Replacing 6th Revised Sheet 3.03

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

For Directory Assistance Service, the customer shall specify the number of busy-hour minutes of capacity (BHMC) from the customer's premises to the Directory Assistance location. If the Directory Assistance Service is to be combined with a FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service, the customer shall also specify which FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service trunk group is to be associated with the Directory Assistance Service. This information is used to determine the number of transmission paths as set forth in Section 9.2, E.3., following. The customer then specifies the Directory Transport features.

For all Special Access Services, the customer must specify the customer-designated premises or hubs involved, the type of service (e.g., Voice Grade, High Capacity, etc.), the channel interface, technical specification package and features desired. For multipoint services, the channel interface at each premises may, at the request of the customer, be different, but all such interfaces shall be compatible.

For WATS Access Line Service the customer must also specify the type of calling (i.e., originating or terminating) for which the service is to be provided, the type of WAL (i.e., non-joint provided or joint provided, WAL), the type of address signaling and the type of supervisory signaling.

Additionally, when the necessary screening functions are not provided at the wire center which serves the customer premises, the Telephone Company will provide the service to the nearest wire center where capacity exists. In these circumstances, the customer will be so notified and the order will be changed to designate the appropriate premises. No charge will apply for the order modification. In addition, the customer must specify that the WATS Access Line is to be provided with an extension in the same or a different LATA, if applicable. When such an extension is specified, the customer must provide either (1) the end user premises (for an intraLATA extension) or (2) the customer-designated premises (for an extension in a different LATA) to which the extension is to be provided.

5.2 Access Order-(Continued)

Operator Service System (OSS) Tandem interconnection requirements are specified in Section 17, Paragraph 17.2, following. Information regarding OSS Tandem locations is contained in the Southwestern Bell Interexchange Customer Information Handbook.

(AT)

Carrier Identification Code Parameter (CIP)

The customer must specify per trunk group or tandem, and all associated Carrier Identification Codes, the end offices that will be used to pass originating Carrier Identification Code Parameter (CIP) to the customer's designated premises. The customer's end office must be equipped with SS7 Signaling and is provided in conjunction with Common Channel Signaling/Signaling System 7 (CCS/SS7) Interconnection Service as set forth in Section 23. End offices so equipped may be found in NECA Tariff F.C.C. No. 4.

(AT)

- For Common Channel Signaling/Signaling System 7 (CCS/SS7) Interconnection Service, the customer must provide the following information to the Telephone Company at the time of ordering:
  - Number of access links
  - Link Type
  - Signaling Link Code
  - Customer Signaling Point Code
  - Common Language Location Identifier (CLLI) code of the Telephone Company interconnecting Signal Transfer Point
  - Contact telephone number for installation and maintenance of the customer's designated premises

When ordering CCS/SS7 Interconnection Service, the customer will provide an estimate of total annual volume and busy hour busy month volume projected for a period of three years. The forecast should be itemized by message type. The Telephone Company will utilize this forecast in its own efforts to project further facility requirements.

- For LIDB Validation Service, the customer shall provide a LIDB Validation Service Order Form which specifies the OPCs of the customer's designated OSSs sending the query or queries, the PIU per OPC of the customer's OSS location, and the desired due date of the order.

LIDB Validation Service is provided in conjunction with CCS/ SS7 Interconnection Service, as set forth in Section 20. In order to utilize LIDB Validation Service, the customer must have CCS/SS7 Interconnection Service to the two Telephone Company STPs designated by the Telephone Company as the interconnecting STP pair to be utilized for interconnection to the CCS/SS7 network. The Telephone Company's STP locations are provided in the National Exchange Carriers Association, Inc. Tariff F.C.C. No. 4.

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

The BHMC may be determined by the customer in the following manner. For each day, the customer shall determine the highest number of minutes of use for a single hour (e.g., 55 minutes in the 10-11 a.m. hour). The customer shall, for the same hour period (i.e., busy hour), pick the 20 consecutive business days in a calendar year which add up to the largest number of minutes of use. The customer shall then determine the average busy-hour minutes of capacity (i.e., BHMC) by dividing the largest number of minutes-of-use figure for the same hour period for the consecutive 20-day period by 20. This computation shall be performed to establish the BHMC's for each end office the customer wishes to serve. These determinations thus establish the forecasted BHMC for each end office.

Where the Special Access Service is exempt from the Special Access Surcharge as set forth in Paragraph 7.3.2, following, and the customer desires an exemption from the surcharge, it shall furnish with the order the certification as set forth in Paragraph 7.3.2, following.

