14.4 Optional Calling Features (continued)

MAR 27 2000

14.4.1 Feature Descriptions (continued)

MO. PUBLIC SERVICE COMM

- M. Multiple Directory Number Distinctive Ringing** - This feature allows an end user to determine the source of an incoming call from a distinctive ring. The end user may have up to three additional numbers assigned to a single line (i.e. Distinctive Ringing - First Number and Distinctive Ringing - Second Number). The designated primary number will receive a normal ringing pattern, other numbers will receive distinctive ringing patterns. The pattern is based on the telephone number that the calling party dials.
- N. Selective Call Forwarding** permits the end-user to automatically forward to another number calls received from up to twelve end-user pre-selected telephone numbers programmed into the features screening list. The end-user controls when the feature is active, the forward-to number and can add or remove calling numbers from the feature's screening list.
- O. Auto Redial** permits the end-user to have calls automatically re-dialed when the first attempt reaches a busy number. The line is checked every 45 seconds for up to 30 minutes and alerts the Customer with a distinctive ringing pattern when the busy number and the Customer's line are free. The Customer can continue to make and receive calls while the feature is activated. The following types of calls cannot be reached using Repeat Dialing:

- calls to 800 service numbers
- calls to 900 service numbers
- calls preceded by an interexchange carrier access code
- International Direct Distance Dialed calls
- calls to Directory Assistance calls to 911

MO. PUBLIC SERVICE COMMI

- P. Simultaneous Call Forwarding** allows you to call forward multiple calls simultaneously.
- Q. Speed Calling** permits the Customer to place calls to other telephone numbers by dialing a one or two digit code rather than the complete telephone number. Code lists may include local and toll telephone numbers. The Customer has the ability to add telephone numbers to or remove them from the a speed calling list without the Company's help.
- R. Three-Way Calling** permits the end-user to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The end-user initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming.

SECTION 14.0 - DESCRIPTION OF LOCAL EXCHANGE SERVICES (Continued)

14.4 Optional Calling Features (Continued)

14.4.1 Feature Descriptions (Continued)

- S. **Optional Calling Four Features Package** permits a Business UNE-P or Ionex Facilities-Based Customer to purchase the following four optional calling features at a discounted bundled rate: Call Forwarding, Remote Access to Call Forwarding, Three-Way Calling and Call Blocker.

- T. **Optional Calling Nine Features Package** permits a Business UNE-P or Facilities-Based Customer to purchase the following nine optional calling features at a discounted bundled rate: Caller ID Name, Caller ID Number, Call Forwarding, Remote Access to Call Forwarding, Three-Way Calling, Call Blocker, Auto Redial, Speed Call 30 and Priority Call.

- U. **Ionex Call Transfer Disconnect** is a Service that allows Business Customers to initiate a three-way call with either an incoming or originated call and then disconnect, leaving the two remaining Parties connected. The Customer can activate Ionex Call Transfer Disconnect, regardless of who originated the call. The Customer flashes the switch hook while the Called Party is on the line, causing the Called Party to be split from the connection and placed on hold while dial tone is returned to the Customer. Next the Customer dials the Third Party, hearing the progress tones (which cannot be heard by the original Called Party). After the Customer dials the Third Party, the Customer initiates the call transfer by either disconnecting fully from the call, waiting until the Third Party answers, and talking to the Third Party while keeping the original Called Party on hold, or creating a three-way call by hanging up, leaving the other two parties connected. After the Customer initiates the transfer and disconnects from the call, the Customer's line is released from the call and the Customer is able to originate or receive calls. The two remaining parties remain connected on the call.

Call Transfer Disconnect not available with Metro Lines, 3-Way Calling, Speed Dial 8 or Speed Call 30.

- V. **Reserved For Future Use.**

SECTION 14.0 - DESCRIPTION OF LOCAL EXCHANGE SERVICES (Continued)

14.5 ISDN SERVICES Service Commission

14.5.1 General*

(T)

A. **Integrated Services Digital Network (ISDN)** is a digital architecture that provides an integrated voice and data capability to the Customer premises, using the public switched network. ISDN distributes voice, data, video, image and facsimile by using either a Basic Rate Interface (BRI) or a Primary Rate Interface (PRI). These serving arrangements conform to international standards adopted by the International Telecommunications Union.

B. **Definitions Peculiar to ISDN**

Basic Rate Interface (BRI) consists of one or two B (Bearer) channels and one D (Data) channel on one pair of wires. BRI is offered as ISDN Service.

B Channel is a facility that carries circuit-switched voice or data communications at speeds up to 64 kbps, from the Customer premise, over the loop facility, to the central office.

B Channel Circuit Switched Data provides the capability of making data calls over the public switched network. Information is transmitted the same way as digitized voice. Like a voice call, a circuit-switched data call ties up network resources for the duration of the call. Calling Line ID is provided.

D Channel carries signaling and packet data information, at speeds up to 16 k/bits on BRI, and signaling-only information up to 64 k/bits for Primary Rate Interface, from the Customer's premises to the central office. The D-channel has both data and signaling functions but it does not have voice capability.

