OF THE STATE OF MISSOURI

In the Matter of	)	
the Resource Plan of	)	File No. EO-2018-0269
KCP&L Greater Missouri Operations Company	)	

**APPLICATION TO INTERVENE OF SIERRA CLUB**

Comes now Sierra Club, and pursuant to 4 CSR 240-2.075, applies to intervene herein. In support of its motion to intervene, Sierra Club states the following.

1. Sierra Club is a nonprofit organization organized and existing under the nonprofit corporation laws of the state of California. Sierra Club has more than 600,000 members nationally and over 12,000 members in Missouri, many of whom reside in GMO's service territory and are GMO ratepayers. The Missouri Chapter of Sierra Club has an office at 7164 Manchester, St. Louis, MO 63143; email [john.hickey@sierraclub.org](mailto:john.hickey@sierraclub.org); telephone 314-644-1011. Sierra Club exists for the purpose of preserving and protecting environmental values. Consistent with this mission, Sierra Club for many years has advocated for transitioning the electricity sector from coal-fired generation to cleaner and lower cost forms of energy, such as energy efficiency and renewable energy sources. Sierra Club's interest in protecting and enhancing the quality of ambient air and water throughout the state will be favorably affected if GMO aggressively pursues renewable energy, energy efficiency, and demand response programs that displace fossil fuel generation. Sierra Club is concerned with emissions of greenhouse gases that lead to global warming, and with pollution from non-renewable

sources that cause a host of health problems including asthma, mercury poisoning, sudden infant death syndrome, respiratory problems, and other problems.

2. Sierra Club was a party to GMO's 2013 and 2014 IRP updates, 2015 IRP case EO-2015-0252 and GMO MEEIA and rate cases.

3. Sierra Club's interest in promoting cleaner and lower cost forms of energy is different from those of the general public and could be adversely affected by an order approving prolonged reliance on aging coal plants, inadequate levels of DSM programs, and continued discouragement of renewable generation. Moreover, Sierra Club's staff and consultants have unique and extensive experience in analyzing the feasibility and cost-effectiveness of coal and its alternatives. Sierra Club's intervention would serve the public interest in prudent resource planning, public health, and the curtailment of greenhouse gas emissions.

4. Sierra Club is not yet certain of the position it will take in this case.

5. It will serve the public interest for the PSC to grant this application to intervene.

WHEREFORE, Sierra Club respectfully requests the Public Service Commission to grant the application to intervene.
