Exhibit No.: 023

Issues: Synergy and Costs to Achieve

allocations;

Post-Merger allocations

Witness: Tim M. Rush

Type of Exhibit: Supplemental Direct Testimony
Sponsoring Party: Great Plains Energy Incorporated and

Kansas City Power & Light Company

Case No.: EM-2007-0374

Date Testimony Prepared: August 8, 2007

MISSOURI PUBLIC SERVICE COMMISSION

CASE NO.: EM-2007-0374

SUPPLEMENTAL DIRECT TESTIMONY PURSUANT TO THE SCHEDULING ORDER

OF

TIM M. RUSH

ON BEHALF OF

GREAT PLAINS ENERGY INCORPORATED

AND

KANSAS CITY POWER & LIGHT COMPANY

Kansas City, Missouri August 2007

Case No(s). Fro 2007-0314

Date 10208 Rptr 45

SUPPLEMENTAL DIRECT TESTIMONY

PURSUANT TO THE SCHEDULING ORDER

OF

TIM M. RUSH

Case No. EM-2007-0374

1	Q:	Please state your name and business address.
2	A:	My name is Tim M. Rush. My business address is 1201 Walnut, Kansas City, Missouri
3		64106.
4	Q:	By whom and in what capacity are you employed?
5	A:	I am employed by Kansas City Power & Light Company ("KCPL") as Director,
6		Regulatory Affairs, a position I have held since 2001. KCPL is a wholly-owned
7		subsidiary of Great Plains Energy Incorporated ("Great Plains Energy"). KCPL and Great
8		Plains Energy are referred to collectively as the "Company" in this testimony.
9	Q:	What are your responsibilities?
10	A:	My general responsibilities include overseeing the preparation of KCPL's rate cases,
11		class cost of service and rate design. I am also responsible for overseeing the regulatory
12		reporting and general activities specific to the state of Missouri and the Missouri Public
13		Service Commission ("MPSC").
14	Q:	Please describe your education, experience and employment history.
15	A:	In addition to public schools, I received a Master's Degree in Business Administration
16		from Northwest Missouri State University in Maryville, Missouri. I did my
17		undergraduate study at both the University of Kansas in Lawrence and the University of
18		Missouri in Columbia. I received a Bachelor of Science Degree in Business

1		Administration with a concentration in Accounting from the University of Missouri in
2		Columbia.
3		I was hired by KCPL in 2001. Prior to my employment with KCPL, I was employed by
4		St. Joseph Light & Power Company ("Light & Power") for over 24 years. At Light &
5		Power, I was Manager of Customer Operations from 1996 to 2001, where I had
6		responsibility for the regulatory area, as well as customer services, which included the
7		call center, collections and marketing areas. Prior to that, I held various positions in the
8		Rates and Market Research Department from 1977 until 1996. I was the manager of that
9		department for fifteen years.
10	Q:	Have you previously testified in a proceeding at the MPSC or before any other
11		utility regulatory agency?
12	A:	Yes, I have testified in numerous proceedings before the MPSC.
13	Q:	What is the purpose of your testimony?
14	A:	I will discuss the approach Great Plains Energy has taken to allocate synergies, transition-
15		related costs and transaction costs from the proposed acquisition of Aquila, Inc.
16		("Aquila") by Great Plains Energy ("the Merger"). I will present how the Company
17		envisions recovery of these costs in the next rate proceedings before the MPSC. I will
18		address from a rate setting point of view, how the overall Merger synergies, transaction
19		and transition-related costs will affect each regulated jurisdiction and the benefits for
20		customers derived from the Merger. I will also discuss the allocation process Great
21		Plains Energy, KCPL and Aquila will utilize post-Merger.
22		Allocation of Synergy Savings, Transition-Related Costs and Transaction Costs

1	Q:	Did you determine the value of the synergies, transition-related costs and
2		transaction costs?
3	A:	No, these values were determined by various integration teams, with the results discussed
4		in the supplemental direct testimony of Company witness Robert Zabors and other
5		Company witnesses. My responsibility was to develop an appropriate method to allocate
6		the synergies, transition-related and transaction costs to the various KCPL and Aquila
7		regulatory jurisdictions and to Aquila's non-regulated operations (referred to in this
8		testimony as "Merchant"). The KCPL regulatory jurisdictions include KCPL-Missouri,
9		KCPL-Kansas and KCPL-wholesale. The Aquila regulatory jurisdictions include Aquila
10		MPS-retail, Aquila MPS-wholesale, Aquila L&P-electric, and Aquila L&P-industrial
11		steam.
12	Q:	What approach did you take to determine the appropriate allocation factors?
13	A:	An allocation team with representatives from Great Plains Energy, KCPL and Aquila
14		determined an allocation factor for each synergy savings based on the most representative
15		cost driver. The allocation team's approach was to keep the allocation factors relatively
16		simple and easily auditable. For example, most of the factors utilize Form 1 statistics.
17	Q:	What do you mean by the term "cost driver"?
18	A:	A cost driver is an activity that causes a cost to be incurred. For example, meter reading
19		costs are driven by the number of meters in the field. Billing costs are driven by the
20		number of bills processed. Other cost drivers may result in the costs being directly
21		assigned to a specific jurisdiction or combination of jurisdictions. For purposes of this
22		testimony the terms "cost driver" and "allocation factor" are used interchangeably.
23	Q:	What cost drivers did the allocation team determine to be most appropriate?

