1 DOYLE L. GIBBS, being duly sworn, testified as
2 follows:

3 DIRECT EXAMINATION BY MR. TODD:

4 Q. Good morning, Mr. Gibbs.

5 A. Good morning.

6 Q. My name is Gordon Todd. I'm an attorney
7 with Cooper and Kirk, representing AmerenUE.

8 I'll have you introduce yourself for the
9 record, please.

10 A. Yeah. My name is Doyle L. Gibbs. I work
11 for the Missouri Public Service Commission.

12 Q. What's your position with the Commission?

13 A. I'm an auditor with the accounting Staff.

14 Q. So you have -- have you been deposed before?

15 A. Yes, I have.

16 Q. How many times?

17 A. Twice, actually.

18 Q. Seeing as I know I've deposed you twice --

19 A. Yes.

20 Q. -- I know that you're familiar with my
21 ground rules. Let me shoot through them quickly.

22 It's important that we just speak one at a
23 time so the court reporter can get down everything we
24 say. Do you understand that?

25 A. Yes.

1 Q. And you understand that it's important that
2 you give all of your responses verbally?

3 A. Yes.

4 Q. You understand that if we use technical
5 terms, it's important for clarity of the record and
6 for clarity of your answers that you should make sure
7 that I'm using them correctly or define them, if
8 necessary.

9 A. Okay.

10 Q. You understand it's important to give
11 complete answers --

12 A. Yes.

13 Q. -- and to provide all information you have
14 that would bear on an answer to a question.

15 A. Okay.

16 Q. If you don't understand the question, you
17 can ask me for clarification. Okay?

18 A. Yes.

19 Q. Alternatively, you can have the court
20 reporter read back a question if you want.

21 A. Okay.

22 Q. During the course of the deposition, your
23 attorney may object to a question. You understand
24 that unless you are specifically instructed to not
25 answer a question, you must go ahead and answer it.

1 after the objection has been lodged?

2 A. Yes.

3 Q. And you understand that while we're here
4 today in the offices of the Commission in a somewhat
5 informal setting, you are testifying here under oath
6 and subject to the laws of perjury. You understand
7 that?

8 A. Yes.

9 Q. Mr. Gibbs, is there any reason why you would
10 be less than truthful today?

11 A. No.

12 Q. If at any point during the deposition you or
13 anyone else here needs to take a break, just let me
14 know, and we'll get one in as soon as convenient.
15 Okay?

16 A. Sounds fine.

17 Q. Mr. Gibbs, preparing for today's deposition,
18 specifically, what have you reviewed?

19 A. I have reread my testimony from the
20 current -- current filing as well as the prior filing.
21 I have reread my deposition and reviewed some
22 additional testimony with regards to other Staff
23 members that might have an impact on what I did in
24 this filing.

25 Q. I see you have a note pad in front of you.

1 there. Can you tell me what's on that note pad?

2 A. Yeah. This is just a couple notes. I just
3 wanted to make sure that -- I was informed earlier
4 of -- as a matter of fact, I've got a date here. On
5 February 2nd I was notified by Gary Weiss of the
6 Company of a couple of errors that they thought were
7 in work papers, and so what I've done is I've just
8 kind of summarized what Gary thought those errors
9 were, what I've done to correct those errors. And
10 those errors that have been corrected, I've already
11 provided work papers in support of those changes to
12 the Company.

13 Q. Did you prepare those notes specifically for
14 this deposition?

15 A. Yes.

16 MR. TODD: Okay. Eric, I'm going to want
17 copies of those.

18 MR. MOLTENI: Excuse me. Just a
19 clarification point. Are we talking about errors in
20 the Company's work papers or errors in the Staff's
21 work papers?

22 THE WITNESS: These were errors that the
23 Company had found in the Staff's work papers.

24 MR. ANDERSON: Just so I'm clear, Gordon,
25 are you going to be requesting those formally, or are

1 you requesting them informally first?

2 MR. TODD: Let's go off the record for a
3 minute.

4 (A DISCUSSION WAS HELD OFF THE RECORD.)

5 MR. TODD: For the record, notes that
6 Mr. Gibbs produced specifically for this deposition
7 are going to be copied and produced here, and the
8 Company will later formally request more detailed
9 notes.

10 BY MR. TODD:

11 Q. In preparing for the deposition, did you
12 review any documents or data requests?

13 A. Yes.

14 Q. Which ones?

15 A. In response to one of the data requests, I
16 think, that was submitted to the Staff by Mr. Cook,
17 I think I have responded to that, and I think you
18 should have a copy of that data request response.
19 Specifically, it was data request JJ-- JJC-16. I've
20 enumerated the data requests that I've reviewed.

21 Q. And you reviewed those specifically to
22 prepare for this deposition?

23 A. Not for this deposition. For the
24 deposition -- these were the work papers I -- work
25 papers -- the data requests that I specifically

1 reviewed with regards to data that was provided in the
2 development of the Staff's filing.

3 I went back and reviewed some of the -- some
4 of the DRs related to a couple of the issues,
5 incentive compensation and territorial agreements, for
6 preparation of this deposition.

7 Q. In preparation for this deposition, who have
8 you had conversations with?

9 A. Most of my conversations have taken place
10 with individuals from our legal staff. There are a
11 couple of the people from the accounting staff that
12 also talked with me, but those conversations were
13 really iterations that were already -- I had
14 conversations with the attorneys, basically, where
15 they were kind of review or a heads-up, so to speak,
16 of, you know, You can probably expect this type of
17 question during the deposition.

18 Q. I don't want to know what you discussed with
19 your attorneys.

20 But putting your attorneys aside, who
21 specifically have you had conversations with
22 specifically to prepare for this deposition?

23 A. I've spoken with -- specifically, with Greg
24 Meyer and general conversations with Paul Harrison and
25 John Cassidy who previously have went through

1 depositions.

2 Q. What did you discuss with Mr. Harrison?

3 A. There wasn't any specific questions that I
4 can recall that we actually discussed. I mean, the --
5 it was -- with Paul, it was more of a -- an overall
6 view that he thought this deposition was actually
7 harder than the first one.

8 Q. You didn't discuss any specific topic areas?

9 A. No. I mean, my -- my areas are different
10 from Paul's, so, I mean, there was -- there was no
11 particular conversations that I recall that asked --
12 specific questions that was asked.

13 Q. You didn't discuss any questions that I
14 asked him?

15 A. Not that I can recall.

16 Q. How about your conversations with
17 Mr. Cassidy?

18 A. I seem to recall that there was some
19 conversations where -- where he had mentioned, you
20 know, certain questions that was asked of him,
21 particularly with regards to, you know, what is a test
22 year, how rates -- how rates, you know, would be
23 developed, when they would be in effect, general
24 questions of that nature.

25 Again, his -- his particular areas that he's

1 covering is different from mine, so we didn't get into
2 specific questions with regards to areas.

3 Q. You do agree that there are concepts that
4 overlap different people's testimony?

5 A. Yeah. I'm sure that there needs to probably
6 be -- there probably is an overlap of how things are
7 treated, whether they are consistent or not with the
8 overall Staff policy with regards to how something
9 should be treated.

10 Q. For instance, you use the example of a test
11 year. What a test year is is important to everyone's
12 testimony, isn't it?

13 A. Yes, it is.

14 Q. And you discussed that with Mr. Cassidy?

15 A. Yes. I mean, basically, I think what --
16 what he indicated to me, that, you know, he was asked
17 that question. And, actually, rather than -- rather
18 than eliciting what his response was, I basically
19 expounded what I thought my concept was, and he agreed
20 with that. I have -- I don't really have an idea
21 exactly what his exact response was with regards to
22 that question.

23 Q. Do you remember any other areas or concepts
24 you discussed with Mr. Cassidy?

25 A. No, I do not.

1 Q. How about your conversation with Greg Meyer?

2 A. Greg's conversation was almost specifically
3 directed to the test year concept. And I think that
4 with my years that I've had with the Commission, I
5 think I have a pretty firm grip on what a test year
6 is.

7 Q. When did you have these conversations?

8 A. The discussion I had with Greg actually
9 occurred earlier this morning.

10 Q. I don't mean to suggest that you don't know
11 what a test year is, but I want you to tell me exactly
12 what Mr. Meyer told you regarding a test year.

13 A. What Greg indicated to me is that he wanted
14 to be sure that I understood that the test year
15 concept was basically a matching principle where
16 essentially you have your revenues, expenses, and
17 investment that are keyed to a certain point in time.

18 Q. That's the extent of it?

19 A. That's the extent of it.

20 Q. Okay. The testimony that you filed in this
21 case, to make sure we're on the same page, I'm going
22 to refer to as your current testimony, and your -- the
23 testimony you filed -- you filed last year, I'm going
24 to call your prior testimony. Okay?

25 A. Okay.

1 Q. In preparing your current testimony, does
2 your current testimony reflect entirely your own work?

3 A. This one does, yes.

4 Q. Last time around you were adopting testimony
5 in part that Mr. Griggs had proposed?

6 A. And also Jim Schweiterman.

7 Q. Right. Did you receive any input from any
8 other Staff members into the testimony you've prepared
9 currently?

10 A. In terms of the testimony itself?

11 Q. Yes.

12 A. Of course, for testimony, we have a fairly
13 extensive review process. My testimony was provided
14 to our legal staff. It was provided to Lena Mantle, I
15 think Janice Pyatte, Greg Meyer, Steve Rackers.

16 I think that that's kind of -- that's kind
17 of the gamut of who my testimony was provided to.
18 That doesn't necessarily mean that I got any feedback,
19 you know, from each of those individuals. And most
20 feedback which I did have or did get back was
21 basically in the form of maybe sentence context or
22 maybe a rewording. Nothing of any substance.

23 Q. Do you preserve -- let me ask you this: How
24 does the review process work?

25 A. Normally, what -- what I do is -- is I would

1 print out a copy of what I've done and then provide a
2 hard copy to those individuals, and those individuals
3 would make their marks or whatever they think, and
4 provide me a copy -- that copy back with those remarks
5 on it. I would change my original electronic version
6 and discard the copies.

