INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

I. BASIC RATE INTERFACE (BRI) ⁽¹⁾ (C)

A. General

1. Integrated Services Digital Network - Basic Rate Interface (ISDN-BRI) is a local exchange telecommunications service that provides integrated voice and data communications capability. ISDN-BRI service supports the simultaneous transmission of voice and data over a single exchange access line.

ISDN-BRI provides a customer two B-channels with transmission speeds up to 64 Kbps each and one 16 Kbps D-channel. The service provides switched communication paths providing end user access to a variety of network services and features including data, voice and video, which conforms to internationally developed, published and recognized standards generated by the International Telecommunications Union.

2. Service Capabilities

- a. ISDN-BRI consists of three distinct channels delivered to the customer's premise: two B (bearer) channels and one D (delta) channel. This is also known as 2B+D. ISDN-BRI is not available in other channel configurations of 1B+D or 0B+D.
- b. The B-channel carries voice and/or data communications at speeds up to 64 Kbps, from the customer's premise, over the loop facility, to the central office. Packet data services are not available over the B-channel.
- c. The D-channel carries administrative signaling at 16 Kbps for call-control for either a voice or data B-channel call on the ISDN-BRI line. The D-channel does not have voice capability. Packet data services are not available on the D-channel.
- d. Customers subscribing to ISDN-BRI must comply with ISDN Basic Rate Network Interface specifications as specified by the Company. The ISDN Basic Rate Interface is comprised of a limited set of standard user-network interfaces. The BRI customer premises equipment (CPE) located at the customer premises must be compatible with the network interface. This interface is defined as follows:

PUBLIC TELEPHONES

MISSOURI
PUBLIC SERVICE COMMISSION

- I. A public telephone is an exchange station installed at the Company's initiative or at its option, at a location chosen or accepted by the Company as suitable and necessary for furnishing service to the general public.
- II. Public telephones are ordinarily coin operated, except in some cases where the public telephone is in the charge of a Telephone Company attendant or the service is coinless.
- III. Public telephones are installed primarily for the use of the general public in making outgoing calls. It is contemplated that the occupants of the premises in which the public telephones are located have subscribed or shall subscribe for such service as is necessary in the judgement of the telephone company, in the conduct of their business. The public telephones are supplemental to such customer's telephones, and their telephone numbers will not be listed in the directory nor shall the agent on whose premises they are located be permitted to advertise their numbers.
- IV. Public telephones are installed without a deposit or guarantee. Each local message is charged to the public at twenty-five cents (\$0.25) and toll messages are charged for at the established toll rates of the company responsible for carrying the call. Additionally, an operator services charge or its equivalent may also be applicable.
- V. Extension stations on public telephones will not be permitted.
- VI. In all cases the Company furnishes and displays such of its standard signs as are necessary to properly direct customers to the station.
- VII. The Telephone Company may furnish public telephones without coin collecting equipment in selected locations for the purpose of satisfying demand for optional billing services on an originating basis only. In the normal mode, Coinless Public Telephone service affords customers the option of selecting a preferred billing arrangement for outgoing messages: charging to a third number or to a Telephone Company credit card account, or placing calls collect. In certain locations, however, calls may be billed on a collect basis only.

2. Service Capabilities (Cont'd)

d. (Cont'd)

A two-wire interface is the physical interface between a central office switch equipped with ISDN and the customer premises equipment which is necessary for terminating a telephone circuit or facility at the customer premises.

3. Standard Features

a. Closed User Group – allows the user to establish subnetworks within which the members of the Closed User Group can communicate. Each data terminal in a Closed User Group can be arranged in one of the following modes:

- (1) Outgoing Access – The data terminal originates outgoing calls only.
- (2) Incoming Access – The data terminal receives incoming calls only.
- (3) Incoming Calls Barred – The data terminal originates outgoing calls only to the data terminals in the Closed User Group with which it is associated.
- (4) Outgoing Calls Barred – The data terminal receives incoming calls only from the data terminals in the Closed User Group with which it is associated.
- (5) Unrestricted Access – The data terminal receives and originates both incoming and outgoing calls.

b. Configuration Group – Associates a button or buttons of an ISDN-CPE station to a feature or group of features. Each different telephone set button arrangement requires that a different Configuration Group be assigned.

(11) Feature Package 1 - This package includes:
Calling Number ID/Calling Name ID
Call Forwarding
Flexible Calling
Automatic Callback
Additional Call Offering

(12) Loop Extension – ISDN-BRI is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. This limitation is a cable plant distance of approximately 18,000 feet. The actual distance is dependent on decibel (db) loss and not just physical loop length. Should the customer's service location exceed said limitations, service will be provided where the Company has compatible facilities available, or where existing facilities can be made compatible by the addition of special equipment. This service, which carries an additional charge, is called Individual Line Loop Extension and will extend the loop to approximately 36,000 feet.

B. Regulations

1. This service is offered only where facilities and appropriate technology exist.
2. Local voice and data calls will be billed on a flat-rate basis, as shown in Section 23.I.C. Toll charges shall apply when data or voice calls are made outside of the customer's designated local calling area. When two simultaneous B-channels are combined for a maximum data speed of 128 Kbps, the toll call will be billed as if two calls were dialed by the originating customer.

⁽¹⁾ **Limited to existing residence customers at existing locations as of July 30, 2008.** (N)

5. Optional Services and Features* (Cont'd)

a. (Cont'd)

- (11) Feature Package 1 - This package includes:
 Calling Number ID/Calling Name ID
 Call Forwarding
 Flexible Calling
 Automatic Callback
 Additional Call Offering

- (12) Loop Extension - ISDN-BRI is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. This limitation is a cable plant distance of approximately 18,000 feet. The actual distance is dependent on decibel (db) loss and not just physical loop length. Should the customer's service location exceed said limitations, service will be provided where the Company has compatible facilities available, or where existing facilities can be made compatible by the addition of special equipment. This service, which carries an additional charge, is called Individual Line Loop Extension and will extend the loop to approximately 36,000 feet.

B. Regulations

- 1. This service is offered only where facilities and appropriate technology exist.
- 2. **Local voice** and data calls will be billed on a flat-rate basis, as shown in Section 23.I.C. Toll charges shall apply **when data** or voice calls are made outside of the customer's designated local calling area. When two simultaneous B-channels are combined for a maximum data speed of 128 Kbps, the toll call will be billed as if two calls were dialed by the originating customer. (CT)

* ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

I. BASIC RATE INTERFACE (BRI) ⁽¹⁾ (Cont'd) (C)

B. Regulations (Cont'd)

3. In exchanges where IntraLATA Presubscription has been implemented, only one InterLATA and one IntraLATA Carrier may be selected for all B-channels associated with the same ISDN-BRI Service. Access via 101XXXX to other Interexchange Carriers is available.
4. A minimum service period of three months is required.
5. The Company shall terminate ISDN-BRI Services at the Company Network Interface Device (NID) located at the customer's premises.
6. Two Primary Directory Numbers will be included with an ISDN-BRI Service, one for each B-Channel. If Additional Directory Numbers are required on either channel, an additional charge, as specified in Section 23.I.D., will apply for each additional number.
7. ISDN-compatible customer premises terminal equipment is required for proper operation. It is the customer's responsibility to provide necessary power and obtain such equipment.
8. The provisions for temporary suspension of service, as defined in Section 34 of this tariff, do not apply to ISDN-BRI Service.
9. This service is available only from central offices, which have the necessary facilities to provide ISDN-BRI on the standard network platform. In the event a customer is provided service from a non-ISDN compatible central office, the Company will provide ISDN-BRI Service from an alternative serving central office. This provision is accomplished by utilizing a 'hubbing' architecture and the subscriber may be required to accept a unique NXX.

When a unique NXX is required, charges for Foreign Exchange Service, specified in the Company Private Line Tariff, P.S.C. MO.-No. 24, will apply in addition to the rates and charges included in this section. Due to the nature of the 'hubbing' architecture and the use of a unique NXX, the local calling area (e.g., Extended Area Service) may change.

4. The Non-Recurring Charge for ISDN Service Capability Package installation will be discounted 50% when a customer commits to a 12-month service period or 100% when a customer commits to a 24-month service period. If termination of service prior to the end of the commitment occurs, the customer is responsible for payment of the remainder of the Non-Recurring Charge.
5. ISDN-BRI provides for one Configuration Group to be established at the initial implementation of service. Subsequent additions of Configuration Groups or in excess of one group on the initial establishment of service will be charged an installation charge per Configuration Group.
6. A Change Charge will apply for a database change subsequent to the installation of an ISDN-BRI Service. This includes changing, adding, or deleting features or feature packages, directory numbers, or number appearances.
7. However, this termination requirement will not apply when the customer converts to a next generation service offering of a separately tariffed service, provided that:
 - (a) The service period for the new service offering is a minimum period equal to or exceeding the remaining service period of the disconnected arrangement, whichever is greater; and
 - (b) The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between installation of the new service and disconnection of the existing service; and
 - (c) The service orders are for the same customer at the same location.

Integrated Services Digital Network (ISDN) to Frame Relay Service (FRS) is an example of a next generation service offering.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

REC'D JUN 19 2002

II. PRIMARY RATE INTERFACE (PRI)

These rates and regulations are applicable to Integrated Services Digital Network Primary Rate Interface (ISDN-PRI) Service established prior to June 4, 2001. These rates will remain in effect until all contracts containing these rates have expired or until all applicable customers have converted to ISDN-PRI Service Terms and Conditions set forth in Section 23.III. of this tariff.

A. General

1. Integrated Services Digital Network (ISDN) - Primary Rate Interface (PRI) Service is an intraLATA group of offerings supported by the ISDN architecture.
2. ISDN-PRI Service provides a method of access to the telephone network called Primary Rate Access. Primary Rate Access is an ISDN based, DS1 access link to the telecommunications network and provides integration of multiple voice and data transmission channels on the same line. The service will initially provide connectivity between an ISDN-PBX or other ISDN-compatible CPE and a serving central office. The basic channel structure for Primary Rate Access is twenty-three 64 Kbps B-Channels and one 64 Kbps D-Channel. Options are available for plus or minus 23 B-channels. These channels may be used to connect the customer's CPE to the **Public Network** (i.e., outward, inward, and two-way trunks, and WATS/800/888 Service access lines).
3. ISDN-PRI is a service for the transmission of digital signals only. Clear Channel Capability and Extended Superframe Format are inherent to the service.
4. Unless specified, the regulations for ISDN-PRI Service apply in addition to the regulations set forth in Section 25 of this tariff.
5. ISDN-PRI Service is provided within a LATA from central offices where appropriate ISDN facilities are available as determined by the Company. Service inquiries will be necessary to determine availability. Special construction charges may apply as specified in Section 8 of this tariff.

(CT)

B. Regulations

1. Customer Premises Equipment (CPE) that is compatible with ISDN-PRI Service is the responsibility of the customer for provisioning.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

II. PRIMARY RATE INTERFACE (PRI)

These rates and regulations are applicable to Integrated Services Digital Network - Primary Rate Interface (ISDN-PRI) Service established prior to June 4, 2001. These rates will remain in effect until all contracts containing these rates have expired or until all applicable customers have converted to ISDN-PRI Service Terms and Conditions set forth in Section 23.III. of this tariff.

(AT)
|
(AT)

A. General

1. Integrated Services Digital Network (ISDN) - Primary Rate Interface (PRI) Service is an intraLATA group of offerings supported by the ISDN architecture.
2. ISDN-PRI Service provides a method of access to the telephone network called Primary Rate Access. Primary Rate Access is an ISDN based, DS1 access link to the telecommunications network and provides integration of multiple voice and data transmission channels on the same line. The service will initially provide connectivity between an ISDN-PBX or other ISDN-compatible CPE and a serving central office. The basic channel structure for Primary Rate Access is twenty-three 64 Kbps B-Channels and one 64 Kbps D-Channel. Options are available for plus or minus 23 B-channels. These channels may be used to connect the customer's CPE to the Public Circuit Switched Network (i.e., outward, inward, and two-way trunks, and WATS/800/888 Service access lines).
3. ISDN-PRI is a service for the transmission of digital signals only. Clear Channel Capability and Extended Superframe Format are inherent to the service.
4. Unless specified, the regulations for ISDN-PRI Service apply in addition to the regulations set forth in Section 25 of this tariff.
5. ISDN-PRI Service is provided within a LATA from central offices where appropriate ISDN facilities are available as determined by the Company. Service inquiries will be necessary to determine availability. Special construction charges may apply as specified in Section 8 of this tariff.

B. Regulations

1. Customer Premises Equipment (CPE) that is compatible with ISDN-PRI Service is the responsibility of the customer for provisioning.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

II. PRIMARY RATE INTERFACE (PRI) (Cont'd)

B. Regulations (Cont'd)

2. The Company shall not be responsible if changes in any of the equipment, operations or procedures of the Company utilized in the provisioning of ISDN-PRI Service render any facilities provided by the customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.
3. Digital transmission rates at speeds less than those indicated may be accomplished as a function of the particular CPE furnished by the user.
4. Temporary suspension of service, as defined in Section 34 of this tariff, does not apply to ISDN-PRI Service.
5. Service Order Charges specified in Section 30 apply in addition to rates and charges following.
6. The minimum service period for ISDN-PRI Service is six months.
7. Verification and Emergency Interrupt service is not available for ISDN-PRI Service.
8. Telephone numbers transmitted via the Optional Incoming Call Identification feature are intended solely for the use of the ISDN-PRI Service Subscriber. Resale of this call identification information is prohibited by this tariff.
9. WATS/800/888 Services utilizing ISDN-PRI Service are available in the Company Intrastate Wide Area Telecommunications Tariff P.S.C. MO. No. 25.
10. Non-facility Associated Signaling (NFAS) provides the capability to serve multiple DS1's over a single D-Channel (NB+D). This feature can be ordered where switch capabilities exist as stipulated in the vendor technical documentation. When NFAS is selected, the customer will order one ISDN-PRI Service arrangement with 23 B-Channels and 1 D-Channel. Additional ISDN-PRI Services arrangements are ordered with 24 B-Channels at rates and charges provided in Section 23.II.F. The D-Channel activated on the initial arrangement serves the additional ISDN-PRI arrangements. If a customer desires, the customer may also request a back-up D-Channel with the NFAS option (NB+2D). It is recommended that D-Channels be provisioned in separate ISDN-PRI Service arrangements.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

II. PRIMARY RATE INTERFACE (PRI) (Cont'd)

B. Regulations (Cont'd)

11. This service is available only from central offices, which have the necessary facilities to provide ISDN-PRI on the standard network platform. In the event a customer is provided service from a non-ISDN compatible central office, the Company will provide ISDN-PRI Service from an alternative serving central office. This provision is accomplished by utilizing a 'hubbing' architecture and the subscriber may be required to accept a unique NXX.

