## Cingular Coverage Viewer

The Cingular Wireless network has the largest digital voice and data coverage in America. Enter your location to see coverage in your area. You can zoom in and re-center the map by clicking on it.

### Address

### Coverage Legend

Coverage last updated on: March 31, 2007. Map depicts an approximation of coverage.

### Important Information About the Coverage Map

Map may include areas served by unaffiliated carriers, and may depict their licensed area rather than an approximation of the coverage there. Actual coverage area may differ substantially from map graphics, and coverage may be affected by such things as terrain, weather, foliage, buildings and other construction, signal strength, customer equipment and other factors. Cingular does not guarantee coverage. Charges will be based on the location of the site receiving and transmitting the call, not the location of the subscriber.

## Local Phone Service

NuVox will change the way you look at local calling.

*When choosing a communications provider, your business is looking for more than local service. We know that. But local call quality is critical. At NuVox, we'll make sure every call is crisp and clear.*

*With NuVox local service, local gets bigger. In each of our markets, we've extended what is traditionally considered local. So more of your calls are "local" and not long distance calls.*

NuVox provides a complete and affordable selection of voice services to meet the needs of your business:

- Business Line Service with Caller ID, Call Transfer Disconnect, Call Waiting, Hunting, Speed Dialing, Three-Way Calling, and various Call Forwarding features
- Trunk Services for DID, DOD, or two-way analog transmissions
- ISDN PRI with dynamic channel allocation and calling name and number delivery
- Interstate, intrastate, local toll, and 8XX long distance
- International calling with access to over 300 countries worldwide
- Account codes that allow you to track long distance usage
- **Voicemail** with a broad range of messaging features to enhance your business' communications capabilities
- Remote Call Forwarding provides callers with a local number that may be forwarded to your business' location

Make it Better with a Bundle

VoxIP uses Voice Over Internet Protocol (VoIP) technology to expand your broadband solution through the dynamic exchange of voice and Internet. While conventional telecommunications require separate channels for voice and Internet, VoxIP enables the channels on your T1(s) to switch between voice and Internet as your call volume needs dictate.

### FLEXLINX

FLEXlinx offers NuVox customers the ultimate flexibility in a made-to-order bundle. With FLEXlinx, your business selects the local, long distance, and Internet service you need along with a host of enhanced features to capitalize on new business opportunities.

#### What's included with FLEXlinx?

- Any combination of voice and Internet services from six to 240 channels
- Feature-rich local service with large local calling areas
- Affordable long distance with International service and phone cards
- Dedicated Internet access available in 64kbps increments
- Robust web services including web hosting, spam filtering, and email
- Powerful networking services for both voice and data applications
- Dependable equipment installation and administration
- On-demand conferencing services available anytime

#### Why FLEXlinx?

- It's Reliable! Proven technology on our state-of-the-art voice and data network
- It's a Bundle! Truly one-stop shopping...it's all you need in a single package for a single price
- It's Simple! Easy to understand pricing and invoice with no surprises from month-to-month
- It's Flexible! Along with voice and Internet service, you can add enhanced services such as voice mail, managed Internet security, and web conferencing services

FLEXlinx customers enjoy all of the benefits of a bundled package, with the flexibility to precisely meet the needs of your business.

## Fiber Optics

[View Our Fiber Optics Map](#)

### Questions & Answers Regarding Fiber Optics and Sho-Me Technologies, L.L.C.

#### **Q Why is Sho-Me Forming a Limited Liability Company?**

A Missouri state law does not allow a rural electric cooperative to do anything but sell electrical energy. Sho-Me Technologies, L.L.C. has been formed and is regulated by the Missouri Public Service Commission to provide dedicated, point to point, non-switched telecommunication services in the state of Missouri.

#### **Q Why is Sho-Me Installing Fiber Optic Cable?**

A Sho-Me uses 2 GHz microwave to control and operate its power system. The federal government has sold Sho-Me's frequencies to private companies, such as AT&T, who are installing wireless Personal Communication Services. So the federal government has really forced Sho-Me to install fiber.

#### **Q How will the fiber be used?**

A The primary use of the fiber will be to control Sho-Me's electrical system. Any excess capacity and/or fiber will be available to lease. Sho-Me can lease capacity, such as a DS-1, DS-3, OC-3 or dark fiber.

#### **Q Will Sho-Me Make A Lot of Money?**

A No, Sho-Me will not earn any profits. Actually, Sho-Me will be very fortunate to breakeven over the next five years. Any funds generated in excess of expenses will either be reinvested in the system or returned to Sho-Me's owners. Sho-Me's owners can then either invest in their system or return money to cooperative members.

#### **Q With a fiber network in place what other services will be available in the future?**

A Fiber Optics will allow a wide variety of electrical system functions, such as remote meter reading. Through partnerships people living in rural areas will enjoy the same privileges those in the city take for granted.

More More Information...

For more information regarding any aspects of Sho-Me's fiber optic network contact [Terry Arndt](#), [Kevin Hopper](#), [Mark Keeling](#), [Jerry Hartman](#), [Jeff Neas](#) or [John Richards](#).

## Cingular Coverage Viewer

The Cingular Wireless network has the largest digital voice and data coverage in America. Enter your location to see coverage in your area. You can zoom in and re-center the map by clicking on it.

### Address

### Coverage Legend

Coverage last updated on: April 30, 2007. Map depicts an approximation of coverage.

### Important Information About the Coverage Map

Map may include areas served by unaffiliated carriers, and may depict their licensed area rather than an approximation of the coverage there. Actual coverage area may differ substantially from map graphics, and coverage may be affected by such things as terrain, weather, foliage, buildings and other construction, signal strength, customer equipment and other factors. Cingular does not guarantee coverage. Charges will be based on the location of the site receiving and transmitting the call, not the location of the subscriber.

## Power Network Coverage Tool

Sprint gives you the power to know you'll have coverage where it matters. This tool provides high-level estimates of our wireless coverage. Coverage is not available everywhere and varies based on a number of factors. [Learn more.](#)

## COVERAGE MAPS

### Choose a coverage map:

- » National
- » Wide Area
- » Mobile-to-Mobile
- » easyedge<sup>SM</sup> Download Service
- » BlackBerry®
- » TalkTracker®
- » Wireless Modems

\*The map shows an approximation of service coverage. Actual coverage may vary. Service may be interrupted or limited due to weather, terrain, customer equipment, or network limitations. Coverage indoors may also vary. U.S. Cellular does not guarantee coverage. User may incur roaming charges at borders of calling areas.