*ISDN Services are available where facilities exist.

SECTION 14.0 - DESCRIPTION OF LOCAL EXCHANGE SERVICES (continued)

RECEIVED

14.5 ISDN SERVICES (continued)

MAR 27 2000

14.5.3 Basic Rate Interface Offerings

MO. PUBLIC SERVICE COMMISSION

A. Single Line ISDN Service

Single Line ISDN Service is compatible with national ISDN and includes circuit-switched voice, circuit-switched data and packet function. Rates are offered for data applications and for home office or small business use. The minimum service period is one month.

B. Standard Features

Both voice and data features are offered. Because of CPE, some of the features offered may function differently, may not be available or may be required to be offered via an access code. The standard features and functions are as follows:

- 2B+D channels on U interface
- 56/64/112/128 Kbps Dialed Data
- Simultaneous Voice and Data Calling
- Touchtone Pass-Through
- Separate Signaling Channel

C. Optional Features

Service Commission

1. CSV/CSD

Single Line ISDN may be equipped for Circuit Switched Voice/Circuit Switched Data (CSV/CSD) on one or both the B Channels to enable the Customer to access the Public Switched Telephone Network. CSV/CSD monthly recurring charges apply on a per channel basis, in addition to usage charges.

2. Packet Switching

The B Channels may be equipped for permanent or demand-based packet switching. In addition, the D Channel may be equipped for packet switching. The Customer will be responsible for charges to their packet directory. Packet switching monthly recurring charges apply on a per channel basis.

3. Calling Features

Certain calling features are available to BRI ISDN Customers with one or more B channels equipped for CSV/CSD. Features listed in Section 6.4.2 of this tariff may be ordered in conjunction with ISDN Service, where available and compatible with the characteristics of the Service.

(T)

4. Link Extensions

Single Line ISDN service may be offered to Customers not served by a compatible ISDN office through link extensions. Link extension facilities and equipment charges apply. In addition, the Customer is responsible for all charges imposed by another Local Exchange Company providing any part of the service per the Special Construction provisions of this tariff.

14.5.4 Primary Rate Interface

A. General

The Primary Rate Interface (PRI) structure consists of 23 B Channels and one D Channel, for a total transmission rate of 1.544 Mbps, the equivalent of one DS1 line. Each 64 Kbps B Channel carries User information such as voice calls, circuit switched data or video. The D Channel is a 64 Kbps channel used for signaling information.

Circuit Switched Data PRI consists of 23 B plus one D Channel, also equivalent to a DS1 line. The Customer may use CPE to bond 64 Kbps B Channels for transmission of circuit switched data or video.

Each PRI consists of a DS1 line and a PRS Service Configuration described below. Loop Diversity and avoidance, and Foreign Exchange Services are available under the Special Construction Provisions of this tariff.

DID may be provided with PRI. A DID trunk termination is required for each inward or two-way B Channel in a PRI.

PRI Service is not available for use in conjunction with internet service provider (ISP) modems or with auto-dialer equipment.

14.5.4 Primary Rate Interface (continued)

MO. PUBLIC SERVICE COMMISSION

C. Network Connections

Circuit Switched Data Connection is a central office translation that provides 23 or 24 B channels on a PRI T1 facility. All B channels are arranged for two-way operation and access to the exchange network. Incoming calls are restricted to circuit switched data or video.

ISDN Trunk Connection is a central office translation that provides a B channel on a PRI. The connection allows access to the exchange network. One ISDN trunk connection is required for each B channel used in a PRS. Trunk connections may be configured on a call-by-call or dedicated basis. Call-by-call consists of B channels configured for inward and outward calls pre-determined by the Customer's traffic. Dedicated means that each B channel is dedicated for inward, outward or two-way traffic.

D. Standard Features

Circuit Switched Data allows the transmission of circuit switched data on a voice channel.

Direct Inward/Outward Dialing allows the station users to place or receive calls bypassing the attendant.

REC'D JUN 13 2002
Service Commission

See Section 16.6.3 for prices and optional features available.

14.6.4 Private Line Services

Channels are classified by series, and further classified within each series by types. The various series and types are described in terms of circuit characteristic and/or use.

The Customer is responsible for the selection of the Service, i.e., type of circuit, signaling options, jacks and terminating interfaces required to meet his/her needs. The Customer-provided terminal equipment and station apparatus must be compatible with the Service provided by the Company. The Company has overall responsibility for the Private Line Service (up to the demarcation point on the Customer premises) including the selection of all local channels. The channel termination provides for termination at the demarcation point and does not provide for inside wiring beyond this demarcation point.

(N)

Exchange rates and regulations apply for the exchange portion of the total Service when Private Line Services are used in connection with Exchange Services, or are connected to Exchange Services or equipment.

14.6.4.A.1 Special Signaling Services - Series 100

Service Commission

These channels are suitable for use with two-point or multi-point Service subject to the number of point limitations indicated for each type and are provided solely for use with Customer-provided power and signaling equipment and other special signaling Services. Those local channels used to provide a transmission path to connect with Customer-provided station equipment (CPE) at a premises are defined in terms of electrical interfaces.