When a unique NXX is required, mileage charges for intraLATA 1.544 Mbps channels as defined in the Telephone Company Intrastate Access Service Tariff will apply in addition to the rates and charges included in this section. Due to the nature of the 'hubbing' architecture and the use of a unique NXX, the local calling area (e.g., Extended Area Service) may change.

12. Voice service is limited to customers served by offices which have the necessary facilities to provide ISDN-PRI on the standard network platform. Customers served by non-ISDN compatible offices will be limited to the transmission of data only.

13. This service is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. Should the customer's service location exceed said limitations, service will be provided where the Company has electrically compatible facilities available, or where existing facilities can be made electrically compatible when regenerated or extension service is provisioned.

C. Definitions

B-Channel - A bidirectional synchronous channel capable of supporting 64 Kbps of digital transmission.

D-Channel - A 64 Kbps digital signaling only channel for call establishment when used with Primary Rate Access.

64 Kbps Clear Channel Capacity (CCC) - A B-Channel connection that provides end-to-end digital connection in which all 64 Kbps of bandwidth are available for customer use.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

II. PRIMARY RATE INTERFACE (PRI) (Cont'd)

D. APPLICATION OF RATES

1. ISDN-PRI Service Primary Rate Access Lines furnished between a serving central office and the customer designated premises will be charged at rates per each Primary Rate Access Line.
2. Nonrecurring charges will not be applicable for the Primary Rate Access Line or interoffice channel facilities when upgrading an existing TransLink Service to an ISDN-PRI Service.
3. ISDN-PRI Primary Rate Access Line rates, including interoffice channels if applicable, apply in addition to Primary Rate Interface and Primary Rate Channel charges.

E. SERVICE COMPONENTS

1. The customer may choose any number of channels up to twenty-three (twenty-four with NFAS) per Primary Rate Access (facility) to be active with a corresponding number of services (i.e., inward/outward trunks, WATS Lines, 800/888 Service) selected. The customer may also choose to have more services selected than channels available for specific applications. The total number of communication paths may not exceed the number of channels subscribed.
2. The components for ISDN-PRI Service will be as follows:
 - Primary Rate Access Line
 - Primary Interface
 - Primary Rate Channels
 - Incoming Call Identification
 - a. Primary Rate Access Line - Will provide a four-wire access loop from the customer premises to the serving central office. The transmission of this loop supports Clear Channel Capability.
 - b. Primary Rate Interface - Provides the multiplexing to support up to twenty-three (23) B-channels at 64 Kbps and one (1) D-channel for signaling also at 64 Kbps. When NFAS is ordered, the Primary Rate Interface can provide up to twenty-four B-Channels at 64 Kbps.

II. PRIMARY RATE INTERFACE (PRI) (Cont'd)

REC'D JUN 19 2002

E. SERVICE COMPONENTS (Cont'd)

Service Commission

2. The components for ISDN-PRI Service will be as follows: (Cont'd)

c. Primary Rate Channels - Will provide an unlimited usage of rated channel that will allow either voice or data transmission up to 64 Kbps.

(1) Voice calls may be completed to both ISDN and non-ISDN lines.

(2) Data Transmission on the B-Channels will be at 64 Kbps within the switch and between ISDN compatible central offices. ISDN interconnection to non-ISDN equipped central offices may be potentially subjected to analog transmission or sub-rated to 56 Kbps. (CT)

(3) The customer may choose to subscribe to additional non-exchange based services. Initial choices for these services will be WATS and 800/888 Service. The subscription to these services is in addition to the charges for ISDN PRI Service.

d. Incoming Call Identification - This optional feature provides the customer with the telephone number or telephone number and name of the calling party. Incoming call identification is provided via the D-Channel associated with incoming calls on a B-Channel to a PBX. Caller ID Blocking is available as stipulated in Section 43 of this tariff.

e. D-Channel Backup - Provides backup for the D-channel for a customer with multiple PRI lines by automatically switching signaling capability over to another D-Channel if service to the primary D-channel is interrupted.

3. Call-by-Call/Integrated Service Access Feature Capability - This feature will allow the customer to dynamically allocate the use of channels for ISDN-PRI Service. The customer may also choose voice or data transmission on a per call basis. In addition, the customer may also choose to subscribe to more services than channels and dynamically change the services in use.

F. RATES AND CHARGES (Cont'd)

5. Move Charge

A move charge, per ISDN-PRI Primary Rate Access line, applies for each Primary Rate Access line moved to a new location in the same building. This move charge is equal to the sum of the Primary Rate Access line nonrecurring charge, Service Change Charge - Inside Moves and Premises Visit Charge specified in Section 23.II.F.6.

6. Service Connection Charges

- a. Service Establishment Charges are applicable for each ISDN-PRI Primary Rate access line ordered, for receiving and recording information and/or taking action in connection with a customer's request, and processing the necessary data. These charges include engineering design, common centralized testing and coordination. The non-recurring charges associated with service establishment are found in Section 23.II.F.1,2,3a and 3b.
- b. Service Change Charges are applicable for receiving and recording information and/or taking action in connection with a customer's termination change at the same premises or transfer of service responsibility request, for processing the necessary data on an existing Primary Rate Access line. A Service Change Charge is applicable for each Primary Rate Access line associated with the customer request (in lieu of a Service Establishment Charge).
- c. Premises Visit Charges are applicable per Primary Rate Access Line, for the termination of a channel at a customer's premises or for termination change at the same premises. Only one Premises Visit Charge applies when more than one channel service of the same type is terminated or moved at the same premises at the same time.

III. PRIMARY RATE INTERFACE (PRI) II

Effective November 21, 2012, this service is limited to existing facilities in service at existing locations for current customers. Current customers may migrate existing services to Integrated Services Digital Network-Primary Rate Interface (ISDN-PRI) Business Service in Section 23.IV of this Tariff at any time without incurring any Nonrecurring Charges or Service Charges. TDP customers may migrate existing services without incurring termination liability charges when they select a commitment period equal to or greater than the length of time remaining under their existing TDP.

(N)

(N)

A. General

1. Integrated Services Digital Network - Primary Rate Interface (ISDN-PRI) Service is a local exchange offering supported by the ISDN architecture.
2. ISDN-PRI Service provides a method of access to the telephone network called Primary Rate Access. Primary Rate Access is an ISDN based, DS1 access link to the telecommunications network and provides integration of multiple voice and data transmission channels on the same line. The service provides connectivity between an ISDN-PBX or other ISDN-compatible CPE and a serving central office. The basic channel structure for Primary Rate Access is twenty-three 64 Kbps B-Channels and one 64 Kbps D-Channel. After purchasing the original 23 B-Channel plus one D-Channel configuration, the customer may purchase another Primary Rate Access Line and another Primary Rate Interface as well as additional B-Channels in increments of 12.

These channels may be used to connect the customer's CPE to the Public Network (i.e., outward, inward, and two-way trunks, WATS and 800/866/877/888 Service access lines).

3. ISDN-PRI Service provides network communication paths providing the end user with access to a variety of network services and features including data, voice and video which conforms to internationally developed, published, and recognized standards generated by the International Telecommunications Union (ITU).
4. Unless specified, the regulations for ISDN-PRI Service apply in addition to the General Regulations set forth in this tariff.
5. ISDN-PRI Service and its optional features and functions are provided within a LATA from central offices where appropriate ISDN facilities are available as determined by the Company. Service inquiries will be necessary to determine availability. Special construction charges may apply as specified in Section 8 of this tariff.

B. Regulations

1. The customer is responsible for providing Customer Premises Equipment (CPE) that is compatible with ISDN-PRI Service.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

III. PRIMARY RATE INTERFACE (PRI) II ⁽¹⁾ (Cont'd) (C)

B. Regulations (Cont'd)

10. Non-Facility Associated Signaling (NFAS)... (Cont'd)

After the first 23B + D PRI is purchased, a customer can purchase additional B-Channels in increments of 12. Additional Primary Rate Access Lines may be ordered in a 24B configuration. The Company recommends that the quantity of Primary Rate Access Lines supported by one (1) D-Channel not exceed four (4). The Company recommends the use of a backup D-Channel for the support of signaling beyond four (4) facilities.

11. This service is available only from central offices, which have the necessary facilities to provide ISDN-PRI Service on the standard network platform. In the event a customer is provided service from a non-ISDN compatible central office, the Company will provide ISDN-PRI Service from an alternative serving central office, as designated by the Company. This provision is accomplished by utilizing a 'hubbing' architecture and the subscriber may be required to accept a foreign NXX. When a foreign NXX is required, mileage charges applicable to High Capacity Service, as defined in the Company's Access Service Tariff, apply in addition to the rates and charges included in this section. Due to the nature of the 'hubbing' architecture and the use of a foreign NXX, the local calling area (e.g., Extended Area Service) may change.

When ISDN functionality becomes available from the central office that normally serves this subscriber, ISDN-PRI Service will be provided from that office and the subscriber may be required to accept a different NXX. If the subscriber chooses to continue ISDN-PRI Service from the alternative serving central office, all charges applicable to High Capacity Service, as defined in the Company's Access Service Tariff, will apply in addition to the rates and charges included in this section.

Similarly, if a subscriber requests ISDN-PRI Service from an alternative serving central office other than that designated by the Company, all charges applicable to High Capacity Service, as defined in the Company's Access Service Tariff, will apply in addition to the rates and charges included in this section.

Emergency 911 calls placed over ISDN-PRI Primary Rate Access Lines provisioned via this arrangement will be identified as the alternative serving central office NXX and not the non-ISDN compatible central office NXX. The Company shall not be liable for any loss or damages arising from the emergency calls placed from ISDN-PRI Primary Rate Access Lines provisioned via an alternative serving central office.

When a foreign NXX is required, mileage charges applicable to High Capacity Service, as defined in the Company's Access Service Tariff, apply in addition to the rates and charges included in this section. Due to the nature of the 'hubbing' architecture and the use of a foreign NXX, the local calling area (e.g., Extended Area Service) may change.

When ISDN functionality becomes available from the central office that normally serves this subscriber, ISDN-PRI Service will be provided from that office and the subscriber may be required to accept a different NXX. If the subscriber chooses to continue ISDN-PRI Service from the alternative serving central office, all charges applicable to High Capacity Service, as defined in the Company's Access Service Tariff, will apply in addition to the rates and charges included in this section.

Similarly, if a subscriber requests ISDN-PRI Service from an alternative serving central office other than that designated by the Company, all charges applicable to High Capacity Service, as defined in the Company's Access Service Tariff, will apply in addition to the rates and charges included in this section.

Emergency 911 calls placed over ISDN-PRI Primary Rate Access Lines provisioned via this arrangement will be identified as the alternative serving central office NXX and not the non-ISDN compatible central office NXX. The Company shall not be liable for any loss or damages arising from the emergency calls placed from ISDN-PRI Primary Rate Access Lines provisioned via an alternative serving central office.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

III. PRIMARY RATE INTERFACE (PRI) II ⁽¹⁾ (Cont'd) (C)

B. Regulations (Cont'd)

- 12. This service is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. Should the customer's service location exceed said limitations, service will be provided where the Company has electronically compatible facilities available, or where existing facilities can be made electronically compatible.
- 13. Rotary Hunt Service is available, at no additional charge, exclusively within the B-channels of a single ISDN-PRI service arrangement or between multiple ISDN-PRI service arrangements. Rotary Hunt Service is not allowed between ISDN-PRI service arrangements and other services, including but not limited to One-Party Business Local Exchange Service and High Capacity Service.
- 14. ISDN-PRI Service is not offered in conjunction with Local Measured Service.
- 15. In order to maintain the quality of ISDN-PRI Service, the Company reserves the right to perform preventative maintenance and software updates to the network. The Company has classified this maintenance as indicated below:

Scheduled Maintenance

Scheduled Maintenance is used to perform such functions as hardware and software upgrades and network optimization. The Company will perform these tasks in a maintenance window that is anticipated to minimize disruption of customer service and activity. The Company will provide advance notice of all scheduled maintenance.

Demand Maintenance

Demand Maintenance may occur as a result of unexpected events and is used when ISDN-PRI network elements are in jeopardy. The Company will perform this type of maintenance at its discretion. Due to the nature of demand maintenance prior notification may not be possible, however, the customer will be informed when the maintenance has been completed.

- 16. The customer is responsible for payment of a maintenance of service charge, as set forth in Section 7 of this tariff, for visits by the Company to the customer's premises when a service difficulty resulting in a trouble report is caused by the use of equipment or facilities provided by the customer.
- 17. One Directory Listing will be provided per D-Channel. Additional Directory Listings are available as specified in Section 9 of this tariff.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

III. PRIMARY RATE INTERFACE (PRI) II ⁽¹⁾ (Cont'd) (C)

C. Definitions

B-Channel – A bi-directional synchronous channel capable of supporting 64 Kbps of digital transmission.