7 Q. You don't preserve the copies?

8 A. No, I do not.

9 Q. You destroy them?

10 A. We've got a recycle bin that that's where it
11 goes.

12 Q. Is that Commission policy -- Staff policy, I
13 should say?

14 A. We've got a general policy that -- of all of
15 the -- all that can be recycled goes into the recycle
16 bin.

17 Q. What I mean to ask is, is there a Staff
18 policy to not preserve drafts of testimony?

19 A. I don't know if there is a written policy of
20 such. I think that that policy can certainly be
21 created once you've been requested a number of times
22 for drafts of testimony that they really have no
23 relationship to what the final product is. So it's
24 just become more of an internal policy that once
25 you've received a draft, you've made the changes, the

1 old one gets tossed.

2 Q. Did you receive any nonwritten input into
3 your testimony?

4 A. Nonwritten input?

5 Q. Uh-huh.

6 A. I'm sure that happens occasionally. I
7 mean -- and it's not so -- because any time somebody
8 has an area that they're creating an adjustment or
9 working on a particular area, they will normally have
10 conversations with people who may have input
11 associated with that or maybe not direct input but
12 maybe what you do has a direct bearing on what
13 somebody else does. So there is those conversations,
14 you know, coordination. So, yes, you know, verbal-
15 type communications do take place.

16 Q. Can you think of any specific substantive
17 input you received into your -- into your testimony,
18 your current testimony?

19 A. In terms of creating my testimony, no.

20 Q. What do you think the point of the review
21 process is?

22 A. In terms of the testimony, that basically
23 what testimony gets filed is going to be a fair
24 representation of what the Staff's position is.

25 Q. In preparing your testimony, have you had

1 any conversations with -- regarding the case with
2 persons outside the Staff?

3 A. Persons outside the Staff?

4 Q. Yes.

5 A. Could you explain who you mean by "outside
6 the Staff"? I mean, I have probably had conversations
7 with Company personnel with regards to explanation of
8 data requests and things of that nature, but, I mean,
9 that's part of the auditing process.

10 Q. Other than Company personnel, have you had
11 any conversations with anyone outside the Staff?

12 A. No.

13 Q. So you haven't had any conversations with
14 anyone from the Office of Public Counsel?

15 A. No.

16 Q. Any conversations with anyone from the
17 Attorney General's Office?

18 A. No.

19 Q. Okay. Mr. Gibbs, you have a degree in
20 accounting that you earned in 1976. Correct?

21 A. I believe that's correct, yes.

22 Q. And you became a CPA in 1988?

23 A. I believe that's -- that's right.

24 Q. What kind of things do you do to stay
25 current in your field?

1 A. In the -- for the regulatory process, we
2 attend conferences, FRI conferences. There may be
3 various seminars or things that's put on by NARUC
4 which is more involved with water, various in-house
5 training. Much of that does not relate so much to the
6 accounting field as it does to current events that's
7 happening, you know, in the industry, where things may
8 be going, what may be in the -- in the -- coming up in
9 terms of the various industries.

10 Much of these things count toward -- count
11 toward your CPE that is required to maintain your
12 certification, although, admittedly, most of the --
13 most of the CPE that we do get is not accounting-
14 specific. It's more regulatory event-specific.

15 Q. You -- you attend this in-house training and
16 learn about current events and events in the industry.

17 Do you think it's important to keep up on
18 what's going on in the industry?

19 A. Yes, and we do that not only through the
20 conferences, but as -- as -- we try to keep informed
21 through -- through in-house meetings as to what --
22 what has transpired, various issues that have gone
23 before the Commission or what issues have come up in
24 cases other than the case that you may be working on
25 on itself so that there -- we develop some kind of a

1 consistency basis across the state in between offices.

2 Q. What is the benefit to you and your work of
3 being up-to-date on current events and having an
4 understanding of what new developments in the industry
5 might be?

6 A. Well, hopefully, it helps me perform my job
7 to the best that I can.

8 Q. How would it do that?

9 A. I don't know how you explain an intangible.
10 I mean, hopefully, what knowledge that you gain
11 through any meetings or training, that you can apply
12 that training within the context of your work, I mean,
13 whether it be through an audit or review or whatever
14 it might be.

15 Q. Well, for instance, would there be a benefit
16 to you knowing that there was likely to be a
17 significant change in the industry that would touch
18 upon an area of analysis you were doing?

19 A. That depends on when that change is
20 anticipated. Going back to what we referred to
21 earlier, the test year concept, we don't try to reach
22 out beyond a known time frame and try to pull
23 something in. We're -- we're somewhat restricted in
24 that regard that we try to maintain that investment/
25 expense/revenue relationship given a defined time .

1 frame.

2 So unless something is very, very
3 extraordinary that's going to be coming down -- coming
4 down the pipe that is imminently known and measurable,
5 it's probably something that -- that we would not take
6 into consideration in an audit process.

7 Q. Okay. You have proposed a series of
8 adjustments and a lot of them are -- I think all of
9 them are areas that you've covered in prior testimony;
10 is that correct?

11 A. Well, I've supported them in -- to some of
12 them I've adopted testimony that's been provided. In
13 the current proceeding, it is my testimony.

14 Q. Okay. What I'd like to do is go through
15 them issue by issue, and in each issue -- in each area
16 I'm going to ask you to tell me what you've done
17 that's new. Just in the interest of getting us all
18 out of here as soon as possible, if you identify for
19 me what's new, then we can focus on that. And to the
20 extent you didn't redo an analysis or you didn't look
21 at it, you just adopted what you had done previously,
22 then we can speed up the process. Is that okay?

23 A. Sounds wonderful.

24 Q. Okay. Let's start out with the growth
25 adjustment you're sponsoring on page 14.

1 Now, you sponsored a similar adjustment in
2 your prior testimony, did you not?

3 A. Yes, I did.

4 Q. Is your methodology the same?

5 A. The methodologies are identical. The only
6 difference is the time frame is moot.

7 Q. Which means you're using different data?

8 A. More current data, yes.

9 Q. Different numbers of customers, for
10 instance?

11 A. Yes.

12 Q. Okay. Tell me what you think is the purpose
13 of doing this adjustment.

14 A. The purpose of this adjustment, the growth
15 adjustment, is to restate revenue to what a -- what
16 the customers as of the end of the update period would
17 produce on an annual basis given normal -- normal
18 usage at current approved rates.

19 Q. Whose idea is this adjustment?

20 A. Whose idea is this adjustment?

21 Q. Uh-huh.

22 A. I don't know. You might have to go all of
23 the way back to the formulation of the Commission
24 itself because this type of adjustment, an
25 annualization adjustment for revenues, was -- has been

1 with the Commission since I've been here, in excess of
2 twenty-five years. So where the -- where this
3 particular adjustment was developed, who developed it,
4 I have no idea.

5 Q. And you're talking specifically about a
6 customer growth adjustment?

7 A. Yes.

8 Q. So in a case like this, or in a rate case,
9 who decides that a specific adjustment, in this case
10 customer growth, will be made in that case?

11 A. I don't know of any case that I've been
12 involved in in determining a revenue requirement that
13 a growth adjustment is -- is not done, particularly
14 within -- within the -- when you're trying to
15 establish new tariffs.

16 Q. Who on the Commission Staff decides that
17 you, Doyle Gibbs, are going to be in charge of doing
18 the customer growth adjustment?

19 A. I think it's a collaborative effort. You
20 take the -- the auditor Vs from the Commission, you
21 take the accounting manager, you take whoever might be
22 named -- somebody is named as the case coordinator.
23 There's a number of -- of major individuals that are
24 initially assigned to do an overall review of what the
25 current status workload is, who is available, and

1 from -- from there, they determine who is going to
2 work the audit. And, typically, whoever is assigned
3 as the case coordinator out of the -- or lead auditor
4 out of the Accounting Department, along with these
5 other individuals, would then decide from the people
6 who are working the audit how to divide that workload
7 up.

8 A lot of that workload is divided based upon
9 a particular auditor's areas of need. They have
10 defined, I think, within the Commission for
11 establishment of certain positions that you need to
12 have this level of experience or involvement within
13 certain areas, and so we try to direct our work in the
14 context of an audit to try to -- to train as well as
15 to develop -- develop the case. So it varies from
16 case to case.

17 (MS. O'NEILL LEFT THE DEPOSITION ROOM.)

18 BY MR. TODD:

19 Q. You mentioned earlier that you had discussed
20 with Mr. Meyer the concept of a test year. I want to
21 talk about that a little bit.

22 You were trying to develop a historical test
23 year; is that correct?

24 A. The premise is based on a historical test
25 year.

1 Q. You're not trying to develop a future test
2 year --

3 A. That is correct.

4 Q. -- or a forecasted test year?

5 A. That is correct.

6 Q. Would you agree or disagree that the costs
7 and revenues that are developed for the test year are
8 hopefully to be representative of those same costs and
9 revenues during the time the rates will be in effect?

10 A. No, I wouldn't necessarily agree with that.
11 What you're trying to do in the concept of a test year
12 is keep the relationship between the revenue, expense,
13 and investment, and, hopefully, that relationship
14 would exist beyond the end of the update period when
15 the rate that's developed based on that relationship
16 goes into effect.

17 There is no guarantee or certainty that once
18 those rates go into effect that there may not be some
19 change in that relationship. Certainly, revenues are
20 going to change due to either growth or loss of
21 customers. That doesn't mean expenses are going to
22 stay the same, but, hopefully, the overall
23 relationship may stay the same that would mitigate
24 any-- anything that would -- that would cause an
25 increase in expense or decrease in revenue or vice .

1 versa.

2 But it's always the option of the Company
3 that when that relationship gets so out of whack that
4 it's affecting earnings, that the Company has the
5 prerogative to file for another rate case.

6 Q. So would it be a fair characterization to
7 say that you are not concerned with developing a
8 reasonably expected levels of -- reasonably expected
9 levels of earnings and costs? You are just more
10 worried about the relationship?

11 A. I don't -- I don't think that we're trying
12 to build rates based on what's going to happen in the
13 future. Historically, we're looking at the
14 relationship. So to the extent that that relationship
15 may change, I mean, the Company would have to file a
16 rate case. But, no, we are not trying to create rates
17 that's predictive of what's going to happen in the
18 future.

19 Q. To answer my specific question, you're not
20 worried about the reasonably expected levels of
21 earnings?

22 A. I think that's -- that's a concern, but I
23 think the premise is that -- that we anticipate that
24 the relationship, the investment, expense, and revenue
25 relationships will stay comparable, that the rates .