For Frame Relay Service (FRS), the customer must specify the customer's designated premises, the Primary Market Area (PMA) involved and the type of access termination. For each access termination requested, the customer must specify the data transmission speed.

In addition, the customer must provide both points connected by a Logical Link, along with the data link connection identifier (DLCI), or address, assigned for each point when establishing the permanent virtual circuit.

When ordering from a point outside the PMA, the Telephone Company shall determine the frame relay switch(es) within the PMA as well as the nearest serving wire center within the PMA.

(AT) | When FGD or BSA-D Switched Access Service is ordered for the provision of Multiple 64 CCC, the customer must have direct routed digital transport facilities between the customer designated premises and the Multiple 64 CCC end office for originating and terminating traffic. To ensure availability of transporting Multiple 64 CCC rates at speeds up to 1536 Kbps, the customer must, at a minimum, order 24 FGD or BSA-D trunks or contiguous increments of 24 FGD or BSA-D trunk groups, equipped with the following:

- SS7 Signaling
- 64 CCC
- Multiple 64 CCC

ACCESS SERVICES

RECEIVED

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

MAY 24 1994

5.2 Access Order-(Continued)

MISSOURI  
Public Service Commission

(MT)

The BHC may be determined by the customer in the following manner. For each day, the customer shall determine the highest number of minutes of use for a single hour (e.g., 55 minutes in the 10-11 a.m. hour). The customer shall, for the same hour period (i.e., busy hour), pick the 20 consecutive business days in a calendar year which add up to the largest number of minutes of use. The customer shall then determine the average busy-hour minutes of capacity (i.e., BHC) by dividing the largest number of minutes-of-use figure for the same hour period for the consecutive 20-day period by 20. This computation shall be performed to establish the BHC's for each end office the customer wishes to serve. These determinations thus establish the forecasted BHC for each end office.

(MT)

Where the Special Access Service is exempt from the Special Access Surcharge as set forth in Paragraph 7.3.2, following, and the customer desires an exemption from the surcharge, it shall furnish with the order the certification as set forth in Paragraph 7.3.2, following.

(AT)

For Frame Relay Service (FRS), the customer must specify the customer's designated premises, the Primary Market Area (PMA) involved and the type of access termination. For each access termination requested, the customer must specify the data transmission speed.

In addition, the customer must provide both points connected by a Logical Link, along with the data link connection identifier (DLCI), or address, assigned for each point when establishing the permanent virtual circuit.

(AT)

When ordering from a point outside the PMA, the Telephone Company shall determine the frame relay switch(es) within the PMA as well as the nearest serving wire center within the PMA.

Replacing Original Sheet 3.0501

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

In addition, the customer must specify one of three trunk allocation schemes: fixed, floating or flexible. In the fixed allocation scheme, the FGD or BSA-D trunks selected for a Multiple 64 CCC call are contiguous and the first FGD or BSA-D trunk is constrained to certain fixed starting points. In the floating allocation scheme, the FGD or BSA-D trunks selected for a Multiple 64 CCC call are contiguous, but the position of the first trunk can float. For the flexible allocation scheme, the FGD or BSA-D trunks selected for a Multiple 64 CCC call may occupy non-contiguous positions within a group of 24 FGD or BSA-D trunks.

Customers may segregate their originating and terminating Multiple 64 CCC traffic by specifying dedicated Multiple 64 CCC trunk group(s) on the order. A Multiple 64 CCC trunk group(s) represents access capacity for carrying only Multiple 64 CCC traffic.

(AT)

For Advanced Carrier Identification Service (ACIS), the customer must have LATA-wide Switched Access in order to receive originating ACIS routed traffic. The customer must specify the:

- LATAs from which they wish to receive originating ACIS calls,
- the ACIS Access Code(s) to be activated in a given LATA,
- the Carrier Identification Code (CIC) of each ACIS Code in a given LATA, and
- the desired due date of the order.

Originating ACIS routed calls from LATAs in which the customer has not ordered ACIS will be blocked.

Originating traffic that is to be routed using ACIS may be combined with either FGB, FGC, BSA-B, BSA-C or BSA-D Switched Access Service. The customer shall designate which FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service trunk groups are to be associated with ACIS. However, when FGD or BSA-D Switched Access Service becomes available in an end office, ACIS traffic originating from that end office must be provided with FGD or BSA-D Switched Access Service.

5.2.1 Access Order Service Date Intervals

MISSOURI  
Public Service Commission

The time required to provision the service (i.e., the interval between the Application Date and the Service Date) is known as the service interval. Such intervals will be established in accordance with published service date interval guidelines and, where possible, will reflect the customer's requested service date.