D-Channel – A 64 Kbps digital signaling only channel for call establishment when used with Primary Rate Access.

D. Features

1. Standard Features

Dynamic Allocation of Bandwidth

Allows *the voice* and data services to share B-Channels and arrange them as a single trunk group. This allows incoming and *outgoing voice* and data calls to utilize B-Channels on a call by call basis. Without this capability, each service will have a dedicated B-Channel.

Incoming Call Identification (Caller ID)

Provides the customer with the telephone number of the calling party. Incoming call identification is provided via the D-Channel associated with the incoming calls on a B-Channel to a PBX.

Clear Channel Capability

The B-Channels on ISDN-PRI are clear, since all signaling and control functions are handled by the D-Channel. This allows all 64 Kbps on each B-Channel to be used for customer information.

D-Channel Control of Multiple ISDN Lines

Provides capability for a single D-Channel to provide signaling and control for one or more ISDN-PRI connections. After the original 23 B-Channel plus one D-Channel, the 24th channel on subsequent ISDN-PRI lines is then made available for customer use. The Company recommends the purchase of a backup D-Channel after the fourth ISDN-PRI line is purchased.

Digital Voice Transmission

All voice calls are transmitted using digital signaling.

⁽¹⁾ **Effective November 21, 2012, this service is limited to existing facilities in service at existing locations for current customers.** (N)

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

III. PRIMARY RATE INTERFACE (PRI) II ⁽¹⁾ (Cont'd) (C)

D. Features (Cont'd)

1. Standard Features (Cont'd)

Direct Inward Dialing (DID) Signaling

Permits incoming dialed calls from the exchange network to reach a specific number served by customer premises equipment (CPE) without the assistance of an attendant. It also provides for the unique identification of the call based on digits sent to the CPE by the central office. The central office will outpulse digits to the CPE that can further process the calls as desired. The rates and charges for DID telephone numbers are in addition to the ISDN-PRI charges and are provided in Section 18 of this tariff.

PBX Station ID Capability

Allows the station users number (calling party) to be transmitted over the ISDN-PRI D-Channel from Direct Inward Dialing equipped CPE PBXs that use ISDN-PRI. This number is provided by the originating station and must have an associated Direct Inward Dialing telephone number working in the central office.

2. Optional Features

D-Channel Backup

Provides backup for the D-Channel for a customer with multiple PRI lines by automatically switching signaling capability over to another D-Channel if service to the primary D-Channel is interrupted.

Network Ring Again

Enables the customer to complete calls to a busy station without continually redialing. Certain equipment restrictions may apply.

Call-by-Call/Integrated Service Access Feature Capability

Allows the customer to dynamically allocate the use of channels for ISDN-PRI Service. The customer may also choose voice or data transmission on a per call basis. In addition, the customer may also choose to subscribe to more services than channels. The Customer Premises Equipment signals the local central office as to which type of service (inward/outward trunk, WATS Lines, 800/866/877/888 Service) to access for each call.

Incoming Call Identification (Caller ID Name and Number)

Provides the customer with the telephone number and name of the calling party. Incoming call identification is provided via the D-Channel associated with incoming calls on a B-Channel to a PBX. The customer's equipment must be compatible with this service.

D. Features (Cont'd)

2. Optional Features (Cont'd)

Circular Hunt

Circular Hunt provides the most efficient hunting sequence available, plus allows for much larger trunk groups than the standard ISDN-PRI packages. With circular hunt, an incoming call is completed to the next available trunk (bearer) in sequence starting from the last trunk selected. This can occur across multiple PRI facilities. The feature can support up to 220 Primary Rate Interfaces in a single hunting configuration. The standard limit is 50.

National ISDN-2 Protocol

National ISDN-2 Protocol is a communication protocol that governs interactions between the customer's equipment and the telephone network. This protocol is more advanced than the standard ISDN-PRI protocol. Most CPE is capable of using the ISDN-2 Protocol.

E911 Call Screening

E911 Call Screening provides for the transmission of PBX or Key System station information via the ISDN-PRI facility to local emergency services authorities. This provides for the possible identification of the specific location on a customer's premises where a 911 call originated. This option is available only in communities where local emergency authorities support the service in conjunction with the Company's Private Switch Automatic Location Identification (PSALI) Service, associated with E911 Service. This service is only available in conjunction with National ISDN-2 Protocol.

⁽¹⁾ **Effective November 21, 2012, this service is limited to existing facilities in service at existing locations for current customers.** (N)

III. PRIMARY RATE INTERFACE (PRI) II (Cont'd)

D. Features (Cont'd)

2. Optional Features (Cont'd)

Circular Hunt

Circular Hunt provides the most efficient hunting sequence available, plus allows for much larger trunk groups than the standard ISDN-PRI packages. With circular hunt, an incoming call is completed to the next available trunk (bearer) in sequence starting from the last trunk selected. This can occur across multiple PRI facilities. The feature can support up to 220 Primary Rate Interfaces in a single hunting configuration. The standard limit is 50.

National ISDN-2 Protocol

National ISDN-2 Protocol is a communication protocol that governs interactions between the customer's equipment and the telephone network. This protocol is more advanced than the standard ISDN-PRI protocol. Most CPE is capable of using the ISDN-2 Protocol.

E911 Call Screening

E911 Call Screening provides for the transmission of PBX or Key System station information via the ISDN-PRI facility to local emergency services authorities. This provides for the possible identification of the specific location on a customer's premises where a 911 call originated. This option is available only in communities where local emergency authorities support the service in conjunction with the Company's Private Switch Automatic Location Identification (PSALI) Service, associated with E911 Service. This service is only available in conjunction with National ISDN-2 Protocol.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

III. PRIMARY RATE INTERFACE (PRI) II ⁽¹⁾ (Cont'd) (C)

E. Service Components

1. The components for ISDN-PRI Service will be as follows:

- Primary Rate Access Line
- Primary Rate Interface
- Primary Rate Channels

- (a) Primary Rate Access Line - Will provide a four-wire access loop from the customer premises to the serving central office. The transmission via this loop supports Clear Channel Capability.
- (b) Primary Rate Interface - Provides the multiplexing to support up to twenty-three (23) B-Channels at 64 Kbps and one (1) D-Channel for signaling also at 64 Kbps. When NFAS is ordered, the Primary Rate Interface can provide up to twenty-four B-Channels at 64 Kbps.
- (c) Primary Rate Channels - Will provide unlimited usage of channel that will allow either voice or data transmission up to 64 Kbps.

- (1) Voice calls may be completed to both ISDN and non-ISDN lines.
- (2) Data Transmission on the B-Channels will be at 64 Kbps within the switch and between ISDN-PRI compatible central offices. ISDN-PRI interconnection to non-ISDN equipped central offices may be potentially subjected to analog transmission or sub-rated to 56 Kbps.
- (3) The customer may choose to subscribe to additional non-exchange based services. Initial choices for these services will be WATS and 800/866/877/888 Service. The subscription to these services is in addition to the charges for ISDN-PRI Service.

2. With the first ISDN-PRI Primary Rate Access Line the customer is required to purchase 23 B-Channels and an initial D-Channel.

After the initial 23B + D configuration, the customer may choose channels in increments of 12 up to twenty-three B + D or twenty-four B with NFAS, per ISDN-PRI Primary Rate Access Line (facility) to be active with a corresponding number of services (i.e., inward/outward trunks, WATS Lines, 800/866/877/888 Service) selected. The customer may also choose to subscribe to more services than channels. The Customer Premises Equipment signals the local central office as to which type of service (inward/outward trunk, WATS Lines, 800/866/877/888 Service) to access for each call.

⁽¹⁾ **Effective November 21, 2012, this service is limited to existing facilities in service at existing locations for current customers.** (N)

III. PRIMARY RATE INTERFACE (PRI) II (Cont'd)

F. Application of Rates

1. ISDN-PRI Primary Rate Access Lines furnished between a serving central office and the customer-designated premises will be charged at rates per each Primary Rate Access Line.
2. Nonrecurring charges will not be applicable for the Primary Rate Access Line or interoffice channel facilities when upgrading an existing High Capacity Service to an ISDN-PRI Service.
3. ISDN-PRI Primary Rate Access Line rates, including interoffice channels if applicable, apply in addition to Primary Rate Interface and Primary Rate Channel charges.
4. If the customer chooses to purchase additional channels after purchasing the original 23B + D configuration, the customer must purchase another Primary Rate Access Line and another Primary Rate Interface as well as the additional channels. Additional channels can be purchased in increments of 12.
5. Rates and charges for optional features and functions are applied to each Primary Rate Interface for which the option is ordered.

G. Rates and Charges

1. ISDN-PRI Primary Rate Access Line

Primary Rate Access Line is furnished between a serving central office and the customer's designated premises. Primary Rate Access Line charges apply per point of termination.

III. PRIMARY RATE INTERFACE (PRI) II (Cont'd)

(MT)

G. Rates and Charges (Cont'd)

3. ISDN-PRI Services will be available in combinations of Primary Rate Channels according to the limits of the Company central office type. Customers will choose the most appropriate combination(s) and will be billed for the services as appropriate. The initial configuration must be 23 B-Channels and 1 D-Channel. Additional configurations are outlined in Section 23.III.E.2. of this tariff.

(a) B-Channel Charge, each channel

	<u>Monthly Rate</u>		<u>Nonrecurring Charge</u>		(CT)
	<i>Non-Competitive Exchanges</i>	<i>Competitive Exchanges</i>	<i>Non-Competitive Exchanges</i>	<i>Competitive Exchanges</i>	
Month to month	\$13.50	\$11.00*	\$10.00	N/A*	(R) (CT)
12-23 months	\$11.50		\$10.00		
24-35 months	\$ 9.75		N/A		
36-59 months	\$ 8.75	\$8.75*	N/A	N/A*	(R) (CT)
60-84 months	\$ 8.00	\$7.12*	N/A	N/A*	(R)(MT)(CT)

* **Rolla exchange only.**

6. Move Charge

A Move Charge, per ISDN-PRI Primary Rate Access Line, applies for each Primary Rate Access Line moved to a new location in the same building. This Move Charge is equal to the sum of the Primary Rate Access Line nonrecurring charge, Service Change Charge - Inside Moves and Premises Visit Charge specified in Section 23.III.G.6.(d) following.

7. Service Connection Charges

(a) Service Establishment Charges are applicable for each ISDN-PRI Primary Rate Access Line ordered, for receiving and recording information and/or taking action in connection with a customer's request, and processing the necessary data. These charges include engineering design, common centralized testing and coordination. The nonrecurring charges associated with service establishment are found in Section 23.III.G.1, 2 and 3.

(b) Service Change Charges are applicable for receiving and recording information and/or taking action in connection with a customer's termination change at the same premises or transfer of service responsibility request, for processing the necessary data on an existing Primary Rate Access Line. A Service Change Charge is applicable for each Primary Rate Access Line associated with the customer request (in lieu of a Service Establishment Charge).

* Only available for customers subscribing to ISDN Primary Rate Interface Two-Way under a Term Discount Plan.

** Certain equipment restrictions apply.

7. Termination Liability Charges

- (a) If a customer chooses to disconnect all or a portion of the Term Discount Plan (TDP) period, Termination Liability Charges will apply to those circuits that are disconnected. If a customer disconnects any portion of the TDP service prior to the end of month six, the customer will be liable for 100% of the payments remaining for the first six months and 50% of the payments remaining for the rest of the Plan. If a customer disconnects any portion of the TDP Service after the end of the sixth month, the customer will be liable for 50% of the payments remaining for the rest of the plan.
- (b) Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the TDP. If a Company initiated rate increase causes a customer's rates to exceed the original rates in effect at the beginning of the TDP, the customer may cancel the TDP without incurring termination liability charges.
- (c) The customer can extend TDP commitment periods at any time during the term of the plan, up to a maximum of 84 months. The number of months accrued in the current plan will apply toward the new plan selected.
- (d) At the end of the TDP service commitment period, the customer may subscribe to a new TDP at the prevailing rates. If the customer does not select a new TDP, the rates will convert to the prevailing month-to-month rates.
- (e) When a service or rate element under a Term Discount Plan (TDP) arrangement is disconnected prior to the expiration of a selected service period as a result of a change of tariff jurisdiction and/or a customer requested change to a Next Generation Service Offering of a separately tariff service, Termination Charges will not apply when:
 - (1) The service period of the new Term Discount Plan arrangement for the new service offering is a minimum period equal to or exceeding the remaining service period of the disconnected arrangement, whichever is greater, and
 - (2) The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between installation of the new service and disconnection of the existing service, and
 - (3) The service orders are for the same customer at the same location.

