Proposed Rescission of Chapter 29 rules

Chapter 29 rules identify requirements associated with wholesale arrangements used for traffic transmitted on the LEC-to-LEC network. The rules have remained unchanged since becoming effective on July 30, 2005. This rulemaking proposes to rescind these rules.

Conceptually the rules may be unnecessary since wholesale matters are typically addressed in interconnection agreements, tariffs, contracts and other arrangements. Consequently rescinding these rules may be a reasonable course of action consistent with the directives contained in Executive Order 17-03 to remove outdated and unnecessary rules.