1	A:	The cost drivers/allocation factors shown on Schedule TMR-2 are the most appropriate
2		for the various synergy categories.
3	Q:	Why was a "general allocator" selected for Shared Services non-fuel operating &
4		maintenance expense ("NFOM") synergies?
5	A:	Shared Services activities encompass general corporate overhead, including Accounting,
6		Legal, Executive, etc. Because no single cost driver is appropriate for these activities, a
7		multi-part "general" allocation factor was used. Great Plains Energy and Aquila use a
8		similar general allocator for their overhead allocations, as documented in their respective
9		Cost Allocation Manuals ("CAM"). The allocation team decided on a three-part general
10		allocation factor, including net plant, retail revenue and payroll costs.
11	Q:	Was a general allocator used for other categories of synergies?
12	A:	No, the general allocator was not used for any of the other synergy categories, except for
13		the synergy attributable to the sale of Aquila's current corporate headquarters at 20 West
14		9 th Street, as the other categories have identifiable cost drivers. For example, delivery and
15		customer service costs are directly influenced by the number of customers or meters.
16		Supply costs, on the other hand, are directly influenced by output levels, such as mega-
17		watt hours generated and/or purchased.
18	Q:	Why are Supply Chain synergies allocated based on expenditures, i.e. spend?
19	A:	As more fully discussed in the supplemental direct testimony of Company witnesses
20		Robert Zabors, Wallace Buran and others, the integration of the two companies will lead
21		to procurement savings from economies of scale and improved logistics.

1	Q:	Once the appropriate cost drivers/allocation factors were identified, how were the
2		synergies allocated among the various regulatory jurisdictions and the Merchant
3		operation?
4	A:	We used a two-step approach. For the first step, each synergy item was allocated among
5		KCPL, Aquila-MPS, Aquila-L&P and Aquila-Merchant, based on the applicable
6		allocation factor and the associated statistical data. In many cases, only certain of these
7		entities were affected, as shown on Schedule TMR-2 (the "Allocated to" column). The
8		second step involved further allocation of the synergies identified in step one to KCPL's
9		three regulatory jurisdictions, Aquila- MPS's two regulatory jurisdictions, and Aquila-
10		L&P's two regulatory jurisdictions, as applicable. The result of this two-step allocation
11		process is presented on Schedule TMR-1.
12	Q:	How were KCPL's synergies allocated among its Missouri, Kansas and wholesale
13		regulatory jurisdictions?
14	A:	The KCPL synergies identified in step one were allocated to its jurisdictions based on
15		allocation percentages established in KCPL's recent rate case, for cost drivers that were
16		the same as or similar to the cost drivers used in step one. For example, KCPL's Shared
17		Services synergies were allocated to KCPL's three regulatory jurisdictions based on a
18		general allocator identical to the three factors utilized to allocate total Shared Services
19		synergies in step one.
20	Q:	How were Aquila-MPS's synergies allocated between its retail and wholesale
21		jurisdictions?
22	A:	The Aquila-MPS synergies identified in step one were allocated based on a 99.46%
23		retail/0.54% wholesale allocation, consistent with Aquila's recent rate case.

1	Q:	How were Aquila-L&P's synergies allocated between its electric and industrial
2		steam regulatory jurisdictions?
3	A:	Aquila-L&P's synergy savings identified in step one were allocated based on various
4		allocators established in the 2007 Aquila rate case, including the Administrative &
5		General allocator, the Operations & Maintenance ("O&M") allocator, and the coal burn
6		allocator.
7	Q:	How were transition-related and transaction costs allocated?
8	A:	As shown on Schedule TMR-1, both transition and transaction-related costs to achieve
9		were allocated in direct proportion to the synergies allocation discussed above.
10	Q:	Why was this approach taken?
11	A:	As discussed earlier in my testimony, the primary purpose of incurring these costs is to
12		ensure the Merger is completed, synergies are achieved and the Merger process is
13		effective. Therefore, it is appropriate to allocate these costs in a manner similar to the
14		synergies.
15	Q.	How are the synergies, transaction costs and transition-related costs proposed to be
16		allocated to the jurisdictions?
17	A.	We are requesting authority from this Commission to establish a regulatory asset account
18		on the books of KCPL and Aquila for both the transition-related and transaction costs and
19		to allow those costs to be amortized over a five-year period beginning at the time of the
20		completion of the Merger. This is more fully described in the testimony of Terry
21		Bassham.