(AT) A schedule of intervals applicable for Switched, Special Access and  
(AT) Frame Relay Services is located in the Southwestern Bell Interexchange Customer Information Handbook. The schedule specifies the services and quantities of these services that can be provided within the published interval.

Access Services provided will be installed during Telephone Company business days. If an IC requests that installation be done outside of scheduled work hours, and the Telephone Company agrees to this request, the IC will be subject to applicable Additional Labor Charges as set forth in Section 13, following.

5.2.2 Access Order Charge

An Access Order Charge will apply per LIDB Validation Service Order for the installation, addition, change or rearrangement of LIDB Validation Service.

5.2.1 Access Order Service Date Intervals--(Continued)

To the extent the Access Service can be made available with reasonable effort, the Telephone Company will provide the Access Service in accordance with the IC's requested interval, subject to the following conditions:

A. Standard Interval

The Telephone Company shall publish and make available to all IC's, a schedule of Standard Intervals applicable for Switched and Special Access Services. This schedule shall specify which services and the quantities of services that can be provided within the standard intervals.

Access Services provided in a Standard Interval will be installed during normally scheduled Telephone Company work hours. If an IC requests that installation be done outside of scheduled work hours, and the Telephone Company agrees to this request, the IC will be subject to applicable Additional Labor Charges as set forth in Section 13, following.

B. Negotiated Interval

The Telephone Company will negotiate a service date interval with the IC when:

1. There is no Standard Interval for the service, or
2. The Short Notice Interval is not applicable, or
3. The IC requests a service date beyond the applicable Standard Interval service date.

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.2 Access Order Modifications

MISSOURI  
Public Service Commission

The customer may request a modification of its Access Order at any time prior to the service date or notification by the Telephone Company that service is available for the customer's use, whichever is later. The Telephone Company will make every effort to accommodate a requested modification when it is able to do so with the normal work force assigned to complete such an order within normal business hours. If the modification cannot be made with the normal work force during normal business hours, the Telephone Company will notify the customer. If the customer still desires the Access Order modification, the Telephone Company will schedule a new service date. All charges for Access Order modifications will apply on a per-occurrence basis.

Any increase in the number of Special Access Service channels or Switched Access Service busy-hour minutes of capacity will be treated as a new Access Order (for the increase amount only).

If the Telephone Company specifies that order modifications are necessary to satisfy the transmission performance for a Special Access Service ordered by a customer (e.g., the upgrading by the Telephone Company of the channel termination from effective two-wire to effective four-wire) and the customer authorizes the suggested order modifications, these changes will be made without order modification charges being incurred by the ICSE. However, charges for the Special Access Service provided to the customer will apply.

CANCELLED

If the Telephone Company specifies that order modifications are necessary to satisfy the transmission performance for a Special Access Service ordered by a customer (e.g., the upgrading by the Telephone Company of the channel termination from effective two-wire to effective four-wire) and the customer authorizes the suggested order modifications, these changes will be made without order modification charges being incurred by the IC. However, charges for the Special Access Service provided to the customer will apply.

CANCELLED NOV 16 1992 BY Jnr R.S. #5.01 MISSOURI Public Service Commission

A. Service Date Change Charge

Access Order service dates for the installation of new services or rearrangements of existing services may be changed, but the new service date may not exceed the original service date by more than 45 calendar days. When, for any reason, the customer indicates that service can not be accepted for a period not to exceed 45 calendar days beyond the original service date, and the Telephone Company accordingly delays the start of service, a Service Date Change Charge will apply. If a Design Change has been requested as set forth in 5.2.3, C., following, and the engineering review cannot be completed within the 45-calendar-day time frame, the new service date may exceed the original service date by more than 45 calendar days. In all other cases, if the customer-requested service date exceeds the allowable service date change period previously described, the order will be cancelled by the Telephone Company,

more than 45 calendar days. In all other cases, if the customer-requested service date exceeds the allowable service date change period previously described, the order will be cancelled by the Telephone Company, appropriate cancellation charges applied and a new order issued with the new service date. If a service date change is necessary to accommodate a customer-requested Design Change, both the Service Date Change Charge and the Design Change Charge apply.

A new service date may be established that is prior to the original service date if the Telephone Company determines it can accommodate the customer's request without delaying service dates for orders of other customers. If the service date is changed to an earlier date and the Telephone Company determines that additional labor or extraordinary costs are necessary to meet the earlier service date requested by the customer, the customer will be notified by the Telephone Company that an Expedited Order Charge, as set forth in 5.2.2(D), following, applies. Such charges to expedite service should they apply, will be in addition to the Service Date Change Charge.

