 911 Trunking Service is offered subject to availability of facilities.
- D. The 911 Trunking Service customer may be a municipality or other state or local government unit, or an authorized agent of one or more municipalities or other state or local governmental units to whom authority has been lawfully delegated. The customer must be legally authorized to subscribe to the service and have public safety responsibility by law to respond to telephone calls from the public for police, fire or other emergency services within the telephone Central Office area arranged for 911 calling.

UNIVERSAL EMERGENCY NUMBER SERVICE (911)

1. Universal Emergency Number Service (911) (Cont'd)**1.1 General (Cont'd)**

- E. The Company may enter into a contract or contracts with the 911 customer or with other telephone companies in order to effectuate the Company's provision of 911 Service in accordance with, pursuant to, and subject to the terms, conditions and limitations of the Tariff. Any such contract(s) shall incorporate by reference the terms, conditions and limitations of this Tariff.
- F. The rates and charges contained herein are in addition to all other applicable rates and charges located in other parts of this tariff.

1.2 Conditions

- A. 911 Trunking Service is provided solely for the benefit of the customer operating the PSAP. The provision of 911 Trunking Service by the Company shall not be interpreted, construed or regarded, either express or implied, as being for the benefit of or creating any Company obligation toward any third person or legal entity other than the customer.
- B. The Company does not undertake to answer and forward 911 calls, but furnishes the use of its facilities to enable the customer's personnel to respond to such calls on the customer's premises.
- C. Temporary or vacation suspensions of service are not provided for any part of the 911 Trunking Service.
- D. 911 Service information consisting of the names, addresses and telephone numbers of Subscribers whose listings are not published in directories or listed in the Directory Assistance records is treated as strictly confidential.
- E. End Users dialing 911 forfeit the privacy afforded by nonpublished and unlisted telephone number service to the extent that the telephone number, address and name associated with the originating station location may be furnished by a PSAP. Information will be provided only for the purpose of responding to emergency calls.

UNIVERSAL EMERGENCY NUMBER SERVICE (911)

1. Universal Emergency Number Service (911) (Cont'd)**1.2 Conditions (Cont'd)**

- F. The Company's entire liability to any person for interruption or failures of 911 Trunking Service shall be limited to the terms set forth in this section and other sections of this tariff.
- G. The customer shall have the responsibility of discovering all errors, defects and malfunctions, in the transmission of calls and data, data base(s), and overall operation of the system. The customer shall make such operational tests as, in the judgment of the customer, are required to determine whether the system is functioning properly for its use. The customer shall promptly notify the Company in the event the system is not functioning properly.
- H. The Company's liability for any loss or damage arising from errors, interruptions, defects, failures or malfunctions of this service or any part thereof whether caused by the negligence of the Company or otherwise shall not exceed an amount equivalent to the pro-rata charges for the service affected during the period of time that the service was fully or partially inoperative.
- I. Each customer also agrees to release, indemnify and hold harmless the Company from any and all loss, claims, demands, suits or other action, or any liability whatsoever, whether suffered, made, instituted or asserted by the customer or by any other party or person, for any personal injury to or death of any person or persons, or for any loss, damage or destruction of any property, whether owned by the customer or others.
- J. The customer also agrees to release, indemnify and hold harmless the Company for any infringement or invasion of the right of privacy of any person or persons, caused or claimed to have been caused, directly or indirectly by the installation, operation, failure to operate, maintenance, removal, presence, condition, occasion or use of 911 Trunking Service features, the equipment associated therewith, or by any services furnished by the Company in connection therewith, including, but not limited to, the identification of the telephone number, address or name associated with the telephone used by the party or parties accessing 911 Trunking Service hereunder, and which arise out of the negligence or other wrongful act of the Company, the customer, its user, agencies or municipalities, or the employees or agents or any one of them.

