2.6 Allowances for Interruptions of Service

- 2.6.1 Credit for Interruptions: When the use of service or facilities furnished by the Company is interrupted due to any cause other than the negligence or willful act of the Customer, or the operation or failure of the facilities or equipment provided by the Customer, a pro rata adjustment of the monthly Recurring Charges subject to interruption will be allowed for the service and facilities rendered useless and inoperative by reason of the interruption whenever said interruption continues for a period of 24 hours or more from the time the interruption is reported to or known to exist by the Company, except as otherwise specified in the Company's tariffs. If the Customer reports a service, facility or circuit to be inoperative but declines to release it for testing and repair, it is considered to be impaired, but not interrupted.

For calculating credit allowances, every month is considered to have 30 days. A credit allowance is applied on a pro rata basis against the monthly Recurring Charges specified hereunder for Local Line or Local Trunk Service and is dependent upon the length of the interruption. Only those facilities on the interrupted portion of the circuit will receive a credit. Credit allowances for service outages that exceed 24 hours in duration will be rounded up to the next whole 24 hours.

3.6 Expedited Service Connection Charges

Customers may request an expedited due date for pending service orders pertaining to initial service installation, or moves, additions, or changes to existing service.

The Company will provide to the Customer an estimate of expedite charges when the Customer requests an expedited due date. The Customer can elect standard installation rather than incurring the estimated charges for expedited service.

Expedited service is offered subject to availability of facilities and resources as well as service order and systems readiness. If the Company accepts, at its option, a request to expedite an order, the Company does not guarantee the requested due date in advance of the normal service order interval. The Company will use its best effort to meet the requested due date. The Company is not liable for vendor or other third-party charges incurred by the Customer if the Company is unable to meet the expedited due date.

A Customer will not be charged an expedite charge in the event the Company is unable to expedite the order. If a Customer requests an expedited date and the Company complies, but the Customer subsequently postpones the due date, expedite charges will still apply.

Non-Recurring Expedite Charges apply in addition to other applicable non-recurring installation and/or Service Connection Charges. The charges apply per order.

DIRECTORY LISTINGS

ORIGINAL PAGE 59
Missouri Public
Service Commission

REC'D MAR 22 1999

7.1 General Regulations

- 7.1.1 The Company shall provide for a single directory listing, termed the primary listing, in the telephone directory published by the dominant exchange service provider in the customer's exchange areas of the Station number which is designated as the Customer's main billing number. Directory listings of additional Company Station numbers, other than the Customer's main billing number, associated with a Customer's service will be provided for a monthly recurring charge per listing.
- 7.1.2 The Company reserves the right to limit the length of any listing in the directory by the use of abbreviations when, in its judgment, the clearness of the listing or the identification of the Customer is not impaired thereby. Where more than one line is required to properly list the Customer, no additional charge is made.
- 7.1.3 The Company may refuse a listing which is known not to constitute a legally authorized or adopted name, obscenities in the name, or any listing which, in the opinion of the Company, is likely to mislead or deceive calling persons as to the identity of the listed party, or is a contrived name used for advertising purposes or to secure a preferential position in the directory or is more elaborate than is reasonably necessary to identify the listed party. The Company, upon notification to the Customer, will withdraw any listing which is found to be in violation of its rules with respect thereto.
- 7.1.4 Each listing must be designated Government or Business to be placed in the appropriate section of the directory. 10.3.3 Termination Liability

To the extent that there is no other requirement for use by the Company, a termination liability may apply for facilities specially constructed at the request of the Customer.

The termination period is the estimated service life of the facilities provided.

The maximum termination liability amount is equal to the estimated amounts for:

1. Cost installed of the facilities provided including estimated costs for arrangements of existing facilities and/or construction of new facilities as appropriate, less net salvage. Cost installed includes the cost of:
 - a) equipment and materials provided or used,

5. any other identifiable costs related to the specially constructed or rearranged facilities.

The applicable liability method for calculating the unpaid balance of a term obligation is obtained by multiplying the sum of the amounts determined as set forth above by a factor related to the unexpired period of liability and the discount rate for return and contingencies. The amount determined pursuant to the above paragraphs shall be adjusted to reflect the predetermined estimate net salvage, including any reuse of the facilities provided. Regulated services covered by the promotion are: Single Business Lines, Key System Service, Select Feature Package, calling features, PBX Trunk Service, T-1 AdvantEdge PBX Service, DID, DNIS, and ISDN-PRI.

Customers will remit the original certificate provided by the Company to receive their free month's service. In order to receive the free month, the customer's account must be in good standing (i.e., no past due balances of more than 30 days) at the time it is otherwise eligible to obtain its free month's service. The applicable free month's service credit will not exceed the customer's bill for service in 13th, 25th and 37th month, respectively. Current customers, including those adding incremental products, are not eligible for this promotion.

GABRIEL™ INTEGRATED SERVICES DIGITAL NETWORK - Missouri Public Service Commission
PRIMARY RATE INTERFACE (ISDN- PRI)

REC'D JUN 30 2000

14.1 Description

ISDN-PRI provides access to and from the Public Switched Telephone Network for circuit-switched voice communications. ISDN-PRI uses ISDN architecture to provide an end-to-end digital DS-1 circuit. It employs a 1.544 mbps facility and typically provides the customer with twenty-three B channels and one D channel. B channels can be used for voice and data communications. The D channel provides out-of-band signaling and control of the B channels. Gabriel ISDN-PRI service is a two-way flat monthly service for business customers (CT)

The provision of ISDN-PRI is subject to availability of Company facilities and compatibility with customer facilities and equipment. The local calling area specified in paragraph 4.2.2 applies to ISDN-PRI. Applicable distance sensitive charges will apply as noted in this Tariff. Other ancillary features listed in the Company's tariffs which are compatible with ISDN-PRI can be provided under the rates and terms noted.

ISDN-PRI service includes the ISDN Interface; the ISDN Port; and trunks. Optional features are described below.

14.2 Optional Features

Backup D Channel: Provides enhanced survivability of ISDN-PRI links by providing automatic takeover for a failed D channel.

Calling Name and Number Delivery Interface: Delivers calling party telephone number/and or listed name (where technically available) to the called party. Caller ID regulations and features, as defined in Section 5 of this tariff, apply to ISDN.

Dynamic Channel Allocation (DCA): Enables a customer to designate the quantity of call types to be allocated within previously provisioned criteria for either DID or DOD services. This feature is also known as call-by-call service selection. The customer must specify the total number of channels assigned to the DCA arrangement and the maximum number of channels allocated per call type within the arrangement.

Direct Inward Dialing (DID): This service routes incoming calls directly to a station, bypassing the central answering point.