A Service Date Change Charge will apply, on a per-order, per-occurrence basis, for each service date changed. The applicable charge is:

	<u>USOC</u>	<u>Charge</u>
Service Date Change Charge, per Order	OMC	\$17.50

(AT) Service Date Change Dispatch Charge	VT6DN	200.00

B. Design Change Charge

The customer may request a design change to the service ordered. A design change is any change to an Access Order which requires engineering review. An engineering review is a review by Telephone Company personnel of the service ordered and the requested changes, to determine what changes in the design, if any, are necessary to meet the changes requested by the customer. Design changes to a pending order include such things as the addition or deletion of features, BSEs, or functions or a change in the type of Transport Termination (Switched Access only), type of channel interface, type of interface group or technical specification package. Design changes do not include a change of customer premises, End User premises, End Office Switch, Feature Group type, BSA type, or Special Access Service channel type. Changes of this nature will require the issuance of a new order and the cancellation of the original order with appropriate cancellation charges applied.

5.2.3 Access Order Modifications (cont'd)

C. Expedited Order Charge

- (1) Analog (Metallic, Telegraph, and Wideband Analog), Voice Grade, DS0 (Wideband Data, MegaLink Data and DovLink) and DS1 Access Services

If a customer desires that service be provided on a due date earlier than the standard interval, the customer may request that service be provided on an expedited service interval. To qualify for an expedited interval the customer must provide End User premises access, where needed, until 11PM (CT), Monday-Friday.

If, upon reviewing availability of equipment, facilities and scheduled workload, the Telephone Company agrees to provide service on an expedited basis and the customer accepts this proposal, an Expedite Order Charge will apply.

The maximum number of circuits, which may be expedited, is limited to twelve (12) two-point or six (6) multi-point Analog/DS0 circuits at the same location, and a limit of nine (9) DS1 circuits at the same location. When the number of access circuits exceeds the maximum threshold the interval will be negotiated and expediting will not be an option.

(CP)

If the Telephone Company determines that service can be provided on an expedited basis, the following charges will apply based upon agreed upon expedited service interval. The Expedited Order Charge applies on a per order basis, regardless of the number of circuits on the order.

D. Expedited Order Charge

If a customer desires that service be provided on an earlier date than that which has been established for the Access Order or the provision of the Access Service, the customer may request that service be provided on an expedited basis. If the Telephone Company determines that service can be provided on the requested date and that additional labor cost or extraordinary costs are required to meet the requested service date, the customer will be notified and will be provided with an estimate of the additional charges involved. If the customer instructs the Telephone Company to proceed, such additional charges will be determined and billed to the customer as follows:

To calculate the additional labor charges, the Telephone Company will keep track of the additional labor hours used to meet the request of the customer and will bill the customer at the applicable Additional Labor charges as set forth in 13.2.6, following.

To develop, determine and bill the customer for extraordinary costs which may be involved, the special construction terms and conditions as set forth in Section 14, following, will be used by the Telephone Company. Authorization to incur the costs and to bill the customer will be in accordance with the terms and conditions in Section 14, following.

When the request for expediting occurs subsequent to the issuance of the Access Order, a Service Date Change Charge as set forth in Paragraph 5.2.3, A., preceding, also applies.

ACCESS SERVICES

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.1 Access Order Service Date Intervals-(Continued)

C. Short Notice Interval-(Continued)

3. For Short Notice Interval Access Orders, the nonrecurring charge is two times the appropriate nonrecurring charges for the service provided as set forth in other sections of this Tariff.

5.2.2 Access Order Modifications

An Access Order may be modified by the IC prior to the service date as set forth following. One or more of the following charges will apply when such modifications are undertaken. When modifications are undertaken, the Telephone Company may specify that the service date will be changed. All charges for Access Order modifications will apply on a per-occurrence basis.

Any increase in the number of Special Access Service channels or Switched Access Service busy-hour minutes of capacity will be treated as a new Access Order (for the increase amount only).

If order modifications are necessary to satisfy the transmission performance for a Special Access Service ordered by an IC, these changes will be made without order modification charges being incurred by the IC.

A. Service Date Change Charge

Access Order service dates may be changed, but the new service date may not exceed the original service date by more than 30 calendar days. If the IC-requested service date is more than 30 calendar days after the original service date, the order will be cancelled by the Telephone Company and re-issued with the appropriate cancellation charges applied. With the agreement of the Telephone Company, a new service date may be established that is prior to the original standard or negotiated interval service date.

