PLEXAR®-CUSTOM SERVICE

33.6 GENERAL REGULATIONS-(cont'd)

- (CT) 33.6.15 End User Common Line Charges will be billed per Plexar-Custom local exchange access line as prescribed by the F.C.C. and set forth in the Access Charges Tariff. An additive equivalent to the Business End User Common Line Charge will apply per Plexar-Custom Access Line. The difference between these two amounts will be credited to the customer's account, once each month on the customer's bill. No credit or debit will be applied to the customer's partial month's End User Common Line charges for stations which may have been added or deleted during the bill period.(1)
- (AT) |
- (AT) 33.6.16 Dedicated facilities may be required, when service is provided to different central offices located in different exchanges and intercom calling is required. In addition to the tie trunk termination rates, refer to the Private Line Service Tariff, Digital Link Services, or appropriate Access Services Tariff for channel charges required for the dedicated facility.
- 33.6.17 Use of Plexar-Custom Service for other than administrative stations by the customer of record is prohibited.
- 33.6.18 Subject to the regulations specified in Section 45 and where facilities permit, Caller ID Service and call management features may be provided in conjunction with Plexar-Custom at rates and charges specified in the Plexar Custom Service arrangement.
- 33.6.19 Rates and Charges for Simulated Access Lines shall be the equivalent Flat Rate Trunk as set forth in the Local Exchange Tariff.

(1) For the purposes of Plexar BRI Service, EUCL charges shall be interpreted to apply per channel as appropriate.

Issued: August 2, 2002

Effective: September 1, 2002

33.6 General Regulations-(Continued)

33.6.20 A Plexar customer may be served by the same serving central office (referred to as normal serving office) or a different serving office than the one in which they are located. Rates and charges for both serving arrangements will be specified in the Plexar-Custom service arrangement.

When the Plexar customer subscribes to Plexar BRI service, which is provided from a central office other than their normal serving office, and the customer's normal serving office subsequently becomes Plexar BRI equipped, the customer's Plexar BRI service will continue to be provided from their original Plexar BRI serving office. Should the customer subsequently request that their Plexar BRI service be provisioned from their normal serving office, the rates and charges associated with the conversion will be specified in the subsequent Plexar-Custom Service arrangement.

33.6.21 Plexar-Custom Service with a Basic Rate Interface (BRI) Integrated Services Digital Network (ISDN) requires compatible registered CPE under FCC Part 68.

33.6.22 Upon subscribing to Plexar BRI Service, the customer will be required to change his existing telephone number(s) if SWBT determines that it is not reasonably feasible for technical or number administration reasons to continue to provide the customer's existing telephone number(s).

(CT) 33.6.23 Plexar BRI Service is not available with Access Advantage Plus Service as found in Section 18 of the Digital Link Services Tariff.

33.6.24 Plexar-Custom stations shall have available the calling scope associated with the Plexar serving office as defined in the Local Exchange Tariff.

33.7 Features

33.7.1 Standard and optional features available with this arrangement are offered at rates and charges specified with each customer's service arrangement. Features will be provided as requested by the customer, when available.

33.8 Public Service Commission Notification

(CT) 33.8.1 Upon request, the Telephone Company will provide the Public Service Commission Staff the following information:

- Customer name and location(s)
- Type of service to be provided
- A copy of the economic cost study
- Contribution level
- Selected payment option
- The applicable rates

When provided, this information will be considered proprietary by the Telephone Company and should not be made a part of the public record.

33.8.2 Upon receipt, the Staff will have up to 21 calendar days to review this information. If, after completing their review, the Staff determines that there is a discrepancy, but the rates still meet the minimum five percent contribution level after the discrepancy is corrected, no change in rates will be required. However, after the discrepancy is corrected, if the rates do not meet

(CT) the minimum five percent contribution level, they may have to be adjusted. In the latter case, the Company has the option to either revise the rates to meet at least the minimum contribution level of five percent, or be subject to potential disallowances to the extent of the discrepancy in future rate examinations.

(CT)(MT) Following their review, the Staff will notify the Company in writing as soon as possible, of their position as a result of their review of the economic cost study.

