RATE A
METER RATE – CITY AND SUBURBAN

APPLICATION - This schedule is applicable to residential, commercial, industrial, municipal and other general service.

RATE TABLE – For monthly water use as determined by meter – CCF:

	<u>Residential</u>	<u>Commercial</u>	<u>Industrial</u>	<u>Public Authority</u>	<u>Sale For Resale</u>	
First 315 CCF	\$2.9132	\$2.9152	\$2.9152	\$2.9152	\$2.9152	+
Over 315 CCF	\$2.9132	1.9508	1.9508	1.9508	1.9508	+

SERVICE CHARGE – The minimum charge for water service available through the facilities of the Company for the billing period and for the meter size furnished the customer is:

<u>METER SIZE</u>	<u>MONTHLY SERVICE CHARGE</u>	
5/8" Water Meter	\$11.79	+
3/4" Water Meter	12.90	+
1" Water Meter	15.13	+
1-1/2" Water Meter	20.71	+
2" Water Meter	27.38	+
3" Water Meter	43.00	+
4" Water Meter	65.30	+
6" Water Meter	121.00	+

There is no minimum other than the above listed monthly service charge.

TERMS OF PAYMENT – All bills for service under this schedule will be rendered in arrears monthly. Bills for water service will be distributed on a monthly basis. The due date on the tariff shall be ten (10) days after the "date of rendition" of the bill to the customer. The customer's bill will be due and payable after this due date. The delinquent date printed on the bill will not be less than twenty-one (21) days after the date of the postmark of the bill. Any accounts remaining unpaid at the expiration of twenty-one (21) days shall be considered delinquent and the Company may take such action as specified in its filed rules and regulations.

**RATE D
 PRIVATE FIRE SERVICE RATES**

APPLICATION – This rate is applicable to fire hydrants and fire protection systems installed on private property.

CONSTRUCTION PROVISION – The expense of the installation of the fire protection system will be borne by the customer. A detector meter of an approved make and size must be incorporated in each fire protection system. The tap size must be approved by the Company.

RATE TABLE

Tap Size	Minimum Annual Charge	
2" or Less	\$132.72	+
3"	\$298.82	+
4"	\$531.18	+
6"	\$1,195.08	+
8"	\$2,124.44	+
10"	\$3,319.52	+
*Each private fire hydrant Located on company mains	\$1,195.08	+

For private fire services where fire booster pumps are utilized by the customer, the annual charge shall be determined by an equivalent (tap) size. The equivalent tap size shall be the standard pipe size that would deliver, at a velocity of 5 feet per second, the flow capacity of the fire booster pumps.

SPECIAL PROVISIONS –

1. Private fire hydrants and protection systems are to be used solely for the extinguishing of fires or for fire drills.
2. No connections for water service for uses other than fire protection shall be made to any private fire protection system.

SEP 21 1993
 BY 6th B.S. #3
 Public Service Commission
 MISSOURI

For private fire services where fire booster pumps are utilized by the customer, the annual charge shall be determined by an equivalent (tap) size. The equivalent tap size shall be the standard pipe size that would deliver, at a velocity of 5 feet per second, the flow capacity of the fire booster pumps.

SPECIAL PROVISIONS-

1. Private fire hydrants and protection systems are to be used solely for the extinguishing of fires or for fire drills.
2. No connections for water service for uses other than fire protection shall be made to any private fire protection system.

RATE F
RATE FOR MANUFACTURERS AND LARGE QUANTITY USERS OF WATER

APPLICATION - This rate is applicable to Manufacturers and Large Quantity Users of Water whose use is fairly constant throughout the year and is not less than 60,000 cubic feet per month.

This rate is not available to users of water in residences, apartment dwellings, hotels, hospitals, educational institutions, or for irrigation or construction purposes.

RATE TABLE – For all water used as registered by meter:

For all cubic feet per month \$1.7071 per 100 cubic ft.

SERVICE CHARGE – The following monthly service charges must be paid regardless of the quantity of water used.

	<u>METER SIZE</u>	MONTHLY SERVICE CHARGE	
2" or less	Water Meter	1,195.86	+
3"	Water Meter	1,211.49	+
4"	Water Meter	1,233.77	+
6"	Water Meter	1,289.49	+

MINIMUM CHARGE – The minimum charge in any month shall be 60% of the maximum charge that occurred for any of the months of June, July, August, or September in the twelve (12) months period preceding the month for which the bill is rendered, except that the minimum shall not be less than the service charges stated above.

If the customer is forced to close the operations of its plant for a period of 10 days or more because of accidents, fires, damage to plant, strikes of its own employees, acts of God, Governmental regulations or other cause not reasonably within its control, and the customer gives Water Company written notice not later than thirty days after such occurrence, the customer will be entitled to a pro-rated reduction in the monthly minimum charge for the period the customer is unable to use full water service for such cause.

RATE E
RATE FOR PUBLIC WATER SUPPLY DISTRICT 2

APPLICATION – This rate is applicable to water service provided to Public Water Supply District No. 2 (“District”) in order to comply with the agreement dated August 23, 1997, between United Water Missouri (“Company”) and the District, as well as subsequent amendments to that agreement. It is recognized that in accordance with said agreement and amendments, the Company has obtained the use of storage and well facilities owned by the District in exchange for certain operational responsibilities and charges. It is also recognized that the sources of water used by the District’s customers are from its own wells and, in the course of operating the interconnected systems, also from the Company’s treatment plant.

- (A) Pursuant to Paragraph 7 of the August 23, 1977 Agreement, the rate in this tariff shall be charged by the Company to the District for the quantity of water used by the District in any month in which the quantity of water used exceeds the maximum monthly quantity used in the previous calendar year, adjusted for growth in that calendar year, as determined by the formula set forth in Paragraph 7 of the Agreement.
- (B) To the extent that charges for water service have not been made under paragraph (A) above, this tariff rate shall apply to the net flow of “treatment plant” water from the Company to the District, as measured at the interconnections between the Company’s and the District’s systems, provided that there has been a net flow of “treatment plant” water into the District during the last 12-month period.

MISSOURI

Public Service Commission

APPLICATION - This rate is applicable to water service provided to Public Water Supply District No. 2 ("District") in order to comply with the agreement dated August 23, 1977, between Capital City Water Company ("Company") and the District, as well as subsequent amendments to that agreement. It is recognized that in accordance with said agreement and amendments, the Company has obtained the use of storage and well facilities owned by the District in exchange for certain operational responsibilities and charges. It is also recognized that the sources of water used by the District's customers are from its own wells and, in the course of operating the interconnected systems, also from the Company's treatment plant.