1 that are developed from that going into the future
2 will still provide the Company a reasonable rate of
3 return.

4 Q. Why do you say it's a concern? What do you
5 mean by "concern"?

6 A. Well, I don't think it's the Staff's intent
7 to try and create rates that we know are not going to
8 be representative -- or is not going to be able to
9 provide the Company a reasonable return in the future.
10 That's -- I mean, it's just a generalization on my
11 part, and I'm saying that's what -- that's what the
12 concern is that -- that -- I don't think that we would
13 propose the development of rates based on a
14 relationship that -- that would somehow jeopardize the
15 Company's ability to earn a rate -- earn a reasonable
16 rate of return based on the relationship that existed
17 during the historical period.

18 Q. In calculating your customer growth
19 adjustment you have a series of steps and I want you
20 to walk me through them. So tell me what the first
21 thing you did is.

22 A. If you want to know just -- just strictly
23 about the growth calculation, I'll bypass some of the
24 inputs that was provided to me to develop the
25 normalized revenue per customer.

1 Q. Uh-huh. Those inputs were provided by
2 Ms. Teel, is that -- or --

3 A. No. Ms. Janice Pyatte.

4 Q. Okay.

5 A. And the general concept is that it's done
6 each month. Each month you take the beginning and
7 ending customers to find out what the average number
8 of customers were that month compared to the number of
9 customers that existed at the end of the update
10 period, which in this case was September 30th.

11 Q. Let me jump in immediately.

12 Why do you use the average number of
13 customers for each month?

14 A. Because the average rev-- the average
15 customer per month would be more in line with the
16 average revenue per customer for that particular
17 month. The way that the -- the average -- if you take
18 the adjusted revenue, the normalized revenue, say, for
19 a given month and divide it by the customers at the
20 beginning of the month, you're not going to get a true
21 picture because you've had customers either coming on
22 or off the system.

23 So you've got -- you've got revenue
24 associated with customer changes. If you -- and,
25 likewise, if you take the customers at the end of the

1 month, you get that same distortion. By taking the
2 average number of customers and divided it into the
3 revenue that existed for that particular month,
4 adjusted for the weather and the 365 days, which has
5 been explained, you're going to get an average revenue
6 per customer.

7 So because that average revenue is produced
8 by using those average customers, what we're doing by
9 taking and comparing September to the average number,
10 we're -- we're examining that growth from the average
11 to what exists as of September.

12 Q. And the normal month -- the average monthly
13 revenue, that's what you were talking about that
14 Ms. Pyatte developed?

15 A. Yes. What she developed was the normalized
16 revenue by month, by customer class.

17 Q. Uh-huh.

18 A. And so she did not give me the average
19 revenue per customer. That is something where I have
20 taken the average number of customers, divided it into
21 her normalized revenue to get an average revenue per
22 customer.

23 Q. In looking over customer growth, I assume
24 you've looked at many years of data?

25 A. I probably have, but I don't -- it really

1 doesn't fit into the -- the -- the calculation of the
2 growth adjustment. The growth -- growth adjustment is
3 based on what actually exists.

4 We'll look -- we'll look at growth over time
5 to see if there is an alternative method of doing the
6 calculation because of fluctuations of customer levels
7 that given any point in time maybe that might not be
8 the most reflective level of customers. But that
9 wasn't the case here.

10 Q. Is Ameren a growing company in terms of
11 number of customers?

12 A. Yes, they are.

13 Q. Is that growth pretty steady?

14 A. I haven't examined it to determine how --
15 how steady that growth is, no.

16 Q. Putting aside the steadiness of the growth
17 rate, then, has growth been constant?

18 A. Well, I see that as the same question, and I
19 haven't -- I haven't actually -- I actually haven't
20 looked at that.

21 Q. Do you have an idea whether -- if you pick
22 a -- any given month, is it more likely that year-end
23 customers -- month-end customers will be higher than
24 month-beginning customers?

25 A. Generally speaking. I mean, that doesn't

1 preclude the fact that there may be instances where
2 there may be a drop-off of customers.

3 Q. Certainly.

4 A. Generally, over an annual period of time,
5 it's an increase in customers.

6 Q. So, again, generally speaking, it would be
7 true that the average customers per month will be
8 lower than month-end customers?

9 A. Typically, yes.

10 Q. And it is also true, then, that using
11 average customers per month, again, in an adjustment
12 such as this, will, generally speaking, add more
13 customers per month than would be the case if you used
14 month-end customers?

15 A. If you're just talking strictly in terms of
16 numbers, yes. If you use month-end versus end of
17 September, you're going to have fewer customer
18 additions than you would if you looked at the average
19 for the month compared to September. Of course, I
20 would also think that your calculations would be
21 totally skewed.

22 Q. All of the growth you've factored into the
23 adjustment is based on -- is based on September, the
24 end of the update period. Correct?

25 A. Yes, that's correct.

1 Q. Do you recall -- in preparing for this
2 deposition, you told me you read the transcript of the
3 last time I deposed you -- the last two times I
4 deposed you.

5 A. Yeah. I read through it, yes.

6 Q. Do you recall, when I previously deposed you
7 on this issue, we discussed a number of costs that new
8 customers imposed on the Company?

9 A. I believe there was some discussion with
10 that regards.

11 Q. For instance, your adjustment makes a fuel
12 allowance for additional customers, doesn't it?

13 A. What my adjustment does in terms of -- in
14 addition to calculating the additional revenue, it
15 calculates a change in kWh. That kWh is provided to
16 other Staff members that incorporate it into a fuel
17 model that creates the fuel.

18 So to the extent that those -- those kWh are
19 included in the fuel model, there is a fuel cost
20 that's included associated with that growth, yes.

21 Q. And that is the only other adjustment that
22 is made to the Staff's rate case related to growth
23 adjustment; is that correct?

24 A. Yes, it is.

25 Q. Let's talk about your payroll adjustment..

1 What you've done here, to make sure that I
2 understand it -- we might be able to short-circuit
3 this -- is you have removed the O&M costs associated
4 with the Callaway refueling, and then you calculated
5 your O&M adjustment without Callaway in it, and then
6 you've treated Callaway separately?

7 A. Yes. But I didn't take out the total
8 Callaway O&M. It's the incremental overtime
9 associated with the Callaway refueling.

10 Q. You're right.

11 And you then calculated the incremental
12 Callaway overtime separately?

13 A. Yes.

14 Q. And you did that by taking an average of the
15 last three refuelings?

16 A. Yes, that's correct.

17 Q. And I think you say in your testimony that
18 you did that because the most recent Callaway
19 refueling was 60 percent greater than the prior two
20 refuelings? That's on page 20, lines 8 and 9.

21 A. Yes.

22 Q. Now, when you say 60 percent greater, do you
23 mean the overtime costs of this refueling were greater
24 than either of the last two or greater than the last
25 two combined?

1 A. It would not be combined. I mean, it would
2 be -- looking at that cost individually to the
3 other -- other refuelings, that generally this
4 particular refueling, for whatever reason, was
5 considerably higher than the other refuelings.

6 Q. Did you look at any other refuelings other
7 than the prior two?

8 A. I think there might have been three or four
9 refuelings, I think, in the overall analysis, but --

10 Q. Do you recall whether incremental overtime
11 was consistent across all of the other prior
12 refuelings you looked at?

13 A. I don't recall specific-- recall
14 specifically.

15 Q. Did you inquire of the Company why the most
16 recent Callaway refueling was more expensive?

17 A. No, I did not.

18 Q. Do you have any personal knowledge regarding
19 why it may have been more expensive?

20 A. No, I do not.

21 Q. So your analysis -- your adjustment here is
22 based entirely on the fact that the most recent
23 refueling was more expensive than the prior two?

24 A. Yes.

25 Q. Let's talk about incentive compensation.

1 Turn to page 22.

2 Now, this is an area that the last time
3 around you were adopting from Mr. Griggs; is that
4 correct?

5 A. Yes.

6 Q. And this time you've done the analysis
7 yourself?

8 A. Yes.

9 Q. Give me a sense how much of the analysis you
10 have done yourself entirely this time, or have you
11 just copied over and adopted much of what Mr. Griggs
12 had previously done?

13 A. Well, I think in the original filing, the
14 July filing, that what Mark Griggs had done with
15 regards to incentive compensation had followed recent
16 policies of the Staff and what the Commission had --
17 has -- has since ordered with regards to incentive
18 compensation, so I don't think what he did was so out
19 of line with regards to incentive compensation. And
20 so the methodology that was used in the original and
21 what is in the -- the newer March filing follows the
22 same methodology and approach.

23 Q. Have you ever designed an incentive
24 compensation plan?

25 A. No, I have not.

1 Q. Have you ever received any training
2 regarding incentive compensation?

3 A. No, I have not.

4 Q. Do you have any experience in a related
5 field?

6 A. I can't say that I have.

7 Q. Other than adopting Mr. Griggs's testimony
8 last time, have you performed an incentive
9 compensation adjustment before?

10 A. Yes, I have.

11 Q. And would it be fair to say that the sum
12 total of your experience with incentive compensation
13 would be sponsoring incentive compensation adjustments
14 in Staff rate cases?

15 A. Yes, it would.

16 Q. In your testimony you have analyzed the
17 incentive plan that was in effect for the calendar --
18 for calendar year 2000 that paid out at the beginning
19 of calendar year 2001; is that correct?

20 A. Yes, because the -- the payments associated
21 with the year 2000 is the actual expense dollars that
22 affect the test year period.

23 Q. Have you reviewed at all the Company's plan
24 that is in effect for the year 2001 that would have --
25 would have or has paid out at the beginning of

1 calendar year 2002?

2 A. I have generally reviewed -- reviewed the
3 program. I did not give it much consideration with
4 regards to the adjustment in the current filing.

5 Q. And you made that decision because the 2000
6 plan paid out during the test year?

7 A. Yes. That is the plan that's actually
8 affecting test level expenses.

9 Q. And do you consider it relevant at all that
10 the 2000 plan is no longer in effect?

11 A. I would say that I found that it was
12 relevant because I've adjusted it. The -- again, it
13 was the 2000 plan that affected the test year, and
14 that's why that particular plan was addressed.