33.9 Rates

Rates for Plexar-Custom arrangements will be based on the economic costs, contribution level and the payment plan and contract option selected. These factors will vary with each Plexar-Custom arrangement and will, therefore, reflect varying rates for individual arrangements. At no time, will the contribution level be less than 5 percent above Incremental Unit Costs.

33.10 Economic Cost Studies

An economic cost study will be performed for each Plexar-Custom arrangement. These studies will conform to accepted economic principles and will be provided to the Commission Staff as outlined in Paragraph 33.8.

33.11 Payment Options

Payment options specified by the customer will be offered when possible. The customer will be required to sign a Letter of Election for service for the contract period he chooses.

(CT) PAYPHONE EXCHANGE ACCESS SERVICE

34.1 GENERAL

(CT) 34.1.1 Payphone Exchange Access Service is offered for use with pay telephones and public facsimile devices. This service includes coin, coinless, cordless, card reader or a combination of a coin/card reader instrument.

Payphone Exchange Access Service is furnished to payphone service providers opting to provide a means for the general public, transients and/or collective groups to place local and/or toll calls.

(CT) Normally, locations for Payphone Exchange Access Service include, but are not limited to, restaurants,  
(RT) convenience stores, hospitals, educational institutions, truck stops, etc.

(CT) All attachments of pay telephones to the network must be made pursuant to the rules and regulations set  
(FC) forth in this tariff.(1)

(CT) 34.1.2 Payphone Exchange Access Service is a two-way or, optionally, one-way originating only business  
exchange access line composed of the serving central office line equipment, all outside plant facilities  
needed to connect the serving central office with the customer's premises and the network interface.  
These facilities are Telephone Company-provided and maintained and provide access to and from the  
telecommunications network for long distance service and local calling. 1+ 900 call restriction is  
(FC) provided at no additional charge.(2)

(RT) 34.1.3 Selective Class of Call Screening will be provided where such facilities are available at the payphone  
service provider's option. Selective Class of Call Screening treatment restricts outgoing operator-handled  
calls, placed over the Telephone Company's network, as described in paragraph 34.4.2.A. The Telephone  
Company will not be responsible for screening those calls placed over the network of any  
(MT)(CT) carrier other than the Telephone Company or placed through non-local exchange telephone company  
(FC) operators.(1)(3)

(CT) The specific Selective Class of Call Screening type is chosen by the payphone service provider from  
those shown in paragraph 34.4.2.A. No variation, alteration or refashion of the screening codes, billing  
restrictions, applicable access or other general provision of this Selective Class of Call Screening  
treatment will be permitted.

(CT) 34.1.4 Billed Number Screening will be provided at the payphone service provider's option at no additional  
charge. Billed Number Screening restricts collect calls and bill to third number calls placed over the  
(RT) Telephone Company's network from being billed to the pay telephone account.

- (RT) (1) Not applicable to the public facsimile device.
- (FC) (2) 1+ 900 call restriction restricts calls to these pay-per-call information services to only those calls which are alternately billed.
- (FC) (3) Selective Class of Call Screening is not available in conjunction with SmartCoin access lines.

(CT) PAYPHONE EXCHANGE ACCESS SERVICE

34.1 GENERAL - (Continued)

34.1.5 Answer Supervision-Line Side provides "off-hook" supervisory signals to customer premises equipment. These signals originate from the called party's serving central office (terminating office) to a line interface at the calling party's serving central office (originating office). This provides the signaling necessary to allow billing to begin. This feature is not compatible with the Call Waiting, Speed Calling, and Three-Way Calling features when provided with Selective Class of Call Screening. Answer Supervision is an optional service.(1) This feature is available where appropriate Telephone Company facilities exist.

(CT) 34.1.6 SmartCoin<sup>sm</sup> service is offered, at the payphone service provider's option, where the necessary facilities are available. SmartCoin access lines may be provided as either two-way or one-way originating only access lines. With the exception of Dial Tone First and Answer Supervision-Line Side, the services included on SmartCoin access lines apply only on local and intraLATA toll calls that are handled by the Telephone Company.

(RT)(AT)  
|  
(AT)

(CT) As an option, the payphone service provider may request Customer Billing Reports which will provide additional information regarding sent paid calls originating from the SmartCoin access line. This report will include details of all Telephone Company handled sent paid calls with the exception of local calls which do not require the assistance of an operator. This Customer Billing Report is provided subject to the rules specified in Section 13 of this tariff at rates applicable to toll reports as specified in paragraph 13.23.3.

