

AmerenUE 4 CSR 240-23.020 Electrical Corporation Infrastructure Standards Compliance Plan - Supplement

Introduction

This document supplements Union Electric (dba AmerenUE) Company's plan for complying with the infrastructure inspection standards established by Missouri Public Service Commission Rule 4 CSR 240-23.020, Electrical Corporation Infrastructure Standards (referred to in the remainder of this document as "the Rule"). AmerenUE's compliance plan (referred to in the remainder of this document as "the Plan") was submitted to the Commission on 30 June 2008 as required by Section (3) (B) of the Rule. The Plan included AmerenUE's projected schedules for completing a full cycle of inspections for the equipment listed on the table attached to the Rule entitled, "Electrical Corporation System Inspection Cycles (Maximum Intervals in Years)". However, at the time of submission, the Plan did not include projected schedules for underground network inspections for calendar year 2009 and the calendar years beyond 2009 because these schedules were under development at the time the Plan was submitted. The Plan stated that these schedules would be submitted to the Commission by the end of 2008. This supplement includes these schedules.

Definitions

For the purposes of this compliance plan supplement, the following definitions shall apply:

1. Underground Network Equipment – Underground equipment including manholes, vaults, and other underground structures. Equivalent to "Underground Networks" and "Manholes, Vaults, Tunnels, and Other Underground Structures" noted on the table entitled, "Electrical Corporation System Inspection Cycles (Maximum Intervals in Years)" included with the Rule.

Distribution System Inspection Program Schedule – 1 January 2009 to 31 December 2009

AmerenUE plans to conduct underground network equipment "Detailed Inspections" on the circuits listed in Attachments P and Q in 2009. Manholes will be inspected in accordance with the schedule listed in Attachment P and vaults will be inspected in accordance with the schedule listed in Attachment Q.

Distribution System Inspection Program Schedule – Outyears

AmerenUE plans to conduct underground network equipment "Detailed Inspections" on the circuits listed in Attachments R and S in the years after 2009. Manholes will be inspected in accordance with the schedule listed in Attachment R and vaults will be inspected in accordance with the schedule listed in Attachment S.

The combination of schedules shown in Attachments R and S ensures that all of the underground network equipment is inspected at the periodicity specified by the table entitled, “Electrical Corporation System Inspection Cycles (Maximum Intervals in Years)” included with the Rule.

Conclusion

This supplement completes the Plan originally submitted by AmerenUE on 30 June 2008 by providing the underground network schedule information under development at the time of the original submission.
