Re: In the Matter of the Application of Charter Fiberlink - Missouri, LLC ("Charter")
to Overturn the North American Numbering Plan Administrator's Decision to
Withhold Numbering Resources Related to the Wentzville Exchange

Dear Mr. Dale:

Enclosed is an electronic copy of Charter's Application for Review and Reversal of NANPA Decision (the "Application"). Please file the Application in your usual fashion.

If you have any questions or comments, please call the undersigned.

Sincerely,

Kennard B. Woods
Counsel for Charter Fiberlink - Missouri, LLC

KBW/jh

Enc.

cc: Charter Fiberlink - Missouri, LLC
(with enclosure)

**BEFORE THE PUBLIC SERVICE COMMISSION
OF THE STATE OF MISSOURI**

In the Matter of the Application of Charter Fiberlink-Missouri, LLC to Overturn the North American Numbering Plan Administrator's Decision to Withhold Numbering Resources Related to the Wentzville Exchange	Case No.
--	----------

Application for Review and Reversal of NANPA Decision

Charter Fiberlink-Missouri, LLC ("Charter"), pursuant to 4 CSR 240-2.060, 4 CSR 240-2.080(16), 4 CSR 240-37.040, 47 C.F.R. § 52.15(g)(3)(iv)-(4), and other applicable law, hereby respectfully requests that the Missouri Public Service Commission (the "Commission") overturn the denial by Neustar, Inc. ("Neustar"), the Pooling Administrator for the North American Numbering Plan Administrator ("NANPA"), of Charter's application for a growth numbering resource.

Customers in the Wentzville rate center (also referred to as the Wentzville exchange) subscribe to Metropolitan Calling Area ("MCA") service. NANPA recently denied a request by Charter for a block of MCA-related numbers for the Wentzville rate center. Charter requires the MCA numbers in order to offer and support local telecommunications services in the Wentzville rate center. Charter respectfully requests that the Commission overturn the denial by NANPA of Charter's application for numbering resources, and grant Charter a waiver of the growth code requirements to permit NANPA to approve Charter's application for a new growth block of ten thousand (10,000) numbers, which will be designated as MCA-related, for the Wentzville rate center.

In support of this Application, Charter states as follows:

Charter's Authority to Maintain this Application

1. Charter is a competitive provider of local and interexchange telecommunications services in Missouri. On April 5, 2001, the Commission in Case No. TA-2001-346 granted certificate of service authority to Charter to provide local and interexchange telecommunications services. Charter's certificate of service authority remains valid and is incorporated herein by reference pursuant to 4 CSR 240-2.060(1)(G). Charter is a limited liability company duly created and existing under and by virtue of the laws of the State of Delaware. Charter's principal place of business is located at 12405 Powerscourt Drive, St. Louis, Missouri 63131. Charter is authorized to do business in Missouri, having registered properly with the Missouri Secretary of State, and is in good standing with the Office of the Missouri Secretary of State, pursuant to 4 CSR 240-2.060(1)(C). *See* Attachment 1. The nature of Charter's business is the provision of telecommunications services to residential and business customers.

2. In accordance with 4 CSR 240-2.060(1)(K), Charter states that there are no final unsatisfied judgments or decisions against it in any state or federal agency or court which involve customer service or rates for which action, judgment or decision has occurred within three (3) years of the date of this Application.

3. Pursuant to 4 CSR 240-2.060(1)(L), Charter states that it does not have any overdue annual reports or assessment fees owed to the Missouri Public Service Commission.

Service of Documents in this Proceeding

The MCA Plan and Numbering Resources in Missouri

5. Because of the existence of the MCA plan in the greater St. Louis area,¹ routing protocols must be used by all carriers to identify and distinguish MCA and non-MCA calling. Therefore, Charter is required (as are other providers of telecommunications services) to use segregated, dedicated NXX codes for the provision

¹ The MCA plan in the greater St. Louis area was established to provide local calling to closely situated customers. The plan essentially converts what would normally be an in-state toll call into a local call. This is accomplished by designation of NPA-NXX codes as local calling codes or non-local calling codes in the provider's switches as used within the MCA. Under the MCA plan, the first company to receive a block of numbers from any 10,000 block designates that block as either MCA or non-MCA. All providers thereafter load numbers in that block according to the original designation (MCA or non-MCA). All other blocks assigned thereafter carry the same designation since the NXX for all other blocks is identical to the original block. Otherwise, calls are not properly routed as local or non-local calls. NXX code blocks cannot be mixed (*i.e.*, as between MCA and non-MCA) within a 10,000 block; otherwise, it would be impossible to determine which calls should be billed as local and which calls should be billed as interexchange.

of MCA service. Accordingly, Charter must obtain two (2) separate blocks of numbers in order to offer both MCA and non-MCA service in any affected rate center.

6. The Commission has acknowledged that all local exchange carriers (CLECs and ILECs) must segregate NXX codes in order to distinguish between MCA and non-MCA customers; therefore, each carrier must obtain an MCA NXX code for each rate center in which MCA service is offered. *In the Matter of an Investigation for the Purpose of Clarifying and Determining Certain Aspects Surrounding the Provisioning of Metropolitan Calling Area Service After the Passage and Implementation of the Telecommunications Act of 1996*, Case No. TO-99-483, Report and Order at 28 (September 7, 2000).

7. NANPA, however, does not recognize distinctions between MCA and non-MCA blocks, and, therefore, will not open a new NXX code until all prior blocks are exhausted. The Industry Task Force formed to study MCA service issues articulated the competitive disadvantage that CLECs such as Charter face when attempting to secure an initial or second NXX code from NANPA in order to offer both MCA and non-MCA service:

[I]f a carrier has not used 60%² of the available numbers in an NXX code, the NANPA will not issue another code in the same exchange, as is required to satisfy the dialing requirements for Missouri's MCA service. While the Task Force notes that the 60% utilization standard applies equally to competitors and incumbents, of particular concern is the fact that only competitors are being denied the ability to serve new customers. This is because incumbents already had the required minimum of two NXX codes to serve an exchange when the 60% utilization guideline was established. Plainly stated, competitors are being denied the MCA codes necessary to provide MCA service in competition with incumbents.

² Pursuant to the FCC's number utilization rules, the minimum usage to qualify for a growth code is seventy-five percent (75%). See 47 C.F.R. § 52.15(h). In addition to the minimum usage threshold, applicants for growth codes must also show that their existing codes are within six (6) months of exhaust. *Id.* See below for additional discussion of utilization requirements.

In the Matter of Further Investigation of the Metropolitan Calling Area Service After Passage and Implementation of the Telecommunications Act of 1996, Case No. TO-2001-391, Final Status Report of the Industry Task Force, at 21-22 (January 24, 2002).

8. Therefore, compounding the “two NXX requirement” of the MCA plan is the fact that, to date, Charter has been unable, in the absence of Commission action, to obtain more than one (1) block of numbers in any affected rate center where there is an existing unexhausted number block. Thus, the Commission has granted similar requests by Charter to overturn denials by NANPA of numbering resources.³

NANPA’s Denial of Charter’s Request for Numbering Resources

9. Upon completion of a block search for the Wentzville rate center, Charter determined that there were no MCA number blocks available for that exchange (*i.e.*, all number blocks that have availability are designated as non-MCA).

10. Therefore, on December 11, 2007, and in anticipation of exhaust of the currently assigned MCA code, Charter submitted a block code request to NANPA for a new ten thousand (10,000) number block in the Wentzville rate center. *See* Attachment 2. Additionally, Charter submitted a forecast of one (1) month to exhaust. *See* Attachment 3. Charter’s request was rejected by NANPA, since there are currently non-MCA number blocks available in the Wentzville rate center. *See* Attachment 4.

11. Because, however, non-MCA number blocks cannot be used for MCA calling, Charter would be unable to offer hosted phone numbers in the Wentzville rate center to new customers once the existing MCA block assigned to Charter is exhausted.

³ *See* Commission Case No. LO-2006-0471 and Case No. TO-2005-0062.

Consequently, the only customers Charter can serve are porting customers. This places Charter at a serious competitive disadvantage.

12. Charter is a growing competitive provider in the St. Louis area. Where number blocks for MCA service are not available and number blocks for non-MCA service are available, Charter will not be able to obtain additional MCA number blocks absent a Commission order. As Charter expands its footprint, it will continue to be hampered in its efforts to offer MCA services that other carriers are able to offer.

13. Charter desires to offer its customers the full range of services available from other carriers in this market. Charter is unable to do so without adequate numbering resources. In the instant proceeding, Charter will be unable to offer MCA service to new customers in the Wentzville rate center because it cannot offer any new hosted service in the Wentzville exchange upon the exhaust of Charter's existing assigned MCA code.

14. In order for Charter to obtain other MCA numbers in the Wentzville rate center, Charter must obtain an order from the Commission under 47 C.F.R. § 52.15(g)(3)-(4) that overrules the NANPA decisions.

**Authority and Necessity for Commission Review
of the Denial of Charter's Request**

15. The Federal Communications Commission ("FCC") has granted this Commission authority to review and overturn decisions by NANPA to withhold numbering resources where the carrier has complied with reporting and numbering resource application requirements. 47 C.F.R. § 52.15(g)(3)(iv) and (4). *See also* 4 CSR 240-37.040. The unique circumstances relating to the MCA plan in the greater St. Louis area warrant Commission action in this case.