Special Signaling Services are available as follows:

14.6.4.A.1(a) Type 101 - Transmission Characteristics:

(N)

Type 101 Service is furnished on an intraexchange two or three-point basis only.

Type 101 Service has a two-wire interface with two-wire facilities for use with direct current transmission (metallic continuity). Customers may order two, two-wire Services to achieve four-wire Service. Transmission specifications and limitations are described in the Telcordia Technical Reference on the transmission specification for private line metallic circuits which includes the following:

Current applied by CPE - AC and DC components per conductor, not to exceed .150 amperes rms. Magnitude of the peak of the voltage between any conductor and ground - not to exceed 70.7 volts except continuous DC voltage not to exceed 135 volts.

14.6.4.A.2 Sub-Voice Grade Service - Series 200

Service Commission

Series 200 channels are furnished for teletypewriter, data, supervisory control and miscellaneous signaling use.

Sub-Voice Grade Service provides, and is designed for, transmission of low speed data at rates up to 75, and up to 150, baud within certain technical specifications. These channels are furnished for half-duplex and duplex operation. The Service is not suitable for the transmission of alternating current tones.

The types of local channels and the transmission characteristics offered for termination at a premises for termination in Customer-provided terminal equipment and systems are as follows:

(N)

14.6.6.A.2.(a) Type 250

An interface engineered for binary signals at rates up to 75 baud, 20 +/- 1 or 62.5 +/-2.5 milli-amperes neutral signals. The Company has the option of providing 20 or 62.5 milliamps and will notify the Customer of the current level applied.

The maximum open circuit voltage across the send data leads at the interface will not exceed 270 volts.

The terminal equipment shall deliver no more than 8% telegraph distortion and shall be capable of processing received data signals with up to 35% telegraph distortion.

SECTION 14.0 - DESCRIPTION OF LOCAL EXCHANGE SERVICES (Continued)

REC'D JUN 13 2002

14.6.4 Private Line Services (Continued)

14.6.4.A Description of Services (Continued) Service Commission

Basic Parameters and Specifications for Sub-Voice Grade Local Channels used with Customer-provided station equipment (CPE).

Channel Signals: Local channels used with CPE. Note that the specifications of Channel Signals refer to the requirement of the total Service offering and not the individual local channel.

Channel Distortion: Local channels used with CPE. Note that the specifications for Channel Distortion refer to the requirement of the total Service offering and not the individual local channel.

Power Requirement: For up to 75-baud type - where the Company provides transmission equipment at the interface. Customer must provide a source of continuous 117 volt, 60 Hz AC power by means of a non-switched outlet. For up to 150 baud - Customer must in all cases provide a source of continuous 117 volt, 60 Hz AC power, non-switched outlet. The Company will in all cases supply all voltage and current adjustments to the local channel.

(N)

14.6.6.A.3 Voice Grade Service - Series 300

Series 300

Series 300 local channels for voice grade Service are furnished for half-duplex (voice or data use) and duplex (data use) operations for oral communications, and data communications that operate within certain technical specifications. Unless expressly provided for elsewhere, these are the only channels provided for voice grade transmission. The various types of local channels which are offered for termination in terminal equipment and systems provided on a Customer, Authorized or Joint User premises are as follows:

14.6.6.A.4 Voice Grade Service - Series 400 (Continued)

REC'D JUN 13 2002

14.6.6A.4.(b) Type 428

Service Commission

A two-wire interface with effective two-wire facilities engineered for a 1000 Hz net loss of VNL +4 dB. Normally suitable for use as a main or extension station of a premises PBX (or similar) Switching System. Additional signaling arrangements may be required.

14.6.6A.4.(c) Foreign Exchange

(N)

Foreign Exchange is offered when an End User requests a telephone number from a different Central Office, and exchange, located within the same Local Access and Transport Area (LATA). The Service enables both inbound and outbound calling. To configure this type of service arrangement, a circuit must be designed. The type of circuit required for such a request is referred to as a 'telephone number' circuit. Foreign Exchange Service provides a telephone number and signaling from an exchange other than the exchange normally serving the Customer's location.

Bridging Charges per channel bridged apply when three or more voice grade channels connect at the same location.

Customers must insure that neither direct transmitted signal nor reflected signal energy is allowed to violate interconnection protection criteria and regulations as set forth in the Provision of Equipment and Facilities Section 2.8 of this tariff.

RECEIVED

14.7 Directory Assistance and Listing Services

MAR 27 2000

14.7.1 Directory Assistance

MO. PUBLIC SERVICE COMMISSION

Provides for identification of telephone directory numbers, via an operator or automated platform.

14.7.2 Directory Listing Services

For each Customer of Company-provided exchange service, the Company shall list the Customer's main billing telephone number in the directory published by the dominant local exchange carrier in the area at no additional charge. At a Customer's option, the Company will arrange for additional listings for an additional charge.