(A) Pursuant to Paragraph 7 of the August 23, 1977 Agreement, the rate in this tariff shall be charged by the Company to the District for the quantity of water used by the District in any month in which the quantity of water used exceeds the maximum monthly quantity used in the previous calendar year, adjusted for growth in that calendar year, as determined by the formula set forth in Paragraph 7, of the Agreement.

(B) To the extent that charges for water service have not been made under paragraph (A) above, this tariff rate shall apply to the net flow of "treatment plant" water from the Company to the District, as measured at the interconnections between the Company's and the District's systems, provided that there has been a net flow of "treatment plant" water into the District during the last 12-month period.

RULES AND REGULATIONS
GOVERNING THE RENDERING OF SERVICE

REC'D OCT 14 1999

APPLICATION FOR SERVICE

1. Service connection will be made, and water will be furnished upon written application by the prospective customer (or his properly authorized agent), on a form prepared by the Company for this purpose, and after approval of such application by the Company. The application for service shall state clearly the class, scope, and type of use to be made of the service as well as the purpose for which it will be used. Service connections will not be approved unless a main is directly adjacent to the property to be served by a line perpendicular from the point on the main to a point on the building.
2. The application and these rules and regulations constitute the contract between the customer and the company; and each customer by accepting of water, agrees to be bound thereby.
3. A new application must be made to, and approved by, the Company upon any change in the identity of the contracting customer at a property or in the service as described in the application, and the Company may, upon five days' notice, discontinue the water supply until such new application has been made and approved.
4. Each application for service shall be made on the basis of rates applicable to customers under the tariff provision.

SERVICE CONNECTION

5. Each customer shall be supplied through a separate service line.
- + 6. For the purpose of this tariff, a "Service Connection" is defined as the service pipe from the Company main to a curb stop/valve or meter box/pit at the property line. A "Customer Water Service" is defined as a pipe with appurtenances from the curb stop/valve or meter box/pit to the customer's premise.

All new service lines shall be installed according to Company and City specifications. The cost of the initial Service Connection installation including the tap shall be borne by the customer. The Company shall take over ownership of the Service Connection upon application for service and the initial setting of the meter. Service Connections shall be placed inside the curb line or Company right of way, all of which service line shall be accessible to the Company at all times.

- + 7. All 3/4 inch and 1 inch service lines from the main to the meter shall be Type "K" copper. 2 inch or over may be ductile iron cement lined and shall be approved by Company as to size and installation. All such service lines shall be placed at least 30 inches below the surface of the ground.

RULES AND REGULATIONS
GOVERNING THE RENDERING OF SERVICE

REC'D OCT 14 1999

- 8. No service lines shall be laid in the same trench with the sewer pipe.
- 9. When a meter is located within the customer's building a stop and waste valve, easily accessible to the occupants, shall be placed in the service line within the building supplied with water. Such valve shall be located so that it will be possible to drain the meter and all pipes in the building. When the meter is located outside the customer's building, a positive shut off valve shall be located immediately inside the customer's building.
- + 10. The Company shall at its own expense, be responsible for the maintenance of all Service Connections, including the curb stop/valve and meter. The meter box/pit, the meter yoke and all other appurtenances in the meter pit/box shall remain the property of the customer.

When in the opinion of the Company, the entire Service Connection is in need of replacement, the Company shall make the replacement at its own expense. Until such replacement is made, the entire Service Connection from the main to the customer's premise shall be considered to be the property of the Customer.

Should a leak occur and the existing curb stop/valve or meter box/pit is not located on the property line, and it can not be determined whether the Company or the Customer is responsible for the leak; the Company at its expense will install a curb stop at the property line or as close as possible if obstructions prevent placement on the property line. If the leak is between the main and the newly installed curb stop the Company will assume responsibility for the maintenance and expense of the leak. However, if the leak is on the customer's side of the newly installed curb stop, the Customer shall be responsible for the maintenance and expense of the leak.

- + 11. The Company shall in no event be responsible for damage to persons or property cause by the location of, the condition of, or water escaping from, the Service Connection or Customer Water Service or any other pipe or fixture owned by the customer and the customer at all times shall comply with state and municipal regulations in reference thereto.
- 12. The use of water service by a customer shall be in accordance with the class, scope and type of use, and for the purpose stated in his application and service contract. A customer shall not use, or allows use of water service through his service facilities for others or for purposes other than those covered by his application. To make service available for other purposes or character of use, a new application and contract is required.

*(All) of the public water system by any customer or another water system.

II. CROSS CONNECTIONS

- A. Definition: Cross connection is any connection or structural arrangement between the Company's public water supply and any source or system through which backflow can occur. By-pass arrangements, jumper connections, removable sections, swivel or changeover devices, and other temporary or permanent devices through which, or because of which, backflow can occur are considered cross connections.
- B. No person or potential customer shall be given a service connection of any type until the water plumbing system has been approved as having complied with all requirements of the Plumbing Inspector.
- C. No person or customer shall be permitted to install or maintain a cross-connection to the Company's public water supply.

III. BACKFLOW PREVENTION

- A. Definition: Backflow is a flow of any foreign liquid, gas or other substance into the Company's public water supply from any other source than the intended one.
- B. An approved backflow prevention device shall be installed on each customer service line where, in the judgement of the Company, Plumbing Inspector or State Agencies, there exists a potential of pollution to the Company's public water supply.
- C. An approved backflow prevention device shall be installed on each customer service line serving premises where the conditions exist as outlined below:
 - 1. Premises on which any substance is found which may create an actual or potential hazard to the Company's public water supply.
 - 2. Premises where, because of security requirements or

IV. BACKFLOW PREVENTION DEVICES

A. There are two types of backflow prevention devices recognized by the Company: 1) air gaps and 2) reduced pressure devices. The mechanical device shall be one that meets AWWA Standard C 506-78 as hereafter revised.

B. A backflow prevention device shall be installed in accordance with the recommendations and specifications of the manufacturer of the device.

C. Any existing backflow prevention device installed prior to the effective date of this program shall, except for inspection, testing, and maintenance requirements, be excluded from the requirements of IV.A. provided that the Company, Plumbing Inspector and State Agencies are assured that the device will protect the Company's public water supply.

V. RESPONSIBILITY OF THE CUSTOMER

A. When the customer requests water service, he shall advise the Company in writing as to: 1) any alternate source of water which may be used in his facility; 2) the type of fire protection system to be utilized, if any; and 3) type of facility or process to be utilized.

B. The customer shall submit two copies of certified plans for fire service connections, lawn or irrigation systems and other facilities requiring approved backflow prevention devices to the Company for approval prior to construction.