Integrated Services Digital Network - Primary Rate Interface (ISDN-PRI) to **Enhanced** Frame Relay Service (**EFRS**) or Asynchronous Transfer Mode (ATM) are a few examples of a Next Generation Service Offering. (CT)

BUSINESS SERVICE

A. General

1. Integrated Services Digital Network - Primary Rate Interface (ISDN-PRI) Business Service ("ISDN-PRI Business Service") is a local exchange offering supported by the ISDN architecture.
2. ISDN-PRI Business Service provides a method of access to the telecommunications network called Primary Rate Access. Primary Rate Access is an ISDN based, DS1 access link to the telecommunications network and provides integration of multiple voice and data transmission channels on the same line. The service provides connectivity between an ISDN-PBX or other ISDN-compatible customer premises equipment ("CPE") and a serving central office. The basic structure for Primary Rate Access is comprised of twenty-three 64 Kbps B-Channels and one 64 Kbps D-Channel, referred to hereafter as "23-B+D". After subscribing to the original 23-B+D configuration, the customer may subscribe to additional ISDN-PRI Business Service arrangements in as 23-B+D or as 24-B Channels. These channels may be used to connect the customer's CPE to the Public Network (i.e., inward/outward trunks, two-way trunks, WATS lines or toll free service).
3. ISDN-PRI Business Service provides network communication paths that provide the end user with access to a variety of network services and features including data, voice and video which conforms to internationally developed, published, and recognized standards generated by the International Telecommunications Union (ITU).
4. ISDN-PRI Business Service and its optional features and functions are provided within a local access and transport area ("LATA") from central offices where appropriate ISDN facilities are available as determined by the Company. Service inquiries will be necessary to determine availability. Special Construction charges may apply as specified in Section A8 of this tariff.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

IV. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI)
BUSINESS SERVICE (Cont'd)

B. Regulations

1. The minimum service period for ISDN-PRI Business Service is six months. Term Discount Plan commitment periods of one, two, three and five years are available.
2. ISDN-PRI Business Service is not offered in conjunction with Local Measured Service. (No additional charges apply for calls to Local Calling Area and Extended Area Service (EAS) exchanges.
3. The customer is responsible for providing CPE that is compatible with ISDN-PRI Business Service.
4. The Company will not be responsible if changes in any of the equipment, operations or procedures of the Company utilized in the provisioning of ISDN-PRI Business Service render any facilities provided by the customer obsolete, require modification or alteration of such equipment or system, or otherwise affect its use or performance.
5. Digital transmission rates at speeds less than those indicated may be accomplished as a function of the particular CPE furnished by the user.
6. Telephone numbers transmitted via the Optional or Standard Incoming Call Identification feature are intended solely for the use of the ISDN-PRI Business Service subscriber. Resale of this call identification information is prohibited.
7. Non-Facility Associated Signaling (NFAS) provides the capability to serve multiple DS1's via a single D-Channel. This feature can be ordered where switch capabilities exist as determined by the Company. When NFAS is selected, the customer must order one ISDN-PRI Business Service arrangement as a 23-B+D arrangement. After the customer subscribes to the initial 23-B+D arrangement, the customer may subscribe to additional arrangements of either 23-B+D or 24 B-Channels. The D-Channel activated on the initial arrangement serves any additional ISDN-PRI Business Service arrangements with no D-Channel. The Company recommends that the number of B-channels supported by a single D-Channel not exceed 95.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

IV. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI)
BUSINESS SERVICE (Cont'd)

B. Regulations (Cont'd)

8. This service is available only from central offices which have the necessary facilities to provide ISDN-PRI on the standard network platform. In the event a customer is served by a non-ISDN capable central office, the Company may provide ISDN-PRI Business Service from an alternative serving central office, as designated by the Company. The subscriber may be required to accept a foreign NXX. When a foreign NXX is required, the rates for the interoffice facilities of an interexchange ISDN-PRI Business Service arrangement, as specified in G.1. of this Section will apply in addition to the rates normally applicable for an ISDN-PRI Business Service arrangement. The local calling area may not be the same as the local calling area of the exchange in which the customer is located.

If ISDN functionality becomes available from the central office that normally serves this subscriber, ISDN-PRI Business Service will be provided from that office and the subscriber may be required to accept a different NXX. If the subscriber chooses to continue ISDN-PRI Business Service from the alternative serving central office, the rates for the interoffice facilities of an interexchange ISDN-PRI Business Service arrangement will continue to apply in addition to the rates normally applicable for an ISDN-PRI Business Service Arrangement.

If a subscriber requests ISDN-PRI Business Service from an alternative serving central office other than that designated by the Company, the rates for the interoffice facilities of an interexchange ISDN-PRI Business Service arrangement will apply in addition to the rates normally applicable for an ISDN-PRI Business Service arrangement.

Emergency 911 calls placed over an ISDN-PRI Business Service arrangement that is provisioned via a foreign central office will be identified as originating in the alternative serving central office NXX and not the non-ISDN capable central office NXX. The Company shall not be liable for any loss or damages arising from emergency calls placed from ISDN-PRI Business Service provisioned via an alternative serving central office.

9. ISDN-PRI Business Service is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. Should the customer's service location exceed said limitations, service will be provided where the Company has electrically compatible facilities available, or where existing facilities can be made electrically compatible.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

IV. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI)
BUSINESS SERVICE (Cont'd)

B. Regulations (Cont'd)

10. One Directory Listing will be provided per D-Channel. Additional Directory Listings are available as specified in Section 9 of this tariff.
11. Temporary Suspension of service at the customer's request, as defined in Section 34 of this tariff, is not available for ISDN-PRI Business Service.
12. In order to maintain the quality of ISDN-PRI Business Service, the Company reserves the right to perform preventative maintenance and software updates to the network. The Company has classified this maintenance as indicated below:
 - (a) Scheduled Maintenance - used to perform such functions as hardware and software upgrades and network optimization. The Company will perform these tasks in a maintenance window that is anticipated to minimize disruption of customer service and activity. The Company will provide advance notice of all scheduled maintenance.
 - (b) Demand Maintenance - may occur as a result of unexpected events and is used when ISDN-PRI network elements are in jeopardy. The Company will perform this type of maintenance at its discretion. Due to the nature of demand maintenance prior notification may not be possible.
13. Rotary hunt functionality is available with ISDN-PRI Business Service at no additional charge. This functionality increases the likelihood of an incoming call being completed over an ISDN-PRI B-channel by allowing calls made to a busy number to be completed to another idle line. This functionality is exclusively within the B-channels of a single ISDN-PRI Business Service arrangement or between multiple ISDN-PRI Business Service arrangements and is not allowed between ISDN-PRI Business Service arrangements and other services, including but not limited to, Business Individual Line Service. The total number of Primary Rate Interfaces in a single, standard hunting configuration may not exceed 50.
14. Relocation of an ISDN-PRI Business Service arrangement to a new location with the same building or to a different location within the same central office serving area is considered a "move" and a Move Charge will apply for each ISDN-PRI Business Service arrangement that is relocated. Customer requested moves to a location in a different central office serving area are treated as disconnections at the existing location, and service establishment charges will apply for each ISDN-PRI Business Service arrangement established at the new location.

BUSINESS SERVICE (Cont'd)

C. Definitions

1. B-Channel - A bi-directional synchronous channel capable of supporting 64 Kbps of digital transmission.
2. D-Channel - A digital, signaling-only channel for call establishment that is capable of supporting 64 Kbps of digital transmission.
3. Primary Rate Access Line – The facility between the serving central office and the customer's premises. Provides transport for up to twenty-four 64 Kbps.
4. Primary Rate Interface – The central office switching elements that are dedicated to a customer's ISDN-PRI Business Service.
5. Primary Rate Channels – B-Channels or D-Channels, as defined above.
6. Rotary Hunt Functionality - A service arrangement which allows calls made to a busy number to be completed to another idle line in that rotary number group.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

IV. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI)
BUSINESS SERVICE (Cont'd)

D. Features

1. Standard Features

Clear Channel Capability – Allows all 64 Kbps on each B-Channel to be used for Customer information because the B-Channels on ISDN-PRI Business Service are clear as a result of all signaling and control functions being handled by a D-Channel.

D-Channel Control – Permits a single D-Channel to provide signaling and control for one or more ISDN-PRI Business Service arrangements when, after subscribing to an initial 23-B+D configuration, a customer requests additional arrangements consisting of 24 B-Channels.

Digital Voice Transmission - All voice calls are transmitted using digital signaling.

Direct Inward Dialing (DID) Signaling - Permits incoming dialed calls from the exchange network to reach a specific number served by CPE without the assistance of an attendant. The central office will output digits to the CPE that can further process the calls as desired. The rates and charges for DID telephone numbers are in addition to the ISDN charges and are provided in Section 18 of this tariff.

Dynamic Allocation of Bandwidth - Allows the voice and data services to share B-Channels and arrange them as a single trunk group. This allows incoming and outgoing voice and data calls to utilize B-Channels on a call by call basis. Without this capability, each service will have a dedicated B-Channel.

Incoming Call Identification (Caller ID Number Only) – Provides a customer with the telephone number of the calling party. Incoming call identification is provided via the D-Channel associated with an incoming call on a B-Channel to a PBX and is subject to availability and provision by the originating call's carrier's facilities. Customer's CPE must be compatible with this feature.

PBX Station ID Capability - Allows the station user's (calling party's) number to be transmitted over the ISDN-PRI D-Channel from Direct Inward Dialing equipped CPE PBXs that use ISDN-PRI. This number is provided by the originating station and must have an associated Direct Inward Dialing telephone number working in the central office.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

IV. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI)
BUSINESS SERVICE (Cont'd)

D. Features

2. Optional Features

2 B-Channel Transfer – Provides specific central office switching capabilities. For example, when a call terminates at a given location, but is then forwarded to another location, two trunks between the Central Office and the original device are typically employed for the duration of the forwarded call. 2 B-Channel Transfer allows the central office switch to establish the call directly to the final destination and release the trunks going in and out of the forwarding device. A common use of 2 B-Channel Transfer is illustrated below.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

IV. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI)
BUSINESS SERVICE (Cont'd)

D. Features (Cont'd)

2. Optional Features (Cont'd)

Call-by-Call/Integrated Service Access Feature Capability - Allows the customer to dynamically allocate the use of channels for ISDN-PRI Business Service. The customer may also choose voice or data transmission on a per call basis. In addition, the customer may also choose to subscribe to more services than channels. The CPE signals the local central office as to which type of service (e.g., via inward/outward trunk, WATS lines, or toll free service lines) to access for each call. This feature is only available with two-way Primary Rate Interface.

Circular Hunt - Provides the most efficient hunting sequence available, and allows for much larger trunk groups than the standard ISDN-PRI Business Service packages. With circular hunt, an incoming call is completed to the next available trunk (bearer) in sequence starting from the last trunk selected. This can occur across multiple PRI facilities. The feature can support up to 220 Primary Rate Interfaces in a single hunting configuration. The standard limit is 50.

D-Channel Backup – Provides backup for the D-Channel for a customer with multiple ISDN-PRI Business Service arrangements by automatically switching signaling capability over to a back-up D-Channel if service to the primary D-Channel is interrupted.

E911 Call Screening - Provides for the transmission of PBX or Key System station information via the ISDN-PRI facility to local emergency services authorities. This provides for the possible identification of the specific location on a customer's premises where a 911 call originated. This option is available only in communities where local emergency authorities support the service in conjunction with the Company's Private Switch Database Service, associated with E911 Service. This service is only available in conjunction with National ISDN-2 Protocol.

Incoming Call Identification (Caller ID Name and Number) - Provides the customer with the telephone number and name of the calling party, subject to availability and provision by the originating caller's carrier. Incoming call identification is provided via the D-Channel associated with an incoming call on a B-Channel to a PBX. The Customer's equipment must be compatible with this feature.

IV. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI)
BUSINESS SERVICE (Cont'd)

D. Features (Cont'd)

2. Optional Features (Cont'd)

Main Number ID Capability – Available in lieu of the standard PBX Station ID Capability feature, this feature allows only the main number associated with an ISDN-PRI Business Service arrangement to be transmitted and available for display when a call is placed from any station associated with an ISDN-PRI Business Service arrangement.

National ISDN-2 Protocol - A communication protocol that governs interactions between the customer's equipment and the telephone network. This protocol is more advanced than the standard ISDN-PRI protocol. Most CPE is capable of using the ISDN-2 Protocol.

Network Ring Again - Enables the customer to complete calls to a busy station without continually redialing. Certain equipment restrictions may apply.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

IV. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI)
BUSINESS SERVICE (Cont'd)

E. Service Components

1. Each ISDN-PRI Business Service arrangement consists of the following functional components:
 - Primary Rate Access Line
 - Primary Rate Interface
 - Primary Rate Channels
- (a) Primary Rate Access Line - Provides a four-wire access loop from the customer premises to the serving central office. The transmission via this loop supports Clear Channel Capability. One Primary Rate Access Line is provided for every 24 channels.
- (b) Primary Rate Interface - Provides the multiplexing to support up to twenty-three B-Channels at 64 Kbps and one D-Channel for signaling also at 64 Kbps. When NFAS is ordered, the Primary Rate Interface can provide up to twenty-four B-Channels at 64 Kbps. Primary Rate Interfaces will be provisioned as two-way.
- (c) Primary Rate Channels - The initial ISDN-PRI Business Service arrangement consists of a 23-B+D configuration, with unlimited usage that will allow either voice or data transmission up to 64 Kbps. Additional arrangements may be ordered as either 23-B+D or 24-B Channel arrangements.
 - (1) Voice calls may be completed to both ISDN and non-ISDN lines.
 - (2) Data Transmission on the B-Channels will be at 64 Kbps within the switch and between ISDN-PRI compatible central offices. ISDN-PRI interconnection to non-ISDN-PRI equipped central offices may be potentially subjected to analog transmission or sub-rated to 56 Kbps.
 - (3) The customer may choose to subscribe to additional non exchange based services. Initial choices for these services will be WATS and 800/888 service. The subscription to these services is in addition to the charges for ISDN-PRI Business Service.
2. Each Primary Rate Access Line may be active with a corresponding number of services (e.g., inward/outward trunks, WATS lines, or toll free service) selected. The customer may also choose to subscribe to more services than channels. The CPE signals the local central office as to which type of service (inward/outward trunk, WATS lines, or toll free service) to access for each call.

IV. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI)
BUSINESS SERVICE (Cont'd)

F. Application of Rates

1. Nonrecurring charges will not be applicable for ISDN-PRI Business Service arrangements that are updated from an existing 1.544 Mbps service to ISDN-PRI Business Service.
2. The initial ISDN-PRI Business Service arrangement at any location must be configured as 23-B+D, after which additional arrangements may be ordered as either 23-B+D or as 24-B Channels.
3. Rates and charges for optional features and functions are applied to each ISDN-PRI Business Service arrangement for which a separate Primary Rate Interface is required. For example, when a customer has the initial 23-B+D arrangement and an additional arrangement configured as 24-B Channels, two Primary Rate Interfaces are provided. The feature charge applies for each Primary Rate Interface over which the optional feature is activated.