UNIVERSAL EMERGENCY NUMBER SERVICE (911)

1. Universal Emergency Number Service (911) (Cont'd)**1.2 Conditions (Cont'd)**

- K. Because the Company serving boundaries and political subdivision boundaries may not coincide, it is the obligation of the customer to make arrangements to handle all 911 calls that originate from telephones served by Telephone Company Wire Centers served by the PSAP whether or not the calling telephone is situated on property within the geographical boundaries of the customer's public safety jurisdiction.
- L. Application for 911 Trunking Service must be executed in writing by each customer. If application for service is made by an agent, the Company must be provided in writing with satisfactory proof of appointment of the agent by the customer. At least one local law enforcement agency must be included among the participating agencies in any 911 offering.
- M. The customer is required to furnish the Company its agreement to the following terms and conditions:
1. That all 911 calls will be answered in a 24-hour day, seven-day week basis.
 2. That that customer has responsibility for dispatching the appropriate emergency service vehicles within the 911 Service area, or will undertake to transfer all 911 calls received to the governmental agency with responsibility for dispatching such services, to the extent that such services are reasonably available.
 3. That the customer will develop an appropriate method for responding to calls for non-participating agencies which may be directed to the 911 PSAP by calling parties.
 4. That the customer will provide CPE with a capacity adequate to handle the number of incoming 911 lines recommended to be installed by the Company. It is the customer's responsibility to ensure its CPE is compatible with the service(s) provided by the Company.

UNIVERSAL EMERGENCY NUMBER SERVICE (911)

1. Universal Emergency Number Service (911) (Cont'd)**1.2 Conditions (Cont'd)**

- N. This service is offered solely as an aid in handling assistance calls in connection with fire, police and other emergencies and does not create any relationship or obligation, direct or indirect, to any person other than the 911 customer contracting for 911 Trunking Services. In the event of any interruption of the service, the Company shall not be liable to any person, corporation or other entity for any loss or damage in an amount greater than an amount equal to the pro rata allowance of the tariff rate for the service or facilities provided to the 911 customer for the time such interruption continues, after notice to the Company. No allowance shall be made if the interruption is due to the negligence or willful act of the 911 customer.
- O. The rates charged for 911 Trunking Service do not contemplate the constant monitoring or inspection of facilities to discover errors, defects and malfunctions in the service, nor does the Company undertake such responsibility. The 911 customer shall make such operational tests as, in the judgment of the customer, are required to determine whether the system is functioning properly for its use. The customer shall notify the Company in the event the system is not functioning properly.
- P. In the absence of willful misconduct or gross negligence, no liability for any death or injury to any person or for any damage to property shall attach to the Company, its employees, agents or representatives as a result of or in connection with any situation in which the Company may be requested, required, have undertaken or participated in the tracing of a 911 call.
- Q. The customer recognizes that the addresses provided to it by the Company are the same addresses that the Company maintains for its ordinary service, billing or directory records and the Company cannot unconditionally guarantee their existence or accuracy in emergency situations. Therefore, the customer recognizes that addresses should, where circumstances permit, be verified from a 911 calling party. The customer shall make the correction within a reasonable time under the circumstances.

GENERAL EXCHANGE TARIFF

THREE-DIGIT DIALING SERVICE (811)

1. Three-Digit Dialing Service (811)

1.1 General Regulations

- A. The 811 Service is a locally assigned three digit abbreviated dialing code provided to a state One Call System ("SOCS") for use in providing advance notice of excavation activities to underground facility operators by way of voice grade facilities. Federal Communications Commission ("FCC") Docket 92-105 mandates that incumbent local exchange carriers in each local calling area make the 811 abbreviated dialing code available to a SOCS as a tariffed, local calling area based service (the "811 Service").
- B. The 811 Service allows a Company subscriber to access a SOCS call center by dialing only the 811 abbreviated dialing code. Subject to other terms and conditions of this tariff, Company subscribers shall be able to make, and the SOCS shall be able to receive, calls using the 811 Service as part of their local exchange service.
- C. All 811 Service calls shall be local in nature and shall not result in any expanded area calling, intraLATA toll or interLATA long distance or pay-per-call charges to Company subscribers.
- D. The 811 Service is not available for the following classes of service: inmate service, 1+ and 0+ calling, 0- operator assisted calling and 101XXXX calling. The 811 Service is otherwise available wherever local service is available.
- E. 811 Service is available from the Company within the Company's service area only. To provide access to 811 to end users in another company's service area or to a Competitive Local Exchange Carrier ("CLEC") end user within the local calling area, the SOCS must make appropriate arrangements with the other company or CLEC serving that territory. The SOCS should work separately with competing local providers to ascertain that its end user customers will be able to reach one-call services provided by dialing 811.

