Issue Date: February 2, 2010

Effective Date: February 12, 2010

On January 14, 2010, the Staff of the Missouri Public Service Commission filed a motion requesting that the Commission cancel Transworld Network, Corp.'s certificate of service authority to provide intrastate interexchange telecommunications services in the state of Missouri. In File No. TO-2000-352, the Commission recognized the name change of London Telecom Network, Corp., a certificated interexchange service provider in Missouri, to TransWorld Network, Corp. and approved TransWorld's interexchange tariff, M.P.S.C. No. 1.

Staff states in its motion that Transworld contacted Staff and requested that its certificate of service authority and tariff be canceled. Staff recommends that the Commission cancel the company's certificate of service authority to provide intrastate interexchange telecommunications services.

On January 19, 2010, the Commission issued an Order Directing Notice allowing any parties to file an objection or request a hearing to do so no later than January 29, 2010. No objections or requests for a hearing were filed.

The Commission has the authority to cancel a certificate and tariff pursuant to Section 392.410.5, RSMo, which states, in part, “[a]ny certificate or service authority may

be altered or modified by the commission after notice and hearing, upon its own motion or upon application of the person or company affected.”

Based on Staff’s motion, the Commission finds that the certificate of service authority granted to Transworld Network, Corp., shall be canceled. The Commission will also cancel Transworld’s tariff.

THE COMMISSION ORDERS THAT:

1. The authority to provide intrastate interexchange telecommunications services granted to Transworld Network, Corp., in File No. TO-2000-352, is canceled.
2. Transworld Network, Corp.’s tariff, M.P.S.C. No. 1 (Tariff No. JX-2003-0127), is canceled.
3. This order shall become effective on February 12, 2010.
4. This case may be closed on February 13, 2010.

TARIFF FORMAT

REC'D DEC 01 1999

- A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the PSC. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of various suspension periods, deferrals, etc. the PSC follows in their tariff approval process, the most current page number on file with the Commission is not always the tariff page in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

2.
2.1.
2.1.1.
2.1.1.A.
2.1.1.A.1.
2.1.1.A.1.(a).
2.1.1.A.1.(a).I.

REC'D DEC 01 1999

3.7 Operator Services (Cont'd.)

3.7.3 Operator services to privately owned payphones.

3.8 Timing of Calls

The customer's long distance usage charge is based on the actual usage of TransWorld Network's network. Usage begins when the called party picks up the receiver. When the called party picks up is determined by hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. A call is terminated when either party hangs up.

3.9 Calculation of Distance

Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.

The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate center involved. The Company uses the rate centers and associated vertical and horizontal coordinates that are produced by Bell Communications Research in their NPA-NXX V & H Coordinates Tape and Bell's NECA Tariff No. 4.

FORMULA:

$$\sqrt{\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}}$$

EXAMPLE: Distance between Miami and New York City -

	V	H

Square and add: $11,249,316 + 772,641 = 12,021,957$

Divide by 10 and round: $12,021,957 / 10 = 1,202,195.70$
