Public Service Commission

# 6. SWITCHED ACCESS SERVICE

#### 5.3 Obligations of the Telephone Company

# 6.3.4 Trunk Group Measurement Reports

Where technologically feasible and subject to availability, the Telephone Company will, upon request, make available to the customer on previously agreed to intervals, trunk group data in the form of usage in CCS, peg count and overflow.

# 6.3.5 Determination of Number of Transmission Paths

The Telephone Company will determine the number of Switched Access Service transmission paths to be provided for the Switched Access Feature Group C busy hour minutes of capacity ordered. A transmission path is a communications path within the frequency bandwidth of approximately 300 to 3000 Hz or a derived communication path of a frequency bandwidth of approximately 300 to 3000 Hz provided over a high frequency analog facility or a high speed digital facility between a customer's premises and a Telephone Company location. The number of transmission paths will be developed using the total busy hour minutes of capacity by type (as described in 6.1.1(A) preceding) for the end offices for each Feature Group ordered from a customer's premises. The total busy hour minutes of capacity by type for the end office will be converted to transmission paths using standard Telephone Company traffic engineering methods. The number of transmission paths provided shall be the number required based on (1) the use of access tandem switches and end office switches, (2) the use of end office switches only, or (3) the use of tandem switches only.

# 6.3.6 Determination of Number of End Office Transport Terminations

For analog entry switches, a termination will be provided for each transmission path provided. For digital entry switches an equivalent termination will be provided for each transmission path provided.

#### 6.3.7 Design Blocking Measurement

For Feature Group C, the design blocking objective will be no greater than one percent (.01) between the point of termination at the customer's designated premises and the first point of switching when traffic is directly routed without an alternate route. Standard traffic engineering methods will be used by the Telephone Company to determine the number of transmission paths required to achieve this level of blocking.

# 6. SWITCHED ACCESS SERVICE

#### 4.4 Obligations of The Customer

In addition to the Obligations of the customer set forth in 2. preceding, the customer has certain specific obligations pertaining to the use of Switched Access Service. These obligations are as follows:

# 6.4.1 Report Requirements

Customers are responsible for providing the following reports to the Telephone Company, when applicable.

# 6.4.2 Jurisdictional Reports

When a customer orders FGA, FGB & FGC Switched Access Service for both interstate and intrastate use, the customer is responsible for providing reports as set forth in 2.3.14. Charges will be apportioned in accordance with those reports. The method to be used for determining the intrastate charges is set forth in 2.3.15 preceding.

# 6.4.3 On and Off-Hook Supervision

The customer facilities shall provide the necessary on-hook, off-hook and disconnect supervision.

#### 6.4.4 Trunk Group Measurement Reports

With the agreement of the customer, trunk group data in the form of usage in CCS, peg count and overflow for its end of all access trunk groups, where technologically feasible, will be made available to the Telephone Company. This data will be used to monitor trunk group utilization and service performance and will be based on previously arranged intervals and format.

#### 5.5 Rate Regulations

This section contains the specific regulations governing the rates and charges that apply for Switched Access Service.

00T 1 C 1986

# 6. SWITCHED ACCESS SERVICE

#### 6.5 Rate Regulations

# 6.5.1 Types of Rates and Charges

There are two types of rates and charges that apply to Switched Access Service. They are usage rates and nonrecurring charges. These rates and charges are applied differently to the various rate elements as set forth in following:

#### (B) <u>Usage Rates</u>

Usage rates are rates that apply only when a specific rate element is used. These are applied on a per access minutes of use basis. Access minute charges are accumulated over a monthly period.

# (C) Nonrecurring Charges

Nonrecurring charges are one time charges that apply for specific work activities (i.e., installations, moves or changes to an existing service).

# 6. Rate Regulations

## 6.5.4 Minimum Monthly Charge

Switched Access Service is subject to a minimum monthly charge. The minimum charge applies for the total capacity provided.

For the Local Switching, Line Termination and Directory Assistance Information Surcharge rate elements, the minimum monthly charge is the sum of the charges set forth in 6.6.3(A), (B) and 6.6.2 (C) following for the measured or assumed usage for the month.

For the Local Transport rate element, the minimum monthly charge is assessed in terms of a Minimum Monthly Usage Charge (MMUC). If the actual Local Transport usage charge for the month is higher than the MMUC, the customer pays the actual charge. If the Local Transport usage charge is lower than the MMUC, the customer pays the MNUC. The MMUC is determined as set forth in 6.5.5 following. Rates for actual usage are set forth in 6.6.2(A) following.