G. Rates and Charges

1. ISDN-PRI Business Service Arrangement

An ISDN-PRI Business Service Arrangement is furnished between a serving central office and the customer's designated premises. The customer must initially subscribe to a 23-B+ D configuration per location, after which additional arrangements may be ordered as 23-B+D or 24-B Channels.

The rates, charges and regulations for a 1.544 Mbps High Capacity Service interoffice channel, as specified in Tariff P.S.C Mo. No. 26, apply in addition to the following rates for the interoffice facilities of an interexchange ISDN-PRI Business Service arrangement.

4. Service Charges

- (a) Service Establishment Charges apply when a customer requests establishment of a new ISDN-PRI Business Service arrangement(s). Service Establishment Charges apply for each ISDN-PRI Business Service Arrangement that is separately ordered and/or installed. Service Establishment Charges consist of:
- (1) A Service Order Charge as described in Section 30 of this Tariff applies for each order placed, for receiving and recording information, and processing the necessary data in connection with a customer's request for service establishment; and
 - (2) The applicable Nonrecurring Charge for an ISDN-PRI Business Service Arrangement. This charge covers engineering design, common centralized testing and coordination. Nonrecurring charges do not apply for additional ISDN-PRI Business Service Arrangements installed at the same customer designated premises on the same trip and placed on the same service order.
- (b) Premises Visit Charges are applicable per ISDN-PRI Business Service arrangement, for the termination of a channel at a customer's premises or for termination change at the same premises. Only one Premises Visit Charge applies when more than one channel service of the same type is terminated or moved at the same premises at the same time.

Premises Visit Charge,
per ISDN-PRI Business Service Arrangement \$125.00

* Only available for customers whose ISDN-PRI Business Service arrangements include a Two-Way Primary Rate Interface under a Term Discount Plan.

** Certain equipment restrictions apply.

4. Service Charges (Cont'd)

(c) Service Change Charges are applicable for receiving and recording information and/or taking action in connection with a customer's termination change at the same premises or transfer of service responsibility request, for processing the necessary data on an existing ISDN-PRI Business Service. A Service Change Charge is applicable for each ISDN-PRI Business Service associated with the customer request (in lieu of a Service Establishment Charge).

(1) For termination change at the same premises,
Physical, per ISDN-PRI Business Service arrangement \$165.00

(2) For termination change at the same premises,
Programming, per ISDN-PRI Business Service arrangement \$35.00

(d) Move Charges apply for each ISDN-PRI Business Service arrangement moved to a new location in the same building or to a different location within the same central office serving area. The Move Charge is equal to the sum of the Service Change Charges plus the Premises Visit Charge.

H. Term Discount Plan (TDP)

1. Description

(a) TDP commitment periods of one, two, three, and five years are available.

(b) A Customer may extend a TDP commitment period at any time during the term of a TDP. The number of months accrued under the current TDP will apply toward the commitment period of the new TDP. The rates under the new TDP will not apply retroactively toward the months accrued under the current TDP.

(c) At the end of the TDP service commitment period, the customer may subscribe to a new TDP at the then prevailing tariffed rates. If the customer does not select a new TDP, the prevailing rates applicable for the expired TDP will continue in effect for as long as the customer chooses to continue subscribing to the ISDN-PRI Business Service arrangements installed under the expired TDP. Additional ISDN-PRI Business Service arrangements installed after the TDP expiration date will not be eligible for the TDP rates and will be charged at the prevailing Month-to-month rates unless the customer selects a TDP for those services.

2. Rate Changes

- (a) Rate increases or decreases will be automatically applied to the monthly TDP rates for the remaining term of a TDP.
- (b) If Company initiated rate increase(s) to any rate element or combination of rate elements causes the charges for the entire ISDN-PRI Business Service arrangement under the TDP to increase by 10% or more in any plan year, Customer may cancel the TDP without incurring Early Termination Liability Charges provided Customer notifies the Company within 30 days after the effective date of the rate increase. The first 12 months of a TDP commitment period constitute a plan year. Each subsequent 12 month increment constitutes an additional plan year.

3. Early Termination Liability

(a) Calculation of Early Termination Liability

If a TDP Customer disconnects all or a portion of the ISDN-PRI Business Service before the expiration of a TDP, then a Termination Liability Charge will apply to those services which are disconnected. The Termination Liability Charge will be a one-time charge equal to the sum of 50% of the payments remaining for the rest of the TDP. If Special Construction charges were applied to the service being terminated, any termination charges associated with Special Construction will also apply.

(b) Waiver of Early Termination Liability

(1) Customers will not be liable for Early Termination Liability under the following circumstances:

(i) Relocation within Central Office Serving Area

If a TDP Customer relocates an existing Service arrangement to a new location within the same building or to a different location within the same central office serving area prior to the expiration of a TDP, a Termination Liability Charge will not apply, and the number of months accrued at the prior location will carry over to the new location. Move Charges will apply for each arrangement relocated.

(ii) Relocation to Different Central Office Serving Area

If a TDP Customer relocates an existing Service arrangement to a location in a different central office serving area, a Termination Liability Charge will not apply if Customer converts to a new TDP commitment period that is equal to or greater than the original TDP commitment period. The number of months accrued at the prior location under the original TDP will not carry over to the new location. Service Establishment Charges will apply for the ISDN-PRI Business Service arrangement(s) installed at the new location.

3. Early Termination Liability (Cont'd)

(a) Waiver of Early Termination Liability (Cont'd)

(1) Customers will not be liable for Early Termination Liability under the following circumstances (cont'd):

(iii) Technology Upgrade

- a) When a service or rate element under a TDP arrangement is disconnected prior to the expiration of the TDP commitment period as a result of a change in tariff jurisdiction and/or a customer requested upgrade to a next generation service offering, Termination Liability Charges will not apply under the following conditions:

The service period of the new TDP for the new service offering is a period equal to or exceeding the remaining service period of the disconnected TDP, and

The service orders to install the new service and disconnect the old service are related, and there is no lapse in service between the installation of the new service and the disconnection of the old service, and

The service orders to install the new service and disconnect the old service are for the same Customer at the same location.

- b) The Company will determine whether a replacement service qualifies as a next generation service offering.
- c) Nonrecurring charges and Service Charges for the new service will apply according to the requirements of the new service.

RULES AND REGULATIONS APPLYING TO ALL CUSTOMER'S CONTRACTS

V. USE OF SERVICE AND FACILITIES

- A. OWNERSHIP AND USE OF EQUIPMENT -- Equipment, instruments, and lines (excluding inside wire) on customer's premises, furnished by the Telephone Company, shall be and remain the property of the Telephone Company whose agents and employees have the right to enter said premises at any reasonable hour for the purpose of installing, inspecting, or repairing the instruments and lines or for the purpose of making collections from coin boxes, and upon termination of the service, for the purpose of removing such instruments and lines. Such equipment is not to be used for performing any part of the work of transmitting, delivering or collecting any telephone message where any toll or consideration has been or is to be paid any party other than the Telephone Company, without the written consent of the Telephone Company.
- B. No equipment, apparatus, circuit, or device not furnished by the Telephone Company shall be attached to or connected with the facilities furnished by the Telephone Company, whether physically, by induction or otherwise, except as provided in this tariff. In case such unauthorized attachment or connection is made, the Telephone Company shall have the right to remove or disconnect the same, or to suspend the service during the continuance of said attachments or connections, or to terminate the service.

Nothing in this paragraph shall prohibit a customer from using devices which in the opinion of the Company would not endanger the safety of Telephone Company employees or the public; damage, require change in or alteration of, or involve direct electrical connection to (except as provided for elsewhere in this tariff) the equipment or other facilities of the Telephone Company; or interfere with the proper functioning of such equipment or facilities; or impair the operation of the telephone system or otherwise injure the public in its use of the Telephone Company's services.

V. USE OF SERVICE AND FACILITIES (Cont'd)

C. CONNECTION WITH CERTAIN FACILITIES OF CUSTOMER - Customer-provided terminal equipment may be used and customer-provided customer premise inside wire or communications systems may be connected with the facilities furnished by the Telephone Company for telecommunications services as provided in the "Connections with Equipment or Facilities Provided by Customers" section of this tariff.

Violation of the FCC Rules and Regulations pertaining to connection of FCC registered terminal equipment and inside wire may cause a temporary discontinuance of service until the violation is corrected.

D. Devices provided by the customer to obtain quietness or privacy may be used in conjunction with the telephone instrument furnished to the customer by the Telephone Company, provided any such device does not involve direct electrical connection to the Telephone Company except as provided for in "Connection with Equipment or Facilities Provided by Customers" section of this tariff.

E. USE OF CUSTOMER SERVICE - Customer telephone service, as distinguished from Payphone Line Service, is furnished only for use by the customer, his family, employees or business associates, or persons who are a part of the customer's household, except as the use of the service may be extended to joint users. The Telephone Company has the right to refuse to install customer service or to permit such service to remain on the premises of the Payphone Line Service when the instrument is so located that the public in general or patrons of the customer may make use of the service. At such locations, however, customer service may be installed, provided the instrument is so located that it is not accessible for public use.

Except for Payphone Line Service, the payment for local messages by means of a coin collecting device, paid to any party other than the Telephone Company, is prohibited.

REC'D OCT 26 1999

V. USE OF SERVICE AND FACILITIES (Cont'd)

F. USE OF PARTY LINE SERVICE - Applications for party line service are accepted by the Telephone Company with the understanding that each customer will so use the service as not to interfere with an equitable proportionate use of the service by the other customers on the same line. When the duration or number of local messages sent or received by a party line customer is so great as to prevent an equitable proportionate use of the line by other customers on the line, the Telephone Company shall have the right to require the customer to contract for a higher grade of service or to discontinue the service of the customer in question. The Telephone Company reserves the right to limit the continuous use of a party line for local messages. Party line service may not be available to customer in some locations. Check Section 16 of this tariff for limitations.

RULES AND REGULATIONS APPLYING TO ALL CUSTOMER'S CONTRACTS

VI. PAYMENT FOR SERVICE (Cont'd)

C. Residence

- 1. The customer shall receive a bill during each billing period except when the bill has a zero balance. Failure to receive a bill does not relieve the customer of the responsibility for payment for telephone service.

The customer bill shall clearly show:

- The number of access lines for which charges are stated
- The beginning or ending dates of the billing period for which charges are stated
- A statement of the date the bill becomes delinquent if not paid
- Penalty fees and advance payments, if any
- The unpaid balance, if any
- The amount due for basic service
- An itemization of the amount due for all other regulated or non-regulated services, including date and duration (in minutes) of each toll call
- The amount due for other regulated or non-regulated service offered at a packaged rate and an itemization of each service included in the package
- A list of charges due for taxes, franchise fees and other fees and/or surcharges
- Total amount due
- A toll free telephone number a customer may call concerning billing inquiries and billing disputes
- The amount of any deposit, advance payments and/or interest accrued on a deposit which has been credited to the charges stated
- Any other credits or charges applied to the account during the current billing period

Residential customers shall have at least twenty-one days from the rendition of the bill to pay the charges stated thereon. Payment shall be made at the office of the Telephone Company, an authorized collection agency, or by mail.

- 2. **Residential customers may take advantage of an optional, condensed or summary bill format at any time by contacting the Company's Customer Service toll free number found on their current bill and indicating a preference to receive the condensed, optional bill format. Under this summary bill option, customers will still be able to access their full, detailed billing information on the Company's website, or receive a paper copy of their detailed bill, at no charge, by contacting the Company. Customers who have opted to receive the summary bill format may de-select that option at anytime by contacting a Customer Service representative.**

(CT)

1. The customer shall receive a bill during each billing period. Failure to receive a bill does not relieve the customer of the responsibility for payment for telephone service.

Residential customers shall have at least twenty-one days from the rendition of the bill to pay the charges stated thereon. Payment shall be made at the office of the Telephone Company, an authorized collection agency, or by mail.

Demand for payment of toll charges in excess of 400% of the amount of deposit or guarantee may be made in less than twenty-one days by a telephone call to the customer followed by written notification of such demand sent by first class mail. If the toll charge remains unpaid for ten days from rendition of written notification or a mutually established late payment arrangement date or twenty-one days from rendition of the bill, such charges will be deemed delinquent.

Demand for payment of toll charges may be made on less than twenty-one days in the events a residential customer's service has been discontinued in accordance with "Suspension of Service" as reflected elsewhere in this tariff.

Total bills remaining unpaid twenty-two days after rendition, or toll bills remaining unpaid ten days after demand, whichever is less, shall be considered delinquent.

C. Residence (Cont'd)

3. The customer is required to pay, promptly, all charges for exchange service and equipment and for all toll messages including charges for messenger service. The customer is held responsible for all charges for telephone service rendered at his station, both exchange and toll, including charges for toll messages on which the charges have been reversed. In the event of an abandonment of the telephone, the non-payment of any sum due, the use of foul or profane language, the impersonation of another with fraudulent intent, or of any other violation of the lawful regulations of the Telephone Company, the Telephone Company may either temporarily deny service or terminate the contract.

D. Delinquent Account Charge

A delinquent account charge of **2.5%** of the balance or **\$6.00**, whichever is greater, will be assessed to all customer payments received after the due date. This charge will apply to the current total amount due, less any disputed charges, for all services to compensate the company for the additional expense associated with delinquent accounts.

(1)

E. Disputes by Residence Customers

1. The customer shall notify the Telephone Company when all or part of a charge on the customer's bill is in dispute by written notice, in person or by a telephone message directed to the Telephone Company during normal business hours. A dispute must be registered with the Telephone Company prior to the due date of the bill in order for the customer to avoid discontinuance of service.
2. When the Telephone Company becomes aware of a dispute, a record of the date, time and place of the inquiry will be made. A dispute will be investigated promptly and thoroughly. An attempt will be made to settle the dispute in a manner satisfactory to both the customer and the Telephone Company.
3. If the customer fails to cooperate with the Telephone Company in efforts to resolve a dispute, the customer's rights to continuance of service will be waived.

