Tariff Descriptions

Service Description

Directory Listings

Sprint's Directory Listing service regards the inclusion or exclusion within the printed telephone directory as well as directory assistance and charges are associated with the following: (a) private telephone number, (b) additional listing, (c) alternate listing, (d) duplicate listing, (e) foreign listing, (f) and inclusion of office hours.

Extension

An extension is an additional station instrument connected to the same circuit as the main station, and having the same telephone number as the main station. Extension service includes separate ringing, directory listing, telephone number, and available only at the premise of the Main Station.

EAS

Extended Area Service is a non-optional arrangement whereby customers in one exchange can call customers in another exchange without incurring toll charges.

Local Measured

LMS provides customers the option of paying a reduced monthly rate with an additional amount for measured calling to all points within the existing non-toll calling area.

Extension and Tie Line Mileage

The Extension and Tie Line Mileage service is associated with PBX and Key Station service and is where the line is routed through central office, mileage is computed on the airline distance between each terminal and its central office of connection.

Direct Inward Dialing (or PBX)

Direct Inward Dialing (DID) is available only in those central offices that are equipped for such service and is furnished for use with PBX systems equipped for DID. The PBX or key-station equipment is considered to be CPE and Sprint's DID service provides the connection between the CPE and central office.

Digital Trunking

Digital Trunking Service is a digital intraexchange service furnished for use with PBX systems and appropriately equipped Key Systems and provides up to 24 digital channels within a single DS1 signal.

ISDN-BRI

Integrated Services Digital Network - Basic Rate Interface (ISDN-BRI) is a local exchange telecommunications service that provides integrated voice and data communications capability. ISDN-BRI service supports the simultaneous transmission of voice and data over a single exchange access line. ISDN-BRI provides a customer two B-channels with transmission speeds up to 64 Kbps each and one 16 Kbps D-channel. The service provides switched communication paths providing end user access to a variety of network services and features including data, voice and video, which conforms to internationally developed, published and recognized standards generated by the International Telecommunications Union.

ISDN PRI

Integrated Services Digital Network (ISDN) - Primary Rate Interface (PRI) Service is an intraLATA group of offerings supported by the ISDN architecture. ISDN-PRI Service provides a method of access to the telephone network called Primary Rate Access. Primary Rate Access is an ISDN based, DS1 access link to the telecommunications network and provides integration of multiple voice and data transmission channels on the same line. The service will initially provide connectivity between an ISDN-PBX or other ISDN-compatible CPE and a serving central office. The basic channel structure for Primary Rate Access is twenty-three 64 Kbps B-Channels and one 64 Kbps D-Channel. Options are available for plus or minus 23 B-channels. These channels may be used to connect the customer's CPE to the Public Network (i.e., outward, inward, and two-way trunks, and WATS/800/888 Service access lines). ISDN-PRI is a service for the transmission of digital signals only.

Payphone

Payphone Line Service is a class of service furnished to individuals, firms or corporations which permits connection of a customer-provided instrument that is activated by the deposit of coins, cards, tokens or the entry of a customer account number, to the lines of the Company. Payphone Line Service is a two-way or, optionally, one-way originating only, business exchange access line composed of the serving central office line equipment, all outside plant facilities needed to connect the serving office with the customer's premises, and the network interface.

Sprint Solutions

Sprint Solutions is an optional residence service enrollment plan. The Plan permits a customer to receive features and services for a flat monthly rate, for each Sprint Solutions Package residence line provided. Sprint Solutions includes two or more of the following features and services: (a). flat rate local exchange service; (b) the option of subscribing to Sprint Sense Local Toll® Service; and (c) Network Services Package, and individual feature or a group of Custom Call/ExpressTouch® features.

Busy Verification

Busy Verification Service is furnished to customers upon request to provide Line Status or Busy Interrupt for a requested line or trunk. This service is provided where facilities exist.

Custom Calling

Custom Calling Services are optional telephone service arrangements which provide one or more of the following features:

- Call Waiting;
- Call Forwarding;
- · Three-Way Calling;
- Speed Calling;
- Directory Number Transfer;
- Hot Line/Warm Line;
- Intercom Service;
- Call Forward-Busy;
- Call Forwarding-No Answer;
- Call Screening and Transfer;
- Call Forward Universal;
- SignalRing;
- Call Forward of Call Waiting; and
- · Enhanced Call Forwarding.

ExpressTouch ®

ExpressTouch ® is the Company's registered trade mark for a set of advanced call management features including the following:

- Return Call;
- Caller ID with name;
- Caller ID Blocking;
- Call Trace;
- Call Waiting ID;
- Call Waiting Options;
- · Repeat Dialing;
- Selective Call Forward;
- Selective Call Rejection;
- Selective Call Ring; and
- Selective Call Acceptance.

Network Services Packages

Network Services Packages are offerings that combine certain ExpressTouch ® and Custom Calling Service options into packages at rates that provide a monthly savings over the rates that would apply if the services were purchased individually.