(CT) A telephone number change may be required when an existing Payphone Exchange Access Service access line is converted to a SmartCoin access line.

(CT) When subscribing to SmartCoin, the payphone service provider is responsible for arranging for proper handling of coin calls by their chosen carrier or their carrier's agent.

(CT) The Telephone Company will not be liable for shortages of coins collected and deposited at the payphone equipment.

(CT) Calls placed from Payphone Exchange Access Service access lines equipped with the SmartCoin feature will be rated as follows:

(RT) A. Sent paid local calls which do not require the assistance of an operator will be rated by the pay telephone set. The Telephone Company network will receive a signal from the pay telephone set indicating that the local rate has been satisfied.

(CT) B. Operator handled sent paid local calls will be rated to the end user at the price established by the payphone service provider.

(1) Answer Supervision equivalent functionality is included at no additional charge with SmartCoin service.

(AT) 34.1.5 Answer Supervision-Line Side provides "off-hook" supervisory signals to customer premises equipment. These signals originate from the called party's serving central office (terminating office) to a line interface at the calling party's serving central office (originating office). This provides the signaling necessary to allow billing to begin. This feature is not compatible with the Call Waiting, Speed Calling, and Three-Way Calling features when provided with Selective Class of Call Screening. Answer Supervision is an optional service.(1) This feature is available where appropriate Telephone Company facilities exist.

34.1.6 SmartCoin<sup>sm</sup> service is offered, at the customer's option, where the necessary facilities are available. SmartCoin access lines may be provided as either two-way or one-way originating only access lines. This service includes Telephone Company provisioning of operator services, outside facilities, and central office capabilities.

As an option, the customer may request Customer Billing Reports which will provide additional information regarding sent paid calls originating from the SmartCoin access line. This report will include details of all Telephone Company handled sent paid calls with the exception of local calls which do not require the assistance of an operator. This Customer Billing Report is provided subject to the rules specified in Section 13 of this tariff at rates applicable to toll reports as specified in paragraph 13.23.3.

A telephone number change may be required when an existing Customer-Owned Pay Telephone access line is converted to a SmartCoin access line.

When subscribing to SmartCoin, the customer is responsible for arranging for proper handling of interLATA coin calls by their chosen interexchange carrier or their interexchange carrier's agent.

The Telephone Company will not be liable for shortages of coins collected and deposited at the customer's equipment.

Calls placed from Customer Owned Pay Telephone Service access lines equipped with the SmartCoin feature will be rated as follows:

- A. Sent paid local calls which do not require the assistance of an operator will be rated by the customer's pay telephone set. The Telephone Company network will receive a signal from the pay telephone set indicating that the local rate has been satisfied.
- B. Operator handled sent paid local calls will be rated to the end user at the price established by the customer.

(AT) (1) Answer Supervision equivalent functionality is included at no additional charge with SmartCoin

(CT) PAYPHONE EXCHANGE ACCESS SERVICE

34.1 GENERAL - (Continued)

(CT) 34.1.11 A network interface for all access lines associated with pay telephone service will be installed at a location determined by the Telephone Company, which is accessible to the payphone service provider. The normal location of the demarcation point for all pay phone service providers will be determined in a manner consistent with federal and state regulatory requirements.(1)

(CT) The network interface is the point of connection with the telecommunications network and is the termination of the Payphone Exchange Access Service Access Line. It is a Telephone Company-provided jack or its equivalent.(1)

(CT) 34.2 RESPONSIBILITY OF THE PAYPHONE SERVICE PROVIDER

(CT) 34.2.1 The payphone service provider shall be responsible for the installation, operation and maintenance of the pay telephone or public facsimile device used in connection with this service.

(CT) 34.2.2 The payphone service provider shall be responsible for the payment of a Customer-Owned Equipment Trouble Isolation Charge as provided in Section 16 of this tariff for visits by a Telephone Company employee to the payphone service provider's premises when a service difficulty or trouble report results from the use of a payphone service provider's pay telephone or public facsimile device, even if the service difficulty is reported by persons other than the payphone service provider.

