1.3 Description of Services

1.3.1 Working Assets Funding Service, Inc. d/b/a Credo Long Distance is a communications common carrier providing various interexchange communications services. Specific service offerings are described below.

1.3.2 Timing of Calls

The Subscriber's long distance usage charge is based on the actual usage of Carrier's network. Usage begins when the called party picks up the receiver. When the called party picks up is determined by hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. When software answer supervision is employed, up to 60 seconds of ringing is allowed before it is billed as usage of the network. A call is terminated when the calling party hangs up. Usage charges are rounded to the next six seconds.

1.3.3 Calculation of Distance

- A. Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.
- B. The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The Company uses the rate centers and associated vertical and horizontal coordinates that are produced by Bell Communications Research in the NA-NXX V&H Coordinates Tape and Bell's NECA Tariff No. 4.
