MO. PSILLE PER PERMAN

2.1.2 Limitations

- A. For Enhanced Service Providers (ESPs), Access Services are not to be used as toll replacement. All calls, whether originating or terminating, will be limited to the local calling scope of the ESP's serving wire center as defined in the Telephone Company's local or general exchange tariffs. This limitation includes calls which:
 - Originate at an end user and terminate to an ESP.
 - Originate at an end user, route through the ESP and terminate to another end user.
 - Originate at an ESP and terminate to an end user.

Where Access Service features exist which limit the scope of the Access Service to a local calling area, as a condition of being provided Access Services, ESPs shall request these features on the same Order on which the associated Access Service is requested.

Also, as a condition of being provided Access Service, ESPs will be required to sign an agreement not to disclose the calling party's telephone number, except for services directly related to the call (e.g., call setup, routing of calls, billing and maintenance) unless permission is given by the calling party.

- B. Switched Access Services terminating at an IC terminal location will be (RT) billed only to the IC.
 - C. The use and restoration of services shall be in accordance with the Federal Communications Commission's Rules and Regulations which specify the priority system for such activities as set forth in Paragraph 10.7.1, C., following.
 - D. Directory listings will not be furnished as a part of the services provided under this Tariff. Directory listings will be provided at the rates and charges specified in the appropriate General Exchange Tariff for additional listings.

in this Tariff shall apply to such assignee or transferee. The assignment or transfer of services does not relieve or discharge the assignor or transferor from remaining jointly or severely liable with the assignee or transferee for any obligations existing at the time of the assignment or transfer.

- (CT) 2.2.2 Unlawful and Abusive Use
 - A. The services provided under this Tariff shall not be used for an unlawful purpose or used in an abusive manner.

Abusive use includes:

- 1. The use of the service of the Telephone Company for a call or calls, anonymous or otherwise, in a manner reasonably expected to frighten, abuse, torment, or harass another;
- 2. The use of the service in such a manner as to interface unreasonably with the use of the service by one or more other customers.
- B. The Telephone Company shall, upon written request from a customer, another exchange carrier or lawful authority, terminate service to any subscriber or customer identified as having utilized service provided under this Tariff in the completion of abusive or unlawful telephone calls. Service shall be terminated by the Telephone Company as provided for in its General Exchange Service Tariffs.
- C. In such instances when termination occurs, as in (B) preceding, the Telephone Company shall be indemnified, defended and held harmless by the customer or any other Exchange Carrier or party against any claim, loss or damage arising from the Telephone Company's actions in terminating such service, unless caused by the Telephone Company's negligence.
- 2.3 Obligations of the IC
 - 2.3.1 Damages

The IC shall reimburse the Telephone Company for damages to facilities of the Telephone Company utilized to provide services under this Tariff caused by the negligence or willful act of the IC or

The IC shall provide the Telephone Company timely not fight Service Commission following: planned or unplanned outages of the IC facilities which will affect the Telephone Company's capability to provide adequate service for anticipated traffic volumes; facility failures within the IC network which will adversely impact upon the Telephone Company's capability to provide adequate service for anticipated traffic volumes and IC marketing activities designed to generate rapid or short-term increases in anticipated traffic volumes. This timely notification will enable the Telephone Company to administer its network as set forth in Section 6, Paragraph 6.5.1, following.

2.3.13 Coordination with Respect to Network Contingencies

The IC shall, in cooperation with the Telephone Company, coordinate in planning the actions to be taken to maintain maximum network capability following natural or man-made disasters which affect tele-

communications services.

2.3.14 Determination of Intrastate Charges for Mixed Interstate and Intrastate Switched Access Service

(CP) When mixed interstate and intrastate Switched Access Service is provided, all charges (i.e., nonrecurring, monthly and usage) including optional feature charges, will be prorated between interstate and intrastate.
When the actual jurisdiction of usage is known, that actual apportionment will be the basis for prorating charges. When the actual jurisdictional data is not known, the perpentages provided in the reports in Paragraph 2.3.15A, following, will serve as the basis for prorating the charges. The percentage of an Access Serville to be charged as intrastate is derived in the following manner:

- Intrastate charges apply by all smees ges, that originate on the IC's network in Missouri and terminate at exemplone number in Missouri. A message originates on the IC's network when it first reaches any point of interconnection between the IC's facilities, either owned or leased, and the facilities of the Telephone Company.