A Service Date Change Charge will apply, on a per-order, per-occurrence basis, for each service date changed. The applicable charge is:

Section 5  
Original Sheet 8

ACCESS SERVICES

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.2 Access Order Modifications-(Continued)

A. Service Date Change Charge-(Continued)

	<u>USOC</u>	<u>Charge</u>
Service Date Change Charge, per order	OMC	\$29.59

If the service date is changed to an earlier date, an Expedited Order Charge as set forth in Paragraph 5.2.2, D., following, will apply in addition to the Service Date Change Charge.

B. Partial Cancellation Charge

Any decrease in the number of Special Access Services, Switched Access Service busy-hour minutes of capacity or Dedicated Access Lines will be treated as a partial cancellation.

An IC may cancel any number of Special Access Services. For Switched Access Service busy-hour minutes of capacity, the amount cancelled cannot cause the order to drop below the minimum requirements as set forth in Paragraph 5.1.1, preceding, and Paragraph 5.5, following. When the capacity cancelled brings the ordered capacity below these minimum requirements, the entire order will be cancelled.

A Cancellation Charge will apply on a per-order, per-occurrence basis for the quantity cancelled. The applicable Cancellation Charge is computed as set forth in Paragraph 5.2.3, following.

C. Design Change Charge

The IC may request a design change to the service ordered. A design change is any change to an Access Order which requires engineering review. A design change may include such things as the addition or deletion of optional features or functions or a change in the type of Transport Termination (Switched Access only), type of facility interface, type of facility or type of access connection interface group. It may not include a change of IC terminal location, End User's premises, end office switch or Feature Group type.

ACCESS SERVICES

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.2 Access Order Modifications-(Continued)

C. Design Change Charge-(Continued)

Changes of this nature will require the issuance of a new order and the cancellation of the original order with appropriate charges applied. The Design Change Charge will apply to all Special Access Service, channels or Switched Access Service busy-hour minutes of capacity.

The Telephone Company will review the requested change, notify the IC whether the change can be accommodated and specify if a new service date is required. If the IC authorizes the Telephone Company to proceed with the design change, a Design Change Charge will apply. If the change involves the addition or deletion of optional features for which nonrecurring charges are stated, the Design Change Charge is equal to one-half the nonrecurring charge for each feature being added or deleted. When there is no nonrecurring charge associated with the change being made, the Design Change Charge is equal to one-half of the nonrecurring charges for the Access Service ordered. If multiple changes are made on a single order, some of which have separately stated nonrecurring charges and others which do not, both of the above charges will apply. The Design Change Charge will apply on a per-order, per-occurrence basis.

If a change of service date is required, the Service Date Change Charge as set forth in Paragraph 5.2.2, A., preceding, will also apply.

D. Expedited Order Charge

When placing an Access Order, an IC may request a service date that is prior to the standard interval service date. An IC may also request an earlier service date on a pending standard or negotiated interval Access Order. If the Telephone Company agrees to provide service on the requested date, an Expedited Order Charge will apply.

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.5 Selection of Planned Facilities for Access Orders

- A. When there are analog or digital high-capacity facilities to the first point of switching for switched access or to a hub for special access, or when there are digital high-capacity facilities to an interconnecting Signal Transfer Point (STP) for CCS/SS7 Interconnection Service, the customer must specify a channel assignment for each service ordered. In addition, when a customer requests a Rollover, the Connecting Facility Assignments (CFA's) must be specified for the facilities involved in the Rollover for each service. The customer will provide this information to the Telephone Company during the order process.
- B. For all other Access Orders, the option to request a specific transmission path or channel is not provided, except as provided for under Special Facilities Routing as set forth in Section 11, following.

5.2.6 Minimum Period

(CT)

The minimum period for which Access Service is provided and for which charges are applicable is set forth in each section of this tariff.

When Access Service is disconnected prior to the expiration of the minimum period, charges are applicable for the balance of the minimum period. A disconnect constitutes facilities being returned to available inventory. This terminology does not refer to when billing is stopped, but rather distinguishes a disconnect from a service rearrangement.

(CT)

Service arrangements may be made without a change in minimum period requirements where so specified in this tariff.

ACCESS SERVICES

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.2 Access Order Modifications-(Continued)

D. Expedited Order Charge-(Continued)

To calculate the Expedited Order Charge, the total of all the nonrecurring charges associated with the order is divided by the number of days in the service date interval. The charge is then applied on a per day (i.e., calendar day) of improvement basis, per order. When the request for expediting occurs subsequent to the issuance of the Access Order, a service date change charge as set forth in Paragraph 5.2.2, A., preceding, also applies.