A standard listing includes a name, designation, address and telephone number of the Customer. It appears in the white pages of the telephone directory and in the Company's directory assistance records. Only information necessary to identify the Customer is included in these listings. The Company may use abbreviations in listings. The Company may reject a listing it judges to be objectionable. A name made up by adding a term such as company, shop, agency, works, etc. to the name of a commodity or service will not be accepted as a listing unless the Customer is legally doing business under that name.

A name may be repeated in the white pages only when only when a different address or telephone number is used.

14.8 Operator Services

Provides for live or automated operator treatment when a Customer dials "O." Operator services can be used to help the Customer route or bill a call. Billing options include, but are not limited to, bill to originating telephone number, calling card, collect or to a third party.

14.8.1 Operator Service Requirements

- A. Company will not bill for incomplete calls where answer supervision is available. Company will not bill for incomplete calls and will remove any charges for incomplete calls upon (i) subscriber notification or (ii) Company's knowledge.
- B. The caller and billed party, if different from the caller, will be advised that Company is the operator service provider at the time of the initial contact.
- C. Rate quotes will be given upon request, at no charge, including all rate components and any additional charges.
- D. Only tariffed rates approved by this Commission for Company shall appear on any local exchange telephone company (LEC) billings.
- E. Company shall be listed on the LEC billing if the LEC has multi-company billing ability.
- F. Company will employ reasonable calling card verification procedures, acceptable to the telephone company issuing the calling card.
- G. Company will route all 0- or 00- emergency calls in the quickest possible manner to the appropriate local emergency service provider, at no charge.

14.8 Operator Services (continued)

MO. PUBLIC SERVICE COMMISSION

14.8.2 Operator Service Call Types (continued)

D. Person-to-Person rates apply in addition to local usage charges for calls placed with the assistance of a Company operator to a particular party at the destination number. This charge applies regardless of billing method, including but not limited to billing to the originating line, a calling card, commercial credit card, collect, by deposit of coins in pay telephones, or to a third party. Charges do not apply unless the specified party or an acceptable substitute is available.

14.9 Presubscription Services

Carrier presubscription is a procedure where a Customer designates the carrier which the Customer wants to use for intraLATA and interLATA toll calls, where available. Such calls are automatically directed to the designated carrier without the need to dial carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an intraLATA or interLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on per-call basis.

14.9.1 Presubscription Options - Customers may select the same carrier or separate carriers for intraLATA and interLATA long distance. The following options for long distance presubscription are offered where available. Availability may be limited based on the capabilities of the Customer's serving central office:

Option A: Customer selects the Company as the presubscribed carrier for IntraLATA and InterLATA toll calls subject to presubscription.

Option B: Customer may select the Company as the presubscribed carrier for IntraLATA calls subject to presubscription and some other carrier as the presubscribed carrier for interLATA toll calls subject to presubscription.

Option C: Customer may select a carrier other than the Company for intraLATA toll calls subject to presubscription and the Company for interLATA toll calls subject to presubscription.

MO. PUBLIC SERVICE COMM

14.9.1 Presubscription Options (continued)

Option D: Customer may select a carrier other than the Company for both intraLATA and interLATA toll calls subject to presubscription.

Option E: Customer may select two different carriers, neither being the Company for intraLATA and interLATA toll calls. One carrier to be the Customers' primary intraLATA interexchange carrier. The other carrier to be the Customer's primary interLATA interexchange carrier.

Option F: Customer may select no presubscribed carrier for intraLATA toll calls, which will require the Customer to dial a carrier access code to route all calls to the carrier of choice for each call.

14.9.2 Rules and Regulations

Customers will retain their primary interexchange carrier until they request that their dialing arrangements be changed.

Customers may select either Options A, B, C, D or E for intraLATA presubscription. Option F allows the Customer to decline to choose an intraLATA carrier.

Customers may change their selected option or presubscribed toll carrier at any time subject to charges specified in Section 15.1.

14.9.3 Presubscription Procedures

A new Customer will be asked to select intraLATA and interLATA toll carriers at the time the Customer places an order for local exchange service. The Company will process the Customer's order for service. All new Customer's initial requests for intraLATA toll service presubscription will be provided free of charge.

Public Service Commission

SECTION 14.0 - DESCRIPTION OF LOCAL EXCHANGE SERVICES (Continued)

14.9 Presubscription Services (Continued)

14.9.3 Presubscription Procedures (Continued)

If a new Customer is unable to select at the time it places an order for local exchange service, the Company will direct the Customer to the local telephone directory to select a carrier. Until the Customer informs the Company of its choice of primary toll carrier, the Customer will not have access to long distance services on a basis, and will be required to dial a carrier access code to route all toll calls.

14.10 Miscellaneous Services

14.10.1 900/976 Call Restriction

This service provides the option of blocking, or subsequent unblocking, all 900 and 976 calls on a per line basis. The Company will provide for per-line blocking where the Company's switching facilities permit.