1		We are proposing for the purposes of setting rates, that the Commission allow the merged
2		companies to retain fifty percent (50%) of the net synergies (synergies and transition-
3		related costs) and recover 100% of the transaction costs over the same five-year period.
4		As has been presented in the testimony of Robert Zabors, William Kemp, and other
5		witnesses, it is anticipated that additional synergies will be accomplished and customers
6		will be able to retain 100% of those benefits. Additionally, customers will receive 100%
7		of the benefits from the Merger after the fifth year, i.e., after 2012.
8	Q:	Your allocation procedure addresses all jurisdictions served by both KCPL and
9		Aquila. Do the results of the overall allocation result in a detriment to any
10		jurisdiction?
11	A:	No. As will be discussed later in this testimony, each jurisdiction enjoys a reduced cost
12		from the Merger as a result of the overall allocations of synergies, transition-related costs
13		and transaction costs. The overall benefits from the Merger, once the transition-related
14		and transaction costs are recovered will result in even more benefits for customers in all
15		of the jurisdictions served by the merged organization.
16	Q:	Should this be the only measure of detriment or benefit to customers in the various
17		jurisdictions that will be served after the Merger?
18	A:	No. Many other elements constitute a review of whether the Merger is a benefit or
19		detriment to customers. A long-term view of the overall Merger is necessary to fully
20		understand the future benefits of the combined organization.
21	Q:	Please summarize the results of the synergy allocation.
22	A:	Schedule TMR-1 shows the overall allocation of synergies to each jurisdiction, including
23		Aguila Merchant and both KCPL and Aguila MPS wholesale. The allocation

1		demonstrates that each jurisdiction will receive a benefit from the merged organization
2		because the synergy benefits filter to those jurisdictions as a result of the allocation
3		process.
4		Post-Merger Allocation Process
5	Q:	Has KCPL determined the allocation process it will utilize for services provided by
6		KCPL to Aquila and its business units after the Merger is complete?
7	A:	KCPL has not specifically determined the process that will be utilized. However, KCPL
8		anticipates the process will be similar to the current allocation processes employed by
9		KCPL/Great Plains Energy and Aquila, respectively.
10	Q:	When will KCPL finalize the post-Merger allocation process?
11	A;	KCPL will finalize this process prior to consummation of the Merger.
12	Q:	Has KCPL/Great Plains Energy and Aquila each fully documented their existing
13		allocation processes and communicated accordingly with the MPSC?
14	A:	Yes, each company has annually updated its respective CAM and filed the updates with
15		the MPSC in accordance with 4 CSR § 240-20.015.
16	Q:	Has the MPSC or the Staff of the MPSC communicated any issues or concerns with
17		KCPL or Aquila regarding their CAMs?
18	A:	No, not to the best of my knowledge.
19	Q:	Has KCPL/Great Plains Energy and Aquila estimated the effect of the post-Merger
20		allocation process?
21	A:	Yes, the estimated effect of the post-Merger allocation process on the various regulatory
22		jurisdictions is shown on Schedule TMR-3. This is a high-level estimate that may vary
23		from actual results once the specific post-Merger allocation process is formalized

1	Q:	Does this analysis take into consideration all cost of service components?
2	A:	No, the analysis focuses on two of the more significant components, NFOM and plant-in
3		service.
4	Q:	Does this estimate take into consideration the synergy and costs to achieve effects
5		discussed earlier in this testimony?
6	A:	Yes, the synergies and costs to achieve included on Schedule TMR-1 are included on
7		Schedule TMR-3, by dividing the 5-year totals on Schedule TMR-1 by five to derive an
8		annual effect.
9	Q:	Please discuss the results of the estimate.
10	A:	As shown on Schedule TMR-3, each of the jurisdictions receives a net benefit from the
11		proposed regulatory plan during the first five (5) years after the Merger transaction.
12		Additionally, beyond the first 5 years, saving will continue to accrue to customers from
13		these synergies, as well as other benefits that will occur from the overall organization.
14	Q:	Does that conclude your testimony?
15	Δ٠	Ves it does

BEFORE THE PUBLIC SERVICE COMMISSION OF THE STATE OF MISSOURI

In the Matter of the Joint Application of Great Plains Energy Incorporated, Kansas City Power & Light Company, and Aquila, Inc. for Approval of the Merger of Aquila, Inc. with a Subsidiary of Great Plains Energy Incorporated and for Other Requester Relief
AFFIDAVIT OF TIM M. RUSH
STATE OF MISSOURI)) ss COUNTY OF JACKSON)
Tim M. Rush, being first duly sworn on his oath, states:
1. My name is Tim M. Rush. I work in Kansas City, Missouri, and I am employed
by Kansas City Power & Light Company as Director, Regulatory Affairs.
2. Attached hereto and made a part hereof for all purposes is my Supplemental
Direct Testimony on behalf of Great Plains Energy Incorporated and Kansas City Power & Light
Company consisting of <u>nine</u> (9) pages, having been prepared in written form for
introduction into evidence in the above-captioned docket.
3. I have knowledge of the matters set forth therein. I hereby swear and affirm that
my answers contained in the attached testimony to the questions therein propounded, including
any attachments thereto, are true and accurate to the best of my knowledge, information and
belief.
Tim M. Rush
Subscribed and sworn before me this 8 day of August 2007.
My commission expires: Fib 4.201\ Notary Public "NOTARY SEAL" Nicole A. Wehry, Notary Public Jackson County, State of Missouri My Commission Expires 2/4/2011 Commission Number 07391200
