**CASE NO. EM-96-149**

Q. Please state your name and business address.

A. John P. Cassidy, 815 Charter Commons, Suite 100B, Chesterfield, Missouri 63017.

Q. By whom are you employed and in what capacity?

A. I am employed by the Missouri Public Service Commission (Commission) as a Regulatory Auditor.

Q. Please describe your educational background.

A. I graduated from Southeast Missouri State University, receiving a Bachelor of Science degree in Business Administration, with a double major in Marketing and Accounting in 1989 and 1990, respectively.

Q. What has been the nature of your duties while in the employ of this Commission?

A. Since joining the Commission Staff (Staff) in 1990, I have directed or assisted with audits and examinations of the books and records of utility companies operating within the state of Missouri. I have also conducted numerous audits of small

Direct Testimony of  
John P. Cassidy

1 water and sewer companies in conjunction with the Commission's informal rate  
2 proceedings.

3 Q. Have you previously filed testimony before this Commission?

4 A. Yes, I have. Please refer to Schedule 1, which is attached to my direct  
5 testimony, for a list of cases in which I have previously filed testimony.

6 Q. With reference to this Case No. EM-96-149, have you made an  
7 examination of the data supporting the calculation of credits for the third sharing period  
8 of the second experimental alternative regulation plan (EARP) and other books and  
9 records of Union Electric Company d/b/a AmerenUE (AmerenUE or Company)?

10 A. Yes, in conjunction with other members of the Commission Staff.

11 Q. What are your areas of responsibility in this case?

12 A. My areas of responsibility include the Staff's adjustments to AmerenUE's  
13 credit calculation for Midwest Independent Transmission System Operator (Midwest  
14 ISO) expense, legal fees and environmental expense.

15 Q. What Income Statement adjustments are you sponsoring?

16 A. I am sponsoring the following adjustments, which appear on the  
17 Adjustments to Income Statement, Accounting Schedule 8:

18	Midwest ISO	S-7.2
19	Legal Fees	S-13.3
20	Environmental Expense	S-13.4

21 **MIDWEST ISO**

22 Q. Please explain the Midwest ISO.

Direct Testimony of  
John P. Cassidy

1           A.     In 1998, AmerenUE and AmerenCIPS joined the Midwest ISO. The  
2 Midwest ISO is made up of a number of member regional electric power companies. The  
3 Midwest ISO is responsible for avoiding potential "bottlenecks" in the flow of power and  
4 ensuring measures of reliability. The Federal Energy Regulatory Commission (FERC)  
5 regulates the Midwest ISO.

6           Q.     Why has the Staff made Adjustment S-7.2 with regard to the Midwest ISO  
7 expense?

8           A.     Staff adjustment S-7.2 removes \$12,502,800 associated with AmerenUE's  
9 withdrawal of its membership in the Midwest ISO. During the year 2000, two of the  
10 Illinois members of the Midwest ISO, Commonwealth Edison and Illinois Power,  
11 announced their intent to withdraw from the Midwest ISO and, in turn, join the Alliance  
12 Regional Transmission Organization (Alliance RTO). In November 2000, following that  
13 announcement, AmerenUE determined that the operational configuration of the Midwest  
14 ISO was unacceptable and announced its withdrawal from the Midwest ISO and its  
15 intention to join the Alliance RTO. As a result of the Company's decision to withdraw  
16 from the Midwest ISO, AmerenUE incurred, during May 2001, a \$12,502,800 exit fee.  
17 However, recent events at the federal level with FERC's non-approval of the Alliance as  
18 an RTO indicate that AmerenUE may rejoin the Midwest ISO in the near future and may  
19 be able to recover a full refund of the \$12,502,800 exit fee.

20           Q.     What is the Staff's justification for proposing this adjustment?

21           A.     In Case No. EM-96-149, the Stipulation And Agreement states in sections  
22 7.f.vi, 7.f.vii and 7.f.viii:

23                   7.f.vi     If Staff, OPC or other signatories find evidence that  
24                             operating results have been manipulated to reduce

1 amounts to be shared with customers or to misrepresent  
2 actual earnings or expenses, Staff, OPC or other  
3 signatories may file a complaint with the Commission  
4 requesting that a full investigation and hearing be  
5 conducted regarding said complaint. UE shall have the  
6 right to respond to such request and present facts and  
7 argument as to why an investigation is unwarranted.

8 7.f.vii UE, Staff, OPC and other signatories reserve the right to  
9 bring issues which cannot be resolved by them, and  
10 which are related to the operation or implementation of  
11 the New Plan, to the Commission for resolution.  
12 Examples include disagreements as to the mechanics of  
13 calculating the monitoring report, alleged violations of  
14 the Stipulation and Agreement, alleged manipulations of  
15 earnings results, or requests for information not  
16 previously maintained by UE. An allegation of  
17 manipulation could include significant variations in the  
18 level of expenses associated with any category of cost,  
19 where no reasonable explanation has been provided.  
20 The Commission will determine in the first instance  
21 whether a question of manipulation exists and whether  
22 that question should be heard by it.