15 Q. Maybe I phrased my question inartfully.

16 Obviously, the 2000 plan is relevant for
17 your analysis for the reason you stated.

18 Is it relevant that the plan is no longer in
19 effect?

20 A. Is it relevant that it is no longer in
21 effect?

22 Q. Let me flesh it out a little more.

23 Is it relevant for the purposes of this rate
24 setting procedure that the Company has replaced the
25 2000 plan with the 2001 plan?

1 A. I don't -- I don't think it's relevant that
2 the plan has now been replaced by a 2001 plan, because
3 the 2001 plan, its results were not known until
4 subsequent to the update period, and to take that into
5 account, I think, would be in, I want to say --
6 violation may not be the proper word, but it would not
7 be in synchronization with the test year concept
8 that's been -- that this case has been filed under.

9 Q. But it was known prior to the update period
10 that the 2001 plan had been -- or the 2000 plan had
11 been replaced with the 2001 plan?

12 A. Yes.

13 Q. Tell me what efforts, if any, you have made
14 to understand how the Company goes about creating its
15 incentive compensation plans.

16 A. In terms of the creation of the incentive
17 plan, I have not -- I have not tendered any data
18 requests or inquired of the Company as to how the plan
19 is developed and administered.

20 Q. Do you have any idea what types of factors
21 the Company considers in creating an incentive
22 compensation plan?

23 A. No.

24 Q. Tell me what you understand to be the role
25 of earnings per share in the plan you did analyze, the

1 2000 plan.

2 A. In which plan?

3 Q. The one you analyzed, the 2000 plan.

4 A. The 2000 plan?

5 Q. Uh-huh.

6 A. The earnings per share is, in essence, the
7 driver or determinant of what level of payout is
8 possible under the incentive plan, and why --

9 Q. Let me jump in here.

10 When you say "is possible," what do you
11 mean?

12 A. Well, what I mean by "is possible" is that
13 in addition to meeting certain earnings per share
14 requirements, they have key performance indicators
15 that are developed by business line and by
16 individuals, and in addition to meeting the earnings
17 per share, these key performance indicators need to be
18 attained as well.

19 So there is a possibility, even under the
20 incentive plan, given the earnings per share
21 requirement being attained, that doesn't necessarily
22 mean that the full possible payout under the incentive
23 plan will be paid out.

24 Q. In analyzing the 2000 plan, did you review
25 the various key performance indicators?

1 A. I did look at -- I did look at them. I
2 can't say that I fully understand all of them.

3 Q. Is personal performance a criteria at all in
4 the 2000 plan?

5 A. There is a personal performance -- part of
6 the incentive compensation package, a portion of it,
7 particularly under the mid-management -- the AMIP is
8 how it's been referred to in my testimony -- is geared
9 toward business line and individual performance.

10 I have not received any information with
11 regards to individual performance, and, to be quite
12 honest with you, with this many employees that are
13 covered, it would be probably difficult to examine the
14 individual performance criteria that's provided to
15 every individual in the Company.

16 Q. Let me hop in and just for the record state
17 that there are three plans, really, included in the
18 2000 plan --

19 A. Right.

20 Q. -- the Ameren incentive plan, the Ameren
21 management incentive plan, and the executive incentive
22 plan. That's correct?

23 A. That's correct.

24 Q. And when we talk about the 2000 plan, we're
25 talking about all three, unless we specify one in

1 particular. Is that okay?

2 A. Okay. That's fair enough, because --
3 because under the year 2000 plan, if I'm not mistaken,
4 under the Ameren incentive plan, the AIP, which is
5 payable to full-time, I think, contract employees, the
6 payout was solely based on the earnings per share
7 criteria. I don't think that there was any key
8 performance indicators or individual performance
9 indicators that went into the consideration of the
10 payout of the incentive.

11 Under the AMIP, which includes most of your
12 management and noncontract people, there the incentive
13 plan is set up where the -- you have 50 percent of the
14 possible payout is attributable to meeting business
15 line performance and 50 percent is on individual
16 performance.

17 My understanding on the EIP, which includes
18 the executives and Ameren team members -- I forget the
19 exact -- exact wording -- Ameren leadership team
20 members, I'm sorry, that -- it's my understanding that
21 based on a response I had from the Company that the
22 payout there is initially pretty much based on
23 individual performance.

24 Q. You said earlier that it would be too
25 burdensome to review the individual performance of.

1 every employee whose incentive compensation is
2 somewhat based or based in part on individual
3 performance; is that accurate?

4 A. Yes. And I think it would be somewhat
5 subjective as well, because, I mean, the -- the person
6 that would -- the particular manager of that
7 individual would be the one doing the review, and I
8 think any review by an individual is going to be
9 somewhat subjective.

10 Q. What effort have you made, if any, to
11 understand the types of criteria that are looked at to
12 evaluate individual performance?

13 A. I have not looked at that.

14 Q. In your analysis, you cite a number of cases
15 or Commission decisions, I should say, on pages 24 and
16 25.

17 Have you read these?

18 A. Have I read these orders?

19 Q. Yes.

20 A. Yes, I have. I can't -- I haven't committed
21 them to memory, but I have read the orders.

22 Q. That makes two of us.

23 Did you read them specifically to prepare
24 this testimony?

25 A. Yes.

1 Q. Have you read any other Commission Reports
2 and Orders related to incentive compensation?

3 A. Not that I can recall.

4 Q. One Report and Order that you cite in here
5 on page 25 regards a rate case involving the
6 Southwestern Bell Telephone Company. Do you see that?

7 A. Yes.

8 Q. Have you made any analysis of -- in
9 preparing this testimony of Ameren as compared with
10 Southwestern Bell?

11 A. No, I have not.

12 Q. In the first block quote on page 25, it
13 refers to a long-term incentive reward. Do you have
14 any idea what -- what that was?

15 A. What it was?

16 Q. Yeah.

17 A. Probably not this one in particular. I am
18 familiar with what's referred to as long-term
19 incentive plans where typically the -- an award is
20 provided, but then the actual payout of that reward is
21 deferred where the person has to commit to an
22 additional number of years with the company in order
23 to receive that award. And it's basically geared for
24 the maintaining of key employees.

25 Q. You would agree, would you not, that the

1 Ameren incentive plan for the year 2000 was not a
2 long-term incentive plan of the type you just
3 described?

4 A. No, it was not.

5 Q. In performing your analysis, did you at all
6 look at the relevant labor markets in which Ameren
7 competes?

8 A. No, I did not do an analysis of the labor
9 markets.

10 Q. Do you have any personal understanding of
11 the labor markets in which Ameren competes?

12 A. No.

13 Q. Did you consider the affect on Ameren that
14 having good, quality management versus less good,
15 quality management might have?

16 A. No.

17 Q. I don't want to call them bad management.

18 Did you consider the effects on Ameren that
19 having motivated employees may have?

20 A. No.

21 Q. Did you consider the effect on the
22 ratepayers that Ameren's having good management or
23 motivated employees may have?

24 A. No, I have not.

25 Q. Have you performed any studies attempting to

1 analyze the link between employee performance or
2 management performance and earnings per share?

3 A. No, I have not.

4 May I say, just when looking at the
5 incentive -- and you can have a copy of this if you
6 would like -- but on page 24 of my testimony, because
7 of the correction that was made in the incentive
8 compensation that I had alluded to -- well, I don't
9 know that I've actually explained it, but you'll get
10 an explanation when you receive these notes here,
11 that because of the correction that was made to
12 incentive compensation, that my testimony on page 24,
13 line 11, the 61 percent actually needs to be changed
14 to 40 percent. It's just a mathematical change due to
15 a correction that was made.

16 Q. Thank you.

17 On page 26 of your testimony, starting on
18 line 19, you state, "The Staff believes that it is
19 difficult, if not impossible, to ascertain what the
20 impact of any individual's performance was in relation
21 to the level of EPS for any given year."

22 What is your basis for that statement?

23 A. I personally don't know how you would
24 measure it. I mean, it's -- I mean, that's as simple
25 as I can get.

1 Q. Have you attempted?

2 A. If I had any idea how to do it, I probably
3 would, but I have no idea how to do that.

4 Q. And would I be correct in assuming that your
5 statement here on page 26 goes for any employee of the
6 Company?

7 A. Yes, it would.

8 Q. From top to bottom?

9 A. From top to bottom.

10 Q. The next sentence on page 26 reads, "EPS is
11 also affected by the efforts of employees not involved
12 in Missouri electric operations."

13 What is your basis for that statement?

14 A. Union Electric is a multijurisdictional
15 company. It's also -- just the configuration of
16 Ameren, you have Ameren's CIPS, which is an electric
17 company over in Illinois that is -- that UE acquired.
18 You have AmerenUE, which was the -- what I refer to as
19 the old UE that used to serve just -- just the
20 Missouri/Illinois. I think they used to have a little
21 Iowa, a little Arkansas. I mean, those things have
22 either been merged, sold, you know, what have you.

23 So you've got a corporation that is
24 operating in different venues, so to speak, and it's
25 not just strictly the purpose of supplying power to

1 Missouri. So you have employees that are operating,
2 you know, in other venues in other states.

3 Q. Have you made any statement at an analysis
4 to identify the effect that nonMissouri employees have
5 on AmerenUE on earnings per share?

6 A. No, I have not.

7 Q. The next sentence reads, "Any benefit from
8 achieving a given level of earnings per share are
9 simply too remote to Missouri ratepayers."

10 What analysis, if any, have you performed to
11 back up that statement?

12 A. None.

13 Q. The next sentence reads, "Indeed, increased
14 earnings per share upon which all increases in the
15 funding level of incentive plans are based may
16 actually decrease the quality of service to Missouri
17 ratepayers through the incentive to cut costs to
18 achieve higher earnings."

19 What analysis, if any, have you made to back
20 up that statement?

21 A. There's been no specific analysis that's
22 been performed behind that -- that sentence. I think
23 it's just a general statement and it's not an
24 accusation that it took place. It's merely a fact
25 that -- you know, that -- that costs could be cut that

1 could be detrimental just to achieve a certain
2 earnings per share. Again, I'm saying -- I'm not
3 accusing or saying or implying that it was done. I'm
4 just saying the possibility exists that it could
5 happen.