(CT) 34.2.3 The payphone service provider shall sign a service indemnification agreement.

(CT) 34.2.4 Payphone service providers who elect not to subscribe to Billed Number Screening, as described in paragraph 34.1.4 preceding, will be fully responsible for all collect calls and third number billed calls which are billed to the payphone service provider's exchange access line. The Telephone Company shall have no responsibility to adjust any such charges and/or release payphone service provider from paying such charges. Payphone service provider will hold the Telephone Company harmless from and against any liability or loss resulting from all such collect calls and third number billed calls.

(1) Additional charges (if applicable) will apply as stated in Section 19 of this tariff.

MISSOURI

NOTE: At such time that the Telephone Company serving central office is converted to the capability of providing Local Measured Service and billing programs are in place, the Customer-Owned Pay Telephone's local access line will be converted to and will, henceforth, pay the rates and charges specified in Paragraph 34.4.1, preceding.

34.4.3 Service Charges

(RT) Service and Equipment Charges as specified in the Local Exchange Tariff, apply in addition to other charges for Customer-Owned Pay Telephone Service. Service charges, as specified in Section 19 of this Tariff, apply in addition to other charges specified for Customer-Owned Pay Telephone Service.

(CT) 34.4.4 Where Touch-Tone Service and/or Custom Calling Service is desired, charges as specified in the appropriate Sections of this Tariff are applicable to Customer-Owned Pay Telephone.

(CT) 34.4.5 Rates and Charges applicable to Customer-Owned Pay Telephone Service installation will be as specified in the Local Exchange Tariff.

(CP) 34.4.6 Charges for Directory Assistance Service are not applicable to calls placed from Customer-Owned Pay Telephone Service telephone sets.

(RT) (1) Selective Class of Call Screening is required on all Customer-Owned Pay Telephone Access Lines served from offices equipped to provide Selective Class of Call Screening.

(AT) (2) Permits only collect, third number and credit card.

511

(AT)

---

**35.1 DESCRIPTION**

511 allows end users to access a provider of travel information services (511 customer) by dialing an abbreviated telephone number, five-one-one (5-1-1).

511 is an intelligent routing service that determines the central office serving the calling party, converts the 511 dialed digits to a Routing Telephone Number (RTN) and then uses the RTN to complete the call over the public switched network to the 511 customer or to a call center or other point of destination designated by the 511 customer.

511 is an optional service that may be purchased only by state or local governments or agencies thereof, to be used exclusively for access to travel information services.

511 is offered subject to the availability of facilities.

**35.2 TERMS AND CONDITIONS**

- A. The Company and the 511 customer will negotiate the due date(s) for 511. A minimum service period of one month applies to this service.
- B. Typically there can be only one 511 customer for each stand-alone, host, or remote central office serving area (the "511 service area"). This ensures that 511 calls from an end user located within a 511 service area can be routed to a unique 511 destination. Normally the Company will route calls based on the serving central office. If a central office serves one or more remote central offices or multiple states, the Company will route the 511 calls based on the originating NPA-NXX. The Company will default route calls to one of the customer's RTNs if the Company is unable to route based on the serving central office or originating NPA-NXX.

OBSOLETE PLEXAR<sup>R</sup>-II SERVICE

MISSOURI  
Public Service Commission

(CP) 35.0 OBSOLESCENCE TERMS

Plexar-II service contained in this section is an obsolete service available only to existing customer. Moves, changes and additions shall be in accordance with the definition of "Obsolete to Existing Customer" as defined in Section 8 of this Tariff.

Customers Under A Fixed Monthly Payment Plan:

- May, prior to the expiration of the existing contract, subscribe to Plexar-II service as contained in Section 45 provided that the new contract term be at least 12 months longer than the time remaining on the existing contract. Termination liability charges will not apply when the customer continues with an equivalent service arrangement (i.e., same serving office, current system size).

CANCELLED

DEC 27 2000

By *W.R. 1*  
Public Service Commission  
MISSOURI

Upon expiration of the contract must: (a) subscribe to Plexar-II service as contained in Section 45; (b) subscribe to the Plexar Custom offering contained in Section 33; (c) discontinue the service. The selection of option (a) or (b) will be determined based on the terms and conditions specified in the appropriate tariff sections.