14.10.2 Hunting Line Service

This service is used to establish hunting arrangements between two or more of a customer's local exchange service access lines. Customers may choose from one of the following hunt group arrangements:

Series Hunting - The hunt for an idle access line starts with the called access line in a prearranged hunt group and ends with the last access line in the hunt group, completing the call to the first idle access line encountered. Unless the first access line in the hunt group is called, only a portion of the access line group is hunted.

Circle Hunting - Permits a complete hunt over all the access lines in a prearranged access line hunt group. If no idle access line is encountered the hunting will continue until it reaches the access line that was originally called.

14.9.3 Presubscription Procedures (continued)

MO. PUBLIC SERVICE COMMISSION

If a new Customer is unable to select at the time it places an order for local exchange service, the Company will direct the Customer to the local telephone directory to select a carrier. Until the Customer informs the Company of its choice of primary toll carrier, the Customer will not have access to long distance services on a presubscribed basis, and will be required to dial a carrier access code to route all toll calls.

14.10 Miscellaneous Services

14.10.1 900/976 Restrict

This service provides the option of blocking, or subsequent unblocking, all 900 and 976 calls on a per line basis. The Company will provide for per-line blocking where the Company's switching facilities permit.

14.10.2 Hunting Line Service

This service is used to establish hunting arrangements between two or more of a customer's local exchange service access lines. Customers may choose from one of the following hunt group arrangements:

Series Hunting - The hunt for an idle access line starts with the called access line in a prearranged hunt group and ends with the last access line in the hunt group, completing the call to the first idle access line encountered. Unless the first access line in the hunt group is called, only a portion of the access line group is hunted.

Circle Hunting - Permits a complete hunt over all the access lines in a prearranged access line hunt group. If no idle access line is encountered the hunting will continue until it reaches the access line that was originally called.

SECTION 15.0 - SERVICE CHARGES AND SURCHARGES

15.1 Service Order, Change Charges and Conversion Charges

All Services offered in this tariff are subject to Service Order and Change Charges when the Customer requests new Services or changes in existing Services. Nonrecurring Charges apply to the following: processing Service Orders for new Service, changes to the Customer's Primary Interexchange Carrier (PIC) Code, Conversion Charges and Expedited Service Requests.

	<u>Service Order NonRecurring Charges</u>	
PIC Change, per Primary Line, Trunk or Port	\$5.00	
Change Charges*	ICB	
<i>*Charges vary depending on Custom Arrangement requested by the Customer</i>		
Service Order Charge for Install/Change of Directory Listings and PAV Codes	\$10.00	
Basic Feature Setup Charge	\$15.65	(N)(I)
Service Order Charge – Basic or Complex Lines/Features	\$30.00	
Basic Line Connection Charge for New Installations (per Line)	\$30.00	
***Complex Line Connection Charge for New Installations (per Line) Existing NRC		(T)
Complex Feature Installation Charge (per Feature)	Existing NRC	
Complex Feature Change (Analog Trunk, Telebranch, Market Expansion Line, BRI, Centrex)	\$5.00	
Complex Feature Change Charge (PRI, T-1 Trunks, Private Lines)	\$50.00	(T)

**Basic Lines are Business Local Exchange Lines served with dial tone;
 ***Complex Lines are Trunks, ISDN, Centrex, Telebranch, Market Expansion Lines, and Private Lines;
 1) Service Order Charge applies on all requests. For multiple request types, only the highest Service Order Charge is applied. There are unlimited moves, adds or changes allowed per Service Order Charge.
 2) Line Connection Charge applies per new line installed and is in addition to Service Order Charge.
 3) Complex Features Change Charge is per feature and is applied in addition to Service Order Charge.

5.2 Maintenance Visit Charges

Maintenance visit charges apply when the Company dispatches personnel to a Customer's premises to perform work necessary for installing new service, making changes in service or resolving troubles reported by the Customer when the trouble is found to be caused by the Customer's facilities.

Maintenance visit charges will be credited to the Customer's account in the event trouble is not found in the Company facilities, but the trouble is later determined to be in those facilities.

The time period for which the maintenance visit charges is applied will commence when Company personnel are dispatched at the Customer premises and end when work is completed. The rates for maintenance of service vary by time per Customer request.

In addition to the maintenance of service charge, the customer shall be responsible for the payment of all time and materials charges incurred during the repair visit.

MO. PUBLIC SERVICE COMMISSION

In addition to the charges listed in Section 15 of this tariff the Customer is responsible for nonrecurring and monthly recurring charges.

Recurring charges for standard local service are billed monthly in advance. Nonrecurring charges for installation or rearrangement of service are billed on the next month's bill immediately following work performed by the Company. The applicable local exchange is described in Section 13 of this tariff.

16.1 Standard Local Service (continued)

16.1.B OPTIONAL 2-WAY EXPANDED SERVICES (OES)

REC'D FEB 27 2001
(T)

Optional 2-Way Expanded Service (OES) is an optional service in selected exchanges which provides subscribers with optional local calling areas including the respective Metropolitan Calling Exchange including certain customers in other exchanges as a local call for a flat additional fee per month. See Section 13.2 for detailed calling area(s).