23 7.f.viii Staff, OPC and other signatories have the right to  
24 present to the Commission concerns over any category  
25 of cost that has been included in UE's monitoring results  
26 and has not been included previously in any ratemaking  
27 proceeding.

28 I would also note that the Reconciliation Procedure, Attachment C, Section 2.g  
29 states, in part, that:

30 UE/Staff/OPC reserve the right to petition the Commission for  
31 resolution of disputed issues relating to the operation or  
32 implementation of this Plan.

33 The Staff believes that the Midwest ISO exit payment represents a significant  
34 variation in expense with no reasonable explanation. Since AmerenUE did not remove  
35 this expense from its credits calculation, this represents a reduction in amounts to be  
36 shared with customers by the Company and, therefore, reflects a manipulation of earnings  
37 results as covered in the Stipulation And Agreement. Lastly, the Staff is unaware of any

1 prior rate case proceeding, involving AmerenUE, where Midwest ISO expense was at  
2 issue and where Commission precedent exists.

3 **LEGAL FEES**

4 Q. Please explain how the Company accounts for the legal fees that are the  
5 subject of the Staff's adjustment.

6 A. The Company's treatment for these legal fees is based on accrual  
7 accounting. Under this accrual basis, the Company maintains a reserve of accumulated  
8 funds to pay for legal fees based on estimates of legal fees that the Company anticipates  
9 will be incurred rather than for what is actually paid. Accruals to increase the reserve are  
10 expensed and actual claims are charged against the reserve balance when paid. The  
11 following example shows journal entries that the Company records when it accrues for  
12 legal expense and then subsequently pays for legal expense:

13 **Accrual**

14 Debit (DR) Legal Services Expense

15 Credit (CR) Law Expense Accrual Reserve

16 **Payment**

17 DR Law Expense Accrual Reserve

18 CR Accounts Payable (or Cash)

19 Q. Please explain the Staff's proposed adjustment S-13.3 to legal fees.

20 A. During the third sharing period, July 1, 2000 through June 30, 2001, of the  
21 second EARP, the Company accrued, for Missouri electric operations, approximately  
22 \*\* \*\* of legal fees; however, the Company actually paid only \*\* \*\*  
23 for legal fees during the same period. The difference between the accrued legal fees and

Direct Testimony of  
John P. Cassidy

1 the actual paid legal fees resulted in an excess accrual of \*\* \*\* for the  
2 Company's Missouri electric operations, relating to legal fees. The Staff proposes to  
3 remove the \*\* \*\* of excess accrual over actual cash payments, in order to treat  
4 legal fees using a cash basis approach.

5 Q. Why does the Staff recommend a cash approach for the Company's legal  
6 fees?

7 A. The Staff recommends using a cash approach to account for the  
8 Company's legal fees in order to eliminate the impact of the excess accrual, which has  
9 resulted during the sharing period. The cash approach will provide a determination of  
10 credits based on actual known and measurable costs during the sharing period as opposed  
11 to the Company's accrual basis, which relies upon an estimate of what actual future  
12 payments and costs will be. The Staff's adjustment is reasonable because it allows the  
13 Company recovery of its actual legal fees payments during the third sharing period of the  
14 second EARP.

15 Q. What is the Staff's justification for proposing this adjustment?

16 A. The Staff asserts that sections 7.f.vi, 7.f.vii, 7.f.viii and the Reconciliation  
17 Procedure, Attachment C, Section 2.g from the Stipulation And Agreement in Case  
18 No. EM-96-149, as previously quoted in this direct testimony are applicable to the  
19 Company's accrued legal fees. The Staff believes that the difference between accrued  
20 legal fees and actual legal fees payments is excessive and also represents a significant  
21 variation in expense with no reasonable explanation. The Staff also believes that  
22 significantly accruing expense at a higher level than the actual cash payments incurred  
23 represents a reduction in amounts to be shared with customers by the Company and,

1 therefore, reflects a manipulation of earnings results as covered in the Stipulation And  
2 Agreement. Finally, the Staff is unaware of any prior rate case proceeding, involving  
3 AmerenUE, where legal expense accruals were at issue and where Commission precedent  
4 exists.