6 Q. And you're comfortable recommending an
7 adjustment to the Company's books based on the
8 possibility that that might occur?

9 A. Based on prior decisions of the Company
10 (sic) with regards to incentive compensation, yes, I
11 am.

12 Q. What prior decisions are you referring to?

13 A. The ones that have been referenced in my
14 testimony.

15 Q. Could you point me to those?

16 A. Generally, it's these that have been quoted
17 on page 25 of my testimony.

18 Q. I'm sorry. I thought you said prior
19 decisions of the Company. You meant prior decisions
20 of the Commission?

21 A. Yes. If I said "company" that was my
22 mistake. I apologize.

23 Q. Maybe I misheard it. I was worried there I
24 didn't know something.

25 A. You didn't know that they disallowed those

1 in the past.

2 Q. Let me just polish off the paragraph. The
3 last sentence reads, "The Staff believes there is
4 insufficient evidence to connect incentive
5 compensation expense for a particular group of
6 employees to a direct benefit to Missouri ratepayers
7 for the overall EPS performance."

8 Would I be correct in assuming that, again,
9 you performed no analysis to support that statement?

10 A. You are correct, yes.

11 MR. TODD: Okay. Let's move on.

12 Why don't we take a ten-minute break at this
13 point?

14 THE WITNESS: Sure.

15 (A RECESS WAS TAKEN.)

16 BY MR. TODD:

17 Q. Okay. Let's talk about injuries and damages
18 on page 27 of your testimony.

19 A. Yes.

20 Q. This is another area that in the prior round
21 you adopted from Mr. Griggs?

22 A. Yes.

23 Q. And this time you've done the analysis
24 yourself?

25 A. Yes, I have.

1 Q. Did you redo the entire analysis yourself?

2 A. The database that he had put together, I
3 just extended that database. The methodologies and
4 the approach, I think, that we took to do this
5 adjustment, I don't think there was any change.

6 Q. So the questions I asked you when I last
7 deposed you about your methodology or what
8 considerations went into it would be the same?

9 A. I reread my deposition. I'd hate to say,
10 you know, that exactly what you asked I would answer
11 exactly the same this time, but I think that generally
12 that would be the case.

13 Q. You read it. And did anything strike you as
14 being wrong or you would --

15 A. No.

16 Q. -- change?

17 A. No.

18 Q. Should I -- could I conclude, then, that you
19 did not perform any analysis preparing this testimony
20 of the Company's basis for its own accrual?

21 A. I think my understanding of the Company's
22 accrual is the -- the Company's legal staff's
23 understanding or estimation of the cost that's going
24 to be incurred associated with various cases and then
25 they would set up their accrual on that basis.

1 The difficulty with that, of course, it
2 being an estimate, and you could see from year to
3 year, because of the various cases that may be filed
4 against the Company, that one year you would have an
5 accrual that's up here and the next year the accrual
6 would be down here.

7 It's not only just the amount of payments
8 that are made each year associated with various cases,
9 the accrual itself fluctuates. So I think the use of
10 an average of actual payments is a very reasonable
11 approach to address the injuries and damage issue.

12 (MR. COOK ENTERED THE DEPOSITION ROOM.)

13 BY MR. TODD:

14 Q. Did you at all look at and analyze the
15 Company's estimates of its own legal exposure in any
16 particular case?

17 A. I have received information from the Company
18 on an individual case basis, what their estimate was,
19 what their actual payout was, at what time did the
20 event occur that was associated with the accrual, when
21 they made the estimate of the accrual, when it hit the
22 accrual. So I did do an analysis as to what the
23 estimate was on an individual case basis, what the
24 payout was, when it was originally set up, if there
25 was adjustments to the accrual, looking at the time

1 frame between when it was initially set up, when it
2 was eventually paid, but I did not actually go into
3 the formulation of -- of how they determined the
4 amount of the -- their estimate.

5 Q. So when you say you did an analysis of this,
6 what you mean is you looked at the Company's own
7 accrual, but you didn't actually judge for yourself
8 whether it was correct, whether it was reasonable, and
9 so on?

10 A. That's correct.

11 Q. Do you know what accounting principles the
12 Company follows when it accounts its accrual?

13 A. The Company for financial statement purposes
14 which includes the establishment of the accrual for
15 the injuries and damages, as well as other types of
16 expenditures, is based on the accrual method of
17 accounting, which is standard under generally accepted
18 accounting practices.

19 Q. GAAP?

20 A. Yes.

21 Q. Do you have any reason to disagree with the
22 principles espoused by GAAP?

23 A. Not in terms of financial presentation.

24 Q. But in your rate-making analyses, you do not
25 follow GAAP?

1 A. It's quite common under the -- under the
2 regulatory -- the regulatory venue to move to some
3 other method of accounting for purposes of
4 establishing rates. One of those is -- is moving to
5 an actual paid basis.

6 Q. Do you have any rule or guideline that you
7 yourself follow regarding when to use -- when to move
8 to a cash basis?

9 A. I, myself?

10 Q. Yes.

11 A. It would base -- it would have to be based
12 on an analysis taking a look at what the accrual is
13 versus what has actually -- what has actually
14 happened. In -- I've seen in cases that I have
15 worked, not necessarily with Union Electric, per se,
16 but other companies where I have looked at items that
17 would be on a -- an accrual versus cash basis where
18 I've literally made an adjustment that increased an
19 expense because of an underaccrual.

20 So I think the guiding -- guiding factor
21 behind most of what we do in regards to items of
22 accrual is to take a look at the actuality of the
23 situation, the actual payments, and see if the -- and
24 typically would make the adjustment based on that
25 unless by chance in a given test year that the accrual

1 happened to match the payments. You know, that would
2 be the only reason that we would stay with the
3 accrual.

4 Q. What I hear you telling me -- tell me if
5 this is not correct -- is that you will always go with
6 cash unless the accrual is exactly correct or unless,
7 I should say, the accrual matches cash?

8 A. I would say you could say that generally,
9 but, I mean, like everything else, it's not universal.
10 There could be situations that -- that there may be a
11 difference between the actual payment and the accrual,
12 but looking at the accrual versus cash, that there is
13 not a significant difference, and so it wouldn't
14 matter which -- which method you took.

15 Q. What do you think of a rule -- or I suppose
16 it would be called a principle that said that you
17 should go to cash when the accrual exceeds cash by
18 10 percent?

19 A. What do I think of it?

20 Q. Uh-huh.

21 A. Not very much.

22 Q. What do you mean by "not very much"?

23 A. I think that, you know, when you evaluate
24 something like that to try to put it in such a
25 concrete formula that it has to exceed 10 percent

1 takes the analytical value away from the auditor as to
2 what -- you know, what he really needs to do.

3 I mean, you can -- you can use 10 percent as
4 a generality, but 10 percent to me doesn't really mean
5 that much, because if you're talking 10 percent of a
6 \$100, you're talking \$10, you know, and that's not
7 very material. If you're talking about 10 percent of
8 a million, then maybe you're -- so it's all relative
9 to what you're looking at, and you have to take that
10 in perspective when you do your analysis.

11 Q. When you're analyzing an area such as
12 injuries and damages, do you take into consideration
13 trends over time in injuries and damages payments?

14 A. I mean, if you can establish a trend. I
15 mean, when you look at any accrual versus cash, for
16 example, if you see that -- that -- that -- even if
17 the accrual is over-- I'm going to say overstated
18 compared to actual payments, but you're seeing actual
19 payments on an upward trend, then I, myself, would
20 probably advocate, because that trend using the most
21 current data as -- as the appropriate amount rather
22 than using an average, which would depress that -- you
23 know, it would be -- it would be going against that
24 current trend that you're actually seeing. Likewise,
25 I mean, if it was going down, I would do the same

1 thing.

2 So, I mean, it's -- you have to look at the
3 data and let the data dictate what you have to do.

4 Q. If in a given test year the Company paid out
5 a significant amount of money for -- to settle a
6 damages payment in a particular case, how would -- how
7 would the Staff treat that expense?

8 Let me give a little more context. By
9 "significant," I mean a lot larger than other payments
10 made that year or typically made.

11 A. Well, you're talking about something that is
12 affected by something outside the Company here. I
13 mean, when you're talking about legal lawsuits, you
14 never know what a jury or a judge or what's going
15 to -- what's going to come out of it.

16 I think the -- you know, without getting
17 into specific cases, I know the Company had a
18 particular case that, you know, that -- I mean, it was
19 a walk in the park. I mean, no problem, and they
20 wound up having to pay dollars associated with the
21 case that I personally think the Company shouldn't
22 have had to pay either. I mean, I was totally in
23 agreement with what the Company's position would have
24 been.

25 But you can't -- you can't try to quantify,

1 you know, the value of an injuries and damages issue
2 on a particular case because you never know what's
3 going to come out of it. I mean, that's why I'm not
4 trying to analyze the Union Electric's legal staff as
5 to what their value of these are. I'm looking at what
6 has actually transpired, what the payments are.

7 You could have -- and it's certainly
8 occurred during the time frame that I'm looking at
9 here, over five, six years, you've had payments as
10 high as \$17 million in one year and the very next year
11 you only pay out 4 million. The next year it's way
12 back up here and the next year it's back down here.
13 It's like a yo-yo.

14 So if I'm looking at a particular case in a
15 given year, am I going to say, Okay. This is normal?
16 No, because I'm looking at historically what has
17 happened that, even though you make a large payment
18 here, that doesn't guarantee that you're going to get
19 a large payment the next year.

20 Q. Have you or has Staff, to your knowledge,
21 ever excluded a settlement or payments in a particular
22 case entirely, for instance calling it a one-time,
23 nonrecurring expense?

24 A. I can't say that that has not happened, and
25 it would certainly depend on the circumstances.

1 Q. Uh-huh.

2 A. Certainly, within injuries and damages where
3 you're talking about, you know, some construction
4 worker hitting a -- hitting a transmission line and
5 getting a settlement because of that, I mean, these
6 things are inherent in the electric business.

7 You've got things out there that can pose
8 hazards. I mean, people get careless. It may not be
9 any fault of the Company, but the Company is going to
10 wind up having to pay for it. But, I mean, these are
11 things that are there. They are always going to be
12 there.

