Joe,

Thanks for the response. I may have been unclear in the request for the drawing. We are looking for any new drawings KCPL has with respect to the new or proposed circuit [re]configurations that will affect Blvd Brewery. I have the current construction drawing dated 8-29-05, but what is unclear is what has or is being proposed to be changed upstream to feed the site. There has been a change on KCPL's side that reflects our discussion of KCPL adding new circuits or reconfiguration of existing ones in preparation to service the area.

I appreciate you taking the time to provide the information.

Thanks,

Greg