C. It shall be the responsibility of the customer to have an inspection and operational test made annually of his backflow prevention device in accordance with the manufacturer's procedures to insure that the device is in proper operating condition at all times. The customer must maintain a certificate certifying the timely testing

- B. The Company shall have the right to enter a customer's premises at a reasonable time to inspect and check the customer's compliance with these rules.
- C. The Company may deny or discontinue the water service to a customer if 1) the required backflow prevention device is not installed; 2) if it is found that the device has been removed or bypassed or 3) if the customer does not have his device properly tested and maintained as specified in section V.C. Water service to such premises shall not be restored until the deficiencies have been corrected or eliminated in accordance with these procedures to the satisfaction of the Company.

Of Service**

VII. Fire Protection Systems

- a. All new fire protection systems, other than residential systems utilizing a combination service line for one and two family premises, connected to the Company's water supply shall be protected from back pressure and back siphonage by one of the following testable devices:
 - Double Check Detector assembly (DCDA).
 - Reduced Pressure Detector Assembly (RPDA).
- b. Fire protection systems that contain antifreeze, fire retardant, or other chemicals must be equipped with an RPDA.
- c. A reduced pressure assembly (RP) may be used to isolate a branch line(s) of the fire service that contains chemicals, at the discretion of the Company. In this case, a DCDA may be installed as the containment assembly.
- d. Existing fire protection systems must be equipped, at a minimum, with a double check valve assembly (DC) unless the system contains chemicals. In this case, the system must be equipped with an RP.
- e. When an existing fire protection system equipped with a DC is extended or renovated, the system's backflow prevention device must be upgraded to a DCDA.

RULES AND REGULATIONS

GOVERNING THE RENDERING OF SERVICE - Continued

METERS

- +13. All water service, except water for fire fighting purposes, will be rendered only through meters.
- 14. Each customer's service shall have a separate meter to register the amount of water consumed.
- 15. All meters will be furnished by, and remain the property of the company. The company reserves the right to establish the size and location of meter required by each customer.
- 16. Meters will be maintained by the company as far as ordinary wear and tear is concerned, but the customer, in the instance of an inside installation, shall be responsible to the company for any injury to, or loss of, any meter arising out of or caused by, the customer's negligence or carelessness or that of his servants, employees, members of his household, or any person upon his premises under or by his consent or sufferance. The customer shall not permit anyone when not an agent of the company or otherwise lawfully authorized so to do, to remove, inspect or tamper with the company's meter, or other property of the company on his premises. The customer will not be responsible for the company's meter where there is an outside meter installation if the company has agreed upon the site and the installation of a meter vault or meter box.
- 17. The customer shall notify the company of any injury to, or of any cessation in registration of, the meter as soon as it comes to his knowledge.
- 18. All meters shall be set at convenient locations, accessible to the company, and subject to its control. The meter will normally be placed in a meter box or vault between the curb and property line as near to the curb as possible. Each meter box or vault shall be provided with a suitable cover.
- 19. When it is not convenient or if both the customer and the company agree not to place the meter in a box or vault, as provided in Rule 18, the meter, for commercial or industrial property only will be placed inside the building in a suitable location.

RULES AND REGULATIONS
GOVERNING THE RENDERING OF SERVICE - Continued

20. The customer shall be responsible to furnish and install meter boxes or vaults for all outside meter settings. The meter box vault and cover shall conform to a proper uniform standard established by the Company. The covers shall be of uniform design for convenience and efficiency in the Company's operation.

21. To prevent heat damage to the meter where steam or hot water under pressure is used, other than for normal residential use, a swing check valve and a pressure relief valve must be placed, at the expense of the customer, on the discharge side of the meter and before any outlets are taken off the service line.

METER TESTING

22. The quantity of water recorded by the meter shall be conclusive for both the customer and the Company, except when the meter has been found to be registering inaccurately or has ceased to register. In either of such cases the meter will be promptly repaired or replaced by the Company and the quantity of water consumed shall be estimated by the average registration of the meter on previous corresponding periods.

23. In case of a disputed bill involving the accuracy of a meter, such meter shall be tested, upon the request of the customer, in conformity with the provisions of rules and regulations pertaining thereto of the Missouri Public Service Commission. If the meter so tested is found to have an error in registration of five per cent (5%) or more, the bills will be increased or decreased accordingly as provided by the said rules.

24. The Company, at its own expense, will make periodic tests and inspections of its meters in order to maintain them at our standard of accuracy. Upon request, the company will test any water meter, free of charge, provided that the meter in question has not been tested within 12 months previous to such request. If the meter has been tested within said 12 months period and the test reveals the meter to be accurate within a range 95% to 105% a charge will be made. Refer to Sheet No. 5-B for the amount.

RULES AND REGULATIONS
GOVERNING THE RENDERING OF SERVICE - Continued

TERMS AND CONDITIONS OF BILLING AND PAYMENTS

Each customer is subject to a service charge or minimum charge, the amount of which is set forth in the Schedule of Rates according to size of meter. Payment of all bills must be made at the Company's office either in person, by mail or Electronic Fund Transfer ("EFT") on or before the due date printed on the bills, and are considered delinquent if not paid within twenty-one (21) days of the bill dated.¹ Bills for water service will be distributed on a monthly basis. The due date on the tariff shall be ten (10) days after the "date of rendition" of the bill to the customer. The customer's bill will be due and payable after this due date. The delinquent date printed on the bill will not be less than twenty-one (21) days after the date of the postmark of the bill. Any accounts remaining unpaid at the expiration of twenty-one (21) days shall be considered delinquent and the Company may take such action as specified in its filed rules and regulations.

In addition to any and all charges due the Company, a check or EFT that has been received as payment for service is returned by the bank unpaid, a Returned Deposit Item charge will be assessed to cover the cost of processing this transaction. Refer to Sheet No. 5-B for the amount.

+
+

The Company may serve a Customer on a cash-only basis if more than one check or Returned Deposit Item of the customer is returned NSF or any other valid return reason in a 12-month period. "Cash" shall be deemed to mean U.S. currency, money order, or certified check.

*
*
*

Employees other than office employees of the Company, are not authorized to accept payment of water bills.

If for any reason service is discontinued before the expiration of one (1) month from commencement of service, a bill for at least the minimum charge for one (1) month will be rendered.

- 25. Customers are responsible for furnishing the Company with their correct address. Failure to receive bills will not be considered an excuse for non-payment nor permit an extension of the date when the account would be considered delinquent. All bills will be sent to the address entered in the application unless the Company is notified in writing by the customer of any change of address.
- 26. The use of water by the same customer in different premises or localities will not be combined, and each installation shall stand by itself.
- 27. The Company may render a bill based on estimated usage pursuant to a billing procedure approved by the Public Service Commission if:

(1) Extreme weather conditions or emergencies prevent actual meter readings.