13 Now, in the instance -- I mean, so you have
14 to look at the particular event, whether it's
15 something that is truly something of a one-time
16 nature, because -- because of the event it would
17 never -- never really happen again. So I -- again,
18 just to reiterate, I mean, you have to look at the
19 circumstances around that particular event.

20 Q. Could I paraphrase by saying it's possible
21 that a particular settlement or payment might be
22 excluded in that manner based on its own
23 circumstances?

24 A. If you're talking about accrual versus cash
25 basis and -- and not necessarily directed to

1 particularly injuries and damages, I would say yes.

2 Q. I mean, specifically with relation to
3 injuries and damages, and I suppose this would be
4 under cash basis accounting, is it possible that the
5 Staff would exclude a particular settlement or damages
6 payment on the basis that it was one-time and
7 nonrecurring because it was somehow extraordinary?

8 A. I don't put it out of the realm of
9 possibility. I have not done that in this case.

10 Q. Are you familiar with the concept of
11 intergenerational equity?

12 A. I've heard the word thrown around, yes.

13 Q. Would you agree with the notion that current
14 ratepayers ought to pay for things that benefit them?

15 A. I think that's -- that's a generally
16 accepted concept.

17 Q. And the flip side of that, would you agree
18 that it's unfair to make future ratepayers pay for
19 things that did not benefit them?

20 A. Yeah, but, I mean, you have to look at the
21 time frame that you're talking about when you're
22 talking about intergenerational. You know, if
23 you're talking about we're going to build a power
24 plant 20 years from now so we need to get the money
25 up-front from you guys, well, that's one thing. Or if

1 something is happening here that we're going to say,
2 Okay. We're not going to let you recover this, but
3 we're going to let you recover it 20 years from now, I
4 mean, that's an extreme case of -- of -- of what
5 you're talking about in inter-- what --

6 Q. Intergenerational equity.

7 A. -- intergenerational equity. So I don't
8 think that intergenerational equity is -- is something
9 that's -- something that's absent, but you try to
10 minimi-- I think you try to minimize that.

11 Q. Would it be fair for me to assume in
12 performing your analysis you don't consider
13 intergenerational equity?

14 A. I didn't look at that specifically, no.

15 Q. Let's move on to the territorial agreements.

16 Now, I'm a little confused as to exactly --
17 actually, let me ask you the first question I've been
18 asking.

19 What, if anything, did you change in your
20 analysis of the territorial agreements this time
21 around?

22 A. Overall, the methodologies are pretty much
23 the same, although they are addressed somewhat
24 differently. Because of the way depreciation was
25 calculated in the original filing, there was a

1 separate adjustment in the original filing specific
2 for territorial agreements.

3 In the current -- in the current filing, the
4 March filing, we used a different EMS tool, so to
5 speak. The original was filed under what I call a DOS
6 version that doesn't -- didn't give you much
7 flexibility, so there was things that were done
8 outside the EMS run in an input where I used an EMS
9 run that was -- is driven off of Excel that gives you
10 the flexibility of putting in formulas and allowing
11 you to be a little bit more flexible in what you --
12 what you do so that when you do make an input
13 somewhere that it -- if it has effect anywhere else
14 within the EMS run, it is generated and goes through
15 all of the applicable applications that are affected.

16 So that is the primary change in the
17 territorial agreements where the EMS run was used as
18 the calculator of the depreciation expense rather than
19 doing it external to the EMS run and inputting the
20 number, likewise, and the fuel expense, rather than
21 making a specific adjustment for fuel expense, the kWh
22 was provided to our Energy Department who then used
23 that data to incorporate in their overall fuel run for
24 fuel expense.

25 So the -- the calculation was the same, just

1 that the depreciation and the fuel component was kind
2 of brought into a different spectrum and calculated as
3 part of a total fuel cost, total depreciation cost.

4 MR. TODD: Let me go ahead and get these
5 notes that you provided me put in as Exhibit 1.

6 (EXHIBIT NO. 1 WAS MARKED FOR IDENTIFICATION
7 BY THE COURT REPORTER.)
8 BY MR. TODD:

9 Q. We've marked as Exhibit 1, Mr. Gibbs, the
10 notes that you prepared specifically for today's
11 deposition; is that correct?

12 A. Yes.

13 Q. Now, I want you to explain to me exactly
14 what it is that this adjustment does.

15 A. The territorial agreements?

16 Q. Yes.

17 A. What the territorial agreements adjustment
18 attempts to do is to reinstate the investment revenue
19 and expense levels associated with those areas that
20 was -- was given up or that the net change between
21 what was given up and what was received in regards to
22 the territorial agreements.

23 Q. Now, I think what you just said is two
24 different things, and that's, I think, the source of
25 my confusion.

1 On page 31 of your testimony, line 17, you
2 characterize the adjustment as making the revenue
3 expenses look as if the territorial agreements did not
4 exist. And what you just told me was that you're
5 trying to -- you reverse the net difference.

6 A. And I think it says the same thing. What
7 you -- what I'm saying is when you reverse it, you put
8 back the customers that UE had, you give back the
9 customers that the territorial agreement -- the co-op
10 or the city had, you take the investment you give
11 away, bring it back, give that investment back. I
12 mean, the whole thing is a netting process as if the
13 territorial agreement did not exist.

14 Q. Am I correct, though, that all you are
15 doing is you are changing back the customers,
16 facilities, et cetera, that were actually exchanged
17 on the day the agreement was signed?

18 A. With a -- with a minor exception. I think
19 that we have attempted to -- at least in part, to
20 adjust the revenues to reduce the effect of the
21 territorial agreement as a result of customer
22 additions in the areas that the -- the customers
23 picked up in those -- those areas where they had
24 acquired from the -- through the territorial
25 agreements.

1 Q. So you have looked at information on those
2 areas since the time the agreement was signed?

3 A. Yes.

4 Q. So is what you are handing back to each
5 company now the current ratepayers, facilities,
6 et cetera, in each -- in the traded service areas?

7 A. Yeah. I think -- if I could go through just
8 an illustration, I guess.

9 Q. That would be helpful.

10 A. In one -- say, in one territorial agreement,
11 say, you gave up \$1,000 of revenue and you gained 500,
12 so you had a net loss of revenue of 500. We come now
13 and you've added a couple of customers, so that \$500
14 of lost revenue that you have is now reduced because
15 you have additional revenue associated with these
16 customer additions.

17 That is what has been addressed since the
18 time of the initial territorial agreement. Other than
19 that, it's remained pretty much the same. It's
20 basically a swap from day one.

21 Q. I want to work with the numbers you just
22 gave to make sure I understand this.

23 Let's say Union Electric is giving up the
24 1,000 and Black River Cooperative is giving up the
25 500.

1 A. Right.

2 Q. And which area is it that has now developed
3 additional revenue?

4 A. The additional revenue is associated with
5 the customer additions that the company has acquired
6 in the area that they acquired.

7 Q. So Union Electric gets an area from Black
8 River that initially generated \$500, and let's say it
9 now generates \$600. Whereas the net change initially
10 was \$500, the net change is now \$400?

11 A. That's correct.

12 Q. That's what you're telling me.

13 How long do you think an adjustment like
14 this should continue to be made?

15 A. Theoretically, until such time as it can be
16 proven or shown to the Staff that the net impact of
17 the territorial agreement does not create an
18 additional revenue requirement to the current
19 ratepayers.

20 Q. Suppose for me that two different companies
21 provided services to St. Louis and Jefferson City, and
22 they decided that they would exchange those service
23 areas. Union Electric was just sick of providing
24 service to St. Louis, just wanted Jefferson City now,
25 and the Commission blessed this in an agreement as it

1 did the agreements you are adjusting.

2 Would it be appropriate in that case to
3 attribute back to Union Electric Company all of the
4 ratepayers in St. Louis?

5 A. You talk in a very extreme -- extreme
6 situation here that I can't fathom that it would
7 happen. But assuming that would -- assuming that
8 could transpire, under the current theory that our
9 territorial agreement adjustment has been made, yes,
10 that would be an appropriate adjustment to do.

11 That's also under the assumption that, you
12 know, that particular swap actually caused an
13 additional revenue requirement to the existing
14 customers of the company.

15 Q. When you say an additional revenue
16 requirement to existing customers, what is it about
17 the fact that there is an additional revenue
18 requirement that requires the adjustment to be made?

19 A. In a rate setting when you're trying to
20 establish rates, if a territorial agreement caused an
21 increase in the calculation of revenue requirement, in
22 other words, revenue requirement is higher because
23 of -- of these particular territorial agreements, then
24 that's -- from the Staff's perspective, it's been
25 detrimental to the current ratepayers. And all we're

1 trying to do in -- with respect to the territorial
2 agreements is to reverse the impact of those
3 territorial agreements on the revenue requirement.

4 Q. Now, you would agree with me, would you not,
5 that when the Company signs a contract for fuel that
6 is at a higher price than the previous contract for
7 fuel, talking in general terms, that the increase in
8 the price of fuel is likely to increase cost of
9 service and, therefore, a new rate-making could
10 increase rates?

11 A. But you're talking about a cost that's
12 generated for the provision of service to the current
13 ratepayers, and, as such, the current ratepayers
14 should be paying to the Company for that service.

15 The territorial agreements are a different
16 animal because you're creating a revenue requirement
17 associated with -- with a loss of customers, and so
18 the current customers are having to pick up, if you
19 will, that loss of revenue requirement associated with
20 the territorial agreement.

21 Q. Have you performed any analysis regarding
22 the benefits to UE off of these territorial
23 agreements?

24 A. Now, when you say analysis of benefits, the
25 dollars -- the amounts that we -- that the Staff has

1 incorporated into the adjustments are figures that
2 have been generated by the Company. If you're talking
3 about analysis other than that associated with the
4 benefits due to duplicative services, maybe
5 maintenance of -- avoidance of additional
6 construction, that type of thing, no, we have not done
7 any kind of an analysis as to the nontangible benefits
8 associated with these territorial adjustments.

9 Q. Have you analyzed whether these territorial
10 agreements were a good idea?

11 A. I, myself, was not involved in the actual
12 review of the territorial agreements that was approved
13 by the Commission.

14 Q. Do you have any opinion as to whether they
15 were a good idea?

16 A. No.

17 Q. Has the Staff made any other adjustments in
18 any other areas of its rate case related to the
19 territorial agreements?

