**PRIMARY RATE ISDN: SelectData**

**5.1 GENERAL**

5.1.1 Effective March 1, 2014, no further installations, moves, rearrangements, or changes of any type will be made to Primary Rate ISDN: SelectData services. Customers of record on March 1, 2014 may continue their service as long as such service remains at the location at which it was being furnished on the aforementioned date. In the event that these services are discontinued at their present location for any reason, they will not be reestablished. (AT)

5.1.2 Service Description (CT)

Primary Rate ISDN is an intraLATA dial-up multi-rate switched digital data service. Primary Rate ISDN will provide digital connections ranging from 64 Kbps to 1536 Kbps (synchronous) in 64 Kbps increments of bandwidth via the public switched network. Network access to Primary Rate ISDN is via fully configured ISDN primary rate interfaces (PRI).

SelectData is an inbound-calling-only service, which provides ISDN PRI functionality for digital data transport and/or analog modem calls (voice grade), on a single channel basis. Individual calls may be received at transmission speeds up to 64 Kbps. Outbound calls may not be placed with SelectData service.

**5.2 SERVICE COMPONENTS**

5.2.1 Primary Rate ISDN Arrangement: provides the communication path capable of bandwidth aggregation from the customer's premises to the Primary Rate ISDN serving office. A Primary Rate ISDN arrangement may consist of Control Links and Communication Links. A minimum of one Control Link is required per Primary Rate ISDN arrangement. For SelectData, the minimum configuration provides digital connections of up to 64 KBPS only.

- (1) Applies to the first unit ordered per request, per customer premises, per installation date.
- (2) The installation charge for customer moves within the same Primary Rate ISDN serving office, as described in 5.3.11.B. preceding, will be equal to the installation charge associated with the SelectVideo 36 month service term.
- (3) Applies to all other units ordered in addition to the initial unit per request, per premises, per installation date.
- (4) Business customers who currently have service with another carrier and now establish Primary Rate ISDN SelectData with the Company will receive a waiver of all Installation Charges, Service Connection Charges, and Conversion Charges associated with this rate element. To be eligible, the customer must not currently have any past due bills for regulated service owed to the Company, except in those cases where the customer and the Company have established mutually acceptable payment arrangements for collection of past due amounts. This offer cannot be combined with any other non-recurring and/or conversion charge credits or waiver offers.
- (5) Effective January 25, 2013, 24-, 36-, 48- and 60-Month Service Terms are no longer available for new installations or renewals of Primary Rate ISDN SelectData service. Customers currently on a 24-, 36-, 48- or 60-Month Service Term may continue service at their existing rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service by entering into a new 12-month Service Term agreement at the then current applicable 12-month rates. If the customer does not enter into a new 12-month Service Term agreement, or request discontinuance of the service, the Month-to-Month tariff rates in effect at such time will automatically apply.
- (6) Effective March 1, 2014, SelectData services are grandfathered for existing customers with existing service at existing locations. See Paragraph 5.1.1 of this Section.