16. Section 251(e) of the Communications Act of 1934, as amended by the Telecommunications Act of 1996, 47 U.S.C. § 251(e), grants the FCC exclusive jurisdiction over the North American Numbering Plan and related telephone numbering issues. Section 251(e) also authorizes the FCC to delegate to state utility commissions or other entities all or any portion of its jurisdiction. The FCC has delegated to NANPA the responsibility to manage numbering resources, process applications for NXX code assignments and thousand number blocks, and administer NXX code databases. *See* 47 C.F.R. §§ 52.15, 52.20. The FCC's delegation of authority gives NANPA virtually no discretion in determining whether numbers should be granted or withheld from any carrier when standard numbering rules frustrate a local calling regime. *See* 47 C.F.R. § 52.15(g)-(h).

17. The FCC, however, has authorized state commissions to entertain challenges to adverse decisions by NANPA, and to overturn a "decision to withhold numbering resources from the carrier based on its determination that the carrier has demonstrated a verifiable need for numbering resources and has exhausted all other available remedies." 47 C.F.R. § 52.15(g)(4). The FCC has made clear that "[u]nder no circumstances should consumers be precluded from receiving telecommunications services of their choice from providers of their choice for a want of numbering resources." *In the Matter of Numbering Resource Optimization*, Second Report and Order and Second Further Notice of Proposed Rulemaking, CC Docket Nos. 99-200 and 96-98, FCC 00-429, at ¶ 61 (rel. December 29, 2000). The Commission should exercise that jurisdiction here and grant Charter the necessary authority to secure additional MCA number blocks in the Wentzville rate centers.

18. Charter has filed with NANPA the necessary Forecast Report and MTE Calculation showing one (1) month to exhaust for the Wentzville rate center at which time no new customers in the Wentzville exchange will be able to obtain MCA service from Charter. *See* Attachment 3. Additionally, Charter's utilization reports reflect that existing assigned codes for Wentzville are above the seventy-five percent (75%) utilization level.⁴ *See* Attachment 5.

19. 4 CSR 240-37.040 sets forth the process by which the Commission reviews the decisions of NANPA. The documents required by 4 CSR 240-37.040(1)(A) for Commission review have been submitted as Attachments 2, 3, 4 and 5, respectively. Pursuant to 47 C.F.R. § 52.15(g)(3)(iv)-(4), 4 CSR 240-37.040 and other applicable law, Charter complied with reporting and numbering resource requirements and has demonstrated herein a verifiable need for numbering resources and has exhausted all other available remedies designed to conserve numbering resources. Absent the resources requested by Charter, Charter will be unable to provide MCA service in the Wentzville rate center.

20. If the Commission does not overturn or waive NANPA's denial of Charter's request for an MCA number block, consumers will be precluded from receiving MCA service from Charter in the Wentzville rate center. While Charter is able to provide

⁴ NANPA states that any telecommunications carrier requesting a new thousands-block must demonstrate whether or not it has met the utilization threshold and months-to-exhaust ("MTE") requirements for the affected rate center. A national utilization threshold was established by the FCC, which on June 30, 2004 reached its maximum of seventy-five percent (75%) number utilization for a specific rate center area. In addition, each service provider must show that its MTE calculation is less than or equal to six (6) months before it will be permitted more number blocks. All carriers must file a Number Resource Utilization Forecast Report (Form 502) at least twice a year and update as necessary, regardless of whether a service provider is participating in pooling. The Pooling Administrator tracks all numbering resources and manage the donation and assignment of numbering blocks within the pool based on the information obtained on the block request forms and from the mandated forms.

ported service, absent Commission action Charter would be unable to fill service requests for service on a hosted basis (including second lines where a customer ports a primary line).

21. Accordingly, Charter requests the Commission for a waiver of the numbering rules, consistently with the FCC's direction and mandate. The Commission must not allow the unique requirements of the MCA plan in the greater St. Louis area to frustrate competitive provision of telecommunications services.

Request For Relief

For the foregoing reasons, Charter respectfully requests that the Commission overturn the denial by Neustar, Inc., the Pooling Administrator for the North American Numbering Plan Administrator, of Charter's application for numbering resources in the Wentzville rate center, and grant Charter a waiver of the growth code requirements to permit NANPA to approve Charter's application for a new growth block of ten thousand (10,000) numbers, which will be designated as MCA-related, for the Wentzville rate center, and for such other and further relief as may be appropriate.

Respectfully submitted this 18 day of December, 2007.