20 A. I think the territorial adjustments
21 encompass the change in revenue, maintenance, net
22 investment, and fuel expense.

23 Q. And other than those, you've made no
24 adjustments at all related to your reversal of the
25 territorial agreements?

1 A. I don't believe we have.

2 Q. You told me earlier that you have attempted
3 to update the exchange of revenue somewhat to reflect
4 the more recent developments?

5 A. Yes.

6 Q. That was our 1,000/500 example we were
7 talking about?

8 A. Yes.

9 Q. How many of the adjustments have you
10 adjusted in that manner?

11 A. Offhand, I can't say. I know at least one
12 or two. It wasn't universally applied to all of them.
13 Some of the territorial agreements were -- were not
14 subject to that.

15 I think -- I'm trying to recall which one it
16 was. There was one that was purely a sale where the
17 Company didn't receive any customers. It was just
18 a, you know, selling of -- selling off of a piece of
19 territory. So there was -- some of the territorial
20 agreements were not subject to the same review of
21 customer additions that others were.

22 Q. Did you analyze all of them for customer
23 additions, obviously, with the exception of the sale?

24 A. The information was requested.

25 Q. Did you analyze the information?

1 A. Actually, the latest information that I
2 requested I returned to the Company as nonresponsive
3 and I'm still awaiting a response.

4 Q. As regards the sale, did you factor into
5 your calculation whatever conversation the Company
6 received for the sale?

7 A. I'm sorry. Could you repeat that?

8 Q. For the sale, the contract that was just a
9 sale, did you take into account I assume it was money
10 the Company received for that sale?

11 A. Not with respect to the adjustment, no.

12 Q. How is the energy cost allowed to the
13 Company to serve the new customers -- or the return
14 customers, rather, calculated?

15 A. The dollars associated with those customer
16 changes, associated with those customer changes there
17 was additional kWh associated with those dollars.
18 Those additional kWh associated with those changes was
19 provided to our Energy Department. So those kWh was
20 incorporated into the overall fuel calculation.

21 Q. That would be the production cost model?

22 A. Yes.

23 Q. You provided those to Mr. Cassidy?
24 Mr. Bender?

25 A. Actually, the information was provided to

1 Lena Mantle who I think then, you know, provided it to
2 Leon Bender, I think, for purposes of the fuel
3 production model.

4 Q. Let's talk about uncollectible expense.

5 Would I be correct in assuming your
6 methodology here was just the same as last time?

7 A. The methodology was the same, although, as
8 you may note if you've read through the copy of the
9 notes that was provided to you that I brought in, in
10 addition to the errors that the Company had brought to
11 my attention, I, myself, had found an error in the
12 Staff's calculation of uncollectibles which was, I
13 think, fairly substantial.

14 There was a minor difference in some of the
15 data that had to be adjusted, but the primary error
16 was that in moving to the September update, I
17 inadvertently had also picked up the September
18 per-book accrual as a basis for the adjustment. And
19 when that -- when you go back and make that adjustment
20 based on the June level of expense, the Staff's
21 adjustment went from 1.5 million, which was in our
22 filing, to 5.3 million.

23 Q. And you've gone over that with Mr. Weiss.
24 Correct?

25 A. Yes.

1 Q. Let me just ask you a series of general
2 questions, and then we're going to be done --

3 A. Okay.

4 Q. -- which is going to be a world record for
5 us, I think.

6 In performing your analysis, have you ever
7 considered the effect of your adjustments on the
8 quality of Ameren's management?

9 A. No, I have not.

10 Q. Do you have an opinion as to whether Ameren
11 is a well managed company?

12 A. No.

13 Q. Have you ever considered the quality -- the
14 effect of any of your adjustments on Ameren's safety
15 record?

16 A. No.

17 Q. Do you have any idea whether Ameren has a
18 good or bad safety record relative to other utilities?

19 A. I haven't made that analysis.

20 Q. Do you have any opinion?

21 A. No.

22 Q. Do you have any idea whether Ameren has a
23 good environmental record relative to other utilities?

24 A. I don't know.

25 Q. Have you ever considered Ameren's

1 environmental record in performing any of your
2 analyses?

3 A. No, I haven't.

4 Q. Do you have any idea how Ameren's rates
5 compare to other utilities in Missouri or nationwide?

6 A. Specifically, no, I don't.

7 Q. Do you have any idea how Missouri rates
8 compare to rates nationwide?

9 A. I haven't seen -- I'm sure the analysis is
10 put together someplace, but I have not seen it.

11 Q. Do you have any opinion as to whether Ameren
12 is an efficiently operated utility?

13 A. No.

14 Q. Have you ever considered the effect of your
15 adjustments on Ameren's efficiency?

16 A. No.

17 Q. In performing your analyses, do you ever
18 consider the concept of rate stability?

19 A. No.

20 Q. In performing your analyses, do you ever
21 consider the concept of regulatory instability?

22 A. No.

23 Q. Do you know what I mean by "regulatory
24 instability"?

25 A. Evidently, not. That's why I -- evidently,

1 I must not consider it, so --

2 Q. Do you ever consider the effect on a
3 company's operations that may be had by changing
4 regulatory standards and methods?

5 A. No, I haven't.

6 Q. Have you ever considered the impact that the
7 Staff's rate case may have on AmerenUE?

8 A. No.

9 MR. TODD: We're done.

10 MR. MOLTENI: I have a few questions for the
11 witness.

12 CROSS-EXAMINATION BY MR. MOLTENI:

13 Q. Mr. Gibbs, you remember that Mr. Todd asked
14 you questions about accrual-based accounting versus
15 cash-based accounting?

16 A. Yes.

17 Q. And you remember earlier today you talked
18 about materiality, in specific with an example using
19 10 percent of 100 percent versus 10 percent of a
20 million. Right?

21 A. Yes.

22 Q. And then later on today Mr. Todd asked you
23 some questions about the territorial adjustments?

24 A. Yes.

25 Q. And he gave you a hypothetical of a Jeff

1 City versus St. Louis swap?

2 A. Yes.

3 Q. Would it be fair for me to assume that
4 materiality would come into play in whether the Staff
5 would apply those territorial adjustments in such a
6 swap?

7 A. I'm sure it would, and it would be in the
8 aggregate, not necessarily in the individual.

9 MR. MOLTENI: Okay. Thanks.

10 That's all of the questions I have.

11 MR. TODD: OPC?

12 MR. ROBERTSON: I'm not an attorney. They
13 don't allow me to ask questions.

14 (PRESENTMENT WAIVED; SIGNATURE REQUESTED.)

C E R T I F I C A T E

STATE OF MISSOURI)
) ss.
COUNTY OF COLE)

I, KRISTAL R. MURPHY, CSR, RPR, CCR, with the firm of Associated Court Reporters, do hereby certify that pursuant to agreement, there came before me,

DOYLE L. GIBBS,

at the Missouri Public Service Commission, Room 810, Governor State Office Building, in the City of Jefferson, County of Cole, State of Missouri, on the 12th day of April, 2002, who was first duly sworn to testify to the whole truth of his knowledge concerning the matter in controversy aforesaid; that he was examined and his examination was then and there written in machine shorthand by me and afterwards typed under my supervision, and is fully and correctly set forth in the foregoing 73 pages; and the witness and counsel waived presentment of this deposition to the witness, by me, and that the signature may be acknowledged by another notary public, and the deposition is now herewith returned.

I further certify that I am neither attorney or counsel for, nor related to, nor employed by, any of the parties to this action in which this deposition is taken; and further, that I am not a relative or employee of any attorney or counsel employed by the parties hereto, or financially interested in this action.

Given at my office in the City of Jefferson, State of Missouri, this 12th day of April, 2002.

KRISTAL R. MURPHY, CSR, RPR, CCR

COSTS: (Computation of court costs based on payment within 30 days.)

with even Justice by the King

Employment -
US \$22.75 of 20.8% - 87% reduced from 94.19 to 95.97%
As indicated that 95.97% has data
As indicated to the 95.97% (changed)
included an increase to expense of 18.00

Revised amount - related to AMIF
As add to Co found even EIP was updated
Account on Co record of payment - (neg) on Telam
Net effect was to reduce 87% payment, by
approx 1.5 m. The change was effected
the payment adjustment. It also affected my
testimony at pg 24 June 11.

Conclusion
Payment for AMIF
American Camp - used money and for use actual
Showered P/R 4/10/02 FICA 6300 + 737 400 before
affected by even camp change note (Baker)
Adjustment and FICA + PET ante (Baker also
input even 9/01 - corrected + recalculation P/R

Conclusion
17 p/m of 10/10/02 of approx 200,000
Company mortgage income (4/2/02)

Minor input errors in net write-offs ^{to filing} of approx 4,000
Most significant change was in TY accrual. When
updating to Sept. inadvert. used Sept accrual rather
than June. Overall impact was to change a/c from
1.5 mill to 5.3 mill

Changed approach/method from July 2 filing to March
filing:

1 DOYLE GIBBS, being first duly sworn, testified as
2 follows:

3 DIRECT EXAMINATION BY MR. TODD:

4 Q. My name is Gordon Todd. I'm with the
5 Cooper and Kirk Law Firm, representing AmerenUE.
6 To my right is Gary Weiss, who is also with
7 AmerenUE.

8 Why don't I just have everyone around the
9 table introduce themselves starting with deponent.

10 MR. GIBBS: Doyle Gibbs with the Missouri
11 Commission.

12 MR. ANDERSON: I'm Eric Anderson, with the
13 General Counsel's Office, representing Staff.

14 MR. CASSIDY: John Cassidy, with the
15 Missouri Commission.

16 MS. MANTLE: Lena Mantle, with the
17 Missouri Public Service Commission.

18 BY MR. TODD:

19 Q. Mr. Gibbs, you understand you're being
20 deposed today in Case EC-2002-1?

21 A. Yes.

22 Q. And you are being examined under oath?

23 A. Yes.

24 Q. Mr. Gibbs, have you been deposed before?

25 A. Yes, I have.

1 Q. How many times have you been deposed?

2 A. This would be my second time.

3 Q. Have all of your -- was your prior
4 deposition in a Public Service Commission-related
5 case?

6 A. Yes, it was.

7 Q. Was it an electric utility case?

8 A. Yes. Matter of fact, it was this very
9 same case.

10 Q. As you have been deposed before, you are
11 familiar with the rules, the ground rules, but I'm
12 going to run through them quickly for purposes of
13 the record.