5 **ENVIRONMENTAL EXPENSE**

6 Q. Please explain how the Company accounts for environmental expense.

7 A. Using an accrual basis of accounting, the Company maintains a reserve of  
8 accumulated funds which are set aside to pay for environmental costs related to the clean-  
9 up of contaminated sites. The Company charges major expenditures against the reserve.  
10 Small expenditures are charged directly to expense, to eliminate the constant adjustment  
11 of the reserve amount. The following example demonstrates journal entries that the  
12 Company records when accruing and then subsequently paying for environmental  
13 expense:

14 **Set up of Reserve**

15 DR Administrative & General Expenses – Miscellaneous

16 CR Reserve for Clean-up of Contaminated Facilities

17 **Payment**

18 DR Reserve for Clean-up of Contaminated Facilities

19 CR Accounts Payable

20 Q. In the past, how has the Company accounted for its environmental  
21 expenses?

22 A. The Staff has examined accruals, the charges made against the reserve,  
23 non-labor cash payments charged to expense and the total accrued reserve balance for

Direct Testimony of  
John P. Cassidy

1 environmental expenditures for the twelve month periods ending June 30, 1993 through  
2 June 30, 2001. The following chart summarizes these items:

3 \*\*

4

5

6

7

8

9

10

11

12

13

14

15

16

\*\*

17 This chart shows that by the end of the third sharing period of the second EARP the  
18 Company had a cumulative accrued reserve balance of \*\* \*\*. Subtracting  
19 actual expenses from the accrued reserve balance reveals that the Company has amassed  
20 an over-accrued environmental reserve balance totaling \*\*

21

\*\*, through the end of the third

22

sharing period of the second EARP. This \*\* \*\* over-accrued reserve balance

23

represents the amount the Company believes it might incur at some undetermined time in

24

the future.

25

Q. Please explain the Staff's adjustment S-13.4 to Company's environmental  
26 expense.

27

A. During the third sharing period of the second EARP, the Company

28

accrued \*\* \*\* for environmental expenses; however, the Company only

Direct Testimony of  
John P. Cassidy

1 incurred actual non-labor-related environmental expense totaling \*\* \*\*. The  
2 difference between the accrued environmental expense and the actual paid environmental  
3 expense resulted in an excess accrual of \*\* \*\* for the Company's Missouri  
4 electric operations, relating to legal fees. Staff Adjustment S-13.4 proposes to remove  
5 the \*\* \*\* of excess environmental accruals over and above the actual  
6 environmental payments, in order to treat environmental expense using a cash basis  
7 approach.

8 Q. Why does the Staff recommend a cash approach for the Company's  
9 environmental expenses?

10 A. The Staff recommends using a cash basis approach to account for the  
11 Company's environmental expenses in order to eliminate the impact of the  
12 \*\* \*\* of excess accrual on customer credits. Since 1992, the Company has  
13 never actually incurred a level of expense to justify the level of accruals that it has  
14 booked. The cash approach proposed by the Staff will provide a determination of credits  
15 based on actual known and measurable costs during the sharing period as opposed to the  
16 Company's accrual basis, which relies upon an estimate of what actual future payments  
17 and costs will be. Additionally, the Staff contends that even after making this adjustment  
18 to the third sharing period of the second EARP, the Company will still have an over-  
19 accrued reserve balance in excess of \*\* \*\* to pay for any large future electric  
20 environmental costs. The Staff believes that an approximate \*\* \*\* reserve for  
21 environmental costs is sufficient at this point in time and that the additional  
22 \*\* \*\* of excess accrual made during the third sharing period of the second  
23 EARP should be eliminated.

Direct Testimony of  
John P. Cassidy

1 Q. What explanation has the Company provided for its environmental  
2 accruals and why is this explanation unreasonable?

3 A. The Company has indicated that it needs to make accruals now for future  
4 environmental costs. In the response to Staff Data Request No. 32 (from Case  
5 No. EC-2002-1 also involving AmerenUE), the Company stated that:

6 The (environmental) reserve is not booked by individual site, but  
7 within the minimum and maximum liability, as required by  
8 Statement of Financial Accounting Standard No. 5 and Financial  
9 Accounting Standards Board Interpretation No. 14. Ameren  
10 periodically evaluates the minimum and maximum environmental  
11 liability and adjusts the reserve accordingly. The amount recorded  
12 as a liability is not dependent upon when cash will be required to  
13 settle such obligations.

14 For purposes of calculating sharing credits, the Staff believes this is unreasonable  
15 because the actual timing and the amount of these expenditures are largely unknown.

16 Q. What is the Staff's justification for proposing this adjustment?

17 A. The Staff cites sections 7.f.vi, 7.f.vii, 7.f.viii and the Reconciliation  
18 Procedure, Attachment C, Section 2.g from the Stipulation And Agreement in Case  
19 No. EM-96-149, as previously quoted in this direct testimony, as applicable to the  
20 Company's accrued environmental expense. The Staff believes that the difference  
21 between accrued environmental expense and actual environmental expense is excessive  
22 and also represents a significant variation in expense with no reasonable explanation.  
23 The Staff also believes that accruing expense at a higher level than the actual payments  
24 incurred represents a reduction in amounts to be shared with customers by the Company  
25 and therefore reflects a manipulation of earnings results as covered in the Stipulation And  
26 Agreement. Finally, the Staff is unaware of any prior rate case proceeding, involving  
27 UE, where environmental expense accruals were at issue.

Direct Testimony of  
John P. Cassidy

1 Q. Does this conclude your direct testimony?

2 A. Yes, it does.

**BEFORE THE PUBLIC SERVICE COMMISSION**