Customers Under The Month-To-Month Payment Plan:

- May continue with service until 12 months after the original effective date of Section 45. At that time they must: (a) subscribe to the Plexar-II offering contained in Section 45; (b) subscribe to the Plexar Custom offering contained in Section 33; (c) discontinue the service. The selection of option (a) or (b) will be determined based on the terms and conditions specified in the appropriate tariff sections.

Customers currently subscribing to optional features through the Special Service Arrangements process contained in Section 45 of this Tariff will be converted to the applicable rate.

(CP)

Customers may subscribe to optional features not offered in this section but contained in Section 45 at the applicable rate.

511

(AT)

---

**35.2 TERMS AND CONDITIONS (cont'd)**

- C. Only calls originating within an operational 511 service area will be routed to a 511 destination. End users dialing 511 outside operational 511 service areas will receive a recorded message that the call cannot be completed as dialed. 511 is compatible with Caller ID Service network functionality when used in conjunction with basic exchange services.
- D. Subject to this subparagraph D, the 511 customer may designate only one local RTN or toll-free 8YY RTN within a 511 service area.
- Where, in the case of multiple 511 service areas, the 511 customer designates more than one RTN, the 511 customer must designate the specific stand-alone, host or remote central offices to be served by each RTN.
  - Each local RTN must be within the local service area of end users served by the stand-alone, host or remote central office. If any end user served by the stand-alone, host or remote central office would incur a toll charge to call the local RTN submitted by the 511 customer, the 511 customer must instead use a toll-free 8YY telephone number as its RTN,
  - Normally only one RTN can serve a stand-alone, host or remote central office serving area.
  - 511 calls are not permitted where local calling is restricted (e.g., prisons.)

The Company will route 511 calls originating from end users on its local exchange network whether the end users purchase service directly from the Company or from another Local Exchange Carrier (LEC) reselling Company service.

- E. 511 Service is provided solely for the benefit of the 511 customer; the provision of such service shall not be interpreted, construed or regarded as being for the benefit of or creating any obligation toward, or any right of action on behalf of, any third person or other legal entity.
- F. The Company will make every effort to route 511 calls to the appropriate destination; however, it will not be held responsible for routing mistakes and errors. The Company's obligation under 511 ends upon call completion to the agency-designated RTN.
- G. In addition to the terms and conditions stated in this tariff, all Rules and Regulations stated in Section 17 of this tariff also apply.

OBSOLETE PLEXAR<sup>R</sup>-II SERVICE(1)

JUL 16 1993

35.1 GENERAL--(Continued)

35.1.4 Feature Descriptions--(Continued)

**MISSOURI  
Public Service Commission**

Call Forwarding - Busy Line - This feature provides for forwarding of incoming calls to a preselected Plexar-II station when the called station is busy.

Call Forwarding - Don't Answer - This feature provides for forwarding of incoming calls to a preselected Plexar-II station when the called station does not answer after a predetermined number of ringing cycles.

Call Forwarding - Variable - This feature allows incoming calls to be forwarded to a preselected station line, within as well as outside the Plexar-II system.

Call Pickup - The held call cannot be added to another call. This feature also allows a Plexar-II station user to answer any call within an associated preset pickup group. If more than one line within the pickup group has an unanswered call, the call that is answered is the one that has been ringing the longest.

Call Transfer - Individual - All Calls, Consultation Hold - All Calls, and Three-Way Calling - This feature allows a Plexar-II station user to transfer any established call to another station line within or outside the Plexar-II system, hold any existing call and originate a call to another station line within or outside the Plexar-II system, and add a third party to any established call for a three-party conference, without the assistance of the attendant.

Call Waiting - Intragroup - This feature allows those Plexar-II stations with the Call Waiting - Terminating feature to be call waiting on intragroup calls.

Call Waiting - Originating - This feature allows a Plexar-II station user to direct a call waiting tone toward a busy called Plexar-II station. The busy called station can retrieve the calling station by hanging up and being rung back or by depressing the switchhook to place the existing call on hold and answering the waiting call.

Public Service Commission

35.1.4 Feature Descriptions-(Continued)

Call Forwarding - Busy Line - This feature provides for forwarding of incoming calls to a preselected Plexar-II station when the called station is busy.

