Re: Cheryl Tabular
Case # EC 2007-0146

ms Tabular has been under our care for degenerative disc disease for several years. Most recently she has been diagnosed with Lymphoma & has had recurrent episodes of pneumonia requiring hospitalization as recently as this week. It is detrimental to her health to not have electricity, which controls her heart, especially this time of the year when the nights are very cold. Please reconsider this case & provide her with electricity.

Sincerely,

A. Thomen Reece MD