¹ Pursuant to a variance issued by the Commission May 10, 1995 in its Case No. WO-95-6, previous balances for utility charges and Charges for services not subject to Commission jurisdiction may not be separately itemized. Customers may contact Company's customer service department by telephone to obtain detailed itemization of any balance forward amounts.

BILLS

MISSOURI
Public Service Commission

- 25. Each customer is subject to a service charge the amount of which is set forth in the Schedule of Rates according to size of meter.
- 26. Bills for water service will be rendered and are due and payable as specified on the Schedule of Rates.
- 27. The presentation or non presentation of a bill shall not be held to be a waiver of any of the rules or regulations.
- 28. Employees, other than office employees of the company, are not authorized to accept payment of water bills. Payment of all bills must be made at the company's office either in person or by mail.

DISCONTINUANCE OF SERVICE

- 29. Whenever the customer desires to have his service contract terminated or his water service discontinued, he shall notify the company to that effect in writing. The customer will be responsible for the payment of all service rendered by the company prior to receipt of such written notice and during a reasonable time thereafter, not to exceed two (2) working days, to enable the company to make the final reading of the meter or meters, or to discontinue water service.
- 30. When premises will be unoccupied temporarily, the customer shall notify the company in writing, and water will be turned off and all charges will cease from the date when water service is turned off. When the property is again occupied, the customer shall notify the company in writing, and the water will be turned on. No refund or allowance will be made for unoccupied property when written notice has not been given as provided. No refund will be allowed for property unoccupied for a period less than one month.

(2) The Company is unable to obtain access to the customer's premises for the purposes of reading the meter, or in situations where the customer makes reading the meter unnecessarily difficult.

If the Company is unable to obtain an actual meter reading, it shall undertake reasonable alternatives to obtain a customer reading of the meter.

In the event the company is unable to obtain a meter reading which would otherwise be cause for discontinuance of service in accordance with the Rules of the Public Service Commission of Missouri, the Company will offer special appointments to customers for meter reading between 4:30 p.m. and 9:00 p.m. on Saturday, both excluding holidays. The charge for such special appointment is listed on Sheet No. 5-B.

DISCONTINUANCE OF SERVICE

29. Whenever the customer desires to have his service contract terminated or his water service discontinued, he shall notify the Company to that effect in writing. The customer will be responsible for the payment of all service rendered by the Company prior to receipt of such written notice and during a reasonable time thereafter, not to exceed two (2) working days, to enable the Company to make the final reading of the meter or meters, or to discontinue water service.

30. When premises will be unoccupied temporarily, the customer shall notify the Company in writing, and water will be turned off and all charges will cease from the date when water service is turned off. When the property is again occupied, the customer shall notify the Company in writing, and the water will be turned on. No refund or allowance will be made as provided. No refund will be allowed for property unoccupied for a period less than one month.

31. In cases of vacancy of a customer's property, the customer must notify the company in writing of such vacancy and upon his failure to do so, he will become responsible for any damage to the property of the company, arising from freezing, water damage, injury to meter, or any other failure.

32. The company may discontinue water service to a customer with ten (10) days written notice for one or more of the following reasons:

- (I) Nonpayment of an undisputed delinquent charge. *
- (II) Failure to post a security deposit or guarantee acceptable to the company. *
- (III) Unauthorized interference, diversion or use of the company's water service situated or delivered on or about the customer's premises.
- (IV) Failure to comply with the terms and conditions of a settlement agreement.
- (V) Refusal after reasonable notice to permit inspection, maintenance, replacement or meter reading of utility equipment. Discontinuance for inability to obtain meter readings shall be in accordance with the rules of the Public Service Commission. *
- (VI) Misrepresentation of identify in obtaining water service. *
- (VII) Violation of any other rules of the company approved by the Commission which adversely affects the safety of the customer or other persons, or the integrity of the company's water system. *
- (VIII) Non-payment of a sewer bill pursuant to a contract between the Company and a sewer corporation, municipality or sewer district authorized by state statute. *
- (IX) As provided by state or federal law. *

None of the following shall constitute sufficient cause for the company to discontinue service:

- (I) The failure of a customer to pay for merchandise, appliances, or services not subject to Public Service Commission jurisdiction as an integral part of the water utility service, except for a sewer bill pursuant to Rule 32 (VIII). *
- (II) The failure of the customer to pay for service rendered at a separate metering point, residence or location. In the event of discontinuance or termination of service at a separate residential metering point, residence or location in accordance with these rules, the Company may transfer and bill any unpaid balance to any other residential service account of the customer and may discontinue service after twenty-one (21) days after rendition of the combined bill, for nonpayment, in accordance with this rule; *
- (III) The failure of the customer to pay for a different class of service received at the same or different location. The placing of more than one (1) meter at the same location for the purpose of billing the usage of specific devices under optional rate schedules or provisions is not construed as a different class of service for the purpose of this rule;
- (IV) The failure to pay the bill of another customer, unless the customer whose service is sought to be discontinued received substantial benefit and use of the service;
- (V) The failure of a previous owner or occupant of the premises to pay an unpaid or delinquent bill except where the previous occupant remains an occupant or user; or *

RULES AND REGULATIONS, MAY 20 1975
GOVERNING THE RENDERING OF SERVICE - Continued

31. In cases of vacancy of a customer's property, the customer must notify the company in writing of such vacancy and the Missouri Public Service Commission failure to do so, he will become responsible for any damage to the property of the company, arising from freezing, water damage, injury to meter, or any other failure.

32. Service to any customer may be discontinued for violation of any of these rules and regulations. However, before service may be discontinued for any violation, the company shall give at least five (5) days written notice to the customer, stating the rule violated, the manner of violation, and the date after which service will be discontinued if the violation continues. After service is thus discontinued for violation of rules and regulations, service will not be resumed until reasonable assurance is given that the customer will comply with the rules and regulations and until \$10.00 has been paid to the company as reimbursement for cost of discontinuance and restoration of service. After regular hours or on Saturdays, Sundays or holidays a service charge of \$15.00 will be made.

CUSTOMER'S DEPOSITS

33. The company reserves the right to require a deposit equal to the estimated gross bill for any single billing period plus one month, with a minimum of \$10.00, to secure payments for water service rendered, where the credit of the customer has not been established to the satisfaction of the company. Upon this deposit the company will pay or credit on customer's bill six per cent (6%) interest per annum provided such deposit remains for a period of at least six months. The company will pay or credit on customer's bill, at the end of each calendar year, the interest accrued thereon.

