***August 31, 2009***

Southern Star is providing an update to the System Notice made on August 4, 2009 (Posting ID #2891). This update will become effective gas day September 1, 2009. Southern Star requests that shippers adhere to the criteria below:

- Firm Storage Injections will be limited to MDIQ and Firm Storage Injection AOS will not be allowed. MDIQ overruns will be allowed on any non-physical injection and transfer of gas currently in storage.
- Storage customers should ensure that their MSQ is at or below 100%.
- ISS injections remain unavailable.
- Incremental Parks will not be available.
- Loans and existing park withdrawals will be available.
- If customers do not adhere to the request, Southern Star could issue an OFO on short notice.
- Gas due SSC will be available on a limited basis. Please contact your SSC representative to schedule your payback plan.

These restrictions are expected to remain in effect until Sunday, November 1, 2009 at 9:00 AM. Southern Star will review and provide updates on the status of its system for the period of this posting. If you have any questions regarding this notice, please contact one of the Customer Service Representatives listed below.
