MO. PUBLIC SERVICE COMM.

A. General

1. Custom Calling Service consists of one or more of the following features which provide special kinds of customer-controlled communications features on individual service lines. Custom Calling Service is available only through central offices which, at the Company's option, are appropriately equipped. Operating specifics may vary by central office equipment type but can be described generally as:

- a. Call Waiting--Provides a signal to a customer using the telephone that another call is being attempted to his number. The customer can "hold" the original call to answer the incoming call.
- b. Cancel Call Waiting--Allows customer to dial an access code to cancel call waiting for the duration of the call in progress.
- c. Call Forwarding--Permits all calls directed to a customer number to be routed on to another dialable number, predetermined and activated by the customer.
- d. Remote Call Forwarding--A customer can have calls forwarded to a directory number in another toll area. Normal Direct Distance Dialing toll charge will be applied to your bill if call is answered at the forwarded number.

- f. Three-Way Calling--Allows for the addition of a third number to a connection made between two numbers without the assistance of a company operator. (See Note)
- g. Speed Calling-Short List--Permits customer calling to other telephone numbers through the dialing of a code rather than an entire telephone number. Capacity is 8 numbers dialable by speed dialing code.
- h. Speed Calling-Long List--Same as Item (g) above except capacity is for 30 numbers dialable by speed dialing code.
- i. Ring Again--Allows a subscriber who receives a busy station to receive a special ring indicating that a previously busy line has become idle within a prescribed time period.
- j. Teen Service--Allows a customer to have two directory numbers on the same single-party line so that a subscriber can receive calls dialed to separate numbers without installing a second line.

Note: Transmission on calls forwarded and three way calling may vary upon the distance and routing required to complete such calls; therefore the normal grade of end to end calling cannot be guaranteed on such calls.