RECEIVED
#18431
JUL 17 1975

The company will refund said deposit on notice to discontinue service and after payment in full has been made for all service rendered or when the customer shall have paid the Missouri Public Service Commission bills for service over a period of twelve consecutive months, and any customer, having secured the return of a deposit, shall not be required to make a new deposit unless the service has been discontinued or the customer's credit standing has been impaired through failure to comply with tariff provisions.

MISSOURI
Public Service Commission

(VI) The failure to pay a bill correcting a previous underbilling, whenever the customer claims an inability to pay the corrected amount, unless a utility has offered the customer a payment arrangement equal to the period of underbilling.

Notwithstanding any other provision of this rule, the company shall postpone the discontinuance of water service to a residential customer for a time not in excess of twenty-one days if the company is advised the discontinuance will aggravate an existent medical emergency of the customer, a member of his family or other permanent resident of the premises where service is rendered. The company may require a customer to provide satisfactory evidence that a medical emergency exists.

Notwithstanding any other provision of this rule, the company may discontinue service temporarily without advance notice for reasons of maintenance, health, safety, or a state of emergency.

If a customer disputes a particular bill, the company will not discontinue service for non-payment so long as the customer (i) pays the undisputed portion of the bill (if the parties are unable to determine the undisputed portion, the customer shall pay to the utility fifty percent (50%) of the bill in dispute), (ii) pays all future periodic bills by the due date, and (iii) enters into bonafide discussions with the company to settle the dispute in accordance with rules of the Public Service Commission. If agreement cannot be reached on settlement of the dispute, the customer may register his dispute with the Public Service Commission in accordance with Commission rules.

RULES AND REGULATIONS
GOVERNING THE RENDERING OF SERVICE - Continued

When water service to a premises has been discontinued for any reason other than temporary vacancy, it will be renewed promptly at that premises when the cause for discontinuance has been eliminated, applicable restoration charges have been paid and, if required satisfactory credit arrangements have been made.

No customer whose service has been turned off shall turn on same or have same done by anyone other than the company.

Water will not be turned on to any premises unless there is a responsible person present at such time to see that all water outlets in the premises are closed to prevent damage by escaping water.

When it has been necessary to discontinue water service to any premises because of a violation of the Rules and Regulations or for non-payment of any bill [except for non-payment of a sewer bill pursuant to Rule 32 (VIII)], a charge will be made to partly cover the expense of turning on the water. Refer to Sheet No. 5-B for charges to restore service during regular hours or after regular hours or on Saturdays, Sundays, or holidays. This charge, together with any arrears that may be due the company for charges against the customer, and any service deposit required by the company, must be paid before the water will again be turned on.

+
+

If at the time of such discontinuance of service, the customer does not have a deposit with the company, the company may require a cash deposit as a guarantee of the payment of future bills before the water will be turned on.

SECURITY DEPOSITS

JUL 7 - 1978

MISSOURI
Public Service Commission

- (I) The customer has outstanding with the company or a utility providing the same type of service, an unpaid service account which accrued within the last five years and at the time of the request for water service, remains unpaid and not in dispute.
- (II) The customer has in an unauthorized manner interfered with or diverted the service of a utility providing the same service situated on or about or delivered to the customer's premises within the last five years.
- (III) The customer is unable to meet credit rating standards for water utilities adopted by the Public Service Commission.

The company may require a security deposit or other guarantee as a condition of continued water service due to any of the following:

- (I) The service of the customer has been discontinued by the company for non-payment of a delinquent account not in dispute.
- (II) In an unauthorized manner, the customer interfered with or diverted the service of the company situated on or about or delivered to the customer's premises.
- (III) The customer has failed to pay an undisputed bill before the delinquency date for five billing periods out of twelve consecutive billing periods.

A security deposit required by the company is subject to the following terms and conditions:

- (I) A deposit shall not exceed the company's charges applicable to one billing period plus thirty days and shall be computed on the basis of the estimated annual

billing for service unless the security deposit is required from an existing customer, in which case the deposit shall not exceed two times the highest bill of that customer during the preceding twelve months.

(II) Interest at the rate of six percent per annum compounded annually shall be payable on all deposits. Interest shall be paid upon the return of the deposit. Interest shall not accrue on any cash deposit after the date the company has made a reasonable effort to return such deposit to the customer.

(III) Upon termination of service, the deposit, with accrued interest, shall be credited to the final bill and the balance, if any, shall be returned promptly to the customer.

(IV) The credit of a customer shall be established and the deposit and accrued interest shall be refunded promptly by the company upon satisfactory payment by the customer of all proper charges for water service for a period not to exceed twelve consecutive months. For purposes of this rule, payment is satisfactory if made prior to the date upon which the bill becomes delinquent. The company may withhold refund of the deposit funds pending the resolution of a matter in dispute involving discontinuance for non-payment or unauthorized interference by the customer.

(V) If a customer is unable to pay a security deposit in one payment, the company will allow the customer to make payments over a period of at least two months.

* 34. In lieu of a cash security deposit required by these rules, company may accept the written guarantee of a responsible party as surety for a customer services account subject to the following terms and conditions:

(I) It shall be in writing and shall state the terms of guarantee and the maximum amount guaranteed. The company shall not hold the guarantor liable for sums 1,000.00 8/1/78

RULES AND REGULATIONS
GOVERNING THE RENDERING OF SERVICE - Continued

- 40. When, during normal working hours, the Company is unable to regularly secure reasonable and acceptable access to the customer's meter two times in any twelve month period for the purposes of obtaining meter readings, the company will require the installation of a meter equipped with a remote reading attachment (when practical to do so). The attachment will be installed by the Company at the cost listed on Sheet No. 5-B for the initial installation. The remote reading attachment and all parts and portions thereof, shall remain the property of the Company and shall be maintained by the Company. Failure to pay installation charge will result in discontinuation of water service and will only be reconnected under conditions set forth in Rule No. 32, Paragraph 4, Page 12-B. Any customer whether or not access to his meter is a problem, may request the installation of such remote reading attachment and the Company shall install same subject to the charge and conditions set out above. Company will consider Rule No. 28 (II), as an alternative to the above. Company does not consider a key to premises as reasonable and acceptable access, and will not accept and retain the same.
- 41. The Company will not be liable for any claim or damage arising from a shortage of water, the breaking of machinery or other facilities, or for any damage or inconvenience suffered by the customer, or for any claim for interruption in service, lessening of supply, inadequate pressure, or poor quality of water beyond its control.
- 42. As necessity may arise in case of break, emergency or other similar cause, the Company shall have the right temporarily to cut off the water supply in order to make necessary repairs, connections, etc. The Company shall use all reasonable and practicable measures to notify the customer, in advance, or such discontinuance of service. The Company may restrict or regulate the quantity of water used by customers in case of scarcity of when ever the public welfare may require it.
- 43. No customer shall open or close of the Company's curb stops or valves in any public or private line.
- 44. No agent or employee of the Company shall have the right or Authority to bind in it by any promise, agreement, or representation contrary to the letter or intent of these rules and regulations.