14 You understand that your answers should
15 all be oral?

16 A. Yes.

17 Q. You understand that you and I should try
18 to avoid interrupting each other?

19 A. Yes.

20 Q. You understand that as we go through the
21 deposition, we'll be using various technical terms
22 and terms of art, and you will be more familiar
23 with them than I will. So you understand that
24 you're free to define those or to correct my misuse
25 so the record is clear. Do you understand that?

1 A. Yes, I do.

2 Q. You understand that if you don't
3 understand a question, you're free to ask me to
4 repeat it or to clarify it?

5 A. Yes.

6 Q. You can also have the court reporter read
7 a question back if you have forgotten it.

8 A. Okay.

9 Q. If you think that a term that I use in a
10 question or a term that you want to use in an
11 answer requires some definition, you can define
12 that term within the parameters of your answer; is
13 that understood?

14 A. Yes.

15 Q. As we go through the deposition today,
16 your counsel may occasionally object. If your
17 counsel objects, you have to go ahead and answer
18 the question, do you understand that?

19 A. Yes.

20 Q. You are allowed to not answer a question
21 if your counsel objections on the grounds of
22 privilege and instructs you to not answer, do you
23 understand that?

24 A. Yes.

25 Q. As we go along, if you want to take a

1 break or anyone wants to take a break, please just
2 speak up, and we'll accommodate that at the nearest
3 immediate point, if not, right then. Okay?

4 A. Okay.

5 Q. Now, Mr. Gibbs, today's deposition is not
6 actually on your own testimony, but rather that
7 proffered by Mark D. Griggs; is that correct?

8 A. That is correct.

9 Q. Mr. Gibbs, what have you done to prepare
10 for your deposition today on Mr. Griggs' testimony?

11 A. I have reviewed his testimony, and
12 reviewed his work papers associated with his
13 testimony.

14 Q. Have you reviewed anything that was not
15 produced to AmerenUE?

16 A. Not that I'm aware of.

17 Q. Did you perform any -- re-perform, rather,
18 any of Mr. Griggs' calculations?

19 A. I did not go through and actually do a
20 mathematical check, just a cursory check of the
21 adjustments.

22 Q. Did you speak to anyone in preparation for
23 today's deposition?

24 A. Yes.

25 Q. Who have you spoken to?

1 A. I spoke with my attorney, Eric Anderson,
2 who is sitting here on my left, as well as Steve
3 Rackers and Greg Meyer from the accounting staff.

4 Q. What was the nature of your conversation
5 with Steve Rackers?

6 A. Essentially Steve Rackers just -- I'm
7 trying to think. He didn't formulate any potential
8 questions, basically he just wanted to know if I
9 understood or had at least an understanding of what
10 Mark Griggs had done.

11 Q. Did you review any of Mark Griggs'
12 testimony or work papers with Steve Rackers?

13 A. No, I did not.

14 Q. And the other person you said you talked
15 to was Greg Meyer?

16 A. Greg Meyer, yes.

17 Q. And what was the nature of your
18 conversation with Mr. Meyer?

19 A. The conversation with Greg was basically
20 how to conduct yourself in a deposition, just
21 general, you know, get a good night's sleep,
22 nothing in terms of a technical nature.

23 Q. Would I be correct in assuming you didn't
24 review Mr. Griggs' testimony or work papers with
25 Mr. Meyer?

1 A. No.

2 Q. No, you did not?

3 A. No, I did not.

4 Q. Now, in reviewing Mr. Griggs' work papers,
5 did you find any mistakes?

6 A. I don't know if -- I guess there was a few
7 things and it's not so much in -- it has to do more
8 with information that has come out of earlier
9 depositions with regards to, say, the allocations.
10 In an earlier deposition, there was some question
11 as to the fixed allocation, and that fixed
12 allocation was not properly used in calculating the
13 impact that it has on other allocation factors. So
14 to the extent there were certain changes unrelated
15 to his actual work that would filter into his work,
16 things would have to be changed, yes.

17 Q. Other than the fixed allocation factors,
18 were there any mistakes that you found in the work
19 papers?

20 A. I had some difficulties following some of
21 his allocation percentages, but assuming that those
22 were right, I have no problems with it.

23 Q. By allocation percentages, do you mean the
24 allocation factors?

25 A. Yes.

1 Q. Is there anything that you would add to
2 Mr. Griggs' work papers?

3 A. Not at this time.

4 Q. Anything you would like to qualify in
5 Mr. Griggs' work papers?

6 A. I don't have anything specific, no.

7 Q. Subject to your comments on the allocation
8 factors, do you feel comfortable completely
9 adopting Mr. Griggs' work papers for purposes of
10 your testimony?

11 A. Yes.

12 Q. Did Mr. Griggs have any notes or other
13 papers other than his work papers that are
14 pertinent to this case?

15 A. I did not see any.

16 Q. And you also reviewed Mr. Griggs'
17 testimony?

18 A. Yes, I have.

19 Q. Did you find any mistakes in Mr. Griggs'
20 testimony?

21 A. I don't believe I found any mistakes in
22 his testimony.

23 Q. Anything you would like to add to
24 Mr. Griggs' testimony?

25 A. Not at this time.

1 Q. Anything you would like to delete from it?
2 A. Not at this time.
3 Q. Anything you would like to qualify in it?
4 A. Not that I'm aware of.
5 Q. Do the problems with the allocation
6 factors you mentioned a minute ago, in any way
7 change Mr. Griggs' testimony?
8 A. I don't believe it changes any of his
9 testimony in terms of the concepts.
10 Q. In any other terms?
11 A. Not that I'm aware of.
12 Q. Mr. Gibbs, do you completely adopt and
13 support Mr. Griggs' testimony?
14 A. Yes, I do.
15 Q. Mr. Gibbs, were you involved at all in the
16 preparation of Mr. Griggs' testimony?
17 A. I was part of the initial review of his
18 testimony before it was filed.
19 Q. Were you at all involved in the process of
20 his preparing it before that review took place?
21 A. No.
22 Q. Do you know whether Mr. Griggs' testimony
23 entirely reflects his own work?
24 A. No, I do not.
25 Q. Do you know whether he had assistance from

1 others in preparing any portion of his testimony?

2 A. No, I do not.

3 Q. Do you know what documents Mr. Griggs
4 reviewed in preparing his testimony?

5 A. Not in their entirety, no.

6 Q. What do you mean by not in their entirety?

7 A. His testimony specifically addresses
8 certain DRs and references to prior Commission
9 cases, so that in itself would indicate that he had
10 reviewed those particular items. Anything
11 specifically not addressed in his testimony, I
12 wouldn't have any knowledge of what he had
13 reviewed.

14 Q. Is it possible that Mr. Griggs reviewed or
15 relied upon papers that are not included in his
16 work papers?

17 A. That may be a possibility. I do not know.

18 Q. You don't have any knowledge of such
19 papers?

20 A. That is correct.

21 Q. In preparing testimony in a case such as
22 this, does a Staff member rely on their own
23 experience?

24 A. Could you clarify, please?

25 Q. Certainly. When you're working on

1 performing your analysis on a case such as this, do
2 you rely on your own experiences, for instance,
3 prior cases, from your education, from your
4 familiarity with your own field, things like that?

5 A. I'm sure that that's the case. You rely
6 on your own experience, as well as review of any
7 work papers that may exist in that particular area,
8 in that with regard to that company in a prior case
9 or possibly the work papers from an unrelated case
10 that may have some similarities.

11 Q. Would I be correct in assuming that a
12 Staff witness would also have a general familiarity
13 with the leading texts and treatises in their
14 particular field?

15 A. Yes.

16 Q. And would have a familiarity with leading
17 authors in their field?

18 A. I don't know.

19 Q. Do you know what personal experiences --
20 or pardon me -- what prior experiences Mr. Griggs
21 might have relied on in preparing for his testimony
22 in this case?

23 A. If I'm not mistaken, I don't know if it's
24 an attachment to his testimony or within his
25 testimony itself, there may be a -- yes, there's a

1 Schedule 1 attached to his testimony that indicates
2 prior cases that he has filed testimony in.

3 Q. Do you know whether Mr. Griggs relied on
4 anything from any of these cases?

5 A. No, I do not.

6 Q. Do you know whether or not Mr. Griggs is
7 familiar with leading treatises and texts in his
8 field?

9 A. No, I do not.

10 Q. Do you know of anything beyond his
11 produced work papers that Mr. Griggs may have
12 relied on in preparing his testimony in this case?

13 A. No, I do not.

14 Q. Mr. Gibbs, do you have prior experience in
15 the areas that you're adopting from Mr. Griggs?

16 A. Yes, I do.

17 Q. Which areas do you have prior experience
18 in?

19 A. Over 25 years of experience with the
20 Commission, I have at one time or another probably
21 been involved in each of these areas.

22 (EXHIBIT NOS. 1, 2 AND 3 WERE MARKED FOR
23 IDENTIFICATION BY THE REPORTER.)

24 BY MR. TODD:

25 Q. Let me hand you copies of what has been

1 marked as Exhibit 1, Exhibit 2, and Exhibit 3.

2 Mr. Gibbs, at some point I'm going to call you
3 Mr. Griggs, so I apologize in advance for doing
4 that.

5 Mr. Gibbs, do you recognize what's been
6 marked as Exhibit 1?

7 A. Yes, I do.

8 Q. What is this document?

9 A. This is the direct testimony of Mark D.
10 Griggs, which was filed in this proceeding.

11 Q. And this is the document you have stated
12 you have reviewed or are familiar with and are
13 completely adopting?

14 A. Yes.

15 Q. Do you recognize Exhibit 3?

16 A. Exhibit 3, yes. These are the Staff
17 accounting schedules, which calculate the revenue
18 requirement that was originally sponsored by Jim
19 Schweiterman that I'm currently sponsoring.

20 Q. And the schedules in Exhibit 3 are
21 referenced in Staff's various pieces of written
22 testimony in this case, correct?

23 A. Yes, it is.

24 Q. Let's turn to Exhibit 2, which is a
25 document entitled, Staff's responses to Union