When expediting causes the Telephone Company to incur extraordinary costs that are not recovered by the Expedited Order Charge, the IC will be billed, on an individual-case basis, an amount equal to the costs incurred in lieu of an Expedited Order Charge.

E. Other Modification Charge

Modifications other than those described in Paragraphs 5.2.2, A., B., C. and D., preceding, may be requested by the IC. If the modification can be accommodated and implemented by the Telephone Company, an Other Modification Charge will apply on a per-order, per-occurrence basis.

Some of the types of modifications for which this charge will apply include, but are not limited to, the following:

- Change of billing address.
- Change of telephone number.
- Change in Hunt Group Arrangement.
- Change in Nonhunting Number of Hunt Group Arrangement.
- Change of Jurisdiction (i.e., breakdown between intrastate and interstate minutes of use for Switched Access Services).

Other Modification Charge,  
per order . . . . .

Shared Use (i.e., Switched and Special Access Services provided over the same analog or digital high capacity facilities) is allowed. Shared use facilities to a Hub will be ordered and provided as Special Access Service. While shared use is allowed, individual services utilizing these facilities must be ordered either as Switched Access Service or Special Access Service. When placing the order for the individual service(s), the customer must specify a channel assignment for each service ordered. In addition, when a customer requests a Rollover, the Connecting Facility Assignments (CFA's) must be specified for the facilities involved in the Rollover for each service.

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.3 Cancellation of an Access Order

A. An IC may cancel an Access Order for the installation of service on any date prior to the service date. The cancellation date is the date the Telephone Company receives written or verbal notice from the IC that the order is to be cancelled. The verbal notice must be followed by written confirmation within 10 days.

If an IC or an End User is unable to accept Access Service within 30 calendar days of the original service date, the IC has the choice of the following options:

- The Access Order shall be cancelled, and charges set forth in Paragraph 5.2.6, C., following, will apply, or
- Billing for the service will commence.

In such instances, the cancellation date or the billing date, depending on which option is selected by the IC, shall be the 31st day beyond the original service date of the Access Order.

B. Access Order costs are considered to have started when the Telephone Company incurs any cost in connection therewith or in preparation thereof which would not otherwise have been incurred. These costs include but are not limited to preliminary engineering, orders to suppliers and other similar items of cost. For purposes of determining Cancellation Charges, the costs are considered to have started on the order date (i.e., the day the Telephone Company gives a firm order confirmation to the IC).

C. When an IC cancels an Access Order for the installation of service, a Cancellation Charge will apply on a per-order basis. The Cancellation Charge is calculated by multiplying the total of the nonrecurring charges associated with all items on the Access Order by the number of calendar days elapsed since the order date and dividing that figure by the number of days in the service interval (i.e., the number of days between the order date and the service date). The resulting amount is the Cancellation Charge. When determining the charge for a partial cancellation, as set forth in Paragraph 5.2.2, B., preceding, only those nonrecurring charges associated with the portion of the order being cancelled are used in computing the charge.

5.2.3 Cancellation of an Access Order-(Continued)

D. When an IC cancels an order for the discontinuance of service, no charges apply for the cancellation.

5.2.4 Selection Of Planned Facilities For Access Orders

- A. When there are facilities in the activated state for its use under a Planned Facilities Order or analog or digital high capacity services or a Hub in the Access Service state, an IC may request a specific channel or transmission path be used to provide the Switched or Special Access Service requested in an Access Order. The Telephone Company will make a reasonable effort to accommodate the IC's request. If the Telephone Company determines that the request cannot be met with reasonable effort, and another facility is activated for the IC's use, the Telephone Company will specify the use of that facility and notify the IC accordingly.
- B. For all other Access Orders, the option to request a specific transmission path or channel is not provided, except as provided for under Special Facilities Routing as set forth in Section 11, following.

5.2.5 Minimum Period

- A. Except as set forth in Paragraph 5.2.5, B. and C., following, the minimum period for which Access Service is provided and for which charges are applicable is six months. For the application of minimum period charges for Switched Access Service Feature Groups B, C and D, it is assumed that the last identical capacity placed in service is the first one discontinued.
- B. The minimum period for which Access Service ordered under a short Notice Interval is provided and for which charges are applicable is one month.
- C. The minimum period for analog and digital high capacity services (facilities) to a Hub (service date and activation date are always the same) is 24 months and applies as set forth in Paragraph 5.4.9, A., following.

5.2.6 Minimum Period Charges

When Access Service is discontinued prior to the expiration of the minimum period, charges are applicable for the balance of the minimum period. A disconnect constitutes facilities being returned to available inventory.