Monthly (OES) rates apply in the exchanges listed below. (Notes: 1,2)

Exchange	Existing Business Subscribers (as of 3/28/01)	New Ionex Standard Business Subscribers (on or after 3/29/01)	New Ionex Elite Business Subscribers (on or after 3/29/01)

SECTION 16.0 - LOCAL SERVICES PRICE LIST

Missouri Public Service Commission

REC'D FEB 27 2001

16.1 Standard Local Service (continued)

16.1.C OPTIONAL 1-WAY TOLL SAVER

(T)

Optional 1-Way Toll Saver is an optional 1-way outbound service offered for a monthly flat rate charge in addition to the regular flat rate line fee enabling subscribers to place calls within their LATA to other customers in exchanges within the Toll Saver calling scope. The Toll Saver calling scope includes all customers within the same LATA as the originating subscriber for no additional fee. The Kansas portion of the SWBT Kansas City Metropolitan exchange is included in the Kansas City LATA Optional 1-Way Toll Saver dialing scope.

(T)

Monthly rates apply in the exchanges listed below. (Notes: 1,2)

Exchange	Existing Business Subscribers (as of 3/28/01)	New Ionex Standard Business Subscribers (on or after 3/29/01)	New Ionex Elite Business Subscribers (on or after 3/29/01)
1-Way Toll Saver A		54.00	48.00
1-Way Toll Saver (with Optional 2-Way Expanded Service)		36.00	32.00

Note 1: All Optional Calling Services are additional and not included in flat line prices; No term contract discounts on Optional Calling Services apply.

Note 2: Optional 1-Way Toll Saver is available within the same LATA as the service subscribing line. The Optional 1-Way Toll Saver dialing scope includes all customers in all exchanges. Service will not be offered to local exchange customers being served by a switch located in another state. The service is available to single/multi-line flat rate subscribers. If one line in a hunting arrangement subscribes to Toll Saver, all other lines in the arrangement must subscribe.

SECTION 16.0 - LOCAL SERVICES PRICE LIST (Continued)

16.3 Direct Inward Dialing (DID) Service*

DID permits calls incoming to a PBX system or other CPE to be routed to a specific station without the assistance of an attendant. DID calls are routed directly to the station associated with the called number. DID Service as offered by the Company provides the necessary trunks, telephone numbers, and out-pulsing of digits to enable DID service at a Customer's location. DID Service requires special PBX software and hardware not provided by the Company. Such hardware and software is the Customer's responsibility.

The following charges apply to Customers subscribing to DID Service provided by the Company. These charges are in addition to recurring and nonrecurring charges for PBX Trunks as shown in Section 16.2. Each arrangement provides two-way transmission for a capacity on 24-line termination.

Category 1 (100 DID Numbers or Less)

Per Trunk Group	Monthly Rate	Installation Charge
First Block of 100 DID numbers assigned	\$22.50	\$153.45
First Block of 10 DID numbers assigned	\$4.50	\$153.45
Each additional block of 10 DID numbers assigned over the first block of 10 DID numbers	\$4.50	\$13.95

Category 2 (Greater than 100 DID Numbers)

Per Trunk Group	Monthly Rate	Installation Charge
Each additional block of 100 DID numbers assigned over the first 100 DID numbers	\$22.50	\$153.45
Each additional block of 10 DID numbers assigned over the first 100 DID numbers	\$4.50	\$13.95

DID Trunk Termination, per trunk

Per Trunk Group	Monthly Rate	Installation Charge
With Dial Pulse (DP) Signaling	\$45.00	\$19.12
With Multifrequency (MF) Signaling	\$45.00	\$19.12
With Dual-Tone Multifrequency	\$45.00	\$129.15

Existing Customers of Direct Inward Dialing (DID) Service will be grandfathered as of the Effective Date of this 3rd Revised Page 106.

SECTION 16.0 - LOCAL SERVICES PRICE LIST (Continued)

16.4 Optional Calling Features

The features in this section are made available on an individual basis or as part of multiple feature packages. Features apply to analog lines only; prices not valid in conjunction with the following features: Centrex, Plexar, Off-Premise Location, ADSL, Circuits, Terminals, Telebranches, Pay Phones, Message Party Lines, and Trunks. All features are provided subject to availability. Certain features may not be available with all classes of service. Ionex Elite is the Company's contractual term product. Ionex Standard is comprised of the Company's month-to-month service offerings. Transmission levels for calls forwarded or calls placed or received using optional calling features may not be acceptable for all some uses in some cases.

The following optional calling features are offered to Customers on a monthly basis. Customers are allowed unlimited use of each feature. No usage sensitive charges apply. Multi-line Customers must order the appropriate number of features based upon the number of lines which will have access to the feature.

*Pick Three or Pick Seven permits a Business Customer to purchase three (3) or seven (7) of the predetermined group of Services at the Pick 3 or Pick 7 discounted rate.

