

Charisse Black, CHESTERFIELD, MO.

As a resident in St. Louis county I am extremely concerned regarding the threat of terminating the pipeline. The gas which is provided by this pipeline is critical to the wellbeing of this community, especially during the harsh winter months. Please THOROUGHLY review any concerns submitted by the environmental agency to ensure that this is not politically motivated and truly does identify a valid safety concern. I am not aware of the threats which are included in the suit filed against the pipeline, but DO know that this pipeline enables Spire to provide consistent, clean energy to this region which is critical to supporting those who live and work here. Please consider "re-approving" the pipeline operation as it seems to be providing what is needed with no negative effects.