The Minimum Period Charge for monthly billed services will be determined as follows:

- A. For Switched Access Service, the charge for each remaining month and/or fraction thereof is equal to the applicable minimum monthly charge for the capacity as set forth in Section 6, Paragraph 6.7.4, following.
- B. For Special Access Service, the charge for each remaining month and/or fraction thereof is the applicable monthly rates for the service as set forth in Section 7, Paragraph 7.5, following.

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.7 Shared Use Facilities

Shared Use (i.e., Switched and Special Access Services provided over the same analog or digital high capacity facilities) is allowable only for existing services and to fill out existing systems. Only Switched Access Service busy-hour minutes of capacity may be added to fill out existing systems. When Switched or Special Access Services provided over a shared use facility are disconnected, only Switched Access Service busy-hour minutes of capacity can be ordered by the IC to backfill the system.

5.3 Available Inventory

Available inventory is limited and does not include facilities previously ordered or reserved. Available inventory also does not include analog or digital high capacity facilities. All Access Orders for analog or digital high capacity services or interface groups (i.e., Group, Supergroup, Master-group, DS1, DS1C, DS2, DS3 and DS4) require the use of Planned Facilities.

To the extent they can be provided, the Telephone Company will provide other than high capacity Access Services from an available inventory, except when the IC has Planned Facilities activated for its use and requests the Telephone Company to use such Planned Facilities in providing the requested services.

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.4 Planned Facilities Order

5.4.1 General

- A. An IC may place a Planned Facilities Order for the provision of Planned Facilities. Planned Facilities provided for Special Access Service include Access Connections, Special Transport, Features and Functions and Special Access Lines as described in Section 7, Paragraph 7.1, following. Planned Facilities provided for Switched Access Service include Access Connections, Local Transport and End Office functions as described in Section 6, Paragraph 6.1, following. Planned Facilities will be made available by the Telephone Company for the IC's use on an established activation date. The combinations which may be ordered and made available for the IC's use on the activation date are set forth in Paragraph 5.4.2, following.
- B. Planned Facilities Orders must be placed separately for each activation date for Special Access Service and Switched Access Service. For Switched Access Service, a separate order must be placed for each IC terminal location to end office (by Feature Group type) ordered.

For Special Access Service, separate orders must be placed for each IC terminal location to End User's premises, IC terminal location to IC terminal location and IC terminal location to Hub serving wire center, End User's premises to End User's premises or End User's premises to WATS or WATS-type serving office.

Metallic facilities between the IC terminal location and the IC serving wire center may be ordered for use with Switched Access Service or Special Access Service. A separate order must be placed for each request for such facilities.

- C. To the extent that Planned Facilities can be made available, and unless Special Construction Charges apply as set forth in Paragraph 5.4.1, D., following, the Planned Facilities ordered will be available to the IC at rates and charges as set forth in Paragraph 5.4.11, following, on the activation date. Except as set forth following, the activation date may be set for any working day at least 24 months but not more than 36 months after the order date.

5.4.1 General-(Continued)

C. (Continued)

With the agreement of the Telephone Company, the Planned Facilities activation date may be scheduled for a date earlier than 24 months from the order date. If an IC requests an activation date more than 36 months after the order date, the Telephone Company will determine if such requests can be accommodated. When they can be, orders shall be accepted.

D. Planned Facilities for which the Telephone Company has no foreseeable reuse, may be subject to Special Construction Charges as set forth in Section 14, following, in addition to the rates and charges set forth in Paragraph 5.4.11, following.

The Telephone Company shall determine whether Special Construction Charges apply and will so notify the IC prior to establishing a firm order.

5.4.2 Planned Facilities Provided

The IC may order Planned Facilities as follows:

A. For Switched Access Service

1. Two-wire and four-wire metallic facilities between the IC terminal location and the IC serving wire center. These must be ordered in 100 pair units.
2. Busy-hour minutes of capacity (BHMC) between an IC terminal location and an end office (by Feature Group and type of BHMC). Optional features may also be specified by the IC.

5.4.3 Advance Payments

Public Service Commission

Planned Facilities Orders are subject to advance payments by the IC. Three advance payments are required during the Order Interval, i.e., interval between the order date and the original activation date. These are set forth in Paragraphs 5.4.3, A., B. and C., following. Each advance payment is based on the monthly charge as described in Paragraph 5.4.11, following.

