Dear Honorable Chairman and Commissioners:

After recently becoming aware of the negative impact the rate case filed by Noranda Aluminum would have on Lincoln University, I have no choice but to write in opposition of this rate case.

With an exclusive rate well below the cost of service and 60 percent below rates paid by the average Ameren Missouri customer, Noranda Aluminum's request for an additional 25 percent rate reduction goes too far. This reduction would shift costs in the amount of \$500 million over 10 years to other Ameren customers, including \$153,000 to Lincoln University.

Furthermore, I also understand that Noranda Aluminum has recently released reports of their profits to Wall Street investors and the ability to pay dividends to shareholders.

With all this in mind, I urge the PSC to consider dismissing Noranda's rate case that would only burden other electric companies, including Lincoln University.

Thank you for your time and attention to this matter.

Sincerely,

Kevin D. Rome, Ph.D.  
President
