VS  
Laclede Gas Co.

Dear Missouri Public Service Commission,

Please help me retrieve \$1,266.73 from Laclede Gas Co that was insisted that I pay before I could get a sales inspection for property that I owned at 930 Elias St Louis MO 63147. Over 5 years ago I asked that my gas services be turned off because of several disputes with the company about over charging and estimating to much for gas. I would not leave their company on bad terms nor without paying my final bill. I never know when I may need the services again.

As a General Contractor I decided to convert my house over to electric by changing the hot water tank and cook stove from gas to electric and heating my house with a fire place along with a few heaters.

Laclede Gas Co accused my household of stealing gas because, two meter readings were different. When the Laclede inspector came out to read the meter he bought a police officer with him. The two of them saw my house was converted to electric, both of them helped me tare out a finished wall in order to get to the meter. When meter installer took their old meter out and replaced it with another they could have confused the numbers, I don't know the reasoning but, I think it's madness because I don't use their service anymore and have not for over five years. I think they are trying to punish me and my family for canceling their services.

Please Help!

Sincerely,

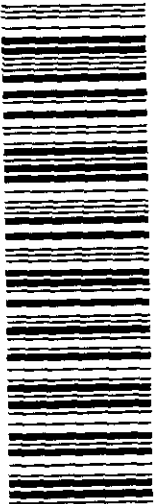

Clyde E. Bradford