RULES AND REGULATIONS
GOVERNING THE RENDERING OF SERVICE - Continued MAY 20 1975

45. Lawn, greenhouse, and garden sprinkling through flexible hoses if equipped with hand or automatic nozzles. Underground lawn sprinklers and irrigation systems may be installed only under special approval by the company. Customer must furnish schematic drawing of the proposed pipe layout, together with valves, sprinkler heads, and appurtenances, including sizes and specifications.

46. The company reserves the right to alter or amend these rules and regulations in the manner provided by law.

FIRE PROTECTION

47. Water from fire hydrants or other fire fighting facilities shall be used only for fire fighting purposes.

48. The company shall have no greater duty, with regard to fire hydrant service or private fire fighting service, than to supply only such volumes of water at such pressures as may be available in the normal operation of the waterworks facilities.

49. Company shall not be considered an insurer of property or persons or to have undertaken to extinguish fire or to protect persons or property against loss or damage by fire or otherwise. In consideration of the level of charges for private fire fighting service, the company shall not be held liable for any amount in excess of 10% of the annual charge for private fire fighting service, as applicable, because of any claim based upon a loss resulting from failure to supply water or pressure or for any other cause.

50. Where metered service is provided to any customer, the company shall not be responsible for the quantities of water or pressures which may be available for any fire fighting facilities or purposes where the customer installs such facilities, or makes connections to his water system for such purposes, on the discharge side of the meter in his service line, and shall not be held liable for any claim based upon loss due to fire or fire fighting.

**Rules and Regulations Governing the Rendering
Of Service**

Rule 48 Private Fire Protection Service

- A. Application for private fire protection service will be considered by the Company subject to the availability of water mains of sufficient size, and the furnishing of fire protection service shall be on the basis of pressure and volumes as may exist in the locality, which pressures and volumes are not guaranteed by the Company. The private fire protection service is not designed to extinguish a fire, but rather to suppress or retard its growth to protect persons and property.
- B. When fire flows are necessary (whether for a single premises or on a Master Water Service Line which is metered at its connection to the Company's main), the meter(s) must be capable of measuring a full range of flows required by the customer (both domestic and fire flows). The Customer with approval from the Company may choose the preferred method of:

A combination service line with a meter designed for both domestic flows and fire flows, typically referred to as a "fire flow" meter, or an approved meter by the Company. For residential single or two family premises combination services only, this meter may not be a "fire flow" meter designed and warranted for use on residential fire suppression systems. That portion of the dual purpose service line from the Company main to the property line shall be the property of the Company in consideration of its perpetual maintenance and upkeep excluding St. Louis County Operations.

Based on Customer's needs and premises requirements, the Customer with approval from the Company may also choose between:

- 1) a split service line configuration which uses a detector check meter(s) on the fire line and a meter suitable for the reasonably anticipated domestic usage requirements on the line not used for fire protection, or
- 2) a dedicated fire service line with detector check meter, which is separate from the domestic water service line.

If a Customer chooses a combination service configuration for a one or two family residential premises that is sized to meet fire flows, this service line will be considered an oversized Domestic Service Line and must conform to the rules for service connections as provided elsewhere in this tariff. An "Application for Special Connection" must be completed and approved in writing by the Company, as well as by the applicable Fire Protection Authority.

A Customer who receives both domestic water and fire protection services through a combination or split service line acknowledges that discontinuance of service for any reason will result in the discontinuance of fire protection service.

- C. If unauthorized usage is made of the fire protection facilities, or unusual circumstances develop, the Company reserves the right, at any time, to install a meter or flow-detection device. In such circumstances the Company will provide the meter, but the cost of meter installation including necessary plumbing, fittings, vaults or meter settings necessary for the installation shall be paid by the Customer.

- 2) a dedicated fire service line with detector check meter, which is separate from the domestic water service line.

C. If unauthorized usage is made of the fire protection facilities, or unusual circumstances develop, the Company reserves the right, at any time, to install a meter or flow-detection device. In such circumstances the Company will provide the meter, but the cost of meter installation including necessary plumbing, fittings, vaults or meter settings necessary for the installation shall be paid by the customer.

D. All new Private Fire Service Line Connections shall include installations of a valve, as approved by the Company, of the same size as the service connection at the junction of the water main, along with an approved backflow prevention assembly with detection meter. The Company or Company's representative will make the service tap to its main at the cost and expense of the Customer. The backflow assembly must be installed on the customer premises in an in-ground vault, above ground, or inside a building. The installation and operation of the backflow assembly must conform to the requirements of the Company and the Department of Natural Resources and shall remain the sole responsibility of the Customer for periodic inspections, testing and maintenance by the Customer. Should a Customer fail to have the backflow assembly inspected, tested or maintained, the Company will refuse to continue service to the premise until such time as the Customer complies with the Rules.

E. No Private Fire Service Line Connections shall be used for domestic, commercial or industrial use unless such connection is authorized by the Company in writing.

F. All new sprinkler pipes and other private fire connection pipes shall be so placed as to be readily inspected. If the pipes are concealed on existing services or not readily identifiable, or if any authorized connections for other uses are in existence, meters shall be installed on each service at the expense of the Customer.

I. Private fire hydrants not installed on public right-of-way or on Company easement and connected to Company mains shall be subject to required contracts as provided in the Company's applicable rate schedule.

J. Any modifications to any existing service lines to retrofit a fire suppression system for either residential or commercial structures shall have written approval of the Company, applicable Fire Protection Authority, and the division of plumbing having jurisdiction of the premises to be served, prior to modification and or installation of said fire suppression system.

K. An applicant for Split, Combination Water Service lines, Special Connection(s) or dedicated fire service lines shall comply with all provisions specified in the Application for Special Connection, which may be modified, altered or changed from time to time by the Company.

L. Service connections for water to be used for the suppression of fire shall be made only upon the terms as provided for in the "Application for Special Connection" for such service, a copy of which is available at the Company's office, and then only after such application has been approved in writing by the Company, as well as by the applicable Fire Protection Authority.