SECTION 16.0 - LOCAL SERVICES PRICE LIST (continued) RECEIVED

16.5 ISDN SERVICE

MAR 27 2000

Basic Rate Interface

MO. PUBLIC SERVICE COMM

Single Line ISDN Service Basic Rate Access is offers flat rated or measured local calling. The Customer may have only one type of Basic Rate Access on an account. The Company will provide flat and measured Basic Rate Access at the same address, for the same Customer; however, the flat and measured services must reside on separate accounts.

Usage charges apply to all outgoing calls when using the measured without usage allowance option.

Following are the monthly rates and nonrecurring charges for Single Line ISDN Service. These rates and charges apply in addition to applicable rates and charges for other services provided by the Company.

Single Line ISDN Service Basic Rate access with a usage allowance includes up to either 600 minutes or 7200 minutes per month of aggregate usage for circuit-switched voice and circuit-switched data. Usage is aggregated at the account level rather than the summary bill level. Additional usage in excess of the usage allowance in a monthly billing period, will incur usage charges.

When BRI is arranged for circuit-switched voice service, Optional Calling Features offered in Section 16.4 of this tariff are available, where such features are compatible with the ISDN service.

16.8 Operator Services

MO. PUBLIC SERVICE COMM

The Company's Local Operator Assisted Calling is available for use by presubscribed Customers as well as transient end users served from aggregated locations. Calls are billed in one minute increments with additional per call charges reflecting the level of operator assistance and billing arrangement requested by the Customer.

Available Billing Arrangements

- A. **Bill to Line** is a billing arrangement whereby the originating caller may bill the charges for a call to the Company-provided local exchange line from which the call is placed. The terms and conditions of the Company apply to payment arrangements.
- B. **Calling Card** is a billing arrangement whereby the originating caller may bill the charges for a call to an approved local exchange carrier issued calling card. The terms and conditions of the local exchange carrier apply to payment arrangements.
- C. **Collect Billing** - A billing arrangement whereby the originating caller may bill charges for a call to the called party, provided the called party agrees to accept the charges. The terms and conditions of the called party's local exchange company apply to payment arrangements.
- D. **Third Party Billing** - A billing arrangement by which the charges for a call may be billed to a telephone number that is different from the calling number and the called number. The terms and conditions of the third party's local exchange company apply to payment arrangements.

SECTION 16.0 - LOCAL SERVICES PRICE LIST (Continued)

16.8 Operator Services

16.8.2 Busy Line Verification and Line Interrupt Service

Upon request of a calling party the Company will verify a busy condition on a designated local service line. The operator will determine if the line is clear or in use and report to the calling party. At the request of the Customer, the operator will interrupt the call on the busy line. Busy Line Interruption is only permitted in cases where the calling party indicates an emergency exists and requests interruption.

No charge will apply when the calling party advises that the call is from an official public emergency agency. Busy Verification and Interrupt Service is furnished where and to the extent that facilities permit.

The Customer shall identify and save the Company harmless against all claims that may arise from either party to the interrupted call or any person.

	<u>Per call</u>

SECTION 17.0 PROMOTIONS

MO. PUBLIC SERVICE COMM

From time to time, Ionex Communications, Inc. may elect to offer special promotions to its customers. These promotions will generally consist of a reduced price, a waiver of installation charges, or a free service with a purchase of another service.

Any promotional waiver or discounted rate will apply one time per customer for each service in any given wire center prefix during the course of the promotional period, subject to prior notification and approval by the Missouri Public Service Commission.

The Company will provide written notice to the Commission no less than seven (7) days prior to the beginning of each promotion period identifying the promotion and the exchanges within which the promotion will be offered. If facilities permit, all business customer will be offered the same opportunity to take advantage of the same terms and conditions under the promotions in which to subscribe to business service.

SECTION 17.0 – PROMOTIONAL OFFERINGS

REC'D MAY 06 2002

17.3 50/50 Promotion

The Company is offering a promotion commencing May 16, 2002, and will apply to orders received through June 30, 2002. The Promotion is as follows:

17.3.1 Eligible Customers

New Subscribers with at least 3 or more local lines per location, not including DSL, located in Southwestern Bell service areas in TX Rate Groups 3-8, OK Rate Groups 4-6, KS Rate Groups 5-8 and MO Rate Groups B, C and D or Customers who are eligible for Ionex facilities-based service in the Plano Northwest, Plano Main, Plano West, Denton, Irving Walnut Hill and Garland Main Verizon wire centers. If a multi-location account, at least 70% of the lines must be located in these areas to qualify for the offer.

17.3.2 The Offer

Sign up for three or more lines of ionex local and long-distance service and get 50% off local line and feature charges during your 7th and 13th months of service with ionex.

17.3.2.A Customers in good standing will automatically receive these local line and feature discounts. Good standing is defined as an account with no past due amount owing.

17.3.2.B New subscribers will receive ionex's Elite pricing without a term commitment. Additional discounts* are available with term commitments.

17.3.2.C Ionex will send the subscriber a coupon redeemable anytime after payment in full of the third ionex monthly invoice. Coupon is good for a one-time credit equal to 50% of one month's long distance usage charges (if those long distance usage charges are equal to or greater than \$100). The maximum credit allowance granted will be \$400 per account. Customer is to pay current month's statement in full, remit the coupon, and the applicable credit will be reflected on the next monthly invoice.