#### 6.5.5 Minigum Monthly Usage Charge

The MMUC (the minimum transport charge) varies by capacity. This charge applies only to Switched Access Services that are charged for on a measured basis when that usage falls below a certain threshold.

JAN 1 1987

# 6. SWITCHED ACCESS SERVICE

OCT 1 9 1966

# 6.5 Rate Regulations

# 6.5.5 Minimum Monthly Usage Charge (Cont'd)

The MMUC is as follows:

	Premium
	Minimum Transport
Mileage	Charge for FGC
Bands	Per BHMC*
0 to 5	\$0.71
Over 5 to 12	2.28
Over 12 to 22	2.72
Over 22 to 25	4.23
Over 25	8.24

\*BHMC is the number of busy hour minutes of capacity provided.

The MMUC billed to customers for FGB & FGC will be based on the total number of BHMCs (by type of BHMC) provided in and/or out of the end office.

## 6.5.12 Mileage Measurement

# MISSOURI Public Service Commission

- (A) The mileage to be used to determine the monthly rate for the Local Transport of usage rated services is calculated on the airline distance between the end office switch where the call carried by Local Transport originates or terminates and the Company's Interconnection Point, as defined in Section (T) 2.5, except as set forth in (C) following. Where applicable, the V&H coordinates method is used to determine mileage. This method is set forth in the appropriate (T) EXCHANGE CARRIER ASSOCIATION TARIFF filed with F.C.C. (T)
- (B) Mileage is shown in 6.6.2 following in terms of mileage bands. To determine the rate to be billed, first compute the mileage using the V&H coordinates method, then find the band into which the computed mileage falls and apply the rate shown for that band. If the calculation results in a fraction of a mile, always round up to the next whole mile before determining the mileage band and applying the rates.

# 7.3 Rate Regulations

#### 7.3.4 Moves (Cont'd)

#### (A) Moves Within the Same Building

When the move is to a new location within the same building, the charge for the move will be an amount equal to one half of the nonrecurring (i.e., installation) charge for the service affected. There will be no change in the minimum period requirements.

# (B) Moves to a Different Building

Moves to a different building will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply. New minimum period requirements will be established for the new services. The customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

7.3.5 Mileage Measurement

Mileage charges are shown with each channel type. Mission the rate to be billed, first compute the mileage from the end office to the interconnection point using the V&H coordinates method, as set forth in the Exchange Carrier Association Tariff F.C.C. NO. 2, then multiply the resulting number of miles times the Channel Mileage Facility rate, and add the Channel Mileage Termination Rate for each termination. When the calculation results in a fraction of a mile, always round up to the next whole number before determining the mileage and applying the rates.

8.1 Recording and Message Processing Service

#### 8.1.6 Rate Regulations

- (A) The Recording and Message Processing Service charges for recording, editing, assembly, and rating apply per message rated whether or not the customer's schedule of rates specifies billing on a per message basis or any other basis.
- (B) When message detail is data-transmitted to or received from a customer or Exchange Telephone Company location by the Telephone Company, charges will be on an individual case basis.
- (C) When message detail is entered on a data file or magnetic tape for provision of message detail to a customer, the per tape charge applies for each data file or tape prepared, and the per record charge applies for each detail record entered on the date file or tape. The Telephone Company will determine the charges based on the number of data files or magnetic tapes prepared and on its count of the records entered thereon.
- (D) All rates and charges for Recording and Message Processing Service remain in effect unless canceled or otherwise modified by approved revisions to this Tariff.

#### B.1.7 Rates and Charges

# 8.2 Billing Service

At the request of a customer, the Telephone Company with reasonable notice and reasonable effort, at its discretion will provide Billing Service.

# B.2.1 Bill Processing Service

# (A) General Description

(1) Bill Processing Service is the preparation of bills for message-billed service and bulk-billed service, mailing of statements of the amounts due for service received from the customer and the collection of deposits and monies due from the end users. Bill Processing Service includes message-billed (when necessary) and bulk-billed account establishment, posting of rated messages and rate elements, rendering of bills, collection of deposits, inquiry, receiving payments, maintenance of accounts, treatment of accounts, and message investigation.
