Subject: Missouri Energy Efficiency Investment Act

Dear Mr. Gunn,

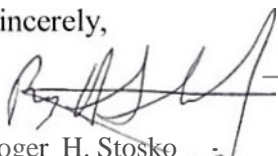

I'm writing to you regarding the MEEIA and the pending approval by the Missouri Public Service Commission before the new three year plan can be implemented. Crescent Electric Supply Company is requesting your support to expedite the approval process.

Our St. Louis facility took advantage of the previous programs by installing energy efficient solutions for their customers that greatly reduced energy consumption and operating costs. This allowed commercial end-users to put the savings to work by reinvesting back in their businesses.

When funding was abruptly cut off last September it caused the immediate shutdown of many projects. The incentives offered by Ameren Missouri to invest in energy efficient upgrades are an important part of the payback calculation end-users consider when making the purchase decision.

The economy is still not fully recovered from the recent recession. Businesses still need incentives to spend scarce revenue on capital improvement activities like energy efficient upgrades. We at Crescent Electric are strong supporters of sustainability initiatives and request your prompt approval of the new MEEIA.

Sincerely,

Roger H. Stosko
Director, Energy Systems & Solutions