Forwarded Message Information

Forwarded Message Information is associated with PBX and Key-station service only and furnishes data about the origin and destination of a message that has been forwarded to a Provider's hunt group arrangement. "Provider" in this context is any entity that furnishes answering and/or voice messaging services to clients. Message Waiting Indication (MWI) is an additional feature included with Forwarded Message Information. This feature provides for an audible interrupted dial tone. This information includes: (1) the called station number, (2) the calling station number for intra-office calls; and (3) the type of call forwarding feature used by the called station number, such as busy or no answer.

MCA

MCA is an optional interexchange plan available in three distinct areas in Missouri: the St. Louis MCA, the Kansas City MCA and the Springfield MCA. Sprint only serves exchanges associated with the Kansas City MCA. Of the five Sprint exchanges that it seeks competitive classification, only Kearney and Platte City are in a MCA zone (Zone 3). This optional plan provides subscribers with a calling area that includes their respective metropolitan exchange and certain customers in other exchanges where MCA service is also available. The Commission, in Case No. TO-92-306 created MCA service to address customer requests for expanded calling scopes in the areas surrounding the three major metropolitan areas of St. Louis, Kansas City and Springfield. The existing calling scopes were modified to address the changing demographics of the metropolitan areas by creating an optional service that expands the local calling scopes for a flat-rated monthly charge. MCA service is not classified as interexchange message telecommunications service. Rather, MCA is similar to basic local telephone service.

About Aquila

Aquila (ticker: ILA, exchange: New York Stock Exchange) News Release - March 9, 2000

UtiliCorp Invests In Missouri Telecom Provider; Expansion Planned Into Energy Service Area

KANSAS CITY, MO, March 9, 2000 – UtiliCorp Communications Services today announced it is partnering with ExOp of Missouri, Inc. to bring digital-quality voice, data and Internet services to rural communities in the Kansas City area with planned expansion into other parts of UtiliCorp United's energy service territory.

UtiliCorp Communications Services, a non-regulated affiliate of UtiliCorp United, is joining the launch of a state-of-the-art telecommunications expansion in western Missouri with a \$7.5 million investment in ExOp, a facilities-based local exchange carrier in Kearney, Mo.

"Currently, our rural energy service territories are significantly under served by their current telecommunications and cable providers," said Jeff Ingram, vice president, UtiliCorp Communications Services. "We're excited about joining this partnership and bringing the best communications available into our service area."

ExOp, founded in 1996, is in the process of expanding its fiber transmission and distribution lines in the Kearney area, and plans to begin extending its fiber lines into adjacent communities. The company currently provides service to 1,400 voice and data access lines in Kearney. The \$7.5 million investment by UtiliCorp will allow ExOp to speed the expansion of its communications services in Kearney and into surrounding communities, Ingram stated.

Among services ExOp offers is local telephone service with features such as caller ID, call forwarding and voice mail; long distance services, and high-speed Internet access. Within the next few months, ExOp plans to begin providing digital cable television service UtiliCorp's investment represents a 35 percent ownership in ExOp. An additional 36 percent interest is held by St. Joseph Light & Power. UtiliCorp and St. Joseph currently have a merger agreement pending before the Missouri Public Service Commission. Upon approval of the merger, the combined company would hold a 71 percent interest in ExOp.

UtiliCorp Communications Services recently began construction of a community-wide fiber optic project in Pueblo, Colo. UtiliCorp United, through its United Energy subsidiary, is currently building a 500-mile fiber-optic network in Australia.

Through its Missouri Public Service division, UtiliCorp United, (NYSE: UCU) based in Kansas City, provides electric service to about 205,000 electric and 47,000 natural gas customers in the state.

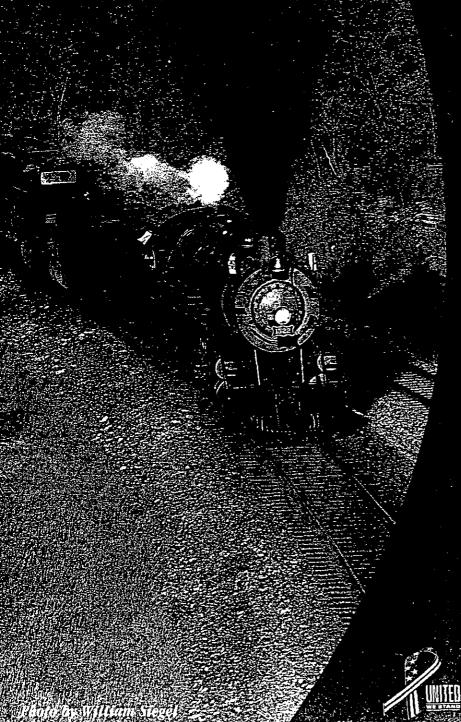

UtiliCorp is a multinational energy company with about 4 million customers. It operates in the U.S., Canada, the United Kingdom, Spain, Germany, Norway, New Zealand and Australia.