Call Forwarding - Don't Answer - This feature provides for forwarding of incoming calls to a preselected Plexar-II station when the called station does not answer after a predetermined number of ringing cycles.

Call Forwarding - Variable - This feature allows incoming calls to be forwarded to a preselected station line, within as well as outside the Plexar-II system.

Call Pickup - The held call cannot be added to another call. This feature also allows a Plexar-II station user to answer any call within an associated preset pickup group. If more than one line within the pickup group has an unanswered call, the call that is answered is the one that has been ringing the longest.

Call Transfer - Individual - All Calls, Consultation Hold - All Calls, and Three-Way Calling - This feature allows a Plexar-II station user to transfer any established call to another station line within or outside the Plexar-II system, hold any existing call and originate a call to another station line within or outside the Plexar-II system, and add a third party to any established call for a three-party conference, without the assistance of the attendant.

Call Waiting - Intragroup - This feature allows those Plexar-II stations with the Call Waiting - Terminating feature to be call waiting on intragroup calls.

Call Waiting - Originating - This feature allows a Plexar-II station user to direct a call waiting tone toward a busy called Plexar-II station. The busy called station can retrieve the calling station by hanging up and being rung back or by depressing the switchhook to place the existing call on hold and answering the waiting call.

35.1.4 Feature Descriptions--(Continued)

Call Waiting - Terminating - This feature allows a Plexar-II station user who is engaged in a telephone conversation to be alerted via an audible tone that an incoming call is attempting to reach that station user. The busy called station can retrieve the waiting call by hanging up and being rung back or by depressing the switchhook to place the existing call on hold and answering the waiting call.

Circle Hunting - This feature provides line hunting in which the hunt for an idle line starts with the called line and proceeds in a prearranged order to all lines in the group.

Conference Calling - Attendant Arrangement - This feature allows a Plexar-II attendant to connect a maximum of five parties, not including the attendant to a conference facility.

Conference Calling - Station Line Arrangement - This feature allows a Plexar-II station user to establish conference connections involving up to six conferees, including the conference controller.

Dial Call Waiting - This feature provides the ability for originating Plexar-II stations to invoke call waiting service on selected intragroup calls by dialing the dial call waiting access code followed by the extension number of the station to be call waited.

Direct Inward Dialing (DID) - Allows an incoming call to reach a Plexar-II station without attendant assistance.

Direct Outward Dialing (DOD) - Allows a Plexar-II station user to gain access to the exchange network without attendant assistance.

Directed Call Pickup - This feature allows for a call directed to a Plexar-II station line to be answered by another Plexar-II station user within the same group or system by dialing a unique answer code and the extension number of the line to be answered.

OBSOLETE PLEXAR<sup>R</sup>-II SERVICE(1)

35.1 GENERAL--(Continued)

35.1.4 Feature Descriptions--(Continued)

MISSOURI  
Public Service Commission

Distinctive Ringing & Call Waiting Tone - This feature enables a Plexar-II station user to determine the source of a call incoming to the station. The station user is also able to determine the source of the call on call waiting calls.

Hunting - Basic - This feature provides hunting for an idle line starting with the called station and ending with the last station in the prearranged group, completing the call to the first idle line encountered.

Intercommunication - This feature allows a Plexar-II station user to directly dial other stations within the same Plexar-II system without attendant assistance.

Night Service - This feature allows incoming calls normally directed to the attendant to be routed to preselected station lines within the customer group and is activated by the depression of a designated key at the attendant position. As an option, Call Forwarding may be used to direct incoming calls to preselected station lines and may be answered in a designated group of stations or by entire system using Call Pickup and/or Directed Call Pickup.

Outgoing Trunk Queuing - WATS - This feature provides efficient usage of business customer private facilities by queuing individual station calls and providing a maximum time limit for a call to remain on queue before possible overflow to the Direct Distance Dialing (DDD) network.

Preferential Hunting - This feature provides a type of line hunting which permits a prehunt over a subset or preferential group of terminals before hunting through the multiline hunt group (MLHG). The hunt through the MLHG can be a regular or circle hunt.

Remote Access Capability - This feature allows a remote caller access to the features of a Plexar-II system by dialing the number associated with the incoming facility and an optional security code.