(N)

*New Elite term Business Customers will be eligible to receive a \$1.00 per line discount (with a 1 year term) or a \$2.00 per line discount (with a 2 year term) off of the monthly recurring rate for each new additional line (up to 50 lines per location) for the life of the Elite Business Service contract term.

17.3.3 Other Terms and Conditions

- Offers available only to ionex Customers who sign up for both ionex local and long distance (inbound/outbound InterLATA/IntraLATA) Services within designated SWBT Exchange Service Areas. Returning Customers must have been without ionex Service for a period of at least 30 days to be considered a "New Customer".
- Offer available only with ionex Elite Business Price Plan: 1 Year Minimum Contract Required. 1- and 2-Year Terms Available.
- Offer is not available with Centrex, Plexar, Off-Premise Locations, Digital Circuits, Digital Trunks, Telebranches, ISDN, Message Party Lines and Payphones.
- Service must be available for installation at the time of order.
- This promotion cannot be combined with any other ionex offer.

SECTION 17.0 – PROMOTIONAL OFFERINGS

Missouri Public

17.3 Ionex Sizzlin' Summer Special Promotion

The Company is offering a promotion commencing July 22, 2002, that will apply to orders received through August 15, 2002. The Promotion is as follows:

REC'D JUL 10 2002

17.5.1 Eligible Customers

New Subscribers with at least 4 or more local lines per location, not including DSL, located in Southwestern Bell service areas in TX Rate Groups 3-8, OK Rate Groups 4-6, KS Rate Groups 5-8 and/or MO Rate Groups B, C and D. If a multi-location account, at least 70% of the lines must be located in these areas to qualify for the offer.

Service Commission

17.5.2 The Offer

Sign up for Four (or more) lines of ionex Local and Long-Distance* Service and Get the 1st Full Month of Local Service FREE.

(*A data product, such as internet service, may be substituted for the promotion's Long Distance Service Requirement if the Customer is under a contract for long distance with another provider)

(N)

Offer available only with ionex Elite Business Price Plan: 1 Year Minimum Contract Required.

Promotion is for 1st Full Month of Local Service per eligible (new) line. Charges will apply to any pro-rated, partial month's service. Non-recurring/installation charges still apply.

17.5.3 Other Terms and Conditions

Offers available only to ionex Customers who sign up for both ionex local and long distance (inbound/outbound InterLATA/IntraLATA) services within designated SWBT Exchange Service Areas listed above. A data product, such as internet service, may be substituted for the promotion's Long Distance Service Requirement if the Customer is under a contract for long distance with another provider.

Returning Customers must have been without ionex Service for a period of at least 30 days to be considered a "New Customer".

Offer is not available with Centrex, Plexar, Off-Premise Locations, Digital Circuits, Digital Trunks, Telebranches, ISDN, Message Party Lines and Payphones.

Service must be available for installation at the time of order.

This promotion cannot be combined with any other ionex offer.

REC'D JUL 18 2002

17.6 Ionex Additional Lines & Features Promotion

The Company is offering a promotion commencing July 29, 2002, that will apply to orders received through August 31, 2002. The Promotion is as follows:

Service Commission

17.6.1 Eligible Customers

Current Business Subscribers located in Southwestern Bell service areas in TX Rate Groups 3-8, OK Rate Groups 4-6, KS Rate Groups 5-8 and/or MO Rate Groups B, C and D.

17.6.2 The Offer

Add up to Five Additional Analog Lines to your ionex Account and Get the 1st Full Month of Local Service FREE and a Waiver of the Non-Recurring/Installation Charges. (Offer also applies to Additional Features as specified below.)

Promotion is for 1st Full Month of Local Service per eligible (new) line. Charges will apply to any pro-rated, partial month's service.

Calling features added at the time of the promotional order will also be eligible for 1st FREE Full Month and a Waiver of the Connection Charges.

Features do not need to be applied to the new lines added; however, features added pursuant to this promotion cannot be applied to more lines than the total number added. (For example: If 3 additional analog lines are added to an existing account with 2 lines, any Additional Features selected via this promotion may not be applied to more than 3 analog lines total.)

(N)

17.6.3 Other Terms and Conditions

Offer is available only to ionex Customers within designated SWBT Exchange Service Areas listed above. Customer must be in good standing with no past due amount owing on account.

Free installation offer limited to five additional lines per location. There is no limitation to the quantity of features qualifying for FREE installation during this promotion. Additional lines and features will be priced at same rate as current account location prices.

Free services offered via credit. First month's local service credit is equivalent to 30 days rate. No cash redemption value.

Offer is not available with Centrex, Plexar, Off-Premise Locations, Digital Circuits, Analog or Digital Trunks, Telebranches, ISDN, Message Party Lines and Payphones.

Service must be available for installation at the time of order.

This promotion cannot be combined with any other ionex offer.