In the event of an abandonment of the telephone, the non-payment of any sum due, the use of foul or profane language, the impersonation of another with fraudulent intent, or of any other violation of the lawful regulations of the Telephone Company, the Telephone Company may either temporarily deny service or terminate the contract.

D. Delinquent Account Charge

A delinquent account charge of **\$1.90** will be assessed to all customer payments received after the due date. The **\$1.90** charge will apply to the current total amount due, less any disputed charges, for all services to compensate the company for the additional expense associated with delinquent accounts. (CR)
(CR)

E. Disputes by Residence Customers

- 1. The customer shall notify the Telephone Company when all or part of a charge on the customer's bill is in dispute by written notice, in person or by a telephone message directed to the Telephone Company during normal business hours. A dispute must be registered with the Telephone Company prior to the due date of the bill in order for the customer to avoid discontinuance of service.
- 2. When the Telephone Company becomes aware of a dispute, a record of the date, time and place of the inquiry will be made. A dispute will be investigated promptly and thoroughly. An attempt will be made to settle the dispute in a manner satisfactory to both the customer and the Telephone Company.
- 3. If the customer fails to cooperate with the Telephone Company in efforts to resolve a dispute, the customer's rights to continuance of service will be waived.

RULES AND REGULATIONS APPLYING TO ALL CUSTOMER'S CONTRACTS

VI. PAYMENT FOR SERVICE (Cont'd)

E. Disputes by Residence Customers (Cont'd)

4. The customer shall pay an amount equal to that portion of the total bill not in dispute. This portion will be mutually determined by the customer and the Telephone Company. The customer's previous usage, the nature of the dispute and other pertinent factors shall be considered when determining the disputed amount. The Telephone Company will not discontinue service for nonpayment of charges in dispute while the dispute is pending.
5. If the Telephone Company and the customer cannot agree on the undisputed amount to be paid, the customer must pay, at the Telephone Company's option, an amount not to exceed fifty (50) percent of the disputed charge or an amount based on the usage during a like period, under similar conditions.
6. Failure by the customer to pay the undisputed amount within four (4) working days from the date the dispute is registered or by the due date of the disputed bill, whichever is later, shall constitute a waiver of the customer's right to the continuance of service.
7. If the dispute is resolved in favor of the customer in whole or in part, the Telephone Company will promptly refund any excess monies paid by the customer.
8. If the dispute cannot be resolved in favor of the customer, the Telephone Company shall notify the customer of their right and the Telephone Company's right to make an informal complaint with the Missouri Public Service Commission (Commission). The Telephone Company will provide the customer with the address and telephone number where the complaint may be filed. If the customer files an informal complaint but does not notify the Telephone Company that part or all of any charge on the customer's bill is in dispute, the Commission will notify the customer of the payment required in paragraphs 5 and 6 preceding.
9. After resolution of a complaint, the Telephone Company may treat a second complaint based on the same facts as already determined and is not required to comply with Missouri Public Service Commission rules set forth in 4 CSR 240-33.080.

RULES AND REGULATIONS APPLYING TO ALL CUSTOMER'S CONTRACTS

- XI. TRANSMITTING MESSAGES - The Telephone Company does not transmit messages but offers the use of its facilities when available for communications between parties.
- XII. USE OF LINES OF OTHER COMPANIES - When suitable arrangements can be made, lines of other telephone companies may be used in establishing wire connections to points not reached by the Telephone Company's lines. In establishing connections with the lines of other companies, the Telephone Company is not responsible or liable for any action or default of the Connecting Company.
- XIII. **CUSTOMER SPECIFIC PRICING PLAN SERVICES**

Customer Specific Pricing Plan Services are available for the provision of:

- A. Dedicated, non-switched, private line and special access services;**
- B. Central office-based switching systems which substitute for customer premise, private branch exchange (PBX) services; and**
- C. Any business service offered in an exchange in which basic local telecommunications service offered by the incumbent local exchange telecommunications company has been declared competitive under Section 392.245 RSMo., and any retail business service offered to an end-user in a noncompetitive exchange.**

Unless otherwise provided in the customer contract, the rules and regulations applying to all customers' contracts found in this and other sections of this tariff apply to all Customer Specific Pricing Plan Services.

Customer Specific Pricing Plan Services arrangements will be provided to the Commission on a proprietary basis upon request.

In establishing connections with the lines of other companies, the Telephone Company is not responsible or liable for any action or default of the Connecting Company.
- XIII. SPECIAL SERVICES AND FACILITIES
- A. Special services and facilities, not otherwise mentioned in, provided for or contemplated by the tariff schedules of the telephone company, may be furnished or leased pursuant to special contract for such special service or facility for such period as may be agreed upon, provided such special service or facility or the use made thereof is not unlawful and does not interfere with the telephone service furnished by the Telephone Company. All contracts which may be entered into pursuant to this tariff provision shall be submitted to the Public Service Commission for its approval. No such contract shall be effective until approved by the Commission.
- B. In the event any such special service or facility or the use made thereof interferes with the furnishing of telephone service by the Telephone Company, the Telephone Company may terminate such contract and cease to furnish such special service or facility after thirty days written notice to the customer and provided further that the commission may terminate such contract whenever, in its opinion, public interest requires such termination.

RULES AND REGULATIONS APPLYING TO ALL CUSTOMERS' CONTRACTS

XIV. OBSERVANCE OF RULES AND REGULATIONS - Failure on the part of customers to observe the rules and regulations of the company automatically gives the company the right to cancel the contract and discontinue the furnishing of service.

XV. TELECOMMUNICATIONS SERVICE PRIORITY SYSTEM

The priority provisioning and restoration of services offered under this tariff relative to the National Security Emergency Preparedness (NSEP) Telecommunications Service Priority (TSP) System shall be pursuant to the regulations and rates as defined in P.S.C. MO.-No. 26 Access Services Tariff, Section 13.3 Miscellaneous Services.

For application in this tariff, such regulations, rates and charges shall be interpreted to apply on a "per request, per line/trunk" basis.

XVI. Telephone Company-provided terminal equipment or protective circuitry will be directly connected in accordance with the FCC Rules and Regulations.

XVII. When local exchange service, toll service, and/or extended area service of other customers is and/or will be degraded by the telephone service of one customer, e.g. answering devices (customer or company owned), time and temperature, etc., the Telephone Company may: (1) refuse to allow such service, (2) require Traffic Load Protection Equipment (where Traffic Load Protection (TLP) is required, the customer will bear the expense), (3) require the customer to lease an adequate amount of access lines, or (4) develop alternate arrangements to properly protect the network.

XVIII. The Telephone Company will make reasonable efforts to cure any material failure to provide service caused solely by year 2000 defects in Telephone Company hardware, software or systems. Due to the interdependence among telecommunications providers and the interrelationship with non-Telephone Company processes, equipment and systems, the Telephone Company is not responsible for failures caused by circumstances beyond its control, including, but not limited to, failures caused by: 1) the Customer; 2) other telecommunications companies as defined by Missouri statute; or 3) customer premises equipment. In addition, the Telephone Company does not ensure compatibility between Telephone Company and non-Telephone Company services used by the Customer.

The priority provisioning and restoration of services offered under this tariff relative to the National Security Emergency Preparedness (NSEP) Telecommunications Service Priority (TSP) System shall be pursuant to the regulations and rates as defined in P.S.C. MO.-No. 26 Access Services Tariff, Section 13.3 Miscellaneous Services.

For application in this tariff, such regulations, rates and charges shall be interpreted to apply on a "per request, per line/trunk" basis.

XVI. Telephone Company-provided terminal equipment or protective circuitry will be directly connected in accordance with the FCC Rules and Regulations.

XVII. When local exchange service, toll service, and/or extended area service of other customers is and/or will be degraded by the telephone service of one customer, e.g. answering devices (customer or company owned), time and temperature, etc., the Telephone Company may: (1) refuse to allow such service, (2) require Traffic Load Protection Equipment (where Traffic Load Protection (TLP) is required, the customer will bear the expense), (3) require the customer to lease an adequate amount of access lines, or (4) develop alternate arrangements to properly protect the network.

RULES AND REGULATIONS APPLICABLE
TO FRANCHISE TAXES

I. GENERAL REGULATIONS:

When any legally constituted governmental body imposes a franchise, occupation, business, sales, license, excise, privilege, or similar tax of any kind on this Company, the amount thereof, insofar as practical, shall be charged on a proportionate basis to all customers receiving telephone service within the boundaries of such governed area. This tax charge, in all cases, will be in addition to the regular charges for telephone service, and will appear on the regular customer bill, identified as such.

II. METHOD OF BILLING:

All such taxes imposed on this Company may be billed periodically to each access line in proportion to the total tax divided by the number of access lines, or it may be billed monthly to each customer as a percentage of their total local service charges. If a percentage factor is used, it shall be equivalent to the ratio of the total tax to be paid by the Company, to the local service revenues, or gross receipts, etc., being taxed.

DERIVED CHANNEL SERVICES

I. INDIVIDUAL VOICE CHANNELS FOR CUSTOM ACCESS SOLUTIONS

A. DESCRIPTION

1. Individual Voice Channels for Custom Access Solutions is an intraexchange digital service designed to provide for the integration of multiple voice channels over Custom Access Solutions as found in **CenturyLink Operating Companies Interstate Service Guide**, Section 8.7. (T)
2. Individual Voice Channels are segregated from the data channels using a Digital Access and Cross-connect System (DACS) located in the Telephone Companies' central office. The DACS will route the voice traffic to the serving wire center switching equipment. Individual Voice Channels may be provisioned with ISDN-PRI functionality upon request. (T)
3. Customers subscribing to Individual Voice Channels for Custom Access Solutions are limited to a maximum of 20 Individual Voice Channels per 1.544 Mbps facility. Each channel is dedicated to the provisioning of Individual Voice Channels for Custom Access Solutions. Channels not activated will not be used for purposes other than providing Individual Voice Channels for Custom Access Solutions.
4. Customers subscribing to Individual Voice Channels for Custom Access Solutions must also order data channels at the same time from **CenturyLink Operating Companies Interstate Service Guide**, Section 8.7, in one of the following combinations: (T)

Individual Voice Channels ⁽¹⁾	Frame Relay Service			
	256 Kbps (4 Channels)	384 Kbps (6 Channels)	512 Kbps (8 Channels)	768 Kbps (12 Channels)
6	10	12	14	18
8	12	14	16	20
10	14	16	18	22
12	16	18	20	24
14	18	20	22	N/A
16	20	22	24	N/A
18	22	24	N/A	N/A
20	24	N/A	N/A	N/A

Shaded area reflects total channels utilized for each combination.

(1) A minimum of 12 Individual Voice Channels is required when provisioned with ISDN-PRI functionality and each configuration requires one D-channel. For example, when a customer subscribes to 12 Individual Voice Channels with ISDN-PRI functionality, the customer is provided with 11 B-channels and one D-channel.

RURAL LINE SERVICE

REC'D OCT 27 2000

I. SERVICES FURNISHED:

A. The following classes of exchange service are furnished at monthly rates specified in the "Local Exchange Service" section for each exchange rate group. (RT)

1. Exchange **services will be subject** to the provisions of this tariff or under the "Construction and Installation Charges", "Local Exchange Service Rate Groups", and "Mileage" sections of the General Exchange Tariffs. (RT)

a. One (1) Party business or residence.

b. Rural One (1) Party business or residence.

PROVIDED THAT:

Rural Business and Residence one-party or four-party service will be furnished subject to facilities being available.

Until such time as the Telephone Company is in a position to furnish rural one-party service, rural four-party service will be furnished subject to provisions of this and other applicable General and Local Exchange Tariffs. Where business or residence one-party service has been provided, four-party service will not be provided at that particular location thereafter.

II. SPECIAL RULE APPLYING TO BUSINESS TELEPHONE ON RURAL LINES

The Company reserves the right to connect business and residence access lines to the same rural line. Whenever, in the judgement of the Telephone Company, the volume or nature of the usage of a line by a business customer becomes such that the service of the other customers on the line is materially affected to the detriment of the other customers, then the Company may require the business customer to contract for one-party business service at the specified rate in the "Local Exchange Service" and "Mileage" sections of the General Exchange Tariff.

B. DEFINITIONS

1. Digital Access and Cross-connect System (DACs) – A digital switching device for routing and switching T-1 lines, and DS0 portions of lines, among multiple T-1 ports. The DACs performs all the functions of a normal “switch” except connections are typically setup in advance of the call, not together with the call.
2. Custom Access Solutions – Provides for the integration of multiple voice and data channels over the same 1.544 Mbps **facility**. (T)

C. GENERAL REGULATIONS

1. The regulations and rates specified herein for Individual Voice Channels for Custom Access Solutions are in addition to the applicable regulations and rates in other tariffs and other sections of this tariff. Unless specified, the regulations for Individual Voice Channels for Custom Access Solutions apply in addition to the General Regulations set forth in this tariff.
2. Individual Voice Channels for Custom Access Solutions is provided subject to the availability of appropriate facilities as determined by the Company. Service inquiries will be necessary to determine availability.
3. Customer Premise Equipment (CPE) that is compatible with Individual Voice Channels for Custom Access Solutions is the customer's responsibility to provision.
4. The Company shall not be responsible if changes in any of the equipment, operations or procedures of the Company utilized in the provisioning of Individual Voice Channels for Custom Access Solutions render any facilities provided by the customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.
5. Individual Voice Channels for Custom Access Solutions is only available where facilities permit.

RURAL LINE SERVICE

MISSOURI
Public Service Commission

I. SERVICES FURNISHED: (Cont'd)

A. (Cont'd)

PROVIDED THAT:

Rural Business and Residence one-party or four-party service will be furnished subject to facilities being available.

