Important Notice (September Messaging) – Corp. Advtg. Measured Markets (MUC application)

Regional Bell Operating Companies (RBOCs) continue to adjust tariff rates in the markets they operate on a regular basis. This means tariff rates have continued to increase, but BullsEye has maintained its commitment to contain standard POTS price increases.

Effective with your next invoice, if you have a local measured plan, there will be an increase in the local usage rate of \$0.015 per minute. Corresponding with this will also be the introduction of a Monthly Usage Commitment (MUC) of \$4.99. If your local usage does not total the MUC of \$4.99 in a given month, a make-up to minimum for the shortfall (difference between the \$4.99 minimum and your actual billed usage) will be applied for that billing period. If your total local usage exceeds the \$4.99 MUC, no make-up charge will be applied for that billing period.

BullsEye Telecom values your business and as always, any discounting and terms outlined in your contract will continue to be honored. If you have any questions, please contact your Account Manager or Client Relationship Manager.
