**TARIFF FORMAT**

**Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.

2.  
2.1.  
2.1.1.  
2.1.1.A.  
2.1.1.A.1.  
2.1.1.A.1.(a).

**SECTION 4 – SERVICE CHARGES AND SURCHARGES, (CONT'D.)**

**4.4 Carrier Presubscription**

**4.4.1 General**

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier that the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

Customers of record will retain their primary interexchange carrier(s) until they request that their dialing arrangements be changed.

**4.4.2 Application of Charges**

After a Customer's initial selection for a presubscribed toll, for any change thereafter, an Presubscription Change Charge, as set forth below will apply. Customers who request a change in intraLATA and interLATA carriers with the same order will be assessed a single charge per line.

**SECTION 5 – LOCAL EXCHANGE SERVICE, (CONT'D.)**

**5.1 General, (Cont'd.)**

**5.1.2 Charges Based on Duration of Use**

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- A.** Calls are measured in durational increments identified for each service. All calls that are fractions of a measurement increment are rounded-up to the next whole unit.
- B.** Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls starts with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.
- C.** Timing terminates on all calls when the calling party hangs up or the Company network receives an off-hook signal from the terminating carrier.
- D.** Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
- E.** All times refer to local time.

**SECTION 5 – LOCAL EXCHANGE SERVICE, (CONT'D.)**

**5.1 General, (Cont'd.)**

**5.1.3 Service Terms and Conditions**

Local exchange service provides a Customer with a telephonic connection to, and a unique telephone number on, the Company switching network that enables the Customer to:

- a. receive calls from other stations on the public switched telephone network;
- b. access the Company Local Calling Services and other Services as set forth in this tariff;
- c. access interexchange calling services of the Company and of other carriers;
- d. access (at no additional charge) to Company operators and business office for service related assistance;
- e. access toll-free telecommunications services such as 800 NPA; and access toll-free emergency services by dialing 0 or 9-1-1 (where available);
- f. access relay services for the hearing and/or speech impaired.

Local exchange service cannot be used to originate calls to caller-paid information services (e.g., 900, 976) provided by other companies. Calls to those numbers and other numbers used for caller-paid information services will be blocked by the Company switch. Each basic local exchange Service corresponds to one or more telephonic communications channels that can be used to place or receive one call at a time.

Individual line local exchange service is comprised of exchange access lines defined as follows:

Exchange Access Line – The service central office line equipment and all the Company plant facilities up to the demarcation point. These facilities are Company-provided and maintained and provide access to and from the telecommunications network for message toll service and for local calling appropriate to the tariffed use offering selected by the Customer.