Until such time as the Telephone Company is in a position to furnish rural one-party service, rural four-party service will be furnished subject to provisions of this and other applicable General and Local Exchange Tariffs. As facilities are made available rural business or residence one-party service will be provided to customers that request it. Where business or residence one-party service has been provided, four-party service will not be provided at that particular location thereafter. When a service is changed from rural four-party to rural one-party service, the service connection or change charges are not applied.

II. SPECIAL RULE APPLYING TO BUSINESS TELEPHONE ON RURAL LINES

The Company reserves the right to connect business and residence access lines to the same rural line. Whenever, in the judgement of the Telephone Company, the volume or nature of the usage of a line by a business customer becomes such that the service of the other customers on the line is materially affected to the detriment of the other customers, then the Company may require the business customer to contract for one-party business service at the specified rate in the "Local Exchange Service" and "Mileage" sections of the General Exchange Tariff.

UNITED **SWITCHLINK** SERVICES*

(T)

I. General

A. United **SwitchLink** Services are serving wire center based communications services for the transmission of digital signals, over a specifically equipped two-wire access line. United **SwitchLink** Services may be ordered as follows:

(T)

(T)

1) United **SwitchLink** provides asynchronous and synchronous data access at speeds up to and including 19.2 kbps.

(T)

2) United **SwitchLink** Plus provides asynchronous data access at speeds up to and including 19.2 kbps and synchronous data access at speeds up to and including 56 kbps.

(T)

B. United **SwitchLink** Services are not inherently voice functional. Use of the service is limited to the transmission of digital signals.

(T)

II. Definitions

United **SwitchLink** Access Line refers to the non-loaded two-wire facility connecting the customer premises to the United **SwitchLink** Services switching equipment.

(T)

(T)

United **SwitchLink** Services Service Arrangement refers to the equipment required in the serving wire center per line to support data transmission speeds over the United **SwitchLink** Service Access Line.

(T)

(T)

United **SwitchLink** Services-Serving Wire Center refers to the central office containing United **SwitchLink** Services switching equipment.

(T)

(T)

Serving Wire Center denotes the local telephone central office in which telephone communication is established between stations within a specified area.

*Limited to existing customers at existing locations as of October 26, 2001.

UNITED SWITCHLINKSM SERVICES *

(C)

I. General

A. United SwitchLinkSM Services are serving wire center based communications services for the transmission of digital signals, over a specifically equipped two-wire access line. United SwitchLinkSM Services may be ordered as follows:

- 1) United SwitchLinkSM provides asynchronous and synchronous data access at speeds up to and including 19.2 kbps.
- 2) United SwitchLink PlusSM provides asynchronous data access at speeds up to and including 19.2 kbps and synchronous data access at speeds up to and including 56 kbps.

B. United SwitchLinkSM Services are not inherently voice functional. Use of the service is limited to the transmission of digital signals.

II. Definitions

United SwitchLinkSM Access Line refers to the non-loaded two-wire facility connecting the customer premises to the United SwitchLinkSM Services switching equipment.

United SwitchLinkSM Services Service Arrangement refers to the equipment required in the serving wire center per line to support data transmission speeds over the United SwitchLinkSM Service Access Line.

United SwitchLinkSM Services-Serving Wire Center refers to the central office containing United SwitchLinkSM Services switching equipment.

Serving Wire Center denotes the local telephone central office in which telephone communication is established between stations within a specified area.

**Limited to existing customers at existing locations as of October 26, 2001.*

SEMI-PUBLIC TELEPHONE SERVICE

RECEIVED
Missouri Public Service Commission

I. GENERAL

- A. Semi-public telephone service will be furnished only under the following conditions:
 - 1. At locations where, in the judgement of the Telephone Company, installation of public telephone service is not warranted, but where there is an appreciable need for protection from the abuses by transients of normal customer service.
 - 2. At locations accessible to a relatively stable group composed of guests, members, employees or occupants, desiring only a directory listing, inward service and protection from toll abuse from transients. Examples of such locations would be clubs, fraternal organizations, educational institutions, hospitals and other small places of business.
- B. Not more than one (1) semi-public telephone will be installed on the same premises except when, in the judgement of the Telephone Company, additional semi-public telephones are warranted.
- C. Multi-coin wall equipment is furnished for semi-public telephone service and the Telephone Company reserves the right to specify the location of this equipment on the customer's premises.
- D. Semi-public telephone service is furnished only on an individual line basis.
- E. Listings in connection with semi-public service are furnished in accordance with the provisions specified in the "Directory Listings" section of this tariff.
- F. Customers may be required to display public telephone signs furnished by the Telephone Company.
- G. The regulations specified in the "Advance Payments and Deposits" section of this tariff apply to semi-public telephone service.

SEMI-PUBLIC TELEPHONE SERVICE

MISSOURI
Public Service Commission

I. GENERAL (Cont'd)

- H. The service connection and moves charges applying to simple business as specified in the "Service Connection Charges" section of this tariff apply to semi-public telephone service.
- I. The Telephone Company reserves the right to refuse installation or continuance of other grades of telephone service on the same premises where semi-public telephone service is provided. Where, in the judgement of the Telephone Company, other grades of service are warranted on the same premises with semi-public service, the Telephone Company reserves the right to specify the location of such station facilities.

II. RATES

- A. Each local message is charged to the public at twenty-five cents (\$0.25) and toll messages are charged for at the established toll rates of the company responsible for carrying the call. Additionally, an operator services charge or its equivalent may also be applicable.
- B. The minimum service period for semi-public service is one month.
- C. The following monthly rates are applicable to semi-public telephone service:
 - 1. Monthly semi-public coin access line rate as specified in the Local Exchange Service section for each rate group.

Monthly Rate

2. Coin collecting telephone instrument. \$ 7.50

- D. Charges for zone mileage beyond the initial rate area, directory listings, miscellaneous equipment, etc. are applied in addition to the monthly rates for the semi-public instruments and access line.
- E. In a location where there is evidence of frequent usage of slugs, foreign or mutilated coins, and after the customer has been notified that such use must be discontinued, the Telephone Company reserves the right to discontinue semi-public service.

PAYPHONE LINE SERVICE

III. PAYPHONE SERVICE PROVIDER

A. General

1. Payphone Line Service is a class of service furnished to individuals, firms or corporations which permits connection of a customer-provided instrument that is activated by the deposit of coins, cards, tokens or the entry of a customer account number, to the lines of the Company.

2. Payphone Line Service is a two-way or, optionally, one-way originating only, business exchange access line composed of the serving central office line equipment, all outside plant facilities needed to connect the serving office with the customer's premises, and the network **interface**. **These** facilities are Telephone Company provided and maintained and provide access to and from the telecommunications network for long distance service and local calling. Billed Number Screening **as described in Section 18.F.** will be provided at no charge.

(M)

(T)

At the option of the customer, Selective Class of Call Screening may be provided at rates listed in 29.III.D following. **Selective Class of Call Screening enables a customer, by means of Telephone Company operator identification, to restrict outgoing toll calls from station users to only those calls which are charged to the called telephone, a third number or a calling card account. All local calls and calls to Telephone Company numbers such as repair service, Directory Assistance service, and public emergency service numbers, such as 911, will be permitted.**

(M)

(T)

(T)

3. A network interface for all access lines associated with payphone line service will be installed at a location determined by the Telephone Company, which is accessible to the customer. The normal location of the demarcation point for all payphone service providers will be determined in a manner consistent with federal and state regulatory requirements.

The network interface is the point of connection with the telecommunications network and is the termination of the Payphone Access Line. It is a Telephone Company-provided Network Interface Device (NID) or its equivalent.

4. The Payphone Service Provider must assume responsibility for all calls billed to their line. Rates for Payphone Line Service are found in III.D.4-5 of this section.

5. Only one access line may be connected to a Payphone Line Service telephone. The access line for card operated telephone must be Touch Tone equipped. Rates for Touch Tone service are included in the Local Exchange Service rate.

SEMI-PUBLIC TELEPHONE SERVICE

SEP 17 1992

III. CUSTOMER OWNED COIN OR CARD OPERATED TELEPHONE SERVICE *Public Service Commission*

A. General

1. Customer Owned Coin or Card Operated Telephone service will apply for use with customer-provided coin or card operated (coinless) telephones at locations accessible to the public, e.g. airports, truck stops, hotels/motels, schools or college buildings and other business locations where desired by the owner of the premises.
2. Customer Owned Coin or Card Operated Telephone service is a two-way or, optionally, one-way originating only, business exchange access line composed of the serving central office line equipment, all outside plant facilities needed to connect the serving office with the customer's premises, and the network interface. Where facilities are available and at the option of the customer, Selective Class of Call Screening may be provided at rates listed in the Miscellaneous Equipment and Service section of the tariff. These facilities are Telephone Company provided and maintained and provide access to and from the telecommunications network for long distance service and local calling. Billed Number Screening will be provided at no charge at the customer's request.
3. Customers providing Owned Coin or Card Operated Telephone service must assume responsibility for all calls billed to their line. Rates for Customer Owned Coin or Card Operated Telephone service are found in III.D.4-7 of this section.
4. Only one access line may be connected to a customer provided coin or card operated telephone. The access line for card operated telephone must be U-touch equipped. Rates for U-touch service are listed in section 18 of this tariff.
5. Customers who discontinue Telephone Company provided Semi-Public Coin service and subscribe to Customer Owned Coin or Card Operated Telephone service will retain the same telephone number associated with ~~their~~ *CANCELLED* Public service.

PAYPHONE LINE SERVICE

III. PAYPHONE SERVICE PROVIDER (Cont'd)

A. General (Cont'd)

6. Answer Supervision provides the capability of delivering "off-hook" supervisory signals from the subscriber's serving central office to a line interface at the customer premises for local and 1+ intraLATA toll calls processed and completed by the Telephone Company. These supervisory signals indicate that the called party has answered the incoming call (gone "off-hook").

(AT)

1. Answer Supervision is furnished only from central offices arranged to provide this service and is provided subject to the availability of facilities.

2. This feature is only available with line side terminated PBX trunks and pay telephone access lines. It is not available with residence or business lines, digital facilities, or trunk side terminated facilities, such as DID trunks, or trunk side access facilities.

PAYPHONE LINE SERVICE

(CT)

III. PAYPHONE SERVICE PROVIDER (Cont'd)

(CT)

A. General (Cont'd)

7. Coin control service is available as an optional service for use in conjunction with payphone line service. Coin control service is based on a central office platform which offers features for use with coinless or coin operated (payphone) telephone service. Coin control service uses a software-driven system to provide features and capabilities similar to those provided by micro-processor based, "smart", payphone sets.

(AT)

Coin control service provides the following features:

a. Coin control for collection, return and recognition - monitors signals from the payphone to identify when coins are deposited. This feature identifies the status of the attempted call and sends a signal to the payphone to collect the coins when the call is completed or return the coins when the call is not completed.

b. Originating line screening - alerts the operator and interexchange carrier systems that the call is originating from a payphone line and may require special handling and billing treatment.

c. Billed number screening - provides an indication in validation data bases that incoming collect and bill - to-third number calls are not to be billed to the payphone line.

d. Announcements - provides standard announcements used with payphone telephone service. Announcements such as deposit required for long distance calls, amount of overtime credit and additional deposits required are provided by this feature.

e. Pre-prompting for overtime - allows the payphone line customer to prompt the end user for additional deposits required for overtime periods of conversation time, prior to the end of time limit and call cut-off if deposit is not received.

(AT)

8. One-way service will be provided only where facilities permit. Intercept treatment will be provided for one-way service.

SERVICE CONNECTION CHARGES - MOVES AND CHANGES

I. GENERAL

A. Service connection charges to connect, move or change telephone service and equipment apply separately for one or more of the following work functions for complex business* or simple business/residence* class of service customers:

1. Record order charge - For receiving, recording and processing information necessary to execute a customer request where only customer, business office or directory records are involved and no premise work, access line work or travel time is necessary. The record order charge does not apply when other service connection charges are applicable.
2. Service order charge - For receiving, recording and processing information necessary to execute a customer's request to connect, move or change telephone service and equipment.
3. Access line work charge - For work associated with the establishing or changing the line connection in the central office and/or outside plant facilities, including the drop wire and protector.
4. Premise visit charge - For the expense associated with traveling to the customer's premises.

*Complex business and simple business/residence definitions can be found in the "Explanation of Terms" Section.

SERVICE CONNECTION CHARGES - MOVES AND CHANGES

I. GENERAL (Cont'd)

- B. Service connection charges are in addition to any other scheduled tariff rates and charges. They apply in addition to and not in lieu of installation charges, non-recurring charges (NRC) or construction charges which are found in other sections of this tariff.
- C. The charges specified herein do not contemplate work being performed at a time when overtime or premium wages apply due to the request of the customer; nor do they contemplate work once begun being interrupted by the customer. If the customer requests overtime labor performed or interrupts work once begun, additional charges will apply.
- D. "Cost" as used in this section, is to be interpreted to mean the cost of labor and materials, including charges for supervision and other overhead expenses.
- E. Service connection charges are applicable for the following:
 - 1. Installations - Initial establishment of telephone service. No distinction is made between an installation and the "To" order of a "To and From" service order.
- F. Certain interexchange service connection charges covered by connecting company tariffs apply to installations, moves and changes of interexchange services, such as foreign exchange lines, WATS lines, and other special services; and are in addition to charges in this tariff.
- G. Residence service connection charges may be billed in equal amounts over periods not exceeding four months. Only one such arrangement at any one time will be provided.

SERVICE CONNECTION CHARGES - MOVES AND CHANGES

III. APPLICATION OF RATES

A. Record Order Charge

The record order charge is applicable, but not limited to, the following customer requests which do not involve line connection or on-premise work:

1. Changes or additions involving directory listings or joint user service.
2. Record order charges do apply when a customer requests a change from business to residence or from residence to business.