THREE-DIGIT DIALING SERVICE (811)

1. Three-Digit Dialing Service (811) (cont'd)**1.2 Obligations of the SOCS**

- A. The SOCS may, but is not required to, submit a written application for 811 service to the Company which will include:
 - (1) The local, foreign exchange or toll free telephone number into which the Company is to translate the dialed 811 abbreviated code.
 - (2) For network sizing and protection, an estimate of annual call volumes, the expected busy hour and holding time for each call to the 811 Service.
 - (3) Complete contact information.
- B. If requested by the Company, the 811 provider shall assist the Company in responding to complaints made to the Company concerning 811 Service.
- C. Local Calling for Company Subscribers
 - (1) The SOCS, in cooperation with the Company, will assure that all 811 Service calls are local and do not generate Extended Area Service ("EAS"), Metropolitan Calling Area ("MCA") service, intraLATA toll, interLATA long distance or pay-per-call charges for Company subscribers.
 - (2) The SOCS must supply the Company with a toll free number. The Company will translate the 811 digits into the telephone number provided by SOCS.
 - (3) The SOCS is responsible for obtaining all necessary permissions, licenses, written consents, waivers and releases and all other rights from all persons whose work, statements or performances are used in connection with the 811 Service, and from all holders of copyrights, trademarks and patents used in connection with the said service.

THREE-DIGIT DIALING SERVICE (811)

1. Three-Digit Dialing Service (811) (cont'd)**1.3 Obligations of the Company**

- A. The Company shall provision the 811 Service in accordance with FCC directives and the terms of this tariff.
- B. When an 811 Service call is placed by the calling party via interconnection with an interexchange carrier, the Company cannot guarantee the completion of said 811 Service call, the quality of the call or any features that may otherwise be provided with 811 Service.
- C. The Company does not undertake to answer and forward 811 Service calls but furnishes the use of its facilities to enable SOCS to respond to such calls at SOCS established call centers.
- D. The rates charged for 811 Service do not contemplate the inspection or constant monitoring of facilities to discover errors, defects, and malfunctions in service, nor does the Company undertake such responsibility. The SOCS is responsible for making such operational tests as, in the judgment of the SOCS, are required to determine whether the Company's facilities are functioning properly for its use. The SOCS is responsible for promptly notifying the Company in the event the Company's facilities are not functioning properly.

1.4 Liability

- A. The Company's entire liability to any person for interruption or failure of the 811 Service shall be limited to the terms set forth in this section and other sections of this Tariff.
- B. The liability of the Company for losses or damages of any kind arising out of mistakes, omissions, interruptions, delays, errors or defects in transmission, or failure or defects in any facility furnished by the Company occurring in the course of furnishing 811 Service, or of the Company in failing to maintain proper standards of maintenance and operation or to exercise reasonable supervision, shall in no event exceed an amount equivalent to the proportionate charge to the SOCS for the 811 Service and local exchange service for the period of service during which such mistake, omission, interruption, delay, error or defect in transmission or defect or failure in facilities occurs.
- C. The Company is not liable for any losses or damages caused by the negligence of the SOCS.

THREE-DIGIT DIALING SERVICE (811)

1. Three-Digit Dialing Service (811) (cont'd)

1.4 Liability (cont'd)

- D. The Company shall not be liable to the SOCS for any damages the SOCS may incur that result from any changes, modifications or rulings made by the FCC.
- E. The Company will make every effort to route 811 calls to the SOCS call center, however, the Company will not be held responsible for routing mistakes or errors.
- F. The 811 Service is provided solely for the benefit of the SOCS. The provision of the 811 Service by the Company shall not be interpreted, constructed or regarded, either expressly or implied, as being for the benefit of or creating any Company obligation toward any third person or legal entity.
