Public Comment received from Karen Custard, Jefferson City, MO:

Regarding (4) Solar Rebate, I feel the commission should consider changing the solar electric system operational date from Dec 31, 2009 to Jan 1, 2009. The retail account holders who install solar electric systems this year won't be eligible for the rebate. Secondly, account holders will put off getting solar electric systems so they can get the rebate, which would hinder what Missouri is trying to accomplish: going "green", creating/saving jobs, jumpstarting the economy.