B. Service Order Charge

1. One service order charge per order is applicable for work done to comply with a customer's request for: installations, the "To" portion of a "To and From" order, inside moves, rearrangements and changes in the telephone service. This also includes customer requested telephone number changes.
2. The term "per order" means all work or service ordered at the same time by the customer, which is performed or provided on the same premises.
3. Unless otherwise specified, the appropriate service order charge is applicable to a customer order for equipment or service, and is in addition to any other non-recurring charge which may be applicable for that equipment or service provided.
4. A service order charge is applicable when a customer requests a change in grade of service.

III. APPLICATION OF RATES (Cont'd)

C. Access Line Work Charge

1. Access line work charges are applicable to placing, connecting, or changing the central office wiring and/or outside plant facilities for the following services:

- a. Business & Residence Main Line Services
- b. Payphone Line Service (CT)
- c. Private Branch Exchange Trunks
- d. Tie Lines
- e. Private Lines (alarms, teletype, music, etc.)
- f. Telephone Answering Service Lines
- g. Transfer Service
- h. Foreign Exchange Lines (for local termination of access lines) (RT)

In addition to the above service, access line work charges are applicable to other services as specified in other sections of this tariff.

D. Premise Visit charge (Travel Charge)

1. The travel charge is applicable if a premise visit is required, to complete work on or adjacent to the customer's premises, as a result of the customer request, except as provided in 2 below. This includes but is not limited to the installation, connection or change of aerial or buried drop wire in the serving terminal or protector as well as work required on the customer's side of the protector.

SERVICE CONNECTION CHARGES - MOVES AND CHANGES

IV. SERVICES CONNECTION CHARGES DO NOT APPLY TO: (T)

- 1. Telephone equipment located on a customer's premises, but used exclusively by the telephone company for maintenance or training activities.
- 2. Inside moves or changes made at the initiative of the telephone company for service reasons.
- 3. Changes from one grade of service to another when the change is initiated by the telephone company, such as mass upgrades prompted by the addition of plant facilities.

(D)

- 4. Disconnection of service for nonpayment of charges due. The charge applicable for restoration of service is specified in the "Restoration of Service" section of this tariff. (T)

- 5. Disconnection and/or removal of the following items of service, or equipment providing no other work subject to service connection charges is involved. (T)

- A. Main or extension telephone service and/or line.
- B. Directory listings and directory services for which monthly recurring charges apply except that service connection charges will apply to customers who have published numbers and go to non-published number, or those who change non-published numbers or go from non-published numbers to published numbers.
- C. Other items of service or equipment for which a monthly recurring charge applies.

- 6. Temporary Suspension of Service (Vacation Service). The charge applicable for reinstating Vacation Service is specified in the "Restoration of Service" section of this tariff. (T)

- 7. The "From" portion of work involved in a transfer of service and equipment from one to another premises. (T) (M)

- 8. Suspension and restoral of service for vacation rate. (T)

- 9. The following cases, if the contract for the service and responsibility for the account including any amounts due or past due, are taken over prior to discontinuance of service and without lapse in rendition of or charge for service: (T)

- A. A change in the ownership of a business, not requiring a record order or service order.
- B. A transfer of residence service from one member of a family to another member of such family at the same location, not requiring a billing or listing change. (M)

SERVICE CONNECTION CHARGES - MOVES AND CHANGES

RECEIVED

JUL 27 1993

SERVICES CONNECTION CHARGES DO NOT APPLY TO:

MISSOURI

Public Service Commission

1. Installation, moves or changes of public telephones.
2. Telephone equipment located on a customer's premises, but used exclusively by the telephone company for maintenance or training activities.
3. Inside moves or changes made at the initiative of the telephone company for service reasons.
4. Changes from one grade of service to another when the change is initiated by the telephone company, such as mass upgrades prompted by the addition of plant facilities.
5. Service reestablished after destruction of the customer's premises by an Act of God or a public enemy, whether at the same or another location. Regular service charges apply, however, to service reestablished in the old location after termination of service or subsequent to its establishment at another location under the above circumstances.

For customers displaced by the major flooding in the summer of 1993, service connection charges do not apply to the establishment of service at an interim location nor to the later re-establishment of service at the same or another location, not to exceed two service connection charge waivers. This special flooding provision expires on December 31, 1993.

SERVICE CONNECTION CHARGES - MOVES AND CHANGES

SERVICE CONNECTION FOR OFF PREMISE MOVES OF SPECIAL EQUIPMENT

Where telephone service is moved from one to another premise in the same exchange:

- A. Any service at the old location which is terminated rather than moved, is subject to any minimum or termination charges which apply.
- B. Any service moved to or established at the new location is subject to any service connection charges, installation charges, minimum and basic termination charges, and to the initial service period, which would apply to a complete new installation of like size and character at the new location.

SERVICE CONNECTION CHARGES - MOVES AND CHANGES

VI. LINK UP MISSOURI

A. Application

- 1. The Link Up Missouri Program is a Federally sponsored low-income connection assistance program designed to make telephone service accessible to qualifying low-income residential households who are currently not on the public switched network. Through this program, the service connection charge for the initial installation of the main access line, as described under "Rates" in this section of the tariff, will be discounted to the applicant at a rate of 50 percent, not to exceed \$30.00. The remaining portion of the service connection charge, up to \$200, may be installment billed, interest-free, over a period of one year. (CT)
- 2. *In compliance with the FCC's Order, FCC 05-178, dated October 14, 2005, support under the federal Link-Up program will be provided to victims of Hurricane Katrina moving to temporary housing arrangements and to those who return to permanent residences in the affected areas. A federal credit in the amount of thirty dollars (\$30.00) per qualifying household will be available to subscribers upon request and certification by the applicants that they were residents of counties that are designated by FEMA as eligible for individual assistance. A signed letter with this certification will suffice. A maximum of two federal credits (one for the temporary location and one for a return to the permanent location) will be available for qualified subscribers. These credits will be available for customer orders through March 1, 2007. These subscribers will not necessarily be eligible for the Lifeline program as specified in this tariff.* (N)

VI. LINK UP MISSOURI

A. Application

Applicable to qualifying residential households as defined under eligibility requirements below. These reduced charges described below shall be assessed only for a single residential telephone line per eligible household at the principal place of residence.

1. All tariffed charges applied in initiating telephone service to residential customers shall either be reduced by one half of the amount required to connect the customer to the local telephone network or thirty dollars, whichever is less, and
2. a six-month, interest-free deferred payment schedule will be established for the charges for initiation of local telephone service at the customer's option.

B. Eligibility Requirements

The following requirements shall be used by the company to determine the eligibility of a subscriber for Link Up Missouri assistance.

1. For federal income tax purposes, the applicant is not claimed as a dependent on another person's tax return unless over 60 years of age.
2. The applicant is currently receiving MEDICAID/Medical assistance payments from the State of Missouri, and has provided their Department of Social Services Client Number (DCN) to the Company.

Of the eligibility requirements listed above, item 1 will be certified by the applicant and reviewed by the telephone company and item 2 will be state or company certified.

C. Rates

50% of the applicable service connection charges found in II. of this section of the tariff, up to a maximum of \$30.

VI. LINK UP MISSOURI (Cont'd)

(NT)

B. Eligibility Requirements (Cont'd)

4. (Cont'd)
a. (Cont'd)

Proof of eligibility must accompany the completed Link Up Missouri application form. Proof of eligibility can be made by mailing a copy of the applicant's proof of participation and enclosing that with a completed Link Up Missouri application to the local exchange company's business office.

OR

- b. Applicant can show that household income falls within the income guidelines for the Missouri Low Income Energy Assistance Program. Household income is defined as total gross income from all sources for all members of the applicant's household.

C. Verification of Eligibility

1. In determining an applicant's eligibility, the eligibility criteria B.1. through B.4. listed above need to be fulfilled.
2. Applicants will be able to self-certify criteria B.1, B.2 and B.3.
3. Criterion B.4.a. or B.4.b. must be verified by the applicant's local exchange company.

D. Credit and Collections

If an applicant is known to have a poor credit history, a deposit may be required.

Once service has been established for a Link Up Missouri applicant, he or she will be expected to adhere to the same bill payment policies expected of any other Telephone Company customer.

There is no restriction as to the number of service connections per year for which qualifying low-income subscribers who relocate may receive Link Up Missouri support.

VII. Lifeline Service

MO. PUBLIC SERVICE COMM.

A. General

Lifeline Service is a means of maintaining and preserving universal service by providing service to customers who are not able to meet basic residential communications needs.

Lifeline Service is limited to one line per household at the customer's primary residence.

B. Requirements

The following requirements have been used by the company to determine the eligibility of a subscriber for Lifeline Service.

1. This service is available to those customers who are certified by the Department of Social Services as eligible to receive Utilicare benefits. The Department of Social Services shall inform such persons of how to apply for Lifeline Services and shall provide to each person documentation of eligibility for participation in the program.

C. Rates

1. A credit of \$3.50 will apply to customers monthly bill. (CT)
2. All charges either recurring or non-recurring for any service other than Lifeline Service, as described herein, shall be billed at the tariffed rate.
3. Service Charges do not apply when Lifeline Service is established or discontinued and it is the only service being ordered.

SERVICE LINE SERVICE

SEP 17 1992

**MISSOURI
Public Service Commission**

II. GENERAL REGULATIONS (Cont'd)

B. (Cont'd)

- 3. Service of both Companies shall not be offered to any irregular.
- 4. The Secretary and/or President of any switcher line shall be responsible to the Telephone Company as to properly handling any switcher line irregulars.

C. Contracts are executed with an agent, representing all service line customers on the line, and the agent is responsible for the payment in full of all charges to the account. Contracts are executed with the agent for a period of one year, terminable thereafter upon thirty days' written notice. All charges are payable monthly in arrears.

D. Under the service line rates shown on the Local Exchange Tariff for each exchange, the Telephone Company will provide pole line facilities and circuits from the central office to a junction point at the initial rate area boundary.

E. Customer's lines, instruments, and apparatus must be constructed, maintained, and operated so as to insure satisfactory service, or connection will not be permitted.

Failure to provide satisfactorily for the proper maintenance shall be considered a voluntary termination of the contract by the customer (agent).

F. No extension telephones are provided for in connection with service telephones, all telephones being charged for at the service line rate shown in the Local Exchange Tariff.

SERVICE LINE SERVICE

III. SERVICE LINES CONNECTED WITH A CENTRAL OFFICE

- A. The rates for service ***lines specified in this tariff for*** each exchange apply when five (CT) or more telephones are connected to the line and entitle customers to switching service and to one listing for each main telephone.
- B. If there are less than five telephones connected to the line, the rate for a residence telephone is the rate for five residence telephones divided by the number of total telephones connected to the line, and the rate for a business telephone is twice the rate for a residence telephone except that the rate per business or residence service telephone shall not exceed the business or residence rate for exchange service for a corresponding class of line within the initial rate area, respectively.

SERVICE THROUGH MISCELLANEOUS COMMON CARRIERS

MISSOURI
Public Service Commission

I. GENERAL

- A. Mobile units of customers of Miscellaneous Common Carriers will be interconnected with telephone exchange and long distance service provided by the telephone company for the interchange of telephone messages, subject to the provisions of this tariff and the rules and regulations of the Public Service Commission of this state.
- B. Interconnecting service will be provided only for Miscellaneous Common Carriers with whom arrangements have been made in the form of a written agreement signed by both the Miscellaneous Common Carrier and the Telephone Company.
- C. The rates set forth in this tariff are applicable to calls originated by customers of the Miscellaneous Common Carrier for that portion of the service from the point of connection with telephone company facilities to stations in the local telephone exchange service area within which the Miscellaneous Common Carrier base station is located.
- D. Additional charges which the Miscellaneous Common Carrier bills to its customers are the charges of the Miscellaneous common Carrier applicable to its portion of the interconnecting service.
- E. Interconnecting service provided under this tariff is restricted to calls to and from the Miscellaneous Common Carrier's mobile units within reliable range of and speaking directly with the Miscellaneous Common Carrier mobile base station serving the area in which the point of connection with telephone company facilities is located. Relaying of messages by the Miscellaneous Common Carrier from one base station to another by radio or other means for purposes of circumventing payment of message toll charges is not allowed.

SERVICE THROUGH MISCELLANEOUS COMMON CARRIERS

MISSOURI
Public Service Commission

I. GENERAL (Cont'd)

F. Interconnecting service for the purpose of transmitting long distance message toll calls intrastate will be provided subject to the Intrastate IntraLATA Message Telecommunications Service tariffs of the affected telephone companies. The Telephone Company will bill the Miscellaneous Common Carrier and the Miscellaneous Common Carrier shall bill and collect message toll charges, applicable state and federal taxes, from its customers and pay the Telephone Company, in addition to the regular monthly charges for the interconnecting service.

G. The point of connection of the Miscellaneous Common Carrier facilities to the Telephone Company facilities shall be at the control point of the Miscellaneous Common Carrier mobile radio base station. Connection is made only by means of interconnecting lines provided by the Telephone Company. Calls to and from mobile unit customers of the Miscellaneous Common Carrier are interconnected by the carrier's operator.

II. RATES

A. Flat Rate Interconnecting Service

1. Interconnecting service is furnished for Miscellaneous Common Carriers for their mobile unit customers in accordance with the "Special Equipment and Assemblies" section of this tariff. Local Message use including messages over Extended Area Service is furnished at the exchange of connection.

	<u>Monthly Rate</u>
2. Paging DID Numbers* (100) (RPMNUM RQ) and (RPMNUM)	\$22.00
3. Mobile DID Numbers* (100) (RMEMNUM RL) and (RMEMNUM)	91.00

* For additional Direct Inward Dial Equipment Charges see Section 18 of the tariff.