For monthly and nonrecurring chargeable rate elements, multiply the percent intrastate use times the quantity of chargeste elements times the stated tariff rate per element.

MAY 20 1985

The IC shall provide the Telephone Company timely notification of the following: planned or unplanned outages of IC facilities which will affect the Telephone Company's capability to provide adequate service for anticipated traffic volumes; facility failures within the IC network which will adversely impact upon the Telephone Company's capability to provide adequate service for anticipated traffic volumes and IC marketing activities designed to generate rapid or short-term increases in anticipated traffic volumes. This timely notification will enable the Telephone Company to administer its network as set forth in Section 6, Paragraph 6.5.1, following.

2.3.13 Coordination with Respect to Network Contingencies

The IC shall, in cooperation with the Telephone Company, coordinate in planning the actions to be taken to maintain maximum network capability following natural or man-made disasters which effects communications services.

- 2.3.14 Jurisdictional Report Requirements
- A. Jurisdictional Reports
 - 1. When the IC orders service for both interstate and intrastate use, the projected interstate percentage of use and intrastate percentage of use must be provided to the Telephone Company. These percentages will be used by the Telephone Company to apportion the use and/or charges between interstate and intrastate until a revised report is received as set forth in Paragraph 2.3.14, A.2., following.
 - 2. Effective on the first of January, April, July and October of each year the IC shall update the interstate and intrastate jurisdictional report. The IC shall forward to the Telephone Company, to be received no later than 15 days after the first of each such month, a revised report showing the interstate and intrastate percentage of use for the past three months ending the last day of December, March, June and September, respectively, for each service arranged for interstate and intrastate use. The revised report will serve as the basis for the next three months' billing and will be effective on the bill date for that service. No prorating or back billing will be done based on the report. If the IC does not supply the reports, the Telephone Company will assume the percentages to be the same as those provided in the last quarterly report. For those cases in which a quarterly report has never been received from the IC, the Telephone Company will assume the percentages to be the same as those provided in the order for service as set forth in Public Service Con marion Paragraph 2.3.14, A.1., preceding.

 - 2.3.14 Jurisdictional Report Requirements-(Continued)
 - B. Maintenance of IC Records

The IC shall maintain and retain for a minimum of one year, complete, detailed and accurate records, workpapers and backup documentation in form and substance to evidence the percentage data provided to the Telephone Company as set forth in Paragraph 2.3.14, A.1. and 2., preceding. All of the records, workpapers and backup documentation shall be made available during normal business hours, at the location named in the report, upon reasonable request by the Telephone Company in order to permit a review by a Telephone Company auditor, an outside auditor under contract to the Telephone Company, or an auditor of a federal or state regulatory commission. If the records, workpapers and backup documentation are not provided or are insufficient or not in accordance with the provisions of this Paragraph, the percentages of interstate and intrastate service will be assumed by the Telephone Company to be the same as indicated in the last report received until the deficiencies are corrected and new reports, as required herein, are provided to the Telephone Company.

2.3.15 Determination of Intrastate Charges for Mixed Interstate and Intrastate Switched Access Service

When mixed interstate and intrastate Switched Access Service is provided, all charges (i.e., nonrecurring, monthly and usage) including optional features charges, will be prorated between interstate and intrastate. The percentages provided in the reports in Paragraph 2.3.14, A., preceding, will serve as the basis for prorating the charges. The percentage of an Access Service to be charged as intrastate is derived in the following manner:

- For monthly and nonrecurring chargeable rate elements, multiply the percent intrastate use times the quantity MAY 20 1985 of chargeable elements times the stated tariff rate per 15 15

- For usage-sensitive (i.e., access minutes and calls) chargeable rate elements, multiply the percent intra- or mission state use times actual use (i.e., measured or Telephone Company-assumed average use) times the stated tariff rate ()