M. A valve controlling the entire supply, as approved by the Company, shall be placed either at the curb or at such other point as may be approved by the Company, and said valve shall be at the expense of the Customer, and any valve pit or vault which may be required will also be furnished by and at the expense of the Customer.

N. Where split services are used for both general and fire purposes, separate charges will be made for each type of service in accordance with the established schedule of rates.

O. The Company shall not be considered in any manner an insurer of property or persons, or to have undertaken to extinguish fire or to protect any persons or property against loss or damage by fire, or otherwise.

P. The Company shall not in any way or under any circumstance be held liable or responsible for personal injury, death, property damage, or any other claim of loss following or resulting from: the termination or discontinuance of a Customer's service; a deficiency in the pressure, volume or supply of water due to the malfunction or failure of a meter; or a deficiency in the pressure, volume or supply of water while meters or service lines are being repaired or replaced, unless such injury, damage or loss is due to the willful misconduct or gross negligence of the Company.

MISSOURI

Public Service Commission

1. On and after February 1, 1970, no charge will be made to the City of Jefferson for rental on public fire hydrants (House Bill No. 241, 75th General Assembly of Missouri Legislature).
2. Installation of public fire hydrants after February 1, 1970.
 - (a) In the event that the City of Jefferson by ordinance or otherwise, shall order the installation of additional public fire hydrants on existing mains having an internal diameter of six inches or larger the Company will install such hydrants at the cost of the Company and will be maintained by and at the expense of the Company.
 - (b) Where pipeline installations are required to carry out an order of the City of Jefferson, to install public fire hydrants, where existing mains in the opinion of the Company are inadequate to provide fire flows to such hydrants, the Company will install such mains at the cost of the City of Jefferson and will install such hydrants at the cost of the Company and will be maintained by and at the expense of the Company.
 - (c) Whenever a change in the location of a public fire hydrant is ordered or requested by the City of Jefferson or made necessary due to a change by the City of Jefferson in line or grade of any roadway, street, avenue, alley, bridge, curb or walk or public place, such change will be made by the Company and the cost of such change will be paid one-half (1/2) by the Company and one-half (1/2) by the City of Jefferson, under the provisions of Ordinance No. 8036 approved July 1, 1968.

DEFINITIONS

1. Individual(s) shall mean a person or group of persons requesting a water main extension to make water service available to an existing or proposed, detached, single family residence(s) occupied by or to be occupied by the requesting party(ies).
2. Developer shall mean a person, firm or corporation who sells two or more lots, parcels or tracts of land to others for the purpose of constructing thereon any type of building; who constructs any type of building, on land which has been subdivided for sale, lease or rent by or to a party(ies) other than the developer.
3. Subdivision shall mean the legal dividing of a tract of land into two or more tracts, lots or parcels.

GENERAL

4. Any individual or developer may request water service to be made available to any lot(s) or subdivision under these rules and regulations.
5. The minimum size of water main to be installed under these rules and regulations shall be 6-inches inside diameter.
6. The normal routing for water main extensions shall be in dedicated streets.
7. The terms of water main extension contracts for industrial and commercial water users, other than developers, shall be negotiated on an individual basis.
8. Company shall design and be the sole judge as to the adequacy of any water main extension and appurtenances.

RULES AND REGULATIONS

GOVERNING WATER MAIN EXTENSIONS - { Continued } May 20 1975

EXTENSIONS FOR INDIVIDUAL(S)

- 9. A water main extension must extend to the center line of the building lot. In instances where the building lot has frontage, paralleling the route of water main extension, in excess of 150 feet, the water main extension shall extend to a point opposite the most distant side of the house or driveway, whichever may be greater.
- 10. A free footage allowance shall be made by the company in accordance with the policy as set forth in Appendix "A" of Exhibit "A".
- 11. In instances where the free footage allowance is not sufficient to permit the installation of the required water main extension, the individual(s) shall deposit with company the estimated excess cost, in the form of a refundable deposit, and enter into an agreement with the company of the type attached hereto and marked as Exhibit "A". The cost of the water main extension shall be based on the use of a six-inch inside diameter main.
- 12. In instances where more than one individual has requested a water main extension, the refundable deposit shall normally be divided in proportion to front footage of the lots. Other methods of dividing the refundable deposit may be used, provided they are acceptable to all individuals and the company.

MISSOURI
Public Service Commission

EXTENSIONS FOR DEVELOPERS

- 13. A water main extension must extend to the extreme property lines of the development as may be appropriate.
- 14. Each separate water main extension to and/or within a subdivision shall be the subject of a separate agreement.
- 15. Developers shall deposit with company the estimated cost of the required water main extension and enter into an agreement with the company of the type attached hereto and marked as Exhibit "B". If additional facilities, such as booster pumping stations, storage tanks, etc. are determined by company to be necessary to provide adequate service to any subdivision, such facilities shall be constructed at the sole cost of developer and shall be the subject of a separate agreement.

WATER MAIN EXTENSION AGREEMENT

EXHIBIT "A"

2. Upon execution hereof, the Developer shall deposit with the Company the sum of _____ DOLLARS (\$_____). Such deposit shall be adjusted, downward only, based upon the determination of the actual cost by Company of facilities installed including water main and appurtenances, overheads, engineering, accounting, and legal expenses plus the cost of obtaining any necessary permits from governmental agencies or organized districts. It if is necessary to adjust the amount of such deposit, in accordance with the terms of this paragraph, a supplemental memorandum will be prepared setting forth the actual costs and shall be attached hereto and made a part hereof. For the purpose of calculating actual costs of the above mentioned project, overheads are determined as follows: The total Company's internal engineering and inspection, administrative and legal costs not directly attributable to a specific project for the current year is divided by the total Company's projected current year construction costs to be used as a percentage. This percentage is reviewed quarterly and adjusted, if necessary, to properly recover actual costs incurred.

+

3. The Company will use its best efforts to commence and carry to completion as soon as possible the installation of said extension, having in mind, however, delays which may be occasioned by weather, acts of God, or the public enemy, strikes, or other matters not within its control.