- A. The first advance payment is due to the Telephone Company 30 days after the order date. The payment shall be an amount equal to three times the monthly charge.
- B. The second advance payment is due to the Telephone Company on the last day of the month that is specified in the following table:

<u>Order Interval In Months</u>	<u>Month After Order Date Second Payment Is Due</u>
up to 19	1st
over 19 to 20	2nd
over 20 to 21	3rd
over 21 to 22	4th
over 22 to 23	5th
over 23 to 24	6th
over 24	7th

The payment shall be an amount equal to six times the monthly charge.

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.4 Planned Facilities Order-(Continued)

5.4.3 Advance Payments-(Continued)

C. (Continued)

Should the Planned Facilities Order be cancelled by the IC, the amount of the advance payments will be credited to the IC's account, and any remaining credit balance will be refunded. The fact that advance payments have been made in no way relieves the IC from complying with the Telephone Company's regulations as to other payments or the prompt payment of bills.

5.4.4 Hub Serving Wire Centers

Planned Facilities Hub serving wire centers for Special Access may be established by the Telephone Company at designated locations in a LATA. A Hub is a Telephone Company office where facilities will be available to reach a specified set of serving wire centers and End User's premises. The location of Hubs, if any, in a LATA will be specified by the Telephone Company. Different serving wire centers may be designated as Bridging Hubs and Multiplexing Hubs. The wire centers served by the Hub serving wire center will also be specified by the Telephone Company.

5.4.5 Modifications of Planned Facilities Orders

Modifications of Planned Facilities Orders may be made by the IC without charge prior to acceptance by the Telephone Company of the Planned Facilities Order. The date when the order is accepted is known as the order date. After the order date, modifications may be made as set forth following:

A. Change in Number of Facilities

After the order date, any increase or decrease in the number or type of facilities ordered will be treated as follows:

1. An increase in the number of facilities ordered will be treated as a new Planned Facilities Order for the increased amount only.

2. Any decrease in the number of facilities ordered will be treated as a cancellation (for the decreased amount only) and will be subject to the regulations and charges set forth in Paragraph 5.4.6, following.

5.4.5 Modifications of Planned Facilities Orders-(Continued)

B. Activation Date Changes

With the agreement of the Telephone Company, the IC may change the activation date of a Planned Facilities Order subject to the following conditions:

1. No activation date may be established that is more than 12 months beyond the activation date specified on the original order. If the IC is unable to accept the facilities within 12 months of the original activation date, the IC has the choice of the following options:
  - a. The Planned Facilities Order shall be cancelled and charges set forth in 5.4.6, B., following, will apply or
  - b. Billing for the facilities will commence.
2. If the requested date is prior to the original activation date, Additional Engineering, Additional Labor and/or special construction charges may apply in order to meet the date. The Telephone Company will determine whether such charges apply and will notify the IC accordingly.
3. A Planned Facilities Order Modification Charge as set forth in Paragraph, 5.4.5, D., following, will apply for each activation date change.

C. Other Modifications

1. With the agreement of the Telephone Company, other modifications may be made prior to the activation date. The types of modifications that may be made include, but are not limited to:

- Change in facility interface
- Addition or deletion of optional features
- Change in type of Transport Termination (Switched Access only)
- Change from two-wire facilities to four-wire facilities or from four-wire facilities to two-wire facilities

ACCESS SERVICES

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.4 Planned Facilities Order-(Continued)

5.4.5 Modifications of Planned Facilities Orders-(Continued)

C. Other Modifications-(Continued)

2. (Continued)

- Change in Feature Group type
- Change in location, i.e., the IC terminal location, the Hub location, the end office or the End User's premises
- Change in type of facilities other than from two-wire facilities to four-wire facilities or four-wire facilities to two-wire facilities

Cancellation Charges as set forth in Paragraph 5.4.6, following, will apply in these cases.

D. Planned Facilities Order Modification Charge

The Planned Facilities Order Modification Charge is applied on a per-order, per-occurrence basis. The applicable charge is:

	<u>USOC</u>	<u>Charge</u>
Planned Facilities Modification Charge, per order. . . . .	OMC	\$29.59

If more than one change is being made at the same time, only one charge applies.

5.4.6 Cancellation of a Planned Facilities Order

A. A Planned Facilities Order may be cancelled after the order date. Cancellation Charges will apply as set forth in Paragraphs 5.4.6, B and C.. following. The cancellation date is the date the Telephone Company receives written or verbal notice from the IC that the capacity or channels ordered are to be cancelled. The verbal notice must be followed by written confirmation within 10 days.

B. The applicable Cancellation Charge is based on the interval between the cancellation date and the activation date or the interval between the cancellation date and 24 months after the order date, whichever interval is shorter. This interval is known as the Cancellation Interval. The Cancellation Charge applicable to each Cancellation Interval is shown in the following table:
