SCHEDULE OF RATES

INCREMENTAL PRICING CLAUSE (Continued)

(P.S.C. Mo. No. 5 Consolidated Sheet Nos. 15 through 20, inclusive) in the same manner as a decrease in the Company's actual gas costs below the wholesale rates on which the Company's PGA factors are predicated. The Company shall establish and maintain a Deferred Incremental Pricing Surcharge Account which shall be a sub-account of the aforementioned Deferred Gas Cost Account. In no event shall the total dollars thereby flowed back to customers exceed the dollars actually collected by the Company in incremental pricing surcharges exclusive of franchise or gross receipts taxes associated therewith.

The terms "incremental pricing surcharge" and "non-exempt industrial boiler facilities" as used herein, shall have the same meaning as set forth in 18 CFR Section 282.504 and 18 CFR Section 282.103 respectively. Exempt end-uses of natural gas as a boiler fuel by industrial facilities are defined under 18 CFR Section 282.203.

If the owner or operator of an industrial boiler fuel facility claims that a portion of the natural gas used in the facility is not subject to incremental pricing surcharges, the volume of natural gas used in the facility which shall be exempt from incremental pricing shall be determined on the basis of an estimation methodology which meets the requirements of 18 CFR Section 282.207. The estimation methodology used by the owner or operator of an industrial boiler fuel facility shall be disclosed to FERC, the Company, and the Missouri Public Service Commission.

Collection of incremental pricing surcharges under this state-level plan shall cease upon:

- (a) FERC's adoption of an alternate fuel price other than No. 6 High Sulphur fuel oil; or
- (b) Implementation of a Phase II Incremental pricing plan by FERC; or
- (c) Termination of Title II of the Natural Gas Policy Act of 1978.

Should collections under this plan be terminated as a result of any of the above, this Incremental Pricing Clause will be cancelled when all monies collected through previous surcharges are distributed through the PGA Clause.

If terminated as a result of either (a) or (b) above, such may not relieve the Company from its obligations under the FERC rules or collecting incremental pricing surcharges. Should such obligation be ongoing, then the Company shall continue to collect such surcharges under the FERC plan until a new state-level plan is instituted.

SCHEDULE OF RATES

AUG 21 1992

MO. PUBLIC SERVICE COM. A.

BILLING OF LICENSE, OCCUPATION, OR
OTHER SIMILAR CHARGES OR TAXES

There shall be added to the Customer's bill, as a separate item, an amount equal to any license, occupation, or other similar charge or tax now or hereafter imposed upon the Company, whether imposed by ordinance or franchise or otherwise, applicable to gas service by the Company to the Customer.

Where such charge or tax is imposed as a percentage of gross or net receipts or revenues from sales of gas, the amount of such charge or tax applicable to gas service to a Customer shall be determined by applying the rate imposed by the taxing authority.

Where such charge or tax is not imposed as a percentage of gross or net receipts or revenues from sales of gas, the amount of such charge or tax applicable to gas service to a Customer shall be determined by dividing the amount of the tax or charge applicable to the billing month by the number of Customers of the Company within the jurisdiction of the taxing authority billed during the previous billing month.

Where more than one such charge or tax is imposed by a taxing authority, the total of such charges or taxes applicable to a Customer may be billed to the Customer as a single amount.

Charges or taxes referred to in this schedule shall in all instances be billed to Customers on the basis of Company rates effective at the time of billing. There shall be returned or credited to Customers, in accordance with the Purchased Gas Adjustment Clause contained in Sheet Nos. 15 through 22, inclusive, that part of such charges or taxes which is collected from Customers but is not paid by the Company to taxing authorities because of refunds which the Company may receive and subsequently does receive from the Company's suppliers and which refunds are returned or credited to the Company's Customers.

SCHEDULE OF RATES

PURCHASED GAS ADJUSTMENT CLAUSE

A. Current Purchased Gas Adjustments

In the event of increases or decreases in the cost of purchased gas, charges for gas service contained in the Company's then effective retail rate schedules on file with the Missouri Public Service Commission (Commission), with the exception of the Large Volume Transportation and Sales Service ("LVTSS") and Vehicular Fuel ("VF") rate schedules, shall be increased or decreased at the times provided in Section E by a Current Purchased Gas Adjustment ("CPGA"). The CPGA for sales made pursuant to the LVTSS and VF rate schedules shall be determined and implemented on a monthly basis, as described in paragraph 5 below, and shall be calculated in conformance with the CPGA for other firm sales rate schedules, except where noted. The cost of purchased gas shall include but not be limited to all charges incurred for gas supply, pipeline transmission and gathering and contract storage.

1. a. The CPGA factor for firm sales shall be calculated by summing the gas cost components per therm as determined in accordance with paragraphs 2.a., b., c., d., e. and, f. respectively, of Section A of this clause.
- b. The CPGA factor for the seasonal and interruptible sales classifications shall be calculated by summing the gas cost components per therm as determined in accordance with paragraphs 2.c., d., e., and f. respectively, of Section A of this clause.
2. The following unit gas cost components, rounded to the nearest .001¢ per therm, are recoverable under the PGA of either firm or interruptible sales customers, where applicable, as described in Paragraph A.1. above.

A. Current Purchased Gas Adjustments

MISSOURI Public Service Commission

In the event of increases or decreases in the cost of purchased gas, charges for gas service contained in the Company's then effective retail rate schedules on file with the Missouri Public Service Commission (Commission) shall be increased or decreased by a Current Purchased Gas Adjustment (CPGA). The cost of purchased gas shall include but not be limited to all charges incurred for gas supply, pipeline transmission and gathering and contract storage.

1. a. The CPGA factor for firm sales shall be calculated by summing the gas cost components per therm as determined in accordance with paragraphs 2.a., b., c., d. and e. respectively, of Section A of this clause and subtracting therefrom the base gas cost level per therm for firm sales as set forth in Section F of this clause.

b. The CPGA factor for the seasonal and interruptible sales classifications shall be calculated by summing the gas cost components per therm as determined in accordance with paragraphs 2.c., d. and e. respectively, of Section A of this clause and subtracting therefrom the base gas cost level per therm for seasonal and interruptible sales as set forth in Section F of this clause.

2. The following unit gas cost components, rounded to the nearest .001¢ per therm, are recoverable under the CPGA of either firm or interruptible sales customers, where applicable, as described in Paragraph A.1. above.

a. Gas Supply Demand Charges. The Gas Supply Demand Charge cost component per therm shall be determined by dividing the total current annualized gas supply demand charges the Company incurs by the firm sales volumes specified in Section F of this clause. Total current annualized gas supply demand charges shall be equal to the sum of the demand charges of each of the Company's gas suppliers obtained by multiplying the latest effective demand charge of each gas supplier by the annualized demand determinants applicable to such gas supplier. Such charges shall include charges payable to a producer or any gas supplier for the reservation of gas supplies and minimum take charges.

Public Service Commission

A. Current Purchased Gas Adjustments

In the event of increases or decreases in the cost of purchased gas, charges for gas service contained in the Company's then effective retail rate schedules on file with the Missouri Public Service Commission (Commission) shall be increased or decreased by a Current Purchased Gas Adjustment (CPGA). The cost of purchased gas shall include but not be limited to all charges incurred for gas supply, pipeline transmission and gathering, contract storage, and related agency services.

1. a. The CPGA factor for firm sales shall be calculated by summing the gas cost components per therm as determined in accordance with paragraphs 2.a., b., c., d. and e. respectively, of Section A of this clause and subtracting therefrom the base gas cost level per therm for firm sales as set forth in Section E of this clause.

b. The CPGA factor for the seasonal and interruptible sales classifications shall be calculated by summing the gas cost components per therm as determined in accordance with paragraphs 2.c., d. and e. respectively, of Section A of this clause and subtracting therefrom the base gas cost level per therm for seasonal and interruptible sales as set forth in Section E of this clause.

2. The following unit gas cost components, rounded to the nearest .001¢ per therm, are recoverable under the CPGA of either firm or interruptible sales customers, where applicable, as described in Paragraph A.1. above.

a. Gas Supply Demand Charges. The Gas Supply Demand Charge cost component per therm shall be determined by dividing the total current annualized gas supply demand charges the Company incurs by the firm sales volumes specified in Section E of this clause. Total current annualized gas supply demand charges shall be equal to the sum of the demand charges of each of the Company's gas suppliers obtained by multiplying the latest effective demand charge of each gas supplier by the annualized demand determinant applicable to such gas supplier. Such charges shall include charges payable to a producer or any gas supplier for the reservation of gas supplies, minimum take charges and any direct-billed agency fees.

PURCHASED GAS ADJUSTMENT CLAUSE MISSOURI Public Service Commission
A. Current Purchased Gas Adjustments
The charges which the Company makes for gas shall be subject to increases or decreases due to increases or decreases in the cost of gas charged by the Company's supplier, Mississippi River Transmission Corporation (MRTC). For the purpose of the computations herein, the basic wholesale rates and basic volumes for determining the base cost of gas are set forth in Paragraph E of this Clause.
In the event of increases or decreases in the aforesaid wholesale rates at which the Company purchases gas, charges for gas service contained in the Company's then effective retail rate schedules on file with the Missouri Public Service Commission (Commission) shall be increased or decreased by a Current Purchased Gas Adjustment (CPGA) determined as follows:
1. a. The CPGA factor for firm sales shall be calculated by summing the demand, commodity and take-or-pay components of gas cost per therm as determined in accordance with paragraphs 1 c. through 1 e. respectively, and subtracting therefrom the base gas cost level per therm for firm sales as set forth in Paragraph E of this clause.
b. The CPGA factor for the seasonal and interruptible sales classifications shall be calculated by summing the commodity and take-or-pay components of gas cost per therm as determined in accordance with paragraphs 1 d. and 1 e. respectively and subtracting therefrom the base gas cost level per therm for seasonal and interruptible sales as set forth in Paragraph E of this clause.
c. The per therm demand gas cost component shall be determined by dividing the current annual demand related cost of purchased gas for the firm sales and firm transportation volumes specific to the Company by the annual demand volumes applicable to the Company.
E. The rate per therm so determined shall be rounded to the nearest .001¢ per therm. The current annual demand related cost of purchased gas shall be calculated by multiplying the most recent Federal Energy Regulatory Commission (FERC) authorized demand rate(s) times the annual demand volumes applicable to the Company.
d. The per therm commodity gas cost component shall be determined by dividing the current annual commodity related cost of purchased gas

A. Current Purchased Gas Adjustments

The charges which the Company makes for gas shall be subject to increases or decreases due to increases or decreases in the cost of gas charged by the Company's supplier, Mississippi River Transmission Corporation (MRTC). For the purpose of the computations herein, the basic wholesale rates for determining the base cost of gas shall be the rates in effect on September 1, 1984, as specified on MRTC's gas tariff on file with the Federal Energy Regulatory Commission (FERC). Such basic wholesale rates are set forth in Paragraph E of this Clause.

In the event of increases or decreases in the aforesaid wholesale rates at which the Company purchases gas, charges for gas service contained in the Company's then effective retail rate schedules on file with the Missouri Public Service Commission (Commission) shall be increased or decreased by a Current Purchased Gas Adjustment (CPGA) determined as follows:

1. The amount of increase or decrease in the cost of purchased gas on an annual basis shall be computed for the Company's sales classified as firm and for the company's sales classified as seasonal and interruptible by pricing the fixed test period volumes of gas purchased for each class of sales as set forth in Paragraph E of this Clause at the wholesale rates to be in effect after the increase or decrease in rates causing the CPGA, and subtracting therefrom the base wholesale gas cost level for each sales class as set forth in Paragraph E.

2. The cost of purchased gas applicable to firm sales shall include MRTC's wholesale CD-1 demand and commodity charges and GRI charge; the cost of purchased gas applicable to seasonal and interruptible sales shall include only MRTC's wholesale CD-1 commodity charge and GRI charge.

3. The amount of increase or decrease applicable to the Company's sales classified as firm, determined in accordance with 1 and 2 above, shall be divided by the firm fixed test period sales, in therms (as set forth in Paragraph E). The rate per therm, so determined to the nearest .001¢, shall be the CPGA to be applicable to firm sales.

4. The amount of increase or decrease applicable to the Company's sales classified as seasonal and interruptible, determined in accordance with 1 and 2 above, shall be divided by the seasonal and interruptible fixed test period sales, in therms (as set forth in Paragraph E). The rate per

PURCHASED GAS ADJUSTMENT CLAUSE

A. The charges which the Company makes for gas shall be subject to increases or decreases due to increases or decreases in the cost of gas charged by the Company's supplier, Mississippi River Transmission Corporation. The increases or decreases in charges made by the Company will be computed as follows:

For the purpose of the computations herein, the basic wholesale rates for determining the cost of gas shall be the rates in effect September 1, 1977, the rates upon which the Company's retail rates are predicated. Such rates were:

Demand Charge	\$2.122 per Mcf of Contract Demand per month.
Commodity Charge:	\$1.4188 per Mcf.

CANCELLED
DEC - 4 1984
BY 1st RS 15
PUBLIC SERVICE COMMISSION
OF MISSOURI

In the event of increases or decreases in the aforesaid wholesale rates at which the Company purchases gas, charges for gas service contained in the Company's then effective retail rate schedules on file with the Public Service Commission shall be increased or decreased by a purchased gas adjustment determined as follows:

1. The amount of increase or decrease in the cost of purchased gas on an annual basis shall be computed for the Company's sales classified as firm (including unmetered gas light rate sales) and for the Company's sales classified as interruptible and seasonal by pricing the volume of gas purchased for each class of sales for a twelve month period, such period being the first twelve of the fourteen calendar months preceding the month in which the wholesale rate increase or decrease becomes effective.
 - (a) at the basic wholesale rates set forth above and
 - (b) at the wholesale rates to be in effect after the increase or decrease in rate or rates causing the purchased gas adjustment.

SCHEDULE OF RATES

A. Current Purchased Gas Adjustments (Continued)

a. Gas Supply Demand Charges. The Gas Supply Demand Charge cost component per therm shall be determined by dividing the total current annualized gas supply demand charges the Company incurs by the firm sales volumes specified in Section F of this clause. Total current annualized gas supply demand charges shall be equal to the sum of the demand charges of each of the Company's gas suppliers obtained by multiplying the latest effective demand charge of each gas supplier by the annualized demand determinants applicable to such gas supplier. Such charges shall include charges payable to a producer or any gas supplier for the reservation of gas supplies and minimum take charges. Beginning with the Company's CPGA rates that become effective during November 2007, total current annualized gas supply demand charges shall be reduced by the gas supply demand charge portion of the customers' share of estimated annual off-system sales margins realized by the Company as described in Section H. For purposes of the CPGA calculation \$4,000,000 is the estimated customers' share of annual off-system sales margins. The gas supply demand charge share of off-system sales margins shall be equal to annualized gas supply demand charges as a percent of the sum of annualized gas supply demand charges and annualized capacity reservation charges.

b. Capacity Reservation Charges. The Capacity Reservation Charge cost component per therm to be added to the other rate components to determine the CPGA factor for firm sales customers shall be calculated by dividing the capacity reservation costs allocated to firm sales customers by the firm sales volumes specified in Section F of this clause.

The Capacity Reservation Charge cost component per therm for firm transportation customers shall be determined by multiplying the average capacity reservation cost component per therm by 80%.

The capacity reservation costs to be allocated to firm sales customers shall be equal to total capacity reservation charges less the capacity reservation charges allocated to firm transportation customers. The capacity reservation charges allocated to firm transportation customers shall be determined by multiplying the Capacity Reservation Charge cost component per therm for firm transportation customers by the firm transportation volumes specified in Section F of this clause.

The average capacity reservation cost component per therm shall be determined by dividing the Company's total current annualized capacity reservation charges by the firm sales and firm transportation volumes specified in Section F of this clause.

SCHEDULE OF RATES

PURCHASED GAS ADJUSTMENT CLAUSE (continued)

The amount of gas purchased for sales classified as firm and the amount of gas purchased for sales classified as seasonal and interruptible will be determined by (i) subdividing the Company's total natural gas purchases less its net injections into storage into two parts in the respective ratios which the Company's firm sales and its seasonal and interruptible sales bear to the total of the two classes of sales and (ii) including propane peak shaving volumes as gas purchased for sales classified as firm.

CANCELLED

DEC - 4 1984

1st RS 16

PUBLIC SERVICE COMMISSION OF MISSOURI

2. Where the increase or decrease in cost of purchased gas computed from 1(a) and 1(b) amounts to more than \$100,000, the amount of increase or decrease applicable to gas purchases for sales classified as firm shall be divided by the therms sold to such classification during the same 12 month period and the amount of increase or decrease applicable to sales classified as seasonal and interruptible shall be divided by the number of therms sold to such classification during the same 12 month period and the rate per therm determined to the nearest .001¢ will be used as a net rate in computing the Purchased Gas Adjustment applicable to each class of customers' bills, and
3. the amount of each customer's bill shall include a Purchased Gas Adjustment which shall on a net basis be the product of (a) the rate per therm applicable to the sale classification under which the customer is served determined as in A-2 and (b) the total therms used in the billing period and
4. any increases or decreases in charges for gas service resulting from an increase or decrease in the cost of purchased gas shall be effective on a pro rata basis beginning with the effective date of the rate change causing the adjustment and shall be fully effective one month after the effective date of such rate change provided that in the case of an increase in charges the Company has provided as specified in paragraph D hereof

SCHEDULE OF RATES

A. Current Purchased Gas Adjustments (Continued)

Total current annualized capacity reservation charges shall be equal to the sum of the reservation charges of each of the Company's suppliers obtained by multiplying the latest effective capacity reservation charge of each supplier by the annualized reservation-related determinants applicable to such supplier. Such charges shall include pipeline reservation charges (exclusive of Gas Supply Realignment Cost ("GSRC") surcharges) and contract storage capacity and deliverability charges. Beginning with the Company's CPGA rates that become effective during November 2007, total current annualized capacity reservation charges shall be reduced by the capacity reservation charge portion of the customers' share of estimated annual off-system sales margins realized by the Company as described in Section H. For purposes of the CPGA calculation \$4,000,000 is the estimated customers' share of annual off-system sales margins. The capacity reservation charge share of off-system sales shall be equal to annualized capacity reservation charges as a percent of the sum of annualized gas supply demand charges and annualized capacity reservation charges. Also, beginning with the Company's CPGA rates that become effective during November 2007, total current annualized capacity reservation charges shall be reduced by the customers' share of estimated capacity release revenues realized by the Company as described in Section H. For purposes of the CPGA calculation \$2,000,000 is the estimated customers' share of annual capacity release revenues.

c. Commodity-Related Charges. The Commodity-Related Charge cost component per therm for all sales rate schedules except LVTSS and VF shall be determined by dividing total current annualized commodity-related costs by the total sales volumes specified in Section F. Total current annualized commodity-related costs shall be equal to the product of the current average commodity-related cost per therm and the annual purchase volumes specified in Section F. The current average commodity-related cost per therm shall reflect the known cost of all of the Company's gas supply resources at the time of the PGA filing and, for gas supply contracts that are tied to a monthly spot index, shall also reflect the latest closing prices for natural gas futures on the New York Mercantile Exchange ("NYMEX") for the near month and each ensuing month that precedes the next current PGA effective date as adjusted for the latest actual basis differential realized under each contract.

A. Current Purchased Gas Adjustments (Continued)

Commodity-related charges shall include but not be limited to producer or gas supply commodity charges and pipeline transmission and gathering commodity charges. The current average commodity-related cost per therm must reflect -- in addition to the costs of current purchased gas supplies -- costs or cost reductions at the time of such filing, that are expected to be realized, related to storage withdrawals, gas purchases under fixed-price contracts and the Company's use of financial instruments, except for call options for which only cost reductions expected to be realized during the months covered by the Company's PGA filing shall be reflected.

The Commodity-Related Charge cost component per therm for sales made to LVTSS and VF customers shall be determined by dividing total current annualized commodity-related costs by the total sales volumes specified in Section F. Total current annualized commodity-related costs shall be equal to the product of the current average commodity-related cost per therm applicable to the Company's purchases during the period covered by the new CPGA and the annual purchase volumes specified in Section F. The current average commodity-related cost per therm shall be equal to the latest effective commodity-related charges divided by the total purchase volumes for such period.

d. Take-or-Pay Charges. The Take-or-Pay cost component per therm shall be determined by dividing the current annualized take-or-pay related cost of purchased gas by the total sales and transportation volumes specified in Section F.

e. Other Non-Commodity-Related Gas Costs. With the exception of FERC Order No. 636 transition costs identified in an interstate pipeline company's rate schedules, the Other Non-Commodity-Related Gas Cost component per therm shall be determined by dividing all non-commodity-related gas costs subject to regulation by the FERC or any successor agency, by the total sales and transportation volumes specified in Section F. The Other Non-Commodity-Related Gas Cost component per therm applicable to the aforementioned transition costs will be determined by dividing such costs by the total sales volumes specified in Section F.

f. Gas Inventory Carrying Cost Recovery ("GICCR"). The GICCR component of the Company's CPGA factors shall be determined by dividing the estimated carrying costs on the average gas inventory balances established in the resolution of the Company's most recent general rate case by the total sales volumes specified in Section F.

charges shall be allocated to firm sales and to seasonal and interruptible sales based on the actual sales made by the Company with respect to each such sales classification during the past period to which the refunds are applicable.

2. The amount of refund applicable to firm sales determined as in B-1 herein shall be divided by the amount of therms estimated to be sold in the succeeding 12 months to customers who purchase gas on a firm basis. The resulting unit cost per therm, to the nearest .001¢, will be applied as a credit to bills to such customers over the succeeding 12 months by multiplying such unit refund credit by the total therms billed to each customer in each billing period.

3. The amount of refund applicable to seasonal and interruptible sales determined as in B-1 herein shall be divided by the amount of therms estimated to be sold in the succeeding 12 months to customers who purchase gas on a seasonal and interruptible basis. The resulting unit cost per therm, to the nearest .001¢, will be applied as a credit to bills to such customers over the succeeding 12 months by multiplying such unit refund credit by the total therms billed to each customer in each billing period.

4. The Company may adjust the aforesaid unit refund credit factors in the twelfth month by dividing the estimated refund balances yet to be distributed to each sales classification during such twelfth month by the amount of therms estimated to be sold to each sales classification respectively. The resulting unit cost per therm, to the nearest .001¢, will be applied as a credit to bills during such twelfth month. Any amount by which the refund distribution is less or more than the amount initially determined to be refunded, will be added to or subtracted from the next succeeding refund distribution.

5. The Company will add interest monthly to the balances of refunds received from its supplier(s) remaining to be distributed to customers. The amount of interest to be added each month shall be computed at the rate of 9 percent per annum applied to such refund balance existing on the last date of each month. For each twelve-month refund distribution period, an estimate of the interest to be so added by the Company shall be included in determining the per therm credits to be applied to bills pursuant to Paragraphs 1 through 4 of this Section B.

SCHEDULE OF RATES

PURCHASED GAS ADJUSTMENT CLAUSE (continued)

at least 10 days notice of such increase. In the event the Company has not provided notice 10 days prior to the effective date of an increase in purchased gas costs and of the increase in charges resulting therefrom, such increase will not become effective, until the expiration of the 10 days notice required by paragraph D hereof and then only on a pro rata basis until one month after the effective date of the rate change causing the increase in cost of purchased gas, after which the rate change shall be fully effective.

5. Any Purchased Gas Adjustment provided for herein shall remain in effect until the next Purchased Gas Adjustment becomes effective hereunder, or until retail rates are otherwise changed by law or order of the Commission.

B. Any refunds (except refunds for the period June 15, 1961, to February 1, 1962, flowing out of the final disposition of FPC Docket RP61-21) which the Company receives from Mississippi River Fuel Corporation due to a final determination of that Company's wholesale rates and any refunds which the Company receives from Mississippi River Transmission applicable to gas purchases after February 1, 1962, and resulting from a final determination of that Company's wholesale rates together with any interest included in such refunds will be refunded in turn to the Company's customers. Such refund distribution will commence within three months of receipt of the refund by the Company and will be accomplished in the following manner:

1. The amount of refund applicable to firm sales (including unmetered gas light rate sales) will be determined by computing the difference between cost of gas purchased for such sales at the supplier's wholesale rates in effect for the period covered by the refund and at the finally determined wholesale rates for that period and allocating thereto that portion of the interest received by the Company applicable to such amount, and any license, occupation or similar tax collected from customers applicable to such refund.

A. Current Purchased Gas Adjustments (Continued)

3. The factors determined in Paragraphs 2.b., 2.d. and 2.e. shall be applicable to transportation throughput pursuant to Sheet No. 34 of the Company's Large Volume Transportation and Sales Service per therm, respectively. For informational purposes, such charges shall also be set forth at the bottom of Sheet No. 29.

4. The CPGA for firm sales, with the exception of LVTSS and VF sales, and the CPGA for seasonal and interruptible sales shall be set forth on Tariff Sheet No. 29 to be filed with the Commission and shall remain in effect until the next CPGA becomes effective hereunder, or until retail rates (or the fixed test period purchase and sales volumes) are otherwise changed by order of the Commission. Each CPGA made effective hereunder shall cancel and supersede the previously effective CPGA and shall be the CPGA to be effective thenceforth.

5. Each month, upon the availability of the natural gas market indices used in the determination of the Company's gas supply costs, the Company shall notify all of its LVTSS and VF customers by e-mail or facsimile of the CPGA which shall be applied to sales to such customers in such month. Such CPGA shall be computed in accordance with paragraphs 1 and 2 above, and shall become effective the next gas day after the aforementioned notification. Each month the Company shall submit to the Staff of the Commission a copy of the workpapers containing the computation of the CPGA.

6. The amount of each customer's bill shall include a CPGA charge which shall on a net basis be the product of (a) the CPGA per therm applicable to the sales classification as set forth in Tariff Sheet No. 29 for non customers other than LVTSS and VF, or the CPGA per therm described in paragraph 5 above for LVTSS and VF customers, and (b) the total therms used in each billing period.

1. The following refund factors will be applied as a credit to bills to the applicable customers over the succeeding 12 months by multiplying such factors by the total therms billed to each customer in each billing period.

a. The refund factor for firm sales service shall be calculated by summing the gas supply demand, capacity reservation, commodity-related, take-or-pay and other non-commodity-related gas cost refunds per therm as determined in accordance with paragraphs 2.a, b., c., d. and e., respectively.

b. The refund factor for seasonal and interruptible sales service shall be calculated by summing the commodity-related, take-or-pay and other non-commodity-related gas cost refunds per therm as determined in accordance with paragraphs 2.c., d. and e., respectively.

c. The refund factor for firm transportation customers shall be calculated by summing the capacity reservation, take-or-pay and other non-commodity-related gas cost refunds per therm as determined in accordance with paragraphs 2.b., d. and e. respectively.

d. The refund factor for basic transportation customers shall be calculated summing the take-or-pay and other non-commodity-related gas cost unit refunds per therm as determined in accordance with paragraph 2.d. and e. respectively.

2. Unit refund factors related to various gas cost components, rounded to the nearest .001¢ per therm, will be calculated in the following manner:

a. Gas Supply Demand. The amount of refund related to gas supply demand charges shall be divided by the amount of therms estimated to be sold on a firm basis in the succeeding 12 months.

b. Capacity Reservation. The amount of refund related to capacity reservation charges shall be divided by the amount of therms estimated to be sold and transported on a firm basis in the succeeding 12 months.

.001¢, will be applied as a credit to bills to such customers over the succeeding 12 months by multiplying such unit refund credit to the total therms billed to each customer in each billing period.

5. The amount of refund related to demand charges shall be allocated only to firm sales and firm transportation service. Such amount shall be divided by the amount of therms estimated to be sold and transported on a firm basis in the succeeding 12 months. The resulting unit refund per therm, to the nearest .001¢, will be applied as a credit to bills to such customers over the succeeding 12 months by multiplying such unit refund credit by the total therms billed to each customer in each billing period.

6. The amount of refund related to take-or-pay charges applicable to the period June 1, 1988 through November 14, 1989 shall be allocated to firm sales, firm transportation volumes, and basic transportation volumes of customers who purchased gas on a firm basis during the aforementioned period. Such amount shall be divided by the amount of therms estimated to be sold and transported to the applicable customers in the succeeding 12 months. The resulting unit refund per therm, to the nearest .001¢, will be applied as a credit to bills to such customers over the succeeding 12 months by multiplying such unit refund credit by the total therms billed to each customer in each billing period.

7. The amount of refund related to take-or-pay charges applicable to the period November 15, 1989 and after shall be allocated to all sales and transportation volumes. Such amount shall be divided by the amount of therms estimated to be sold (firm and seasonal and interruptible) and transported (firm and basic) in the succeeding 12 months. The resulting unit refund per therm, to the nearest .001¢, will be applied as a credit to bills to such customers over the succeeding 12 months by multiplying such unit refund credit by the total therms billed to each customer in each billing period.

8. The amount of refund related to commodity related charges shall be allocated only to firm sales and seasonal and interruptible sales based on the actual sales made by the Company with respect to each such sales classification during the past period to which the refunds are applicable.

The amount of commodity related refund applicable to firm sales shall be divided by the amount of therms estimated to be sold in the succeeding 12 months to customers who purchase gas on a firm basis.

C. Deferred Purchased Gas Cost Accounts

NOV 20 1989

The Company shall maintain Deferred Purchased Gas Cost Account(s) which shall be credited by the amount of any gas cost revenue recovered in excess of actual purchased gas costs and debited by the amount of any gas cost revenue recovery which is less than said actual purchased gas costs.

1. Such excess or deficiency in total gas cost recovery, for each sales classification (firm, and seasonal and interruptible) shall be determined by a monthly comparison of the actual cost of gas, net of storage injections and withdrawals, as shown on the Company's books and records, exclusive of refunds, for each revenue month to the gas cost revenues recovered for such revenue month.

a. For firm sales, total gas costs shall include (i) the actual monthly MRTC demand charges (ii), the actual expensed cost of propane peak shaving supplies used and (iii) the actual propane penalty costs incurred.

b. All other actual gas costs incurred will be allocated to firm sales and to sales classified as seasonal and interruptible based on the ratio of each classes' respective actual therm sales to total therm sales for the related revenue month.

2. The amounts of gas cost revenues recovered each month shall be the product of the actual therm sales of each sales class and the gas cost revenue recovery components for such sales class, and shall also include the "Additional Transportation Charges" specified in the Company's Large Volume Transportation and Sales Service tariff. Such revenue recovery components shall be the sum of the base unit cost of gas for each sales class (as set forth in Paragraph E) and the CPGA applicable to each sales class.

3. For each twelve-month period ending with the March revenue month, the differences of the comparisons described above including any balance or credit for the previous year shall be accumulated to produce a cumulative balance of excess or deficiency of gas cost revenue recovery. "Actual Cost Adjustment" (ACA) factors shall be computed by dividing these cumulative balances by the estimated sales volumes during the subsequent twelve-month period beginning with the May revenue month for each of the respective sales classes. All actual ACA revenue recovered shall be debited or credited to the balance of the ACA account as appropriate and any remaining balance shall be reflected in the subsequent ACA computations.

1. Such excess or deficiency in total gas cost recovery, for each sales classification (firm, and seasonal and interruptible) shall be determined by a monthly comparison of the actual cost of gas, net of storage injections and withdrawals, as shown on the Company's books and records, exclusive of refunds, for each revenue month to the gas cost revenues recovered for such revenue month.

a. For firm sales, total gas costs shall include (i) the actual monthly MRTC demand charges (ii), the actual expensed cost of propane peak shaving supplies used and (iii) the actual propane penalty costs incurred.

b. All other actual gas costs incurred will be allocated to firm sales and to sales classified as seasonal and interruptible based on the ratio of each classes' respective actual therm sales to total therm sales for the related revenue month.

2. The amounts of gas cost revenues recovered each month shall be the product of the actual therm sales of each sales class and the gas cost revenue recovery components for such sales class. Such revenue recovery components shall be the sum of the base unit cost of gas for each sales class (as set forth in Paragraph E) and the CPGA applicable to each sales class.

3. For each twelve-month period ending with the March revenue month, the differences of the comparisons described above including any balance or credit for the previous year shall be accumulated to produce a cumulative balance of excess or deficiency of gas cost revenue recovery. "Actual Cost Adjustment" (ACA) factors shall be computed by dividing these cumulative balances by the estimated sales volumes during the subsequent twelve-month period beginning with the May revenue month for each of the respective sales classes. All actual ACA revenue recovered shall be debited or credited to the balance of the ACA account as appropriate and any remaining balance shall be reflected in the subsequent ACA computations.

SCHEDULE OF RATES

PURCHASED GAS ADJUSTMENT CLAUSE (continued)

2. The amount of refund applicable to seasonal and interruptible sales will be determined by computing the difference between cost of gas purchased for such sales at the supplier's wholesale rates in effect for the period covering the refund and at the finally determined wholesale rates for that period and allocating thereto that portion of the interest received by the Company applicable to such amount as any license, occupation or similar tax collected from customers applicable to such refund.
3. The amount of refund applicable to firm sales determined as in B-1 herein shall be divided by the amount of therms estimated to be sold in the succeeding 12 months to customers who purchase gas on a firm basis. The resulting unit cost per therm to the nearest .001¢ will be applied as a credit to bills to such customers over the succeeding eleven months by multiplying such unit credit by the amount of therms billed each month. At the end of the eleven months the amount refunded the firm customers will be subtracted from the amount to be refunded. The remainder shall be divided by the amount of therms estimated to be sold to customers on a firm basis in the twelfth month succeeding the start of the refund distribution. The resulting unit cost per therm to the nearest .001¢ will be applied as a credit to bills to such customers during such twelfth month. Any amount by which the refund distribution is less than or more than the amount to be distributed will be added to or subtracted from the next succeeding refund distribution.
4. The amount of refund applicable to interruptible and seasonal sales determined as in B-2 herein shall be divided by the amount of therms estimated to be sold in the succeeding 12 months to customers who purchase gas on an interruptible and seasonal basis. The resulting unit cost per therm to the nearest .001¢ will be applied as a credit to bills to such customers over the succeeding eleven months by multiplying such unit credit by the amount of therms billed each month. At the end of the eleven months the amount refunded the interruptible and seasonal customers will be subtracted from the amount to be refunded. The remainder shall be

B. Refunds (Continued)

a. The refund factor for firm sales, including LVTSS, service shall be calculated by summing the gas supply demand, capacity reservation, commodity-related, take-or-pay and other non-commodity-related gas cost refunds per therm as determined in accordance with paragraphs 2.a, b., c., d. and e., respectively.

b. The refund factor for seasonal and interruptible sales service shall be calculated by summing the commodity-related, take-or-pay and other non-commodity-related gas cost refunds per therm as determined in accordance with paragraphs 2.c., d. and e, respectively.

c. The refund factor for firm transportation customers shall be calculated by summing the capacity reservation, take-or-pay and other non-commodity-related gas cost refunds per therm as determined in accordance with paragraphs 2.b., d. and e. respectively.

d. The refund factor for basic transportation customers shall be calculated summing the take-or-pay and other non-commodity-related gas cost unit refunds per therm as determined in accordance with paragraph 2.d. and e. respectively.

2. Unit refund factors related to various gas cost components, rounded to the nearest .001¢ per therm, will be calculated in the following manner:

a. Gas Supply Demand. The amount of refund related to gas supply demand charges shall be divided by the amount of therms estimated to be sold on a firm basis in the succeeding 12 months.

b. Capacity Reservation. For refunds relating to periods prior to September 1, 1996, the amount of refund related to capacity reservation charges shall be divided by the amount of therms estimated to be sold and transported on a firm basis in the succeeding 12 months. For refunds relating to periods after August 31, 1996, separate unit refund factors shall be calculated for firm sales and firm transportation customers, consistent with the allocation of capacity reservation charges set forth in Section A.2.b.

B. Refunds (Continued)

Public Service Commission

The amount of commodity related refund applicable to seasonal and interruptible sales shall be divided by the amount of therms estimated to be sold in the succeeding 12 months to customers who purchase gas on a seasonal and interruptible basis.

9. The Company may adjust the aforesaid unit refund credit factors in the twelfth month by dividing the estimated refund balances yet to be distributed to each sales and/or transportation classification during such twelfth month by the amount of therms estimated to be sold and/or transported to each classification respectively. The resulting unit refund per therm, to the nearest .001¢, will be applied as a credit to bills during such twelfth month. Any amount by which the refund distribution is less or more than the amount initially determined to be refunded, will be added to or subtracted from the next succeeding refund distribution.

10. The Company will add interest monthly to the balances of refunds received from its suppliers remaining to be distributed to customers. The amount of interest to be added each month shall be computed at the refund interest rate described in paragraph B. 11 applied to the balance existing on the last day of each month. For each twelve-month refund distribution period, an estimate of the interest to be so added by the Company shall be included in determining the per therm credits to be applied to bills pursuant to Paragraphs 1 through 4 of this Section B, using the refund interest rate described in paragraph B. 11.

11. The refund interest rate shall be equal to the prime bank lending rate as published in The Wall Street Journal less two percentage points. The refund interest rate to be applied to the refund balance at the end of each month shall be equal to the arithmetic average of the refund interest rates in effect on each day during such month. The refund interest rate to be used to make the initial estimate of the interest that will be included in each refund distribution shall be equal to the refund interest rate in effect on the day of the receipt of the supplier refund which results in the accumulation of over \$100,000 in new supplier refunds. At the conclusion of each refund distribution, the refund interest rate used in such distribution shall be reconciled with the actual average refund interest rate in effect for each month during the distribution period.

C. Deferred Purchased Gas Cost Accounts

The Company shall maintain Deferred Purchased Gas Cost Account(s) which shall be credited by the amount of any gas cost revenue recovery in

The amount of commodity related refund applicable to seasonal and interruptible sales shall be divided by the amount of therms estimated to be sold in the succeeding 12 months to customers who purchase gas on a seasonal and interruptible basis.

9. The Company may adjust the aforesaid unit refund credit factors in the twelfth month by dividing the estimated refund balances yet to be distributed to each sales and/or transportation classification during such twelfth month by the amount of therms estimated to be sold and/or transported to each classification respectively. The resulting unit refund per therm, to the nearest .001¢, will be applied as a credit to bills during such twelfth month. Any amount by which the refund distribution is less or more than the amount initially determined to be refunded, will be added to or subtracted from the next succeeding refund distribution.

10. The Company will add interest monthly to the balances of refunds received from its supplier(s) remaining to be distributed to customers. The amount of interest to be added each month shall be computed at the rate of 9 percent per annum applied to such refund balance existing on the last date of each month. For each twelve-month refund distribution period, an estimate of the interest to be so added by the Company shall be included in determining the per therm credits to be applied pursuant to Paragraphs 1 through 4 of this Section B.

CANCELLED

C. Deferred Purchased Gas Cost Accounts

The Company shall maintain Deferred Purchased Gas Cost Account(s) which shall be credited by the amount of any gas cost revenue recovery in excess of actual purchased gas costs and debited by the amount of any gas cost revenue recovery which is less than said actual purchased gas costs.

NOV 4 1991
BY H. R. S. # 19
Public Service Commission
MISSOURI

1. Such excess or deficiency in total gas cost recovery, for each sales classification (firm, and seasonal and interruptible) shall be determined by a monthly comparison of the actual cost of gas, net of storage injections and withdrawals, as shown on the Company's books and records, exclusive of refunds, for each revenue month to the gas cost revenues recovered for such revenue month.

a. For firm sales, total gas costs shall include (i) actual MRTC demand charges (ii), the actual expensed cost of propane peak shaving supplies used and (iii) the actual propane penalty costs incurred.

C. Deferred Purchased Gas Cost Accounts (Continued)

4. These ACA adjustment factors shall be rounded to the nearest .001¢ per therm and applied to billings commencing with the May revenue month to the applicable sales classes.

These "Actual Cost Adjustments" shall remain in effect until superceded by subsequent "Actual Cost Adjustments" calculated according to this provision. The Company shall file ACA factors in the same manner as all other Purchased Gas Adjustments.

D. Filing Requirements

At least ten days before applying any Purchased Gas Adjustment(s), the Company shall file with the Commission an Adjustment Statement showing:

1. The computation of the revised purchased gas costs;
2. A revised PGA Tariff Sheet No. 29 setting forth the rate classes of the Company to which the Purchased Gas Adjustment(s) is to be applied, the net amount per therm, expressed to the nearest .001¢ to be used in computing the Purchased Gas Adjustment applicable to customers' bills under each rate schedule, and the effective date of such adjustment.
3. The Company shall also file with the Commission, as soon as available, copies of any orders or other pertinent information applicable to the wholesale rate(s) charged the Company by its natural gas supplier.

E. Standard Volumes, Basic Rates and Gas Costs

The following standard volumes, basic rates and gas costs shall be used for purposes of Paragraph A hereof:

AUG 1 1990		Seasonal and Interruptible Sales

SCHEDULE OF RATES

C. Deferred Purchased Gas Cost Accounts (Continued)

1. Such excess or deficiency in total gas cost recovery, for each sales classification (firm other than LVTSS and VF, LVTSS, VF and seasonal and interruptible) and for each transportation classification (firm and basic) shall be determined by a monthly comparison of the actual cost of gas, net of storage injections and withdrawals, as shown on the Company's books and records, for each revenue month to the gas cost revenues recovered for such revenue month. The actual cost of gas shall be reduced for any refunds received from the Company's suppliers in connection with gas supply, transportation and storage services. Such refunds shall remain a liability of the Company to be distributed to customers with interest.

2. Each component of actual gas cost shall be allocated to the sales and transportation classifications in accordance with the CPGA components described in Paragraph 2 of Section A above relating to each component and based on the volumes sold and/or transported to the applicable customer classification during the twelve month period ending with the September revenue month. The actual costs of propane peak shaving supplies and penalties will be allocated solely to firm sales customers, including LVTSS and VF customers.

3. The amount of gas cost revenues recovered each month for the sales classes shall be the product of the actual therm sales of each sales class and the gas cost revenue recovery components for such sales class. Such revenue recovery component shall be equal to the CPGA applicable to such sales class.

4. The amount of gas cost revenues recovered each month for the transportation classes shall be the product of the actual therms transported and the "Additional Transportation Charges," where applicable, specified in the Company's Large Volume Transportation and Sales Service tariff.

1. Such excess or deficiency in total gas cost recovery, for each sales classification (firm other than LVTSS and VF, LVTSS, VF and seasonal and interruptible) and for each transportation classification (firm and basic) shall be determined by a monthly comparison of the actual cost of gas, net of storage injections and withdrawals, as shown on the Company's books and records, exclusive of refunds, for each revenue month to the gas cost revenues recovered for such revenue month.

2. Each component of actual gas cost shall be allocated to the sales and transportation classifications in accordance with the CPGA components described in Paragraph 2 of Section A above relating to each component and based on the volumes sold and/or transported to the applicable customer classification during the twelve month period ending with the September revenue month. The actual costs of propane peak shaving supplies and penalties will be allocated solely to firm sales customers, including LVTSS and VF customers.

3. The amount of gas cost revenues recovered each month for the sales classes shall be the product of the actual therm sales of each sales class and the gas cost revenue recovery components for such sales class. Such revenue recovery component shall be equal to the CPGA applicable to such sales class.

4. The amount of gas cost revenues recovered each month for the transportation classes shall be the product of the actual therms transported and the "Additional Transportation Charges," where applicable, specified in the Company's Large Volume Transportation and Sales Service tariff.

4. Beginning with the twelve months ended September 1991, and for each succeeding twelve-month period ending with the September revenue month, the differences of the comparisons described above including any balance or credit for the previous year shall be accumulated to produce a cumulative balance of excess or deficiency of gas cost revenue recovery. "Actual Cost Adjustment" (ACA) factors shall be computed by dividing these cumulative balances by the estimated sales volumes during the subsequent twelve-month period beginning with the November revenue month for each of the respective sales classes. All actual ACA revenue recovered shall be debited or credited to the balance of the ACA account as appropriate and any remaining balance shall be reflected in the subsequent ACA computations.

5. These ACA adjustment factors shall be rounded to the nearest .001¢ per therm and applied to billings commencing with the November revenue month to the applicable sales classes.

These "Actual Cost Adjustments" shall remain in effect until superseded by subsequent "Actual Cost Adjustments" calculated according to this provision. The Company shall file ACA factors in the same manner as all other Purchased Gas Adjustments.

D. Filing Requirements

At least ten days before applying any Purchased Gas Adjustment to the Company shall file with the Commission an Adjustment Rate Schedule showing:

1. The computation of the revised CPGA, refund, or ACA factor;
2. A revised PGA Tariff Sheet No. 29 setting forth the rate classes of the Company to which the Purchased Gas Adjustment(s) is to be applied, the net amount per therm, expressed to the nearest .001¢ to be used in computing the Total Purchased Gas Adjustment (sum of CPGA, refund, and ACA) applicable to customers' bills under each rate schedule, and the effective date of such adjustment.
3. The Company shall also file with the Commission, as soon as available, copies of any orders or other pertinent information applicable to the wholesale rate(s) charged the Company by its natural gas supplier.

SCHEDULE OF RATES

C. Deferred Purchased Gas Cost Accounts (Continued)

5. Each month, carrying costs, at a simple rate of interest equal to the prime bank lending rate (as published in The Wall Street Journal on the first business day of such month), minus two percentage points, shall be applied to the Company's average beginning and ending monthly ACA accounts, including the balance of any undistributed refunds received from the Company in connection with natural gas supply, transportation and storage services. In addition, carrying costs shall be applied to the average beginning and ending balance of the cumulative payments made and/or received in connection with the Company's use of financial instruments as adjusted for hedging gains and/or losses flowed through to customers through paragraph 6 below. In no event shall the carrying cost rate be less than 0%. Corresponding interest income and expense amounts shall be recorded on a net cumulative basis for the ACA deferral period. In addition, an allocation of monthly line of credit fees shall also be charged to the deferred purchased gas cost accounts and shall represent the difference between total line of credit fees (after allocation of holding company fees to affiliates) and the amount allocated to Construction Work in Progress ("CWIP"). The amount allocated to CWIP shall be based on the ratio of the CWIP balances each month to the total balances of CWIP, Propane and Natural Gas Inventories, and net PGA balances (to the extent such net PGA balances are positive).

6. For each twelve-month period ending with the September revenue month, the differences of the comparisons described above including, any carrying costs where applicable, and any balance or credit for the previous year shall be accumulated to produce a cumulative balance of excess or deficiency of gas cost revenue recovery. "Actual Cost Adjustment" (ACA) factors, which shall be included in the Company's November PGA filing, as such filing is described in Section E.1, shall be computed by dividing such balances by the applicable estimated sales or transportation volumes during the subsequent twelve-month ended October period for each of the respective sales and transportation classes. Such ACA factors shall remain in effect until superseded by revised ACA factors in the next scheduled November PGA filing. All actual ACA revenue recovered shall be debited or credited to the balance of the ACA account as appropriate and any remaining balance shall be reflected in the subsequent ACA computations. Beginning with the Company's ACA factors that become effective in November 2007, the Company shall include in the derivation of those factors that apply to firm sales and firm transportation customers a one-time credit of the amounts owed to customers through September 30, 2007 pursuant to the sharing mechanism set forth in paragraph 11 of the Stipulation and Agreement in Case No. GR-2005-0284, which amounts are recorded in a separate Deferred Purchased Gas Cost account.

For each twelve-month period ending with the September revenue month, the differences of the comparisons described above including, any carrying costs where applicable, and any balance or credit for the previous year shall be accumulated to produce a cumulative balance of excess or deficiency of gas cost revenue recovery. "Actual Cost Adjustment" (ACA) factors, which shall be included in the Company's November PGA filing, as such filing is described in Section E.1, shall be computed by dividing such balances by the applicable estimated sales or transportation volumes during the subsequent twelve-month ended October period for each of the respective sales and transportation classes. Such ACA factors shall remain in effect until superseded by revised ACA factors in the next scheduled November PGA filing. All actual ACA revenue recovered shall be debited or credited to the balance of the ACA account as appropriate and any remaining balance shall be reflected in the subsequent ACA computations. Beginning with the Company's ACA factors that become effective in November 2007, the Company shall include in the derivation of those factors that apply to firm sales and firm transportation customers a one-time credit of the amounts owed to customers through September 30, 2007 pursuant to the sharing mechanism set forth in paragraph 11 of the Stipulation and Agreement in Case No. GR-2005-0284, which amounts are recorded in a separate Deferred Purchased Gas Cost account.

SCHEDULE OF RATES

C. Deferred Purchased Gas Cost Accounts (Continued)

5. Each month, carrying costs, at a simple rate of interest equal to the prime bank lending rate (as published in The Wall Street Journal on the first business day of such month), minus two percentage points, shall be applied to the Company's average beginning and ending monthly ACA accounts, including the balance of any undistributed refunds received from the Company in connection with natural gas supply, transportation and storage services. In addition, carrying costs shall be applied to the average beginning and ending balance of the cumulative payments made and/or received in connection with the Company's use of financial instruments as adjusted for hedging gains and/or losses flowed through to customers through paragraph 6 below. In no event shall the carrying cost rate be less than 0%. Corresponding interest income and expense amounts shall be recorded on a net cumulative basis for the ACA deferral period.

6. For each twelve-month period ending with the September revenue month, the differences of the comparisons described above including, any carrying costs where applicable, and any balance or credit for the previous year shall be accumulated to produce a cumulative balance of excess or deficiency of gas cost revenue recovery. "Actual Cost Adjustment" (ACA) factors, which shall be included in the Company's November PGA filing, as such filing is described in Section E.1, shall be computed by dividing such balances by the applicable estimated sales or transportation volumes during the subsequent twelve-month ended October period for each of the respective sales and transportation classes. Such ACA factors shall remain in effect until superseded by revised ACA factors in the next scheduled November PGA filing. All actual ACA revenue recovered shall be debited or credited to the balance of the ACA account as appropriate and any remaining balance shall be reflected in the subsequent ACA computations.

5. Carrying costs shall be applied to certain excesses or deficiencies in gas cost recoveries, which such excesses or deficiencies shall comprise a Deferred Carrying Cost Balance ("DCCB"). The excesses or deficiencies to be included in the DCCB, which shall be computed separately for each of the Company's sales classifications, with the exception of those customers billed under the LVTSS and VF rate schedules, shall be the product of: (a) the difference between the Company's actual annualized unit cost of gas, net of storage injections and withdrawals, and the estimated annualized unit cost of gas factor included in the Company's then most recent PGA filing, and (b) the volumes of gas sold during such month. Each month, carrying costs, at a simple rate of interest equal to the prime bank lending rate (as published in The Wall Street Journal on the first business day of such month), minus one percentage point, shall be credited to applicable sales customers for any excess recoveries of gas costs or credited to the Company for any deficient recoveries of gas costs only when and to the extent that the DCCB exceeds five percent of the Company's average annual level of gas costs for the then three most recent ACA periods.

6. For each twelve-month period ending with the September revenue month, the differences of the comparisons described above including, any carrying costs where applicable, and any balance or credit for the previous year shall be accumulated to produce a cumulative balance of excess or deficiency of gas cost revenue recovery. "Actual Cost Adjustment" (ACA) factors, which shall be included in the Company's Winter PGA filing, as such filing is described in Section E.1, shall be computed by dividing such balances by the applicable estimated sales or transportation volumes during the subsequent twelve-month ended October period for each of the respective sales and transportation classes. Such ACA factors shall remain in effect until superseded by revised ACA factors in the next scheduled Winter PGA filing, with two exceptions. First, the LVTSS sales ACA factor that became effective November 19, 2001 shall be terminated on the effective date of One Hundred and Ninetieth Revised Sheet No. 29. Second, the ACA factor applicable to sales made to VF customers effective November 26, 2002 shall be terminated effective March 1, 2003. Effective with the Company's November 2003 PGA rates, separate ACA factors shall be established for the LVTSS and VF rate schedules, and any deferred gas costs which cause the VF ACA factor to be greater than a \$.05 per therm charge or credit shall be deferred for recovery until the subsequent ACA recovery period. All actual ACA revenue recovered shall be debited or credited to the balance of the ACA account as appropriate and any remaining balance shall be reflected in the subsequent ACA computations.

estimated sales or transportation volumes during the subsequent twelve-month period beginning with the December revenue month for each of the respective sales and transportation classes. All actual ACA revenue recovered shall be debited or credited to the balance of the ACA account as appropriate and any remaining balance shall be reflected in the subsequent ACA computations.

7. These ACA adjustment factors shall be rounded to the nearest .001¢ per therm and applied to billings commencing with the December revenue month to the applicable sales and transportation classes.

These "Actual Cost Adjustments" shall remain in effect until superseded by subsequent "Actual Cost Adjustments" calculated according to this provision. The Company shall file ACA factors in the same manner as all other Purchased Gas Adjustments.

D. Filing Requirements

At least ten business days before applying any Purchased Gas Adjustment(s), the Company shall file with the Commission an Adjustment Statement showing:

1. The computation of the revised CPGA, refund, or ACA factor;
2. A revised PGA Tariff Sheet No. 29 setting forth the rate classes of the Company to which the Purchased Gas Adjustment(s) is to be applied, the net amount per therm, expressed to the nearest .001¢ to be used in computing the Total Purchased Gas Adjustment (sum of CPGA, refund, and ACA) applicable to customers' bills under each rate schedule, and the effective date of such adjustment.
3. The Company shall also file with the Commission, as soon as available, copies of any orders or other pertinent information applicable to the wholesale rate(s) charged the Company by its suppliers. Any supporting material disclosing market-specific information will be designated "Highly Confidential" and will only be made available to the Missouri Public Service Commission or to any party that executes a non-disclosure statement.

out in Paragraph A--the Company's natural gas account will be increased or decreased to offset such variance and a matching contra-increase or decrease will be recorded in a sub-account of the Deferred Purchased Gas Cost Account. The cumulative balance of such deferred account entries for each annual period of April through March will be allocated to firm customers and to seasonal and interruptible customers and included in the calculation of the total Deferred Purchased Gas Cost Adjustment which becomes effective each billing month of May, as prescribed in Paragraph C-4 below. The first effect of such accumulated variances on the Deferred Purchased Gas Cost Adjustment shall be for the monthly variances accumulated in the deferred sub-account for the twelve months ended March 31, 1979, and shall be included with other designated items in determining the Deferred Purchased Gas Cost Adjustment effective for the annual billing period commencing May, 1979. Thereafter the net effect of such variances for each twelve month period ending March 31 shall similarly be included in determining the Deferred Purchased Gas Cost Adjustment to be effective each May.

4. Deferred Purchased Gas Cost Adjustment

DEC - 4 1984

2nd RS 22

For firm customers, the amount of the Deferred Purchased Gas Cost Adjustment to become effective each billing month of May shall be determined to be the balance of the Deferred Purchased Gas Cost Account applicable to firm customers as of the preceding March 31 divided by the amount of therms estimated to be sold to such customers during the succeeding twelve billing months of May through April. The amount of the Deferred Purchased Gas Cost Adjustment to become effective each billing month of May for seasonal and interruptible customers shall be determined to be the balance of the Deferred Purchased Gas Cost Account applicable to such customers as of the preceding March 31 divided by the amount of therms estimated to be sold to such customers during the succeeding twelve months of May through April. The Company's Purchased Gas Adjustment, provided for under Paragraph A hereof, shall be increased or decreased by the Deferred Purchased Gas Cost Adjustment determined pursuant to this Paragraph C. As hereinabove provided, all increases or decreases in charges resulting from the Deferred Purchased Gas Cost Adjustment shall be appropriately recorded in the Deferred Gas Cost Account.

D. Gas Supply Incentive Plan, Effective October 1, 1999 MO. PUBLIC SERVICE COMM

This Section D establishes a Gas Supply Incentive Plan ("GSIP") mechanism, effective October 1, 1999, whereby the Company and its customers share in specified savings and revenues realized by the Company in acquiring, utilizing and managing its system gas supply assets.

The GSIP recognizes that the Company has agreed to bear the risk of certain increases in its gas supply procurement costs and is designed to provide the Company with incentives to minimize the costs incurred in the acquisition, and to maximize revenues generated from the management and utilization, of such assets.

1. The Company shall retain in an Incentive Revenue ("IR") Account a portion of certain savings the Company realizes in connection with the acquisition and management of its gas supply and transportation portfolio

a. The Company shall credit its Deferred Purchased Gas Cost Accounts for the difference between the total revenues it realizes from the release of pipeline transmission or pipeline storage capacity to another party and that portion of such revenues which the Company shall retain in the IR Account according to the following percentages:

Capacity Release Revenues	Company Retention %
First \$1,500,000	10%
Next \$1,500,000 to \$2,500,000	\$150,000 plus 20% of amount above \$1,500,000
Amounts over \$2,500,000	\$350,000 plus 30% of amount above \$2,500,000

5. Deferred Unaccounted For Adjustment

OCT 21 1981

Effective October 24, 1981, this Paragraph C-5 shall be applicable for (1) the determination of the Deferred Unaccounted For Adjustment for gas delivered prior to said effective date, and (2) the recovery of cost (debit) distribution of cost reductions (credit) so deferred.

MISSOURI
PUBLIC SERVICE COMMISSION

In the event that Unaccounted For gas volumes differ from 2.0% of total sales and use by Company, an adjustment will be made to the Company's Purchased Natural Gas Expense Account and to the Company's Deferred Purchased Gas Cost Account. If actual Unaccounted For gas volumes are less than 2.0% of total sales and use by Company in the fiscal year, an entry will be made to increase (debit) the Company's Purchased Natural Gas Expense Account; the contra-entry will be a credit to the Company's Deferred Purchased Gas Cost Account. The amount of the entry will be calculated by subtracting the volume of Unaccounted For gas from whatever that volume would have been if it had been 2% of sales and use by Company and by multiplying that difference in volume by the base rate commodity charge paid by the Company to its supplier as set out in Paragraph A hereof.

CANCELLED

DEC - 4 1984
BY *Jub R 23*
PUBLIC SERVICE COMMISSION
OF MISSOURI

If Unaccounted For natural gas in the fiscal year exceeds 2% of total sales and use by Company, an entry will be made to decrease (credit) the Company's Purchased Natural Gas Expense Account and the contra-entry will be a debit to the Company's Deferred Purchased Gas Cost Account. The maximum level of Unaccounted For gas which can be considered in such an entry will be the volume that represented 2.4% of sales and use by Company during the fiscal year. The amount of the entry will be determined by multiplying the volume of Unaccounted For natural gas (in excess of 2.0% but no greater than 2.4%) by the base price commodity charge paid by the Company to its supplier as stated in Paragraph A hereof. Unaccounted For natural gas volumes in excess of 2.4% will stay in the Company's Purchased Natural Gas Expense Account.

The debit or credit to the Company's Deferred Purchased Gas Cost Account based on the prior fiscal year will be included in the determination of the annual Deferred Purchased Gas Cost Adjustment, which becomes effective in the billing month of May as described in Paragraph C-4 hereof.

Name of Issuing Corporation or Municipality For Community, Town or City

SCHEDULE OF RATES

D. Gas Supply Incentive Plan, Effective October 1, 1999 (Continued)

b. The Company shall debit the Incentive Adjustment ("IA") Account and credit the IR Account for 30% of the amount by which the Company's firm transportation discounts, on any interstate or intrastate pipeline, including discounts for firm transportation which may be bundled with gas supply, exceed an annual baseline of \$13,000,000. In the event the maximum rates used to initially calculate the debit to the IA Account shall have been approved by the responsible regulatory authority on an interim basis subject to refund, the IA Account will be subsequently adjusted, if necessary, to reflect the finally approved rates for the time during which the interim rates were in effect.

c. The Company shall debit or credit the IA Account and credit or debit the IR Account with a portion of the decrease or increase, respectively, in the costs the Company incurs to purchase natural gas supplies ("Procurement Costs") for system supply purposes in accordance with the following procedure and definitions:

(i) A benchmark cost of gas shall be established for each month of the Company's ACA year which shall consist of a demand cost component, and a commodity cost component for all gas supplies other than those firm supplies purchased on a fixed price basis ("Other Supplies").