MISSOURI Public Service Commission

(MT)(FC)B. Jurisdictional Reports-(Continued)

1. (Continued)

jurisdictional usage is unknown, will be used by the Telephone Company to apportion the use and/or charges between interstate and intrastate until a revised report is received as set forth in Paragraph 2.3.13., B.2.,

- (FC) following.
- (AT) When a customer orders FGD or BSA-D with 950 Access, the customer shall state in the order the projected Percent Interstate Usage (PIU) factor for each end office or LATA from which the customer may originate traffic. If a LATA-level PIU factor is provided by the customer, the percentage will be applied to all end offices from which the customer may originate traffic within the LATA and to those end offices for which an end office-(MT) level PIU is not provided.

(AT) If the customer adds to or reduces the FGD or BSA-D With 950 Access Service, it shall provide a revised projected Percent Interstate Usage factor for the overall services provided. The revised report will serve as the basis for future billing and will be effective on the next bill date. No prorating or backbilling will be done based on the revised

(TA) report. Where the FGD or BSA-D With 950 Access PIU factor is not (C)

available for the embedded base of customers when this tariff goes into effect the Telephone Company will determine the PIU factor to be 50

(AT) percent for originating FGD or BSA-D With 950 Access usage.

> The Telephone Company will determine the projected intrastate percentage by subtracting the projected interstate percentage for originating access minutes from 100 (100 - projected interstate percentage = intrastate percentage).

Public Service Commission

A. Jurisdictional Reports-(Continued)

If the customer adds to or reduces the FGD with 950 Access Service, it shall provide a revised projected Percent Interstate Usage factor for the overall services provided. The revised report will serve as the basis for future billing and will be effective on the next bill date. No prorating or backbilling will be done based on the revised report. Where the FGD with 950 Access PIU factor is not available for the embedded based of customers when this tariff goes into effect the Telephone Company will determine the PIU factor to be 50 percent for originating FGD with 950 Access usage.

The Telephone Company will determine the projected intrastate percentage by substracting the projected interstate percentage for originating access minutes from 100 (100 - projected interstate percentage = intrastate percentage).

Access Services Tariff Section 2 Original Sheet 15.04

ACCESS SERVICES

GENERAL REGULATIONS-(Continued)

RECEIVED

2.3 Obligations of the IC-(Continued)

- JUN 03 1994
- 2.3.13 Jurisdictional Report Requirements-(Continued)
- MISSOURI **Public Service Commission**

- A. General-(Continued)
 - 2. Terminating FGC, FGD, BSA-C, BSA-D-(Continued)

projected interstate percentage. The projected interstate percentage will be developed on a monthly basis, by end office, when the Switched Access Service access minutes (FGD, FGD, BSA-C and BSA-D) are measured by dividing the measured interstate terminating access minutes (the access minutes where the calling number is in one state and the called number is in another state) by the total terminating access minutes.

For FGC, FGD, BSA-C and BSA-D Switched Access Services where call details are insufficient to determine jurisdiction, the customer will provide an interstate percentage of FGC, FGD, BSA-C or BSA-D terminating access minutes for each end office or LATA from which the customer may terminate traffic. If a LATA-level PIU factor is provided by the customer, the specified percentage will be applied to all end offices to which the customer may terminate traffic within the LATA or to those end offices for which an end office-level PIU is not provided.

If the customer does not provide the Telephone Company with PIU factors for their terminating FGC, FGD, BSA-C or BSA-D traffic, the Telephone Company will develop a PIU factor for such terminating access minutes utilizing the data used to develop the PIU for the originating access minutes. The Telephone Company developed percentage will be based on the average of the customer's originating FGC, FGD, BSA-C and/or BSA-D usage.

If the customer has no originating traffic within the end office for which sufficient call detail exists to develop an interstate percentage, the Telephone Company will designate a PIU factor of 50% for FGC, FGD, BSA-C or BSA-D terminating access minutes.

Dedicated Network Access Link (DNAL) BSA

Upon ordering Switched Access DNAL BSA, the customer will approvide interstate percentage of use for each DNAL BSA requested.