ExOp of Missouri dba Unite Press Release

Aquila (ticker: ILA, exchange: New York Stock Exchange) News Release - March 9, 2000

UtiliCorp Invests In Missouri Telecom Provider; Expansion Planned Interest Service Area

KANSAS CITY, MO, March 9, 2000 – UtiliCorp Communications Services today announced it is partner with ExOp of Missouri, Inc. to bring digital-quality voice, data and Internet services to rural communit in the Kansas City area with planned expansion into other parts of UtiliCorp United's energy service territory.

UtiliCorp Communications Services, a non-regulated affiliate of UtiliCorp United, is joining the launch a state-of-the-art telecommunications expansion in western Missouri with a \$7.5 million investment is ExOp, a facilities-based local exchange carrier in Kearney, Mo.

"Currently, our rural energy service territories are significantly under served by their current telecommunications and cable providers," said Jeff Ingram, vice president, UtiliCorp Communications Services. "We're excited about joining this partnership and bringing the best communications available into our service area."

ExOp, founded in 1996, is in the process of expanding its fiber transmission and distribution lines in the Kearney area, and plans to begin extending its fiber lines into adjacent communities. The company currently provides service to 1,400 voice and data access lines in Kearney. The \$7.5 million investmently UtiliCorp will allow ExOp to speed the expansion of its communications services in Kearney and int surrounding communities, Ingram stated.

Among services ExOp offers is local telephone service with features such as caller ID, call forwarding and voice mail; long distance services, and high-speed Internet access. Within the next few months, ExOp plans to begin providing digital cable television service UtiliCorp's investment represents a 35 percent ownership in ExOp. An additional 36 percent interest is held by St. Joseph Light & Power. UtiliCorp and St. Joseph currently have a merger agreement pending before the Missouri Public Servic Commission. Upon approval of the merger, the combined company would hold a 71 percent interest in ExOp.

UtiliCorp Communications Services recently began construction of a community-wide fiber optic proje in Pueblo, Colo. UtiliCorp United, through its United Energy subsidiary, is currently building a 500-mile fiber-optic network in Australia.

Through its Missouri Public Service division, UtiliCorp United, (NYSE: UCU) based in Kansas City, provides electric service to about 205,000 electric and 47,000 natural gas customers in the state.

UtiliCorp is a multinational energy company with about 4 million customers. It operates in the U.S., Canada, the United Kingdom, Spain, Germany, Norway, New Zealand and Australia.

Example 19 Fidelity Communications Company

Fidelity Moves Into Country Club Area in Rolla

Fidelity Communications is making progress on extending lines into the Oak Meadow Country Cluwith service available sometime this fall. Its hybrid fiber coax lines carry telephone, cable TV and speed Internet service.

The project extends from the city limits out Highway BB to the golf course. It will makes services to the Pines, Forest Lakes and other subdivisions in the area, totaling almost 500 homes.

"The same services we're offering in Rolla will be available out there," said Tim Riggs, Outside Pl Supervisor. "It's the same technology we're using in the city limits of Rolla."

Two nodes are being added, the first serving 298 homes and the second serving 185. Fidelity cre now installing underground and aerial fiber optic and coax cables in some of the subdivisions.

"Our marketing department has been conducting surveys and gathering information from potent customers in these areas," Riggs said. "We need to let people know they'll have the same service has available to them in a few months."

In addition to interactive digital cable TV and high-speed cable Internet modems, Fidelity offers I and long distance service, including four different long distance plans. About 85 percent of its recustomers use Fidelity as their long-distance carrier.

Fidelity offers the latest in telephone technology and features, including Caller ID with Nationwid call forwarding, voicemail, call waiting, distinctive rings for different callers and rejection of unide calls.

For more information, contact the business office at 426-5000.

Contact: Craig Montgomery Phone: 573-468-1294 Date: 08-26-2002

Local Telephone Service

Fidelity Communications Services 1

Fidelity Communications has been providing local telephone service in Missouri for over 60 years. Two years ago, Fidelity brought that expertise and commitment to excellence to Rolla. With the Lucent Technologies 5ESS switching equipment located in our local Rolla business office and our fully staffed service department, Fidelity offers a superior solution for your local telephone service. State-of-the-art technology plus a full range of tools, called SmartFeatures, lets you make your phone work for you.

SmartFeatures, such as Nation Wide Caller ID with Name, Call Forwarding, Call Waiting, Voice Mail and Speed Dial, make calling your friends across town or around the world easy. For example, see the name and number of who is calling you before you pick up the phone. No more unwanted telemarketing calls.

Never miss that important call you're waiting for when you need to leave your home or office.

Use one of the several Call Forwarding features Fidelity offers to forward the call to your cellular phone or to another phone number. Or use the convenience of our new, more user friendly Voice Mail system and give everyone who calls you the opportunity to leave a message.

Telephone service the way you want it!!! Let Fidelity Communications of Rolla provide all your communications and information needs.

- Save Money
- Convenience of one bill for all services
- Local business office
- Employees that care about your needs

Fidelity Communications - Growing with Rolla