WATER MAIN EXTENSION AGREEMENT

MISSOURI EXHIBIT "A"

Public Service Commission

3. For the purpose of this Agreement, a ~~customer~~ shall mean any person, firm, corporation, company, association, governmental unit or owner of property as guarantor furnished water service by the Company; and the term "Extension" shall mean the mains and appurtenances shown on attached plan.
4. The Company will use its best efforts to commence and carry to completion as soon as possible the installation of said extension, having in mind, however, delays which may be occasioned by weather, acts of God or the public enemy, strikes, or other matters not within its control.
5. The amount of the said "refundable cost" shall be retained by the Company without interest. The Company will, however, refund proportionately to Applicant(s), a sum calculated in accordance with the formula set forth in Appendix "A" hereof for each new customer served through a service lateral directly connected to said extension. Only one such refund will be made for each customer served.
6. The total of all refunds made to the Applicant(s) under the provision of Paragraph 5 shall not exceed the amount of the "refundable cost" as described in Paragraph 2. No refunds shall be made, under the provision of Paragraph 5 for any customer who is rendered water service from said extension after ten (10) years from the date of this agreement.
7. It is further mutually understood and agreed that the mains and appurtenances within the limits of the streets, avenues, roads, ways, or easement areas, whether or not attached to or serving customers but constructed as part of the extension, shall be and remain the property of the Company, its successors and assigns. The Company shall have the right to extend any main installed by it pursuant to the terms of this Agreement in or to other land ~~or~~ or avenues, but the Applicant(s) shall not by reason thereof be entitled to any refunds other than those above provided for 1987

AGREEMENT between _____
hereinafter called the "Company" and _____
hereinafter called the "Developer".

WHEREAS, Developer has requested the Company to extend its system as follows in accordance with the map or plan attached hereto, made a part hereof:

and

WHEREAS, the Company is willing to make such extension upon the terms and conditions hereinafter set forth.

NOW, THEREFORE, in consideration of the premises and of the mutual covenants and agreements herein contained, THE PARTIES HERETO AGREE AS FOLLOWS:

1. Developer hereby applies to the Company for the said extension of its system, and the Company agrees to construct the said extension upon the terms and conditions hereinafter set forth and in accordance with its rules and regulations.
2. Developer shall advance to the Company upon the execution hereof the sum of _____ DOLLARS (\$ _____), which amount the Company estimates to be the cost of installing the said extension, including any overhead cost to the Company such as supervision, engineering, legal expenses and the cost of obtaining any necessary governmental permits. Said estimated cost contains a provision of \$ _____ for rock excavation.

WATER MAIN EXTENSION AGREEMENT

MISSOURI
Public Service Commission EXHIBIT "B"

If the actual cost of rock excavation varies from the aforesaid provision, the amount of Developer's advance will be adjusted accordingly. The actual cost thus finally determined shall be referred to as the "refundable cost". If it is necessary to adjust the amount of Developer's advance, in accordance with the terms of this paragraph, a supplemental memorandum will be prepared setting forth the "refundable cost" and shall be attached hereto and made a part hereof.

- 3. For the purpose of the Agreement, a customer shall mean any person, firm, corporation, company, association, governmental unit or owner of property as guarantor furnished water service by the Company; and the term "Extension" shall mean the mains and other water facilities shown on attached plan.
- 4. The Company will use its best efforts to commence and carry to completion as soon as possible the installation of said extension, having in mind, however, delays which may be occasioned by weather, acts of God or the public enemy, strikes, or other matters not within its control.
- 5. The amount of the said "refundable cost" shall be retained by the Company without interest. The Company will, however, refund to Developer an annual sum calculated in accordance with the formula set forth in Appendix A hereof for each customer served through a service lateral directly connected to said extension during the term of this agreement.
- 6. The total of all refunds made to Developer under the provisions of Paragraph 5 shall not exceed the amount of the "refundable cost" as described in Paragraph 2. No refunds shall be made, under the provision of Paragraph 5, for any customer who is rendered water service from said extension after ten (10) years from the date of this agreement.

WATER MAIN EXTENSION AGREEMENT

It is further understood and agreed that in case of any damage to the water pipes or their appurtenances, or other injuries to the property of the Company in connection therewith, which are caused by the acts or neglect of Developer, the amount of such damage shall be paid to the Company by the said Developer.

12. It is understood and agreed by and between the parties hereto that the right to receive payment under the terms hereof shall be personal to Developer and the same shall not be assigned either as collateral security or otherwise.

13. The term of this agreement shall be for ten (10) years from the date hereof.

IN WITNESS WHEREOF, the parties hereto have caused their respective corporate seals to be hereunto affixed and these presents to be signed by their duly authorized officers this _____ day of _____, 19_____.

WATER MAIN EXTENSION AGREEMENT

APPENDIX A
(Extensions for Developers)

REFUNDS

$$R = \frac{(1-B)(C) - (1-B)(D)(C)}{E + (1-B)(F)} \times .1$$

where:

R = Annual refund per customer connected during the term of the agreement.

B = combined tax rate for Federal and State income taxes for the previous calendar year.

C = average residential revenue for the previous calendar year.

D = operating ratio for the previous calendar year found by dividing the sum of the total operating and maintenance expenses plus total taxes, other than income taxes by the total operating revenues.

E = rate of return on rate base awarded in the Order for the Company's last general rate proceeding.

F = depreciation rate authorized for use for distribution mains.

<p>RULES AND REGULATIONS GOVERNING WATER MAIN EXTENSIONS - Continued</p>		<p>RECEIVED AUG 11 1976 MISSOURI Public Service Commission</p>
<p>WATER MAIN SUPPLEMENTAL RULE</p> <p>To enable Company to pay state and federal income tax which result from the treatment of an advance for construction as gross income, the amount of such advance, as initially estimated and as finally actually determined under the Rule herein regarding extension of mains, shall be doubled. In lieu of up to fifty percent of a doubled advance, a letter of credit in a corresponding amount and from an financial institution with a state or federal charter in good standing shall be accepted by Company. Such letter of credit shall be accepted for the sole purpose of establishing a source from which Company may, for a period not to exceed six months from the end of the tax year in which a doubled advance is treated as gross income, draw funds to pay state and federal income taxes which result from such treatment. All amounts paid in excess of fifty percent of a doubled advance shall be retained, in an interest bearing account approved by the Commission, for the purpose of paying state and federal income taxes which result from treating such advance as gross income. If none, or only a portion, of the escrow funds are necessary to pay state and federal income taxes which result from the treatment of advances for construction as gross income, the excess funds plus interest accrued on the total escrow funds less proper expenses necessary to administrate the escrow account (not to exceed .7 of 1 percent of the total escrow funds) shall be refunded to the person or entity who advanced the funds. Such interest and excess funds shall be refunded within six months of the end of the tax year in which the doubled advance in question is treated as gross income. At no time shall the administrative cost exceed the interest earned on the escrow amounts.</p> <p>Refunds on a doubled advance for construction shall be calculated by doubling the amount which would otherwise be due under the Rule herein regarding extension of mains. In no event shall Company be obligated to refund an amount greater than the amount of a doubled advance, plus interest earned on the escrow account less the expense necessary to administrate the escrow fund.</p>