(ii) The demand cost benchmark component shall be equal to one-twelfth of the sum of the annualized demand costs for each type of gas supply contract the Company requires: baseload, combination and swing. Baseload contracts require the Company to purchase its contracted quantities of gas each day of the contract period(s). Combination contracts provide daily nomination flexibility between zero and the maximum contracted quantity and have an annual minimum contractual requirement of 70% of the aggregate monthly maximum quantities during each year. Swing contracts provide daily nomination flexibility between zero and the maximum contracted quantity and have no annual minimum or monthly contractual requirement.

SCHEDULE OF RATES

RECEIVED

5. Deferred Unaccounted For Adjustment (continued)

OCT 21 1981

Adjustment for gas delivered during the period after September 30, 1981, and prior to October 24, 1981, will be made as follows:

MISSOURI
Public Service Commission

1. A pro-forma adjustment will be calculated for the entire fiscal year ending September 30, 1982, in accordance with the provisions set forth above.
2. The pro-forma adjustment for the entire fiscal year will be reduced to an amount applicable to the portion of the fiscal year prior to October 24, 1981, by multiplying said pro-forma adjustment by the ratio of (1) therm sales which occurred prior to October 24, 1981, to (2) total therm sales billed in the fiscal year.

D. At least ten days before applying any Purchased Gas Adjustment(s), the Company shall file with the Commission an Adjustment Statement showing (a) the computation of the amount of the annual increase or decrease in the cost of purchased gas, (b) the rate(s) per therm to be used in computing the Purchased Gas Adjustment applicable to customers' bills, and (c) the effective date of such adjustment(s). Also, as soon as available, certified copies of any orders applicable to the wholesale rate(s) charged the Company by its natural gas supplier(s), shall be filed with the Commission.

SCHEDULE OF RATES

D. Gas Supply Incentive Plan, Effective October 1, 1999 (Continued)

(iii) For purposes of establishing the demand cost benchmark component in (ii) above, the annualized demand charges for each type of gas supply contract shall be determined by multiplying the Company's annual design supply requirements for each type of supply contract by the associated average demand cost per MMBtu. The design supply requirements are as follows:

Annual Design Supply Requirements
33.2 Bcf
70.4 Bcf
14.1 Bcf

SEP 14 1999

MO. PUBLIC SERVICE COMMISSION

The average demand cost per MMBtu for each type of supply contract shall be the average demand cost per MMBtu of the following three geographic supply regions from which the Company purchases gas: Mid-continent, Gulf Coast and North Louisiana/East Texas. The average demand cost per MMBtu for each supply region, which shall be determined annually through the issuance of a Request For Proposal ("RFP") prior to the start of each ACA year, shall be the weighted average demand cost per MMBtu of all the proposals received by the Company, pursuant to the RFP, for each type of supply contract within each supply region, exclusive of the volumes associated with the highest-priced 10% of all volumes for such type of contract and supply region.

(iv) The commodity cost benchmark component for all Other Supplies shall be computed by multiplying total natural gas volumes purchased for on-system requirements, exclusive of any volumes purchased by the Company on a firm, fixed price ("Firm Fixed Price") basis, by the Weighted Average Spot Cost of Gas ("WACOG"). The WACOG shall be developed by using Inside FERC Gas Market Report first-of-the-month indices and weighting the "Reliant Gas Transmission-East" and "Trunkline-Louisiana" indices by 60% and 40% respectively.

(v) A cumulative benchmark cost of gas shall be computed by summing the benchmark cost of gas for all months of the year or portion thereof.

D. Gas Supply Incentive Plan (Continued)

MISSOURI

PUBLIC SERVICE COMMISSION

i) A benchmark unit cost of gas shall be established for each month of the Company's ACA year which shall be set equal to the weighted average spot cost of gas, as defined in (ii) below, plus 3.2%.

ii) A weighted average spot cost of gas shall be developed by using Inside FERC Gas Market Report first-of-the-month indices and weighting the "NorAm Gas Transmission-East" and "Trunkline-Louisiana" indices by 60% and 40% respectively.

iii) A benchmark cost of gas shall be computed for each month of the ACA year by multiplying total natural gas purchase volumes for system supply by the benchmark unit cost calculated in (i) above.

(iv) A cumulative benchmark cost of gas shall be computed by summing the benchmark cost of gas for all of the months of the ACA year or portion thereof.

(v) At the end of each ACA year, the Company shall compare the cumulative benchmark cost of gas to the actual cumulative cost of purchased natural gas supplies for system supply purposes.

(vi) If the Company's cumulative actual cost of gas is greater than the cumulative benchmark cost of gas but less than or equal to 104% of the cumulative benchmark cost of gas, the IA Account is not affected and actual Procurement Costs are deemed to be prudent.

(vii) If the cumulative actual cost of gas is greater than 104% of the cumulative benchmark cost of gas but less than or equal to 110% of the cumulative benchmark cost of gas, the IA Account is credited and the IR Account is debited with 50% of the difference between the cumulative actual cost of gas and 104% of the cumulative benchmark cost of gas and actual Procurement Costs are deemed to be prudent.

6. Deferred Unaccounted For Adjustment For Gas Deliveries On
And After October 15, 1982 (continued).

OCT 15 1982

The maximum level of Unaccounted For gas which can be considered in such an entry will be the volume that represented 2.9% of sales and use by Company during the fiscal year. The amount of the entry will be determined by multiplying the volume of Unaccounted For natural gas (in excess of 2.5% but no greater than 2.9%) by the base price commodity charge paid by the Company to its supplier as stated in Paragraph A hereof. Unaccounted For natural gas volumes in excess of 2.9% will stay in the Company's Purchased Natural Gas Expense Account.

CANCELLED

DEC - 4 1984

RS 25
PUBLIC SERVICE COMMISSION
OF MISSOURI

The debit or credit to the Company's Deferred Purchased Gas Cost Account based on the prior fiscal year will be included in the determination of the annual Deferred Purchased Gas Cost Adjustment, which becomes effective in the billing month of May as described in Paragraph C-4 hereof.

Adjustment for gas delivered during the period after October 14, 1982, and through September 30, 1983, will be made as follows:

1. A pro-forma adjustment will be calculated for the entire fiscal year ending September 30, 1983, in accordance with the provisions set forth above.
2. The pro-forma adjustment for the entire fiscal year will be reduced to an amount applicable to the portion of the fiscal year after October 14, 1982, by multiplying said pro-forma adjustment by the ratio of (1) therm sales which occurred after October 14, 1982, to (2) total therm sales billed in the fiscal year.

D. At least ten days before applying any Purchased Gas Adjustment(s), the Company shall file with the Commission an Adjustment Statement showing (a) the computation of the amount of the annual increase or decrease in the cost of purchased gas, (b) the rate(s) per therm to be used in computing the Purchased Gas Adjustment applicable to customers' bills, and (c) the effective date of such adjustment(s). Also, as soon as available, certified copies of any orders applicable to the wholesale rate(s) charged the Company by its natural gas supplier(s), shall be filed with the Commission.

REC'D OCT 05 1999

SCHEDULE OF RATES

D. Gas Supply Incentive Plan, Effective October 1, 1999 (Continued)

(vi) At the end of each ACA year, the Company shall compare the cumulative benchmark cost defined above to actual cumulative costs for the Company's on-system requirements, excluding the commodity cost of Firm Fixed Price supplies.

(1) If the Company's cumulative actual cost is greater than the cumulative benchmark cost of gas but less than or equal to 104% of such cumulative benchmark cost of gas, the IA Account is not affected and such actual costs are deemed to be prudent.

(2) If the Company's cumulative actual cost is greater than 104% of the cumulative benchmark cost of gas but less than or equal to 110% of such cumulative benchmark cost of gas, the IA Account is credited and the IR Account is debited with 50% of the difference between such cumulative actual cost of gas and 104% of the benchmark cost of gas and such actual costs are deemed to be prudent.

(3) If the Company's cumulative actual cost is greater than 110% of the cumulative benchmark cost of gas, the IA Account is credited and the IR Account is debited with 50% of the maximum difference computed in (2) above and those costs in excess of 110% of the benchmark cost of gas shall be subject to a prudence review.

(4) If the Company's cumulative actual cost is less than the cumulative benchmark cost of gas, the IA Account is debited and the IR Account is credited with 50% of the difference, subject to the maximum described in (viii) below.

(vii) With respect to commodity costs for Firm Fixed Price gas supplies the Company shall retain a portion of certain savings it may realize by purchasing gas at prices below historical levels. Accordingly, for supplies that are purchased below a Fixed Target Price ("FTP"), the Company shall debit the IA Account and credit the IR Account for the following percentage share of any savings as defined in (vii)(2) below, subject to the maximum described in (viii) below:
