

1 Joseph Light and Power during calendar year 2000 (hereinafter I will commonly  
2 refer to the St. Joseph Power and Light electric and steam heat service territory  
3 and operations as merely “SJLP”). Specifically, I was requested to review and  
4 investigate Aquila “corporate overhead” or “common allocable” costs included  
5 within the development of the MPS and SJLP service territories’ electric retail  
6 jurisdictional revenue requirement determination. As a result of the  
7 investigation I have been able to perform to date, I am sponsoring this direct  
8 testimony on behalf of the Missouri Office of the Public Counsel.

9  
10 **Q. PLEASE BRIEFLY STATE WHAT ISSUES OR TOPICS YOU WILL BE**  
11 **ADDRESSING WITHIN YOUR DIRECT TESTIMONY?**

12 A. Within this direct testimony I am sponsoring three adjustments to the historic  
13 test year operating results that I propose be included within the development of  
14 Aquila’s retail electric and steam heat cost of service. Specifically, I am first  
15 proposing that all severance costs recorded during the historic test year be  
16 eliminated for cost of service determination purposes.

17  
18 Second, a portion of executive managements’ time has historically been devoted  
19 to Aquila’s merger and acquisition activities. More recently, with Aquila’s  
20 financial crisis brought about by its non-regulated energy trading business,  
21 Aquila’s executive management has been devoting resources to divesting or  
22 selling numerous business properties. To its credit, the Company has  
23 voluntarily removed the cost of three high level corporate departments for

1           which it does not seek recovery from retail ratepayers. However, I am  
2           proposing an adjustment to eliminate part of the costs of some *additional*  
3           departments which I believe logically must be devoting significant resources  
4           towards Aquila’s effort to downsize its operations.

5  
6           Third, Aquila’s recent employee downsizing has left it with a significant  
7           amount of unused and unneeded space in its corporate headquarters office  
8           which it owns in downtown Kansas City, Missouri. Aquila’s requirements for  
9           office space has historically been driven by its corporate personnel needs –  
10          which in turn has been driven by its growth in its non-regulated and non-utility  
11          business ventures. The collapse of Aquila’s energy trading operations has  
12          resulted in a significant reduction in “corporate” employees. As noted, this  
13          recent downsizing of corporate employees has left Aquila with excess capacity  
14          in its headquarters office located at 20 West 9<sup>th</sup> Street in downtown Kansas  
15          City, Missouri. Accordingly, I am proposing an adjustment to remove from  
16          end-of-test year rate base that portion of the 20 West 9<sup>th</sup> Building not believed  
17          to be used and useful in the provision of utility service. Similarly, I am  
18          proposing to eliminate a portion of the test year recorded expenses associated  
19          with operating and maintaining the 20 West 9<sup>th</sup> Building.

1                    **QUALIFICATIONS**

2            **Q.    BEFORE DISCUSSING IN GREATER DETAIL THE ISSUES YOU**  
3            **BRIEFLY DESCRIBED ABOVE, PLEASE STATE YOUR**  
4            **EDUCATIONAL BACKGROUND?**

5            A.    I graduated from the University of Missouri - Columbia, with a Bachelor of  
6            Science Degree in Business Administration, with an Accounting Major, in 1975.  
7            I hold a Certified Public Accountant Certificate in the State of Missouri. I am a  
8            member of the American Institute of Certified Public Accountants, and the  
9            Missouri Society of Certified Public Accountants.

10  
11           **Q.    PLEASE SUMMARIZE YOUR PROFESSIONAL EXPERIENCE.**

12           A.    Subsequent to graduation from the University of Missouri, I accepted a position  
13           as auditor for the Missouri Public Service Commission. In 1978, I was  
14           promoted to Accounting Manager of the Kansas City Office of the Commission  
15           Staff. In that position, I was responsible for all utility audits performed in the  
16           western third of the State of Missouri. During my service with the Missouri  
17           Public Service Commission, I was involved in the audits of numerous electric,  
18           gas, water and sewer utility companies. Additionally, I was involved in  
19           numerous fuel adjustment clause audits, and played an active part in the  
20           formulation and implementation of accounting staff policies with regard to rate  
21           case audits and accounting issue presentations in Missouri. In 1979, I left the  
22           Missouri Public Service Commission to start my own consulting business.  
23           From 1979 through 1985 I practiced as an independent regulatory utility

1 consultant. In 1985, Dittmer, Brosch and Associates was organized. Dittmer,  
2 Brosch and Associates, Inc. changed its name to Utilitech, Inc in 1992.

3  
4 My professional experience since leaving the Missouri Public Service  
5 Commission has consisted primarily with issues associated with utility rate,  
6 contract and acquisition matters. For the past twenty-four years, I have  
7 appeared on behalf of clients in utility rate proceedings before various federal  
8 and state regulatory agencies. In representing those clients, I performed revenue  
9 requirement studies for electric, gas, water and sewer utilities and testified as an  
10 expert witness on a variety of rate matters. As a consultant, I have filed  
11 testimony on behalf of industrial consumers, consumer groups, the Missouri  
12 Office of the Public Counsel, the Missouri Public Service Commission Staff, the  
13 Indiana Utility Consumer Counselor, the Mississippi Public Service  
14 Commission Staff, the Arizona Corporation Commission Staff, the Arizona  
15 Residential Utility Consumer Office, the Nevada Office of the Consumer  
16 Advocate, the Washington Attorney General's Office, the Hawaii Consumer  
17 Advocate's Staff, the Oklahoma Attorney General's Office, the West Virginia  
18 Public Service Commission Consumer Advocate's Staff, municipalities and the  
19 Federal government before regulatory agencies in the states of Arizona, Alaska,  
20 Michigan, Missouri, Oklahoma, Ohio, Florida, Colorado, Hawaii, Kansas,  
21 Mississippi, New Mexico, Nevada, New York, West Virginia, Washington and  
22 Indiana, as well as the Federal Energy Regulatory Commission.

1     **Q.    HAVE YOU AND OTHER MEMBERS OF YOUR FIRM BEEN**  
2           **INVOLVED IN PREVIOUS MISSOURI PUBLIC SERVICE ELECTRIC**  
3           **RATE CASES?**

4     A.    I and/or other members of the firm have been involved in some capacity in  
5           every Missouri Public Service Company electric rate review for the past twenty-  
6           seven years. This list of cases would encompass participation in rate increase  
7           cases filed by Missouri Public Service as well as involvement in three earnings  
8           investigations/complaint cases wherein rate reductions were negotiated or  
9           ordered. Also, I would note and emphasize that the firm and I were retained as  
10          consultants to the OPC as well as to the Missouri Public Service Commission  
11          (“MPSC”) Staff in several investigations since the early 1990s to specifically  
12          review “corporate overhead” and/or “corporate allocation” issue areas.

13  
14           **ELIMINATION OF TEST YEAR SEVERANCE COSTS**

15     **Q.    PLEASE CONTINUE BY ELABORATING UPON YOUR PROPOSED**  
16           **ADJUSTMENT TO ELIMINATE “SEVERANCE COSTS” RECORDED**  
17           **DURING THE HISTORIC TEST YEAR.**

18     A.    As shown on attached Schedule JRD-1, I am proposing that all severance costs  
19           associated with employee downsizing occurring during the historic 2002 test  
20           year be eliminated from test year cost of service development. Such costs can  
21           generally be viewed as “non-recurring,” and therefore, not representative of cost  
22           levels that will be experienced prospectively during the time that rates being  
23           established within this proceeding will be in effect.

1       **Q.   PLEASE DESCRIBE THE EMPLOYEE DOWNSIZING PROGRAM**  
2       **THAT OCCURRED DURING THE HISTORIC TEST YEAR, THAT IN**  
3       **TURN RESULTED IN THE RECOGNITION OF THE SEVERANCE**  
4       **COSTS THAT YOU ARE PROPOSING TO ELIMINATE.**

5       A.   During 2002 Aquila underwent a significant change. As testified to by Aquila  
6       witness Mr. Keith Stamm, Aquila undertook a “restructuring” plan wherein it  
7       “decentralized” some functions that had for several years been taking place on a  
8       centralized company-wide basis. Under the “decentralization” plan, certain  
9       functions and responsibilities that had been undertaken through a central  
10      corporate function were dispersed and assigned to various state operations.

11  
12      Additionally, the Company went through a significant downsizing caused by its  
13      exit from the non-regulated energy trading business (i.e., Aquila Merchant  
14      Services), as well as the sale of several other domestic and international  
15      business ventures. Both of these events combined to cause a significant  
16      reduction in the number of total company employees as well as for utility-  
17      dedicated employees.

18  
19      As employees were terminated they were given severance packages that were  
20      based upon a combination of their recent salary, age and years of service. Once  
21      the cost of the various, cumulative severance packages were known, Aquila  
22      immediately charged the one-time costs of the packages to expense.

23

1 **Q. WHAT ADJUSTMENTS ARE YOU PROPOSING IN THIS REGARD?**

2 A. For St. Joseph Light and Power electric and steam heat operations, severance  
3 costs of \$646,723 and \$12,509, respectively, were charged to expense. For  
4 Missouri Public Service electric operations, severance costs of \$2,724,609 were  
5 charged to expense. As shown on attached Schedule JRD-1, I am proposing to  
6 eliminate *all* such noted severance costs amounts from test year operating  
7 expense for purposes of cost of service development.

8

9 **Q. HAVE THE PAYROLL COSTS SAVINGS FROM THE DOWNSIZING**  
10 **OF WORKFORCE THAT HAS RESULTED IN THE SEVERANCE**  
11 **PACKAGES BEING OFFERED BEEN REFLECTED BY THE**  
12 **COMPANY WITHIN ITS ADJUSTED TEST YEAR COST OF**  
13 **SERVICE?**

14 A. Yes. The Company is proposing to reflect actual number of employees utilizing  
15 actual wage rates in effect as of September 2003. The reduced workforce, and  
16 related savings, that resulted in the recording of test year severance expense is  
17 reflected within the Company's payroll annualization.

18

19 **Q. IF RATEPAYERS ARE BENEFITING FROM THE WORKFORCE**  
20 **DOWNSIZING OCCURRING DURING THE HISTORIC TEST YEAR,**  
21 **IS IT APPROPRIATE AND EQUITABLE TO ELIMINATE ALL OF**  
22 **THE SEVERANCE COSTS RECORDED DURING THE HISTORIC**  
23 **TEST YEAR?**

1 A. Yes. First and foremost, the majority of the downsizing occurred in mid-2002.  
2 The rates being established in this case will likely go into effect in early June  
3 2004 – or approximately two years following the period when the majority of  
4 layoffs occurred. Accordingly, the Company, or more specifically, its  
5 shareholders, have retained, or will have retained, the savings from such layoffs  
6 for approximately a two year period by the time that rates from this proceeding  
7 go into effect. Therefore, the Company has recouped, or certainly will have  
8 recouped by the time new rates go into effect, through payroll expense savings  
9 the “upfront” severance costs recognized at about the time the layoffs were  
10 occurring during the historic 2002 test year.

11

12 Second, I submit that it is impossible to quantify how many of the layoffs  
13 occurred as a result of the “decentralization” reorganization discussed above  
14 versus the downsizing that has occurred for the Company’s various Enterprise  
15 Support Function (“ESF”) and Intra Business Units (“IBU”) departments  
16 stemming from the Company’s exit from its energy trading and other non-  
17 regulated businesses. Specifically, as this Commission is no doubt aware,  
18 Aquila has exited its unregulated energy trading business – which had been the  
19 Company’s growth engine and significant business focus prior to 2002. Further,  
20 Aquila has recently sold a number of its unregulated domestic businesses as  
21 well as a number of its regulated and unregulated international operations.

22

1 Aquila’s energy trading operations, as well as a number of its domestic  
2 businesses recently sold, had employees working directly and exclusively for  
3 each noted operation. However, a number of activities and functions have been  
4 undertaken for all the Aquila domestic businesses on a corporate-wide basis.  
5 More specifically, many of the Company’s ESF departments and IBU  
6 departments have historically provided “common” or “overhead” functions to  
7 all domestic operations – including remaining regulated utility division,  
8 Aquila’s now-terminated energy trading operations, as well as many of its other  
9 unregulated business operations that have been sold. Thus, prior to 2002, the  
10 ESF and IBU departments had been created and sized to service and facilitate  
11 the business operations of a much larger business entity. With the winding  
12 down of the energy trading operations – which previously had employed  
13 approximately 700 direct employees – and the sale of a number of other  
14 unregulated domestic business operations, it was necessary to downsize the ESF  
15 and IBU departments. Thus, I submit that a significant portion of the employee  
16 terminations undertaken during the historic test year in the ESF and IBU  
17 departments that provided “common” corporate services occurred as a result of  
18 the corporate-wide downsizing that was facilitated by Aquila’s sale of, or exit  
19 from, whole or large portions of its businesses. In other words, I submit that  
20 many of the test year ESF and IBU employee terminations were really the result  
21 of “right sizing” activities that were occurring as Aquila downsized its total  
22 business operations rather than the “restructuring” that occurred as it  
23 “decentralized” corporate functions back to state-based operations.

1  
2  
3  
4  
5  
6  
7  
8  
9  
10  
11  
12  
13  
14  
15  
16  
17  
18  
19  
20  
21  
22  
23

As a result of the termination of hundreds of ESF and IBU department employees, the total pool of corporate overhead payroll has been significantly reduced. However, it should be noted and emphasized that remaining regulated utility divisions – such as MPS and SJLP – are now allocated a significantly larger portion of remaining, ongoing corporate overhead costs. Or in other words, the size of the corporate overhead “pie” of ESF and IBU departments has shrunk as a result of the noted terminations, but the number of “slices” of the pie has also significantly decreased. Thus, it is difficult to conclude whether the size of a “slice” of the remaining “pie” is larger or smaller than a “slice” might be if the total “pie” had remained larger but there were many more “slices” being cut from the “pie.”

In summary on this latter point, I submit that it is not possible to identify terminations that occurred during 2002 related to state-decentralization-restructuring *versus* terminations that occurred as a result of the right-sizing of corporate office functions as it sold or exited from many business operations. However, I do not believe it would be appropriate or equitable to charge retail domestic utility ratepayers for severance costs related to right-sizing the ESF and IBU departments for the smaller Company. Rather, those costs should be viewed as simply additional costs related to selling or exiting a number of Aquila’s business operations. Further, it is neither obvious nor certain that ratepayers have been, or will be, receiving a *net* benefit from terminations

1 occurring as a result of the ESF and IBU department layoffs. For again, under  
2 the corporate overhead allocation processes in place, retail ratepayers are being  
3 assigned a much larger percentage of remaining, ongoing corporate overhead  
4 costs.

5  
6 **Q. IN A PREVIOUS ANSWER YOU STATED THAT SHAREHOLDERS**  
7 **WOULD HAVE RECOUPED UPFRONT SEVERANCE COST**  
8 **RECORDED DURING THE HISTORIC TEST YEAR IN THE FORM OF**  
9 **PAYROLL AND BENEFITS SAVINGS BY THE TIME THAT RATES**  
10 **BEING ESTABLISHED IN THIS PROCEEDING GO INTO EFFECT.**  
11 **HOW WERE THE SEVERANCE PACKAGES DETERMINED, AND**  
12 **FOR WHAT LENGTH OF TIME WERE TERMINATED EMPLOYEES**  
13 **ENTITLED TO DRAW A SALARY AND RECEIVE BENEFITS?**

14 A. The amount of severance pay was based upon each employee's base salary in  
15 effect at the time of the termination, or in other words, the terminated employee  
16 would continue drawing his or her base salary for a period of time following  
17 termination. The length of time that the severance pay was offered was based  
18 upon the number of years the employee had been with the Company, his or her  
19 age, as well as his or her salary. Specifically, each employee was entitled to one  
20 week of pay for each year of service with the Company, one week of pay for  
21 each year the person's age exceeded 40, and one week of pay for each \$10,000  
22 of base annual pay at the time of termination. Thus, a 50-year-old employee

1 who had been working for the Company for 25 years and who was making  
2 \$70,000 would be entitled to 42 weeks of severance pay calculated as follows:

3	25 years of service	yields	25 weeks pay
4	10 years of age over 40	yields	10 weeks pay
5	\$70,000 salary	yields	7 weeks pay
6	Total period of base wages plus benefits:		42 weeks pay

7 I have not observed any estimate of the “average” period of time that all  
8 terminated employees continued to receive their base salary plus benefits.  
9 However, I believe the average severance pay period would be less than one  
10 year, and without a doubt considerably less than the approximate two-year  
11 period between the time the severance costs were largely recognized in mid-  
12 2002 and the time that new rates from this proceeding will go into effect in mid-  
13 2004.

14  
15 **Q. WHY DO YOU BELIEVE THE SEVERANCE COST PAYBACK**  
16 **PERIOD WOULD BE LESS THAN ONE YEAR?**

17 A. Clearly there would be examples of employees who would be able to draw  
18 salary and benefits for over a one-year period. For example, a sixty year old  
19 who had been with the Company for 35 years and who was making \$100,000 a  
20 year would be entitled to 65 weeks of pay and benefits. Further, I would note  
21 that the severance pay formula described above was applicable to “non-  
22 executive” positions. So it is possible that some executive positions may have  
23 gotten a severance package that was more generous than the standard non-

1 executive package described. However, that stated, I am confident there are  
2 many more examples of employees receiving *less than* a year’s worth of salary  
3 and benefit than there are of employees receiving *more than* a year’s worth of  
4 salary and benefits. Thus, in summary on this point, I submit that the “payback”  
5 in payroll and benefits costs was less than one year on the severance costs  
6 incurred and recorded during the historic test year.

7  
8 **ASSIGNMENT OF CORPORATE OVERHEAD COSTS TO**  
9 **DIVESTITURE ACTIVITIES**

10  
11 **Q. IF THAT CONCLUDES YOUR DISCUSSION ON YOUR PROPOSED**  
12 **ADJUSTMENT TO ELIMINATE TEST YEAR SEVERANCE EXPENSE,**  
13 **PLEASE CONTINUE BY DESCRIBING YOUR NEXT PROPOSED**  
14 **ADJUSTMENT TO TEST YEAR OPERATING EXPENSES.**

15 A. I am proposing that half of the cost of a limited number of ESF departments –  
16 beyond those already identified and removed voluntarily by the Company – be  
17 eliminated from the development of Missouri retail jurisdictional cost of  
18 service. Specifically, I am proposing that one-half of the Company-adjusted  
19 level of the following ESF departments’ cost be eliminated from test year cost  
20 of service development:

1	ESF	
2	Department	
3	<u>Number</u>	<u>ESF Department Description</u>
4	4031	General Counsel
5	4040	Chairman & Chief Executive Officer
6	4043	Board of Directors Management
7	4120	External Communications
8	4130	Treasury
9	4131	Records Management
10	4132	Shareholder Relations
11	4183	Corporate Financial Reporting

12

13 During the historic test year and for some time into the future, Aquila’s upper  
14 management will be devoting significant resources to further divesting efforts,  
15 the winding down of discontinued operations (i.e., energy trading), as well as  
16 simply working with creditors to avoid bankruptcy. The current financial crisis  
17 has not been caused by Aquila’s utility operations. Thus, Aquila’s regulated  
18 utility customers should not be required to pay for the extraneous costs being  
19 incurred as a result of Aquila’s efforts in exiting many of its non-regulated  
20 business ventures. Accordingly, I am proposing that one-half of the above-  
21 listed ESF departments’ costs be eliminated from the revenue requirement  
22 development in this case.

23

24 **Q. IN YOUR PREVIOUS ANSWER YOU STATED “I AM PROPOSING**  
25 **THAT HALF OF THE COST OF A LIMITED NUMBER OF ESF**  
26 **DEPARTMENTS – BEYOND THOSE ALREADY IDENTIFIED AND**  
27 **ELIMINATED VOLUNTARILY BY THE COMPANY – BE ELIMINATED**

1           **FROM THE DEVELOPMENT OF MISSOURI RETAIL**  
2           **JURISDICTIONAL COST OF SERVICE.” WHAT ESF DEPARTMENT**  
3           **COSTS HAS AQUILA ALREADY REMOVED FROM TEST YEAR**  
4           **OPERATING EXPENSE?**

5       A.    To its credit, as discussed by Aquila witness Ms. Beverlee Agut, the Company  
6           has removed costs allocated to MPS and SJLP during the test year from the ESF  
7           departments entitled Capital Structure and Analysis – Domestic, Strategic  
8           Planning and Analysis, Chief Executive Officer, Chief Financial Officer and  
9           UED Headquarters President. Two of the departments – Chief Executive  
10          Officer and UED Headquarters President – were removed because the positions  
11          were eliminated during or following the test year. However, the other three  
12          departments were removed because the Company acknowledged their  
13          significant involvement in selling off business units and/or maintaining the  
14          solvency of the Company. While the Company may be commended for  
15          voluntarily removing the cost of certain ESFs deemed to be exclusively or most  
16          significantly involved in the divestiture process, I simply do not believe it has  
17          captured the time and expense of other senior management that must necessarily  
18          be devoting great resources to further divestiture and/or attempting to maintain  
19          the solvency of the Company. Accordingly, the adjustment I discuss above for  
20          additional ESF departments is also appropriate.

21  
22       **Q.    WHAT ARE THE STATED FUNCTIONS OF THE NOTED ESFS**  
23       **WHICH YOU PROPOSED TO ADJUST?**

- 1 A. As set forth with the Company's Cost Allocation Manual, the noted ESF  
 2 departments undertake the following functions.

Dep't. No.	Department Title	Description of Work Process
4031	General Counsel	Overall responsibility for all matters of a legal nature including mergers, acquisitions, joint ventures and divestitures
4040	Executive	Makes Executive decisions for the corporation. Performs services for all divisions as well as overseas operations
4043	Board of Directors Management	Oversees the coordination of issues surrounding the board of directors
4120	External Communications	Department performs communication work for and reviews the communication's work of all operations of the company, including international operations. Responsibilities include media relations, corporate advertising, publications, graphics, corporate identity, presentations, annual meeting, and internal communications.
4130	Treasury	Responsible for permanent financings of the corporation (stock issues, debt issues). Manage cash and all borrowings. Handle the administration of the defined benefit plan and 401Kplan. Maintains a relationship with debt rating agencies. Handle specifically all the financing for any involvement in our overseas operations such as financing for acquisitions, etc. Does not handle any of the 401K activities for our international subsidiaries nor West Kootenay.
4131	Records Management	Three main areas: 1) Responsible for Board meeting and committee minutes and arrangements for Board members. All board member transportation costs including lodging and expenses are booked to this RC. 2) Responsible for corporate records of the company. Record keeper for 120 subsidiaries – makes sure all subsidiaries are in good standing in all states. 3) Corporate record retention. Coordinate all legal activities through Blackwell Sanders

3

1

4132	Shareholder Relations	Communication relationship with analysts on the street that follow UCU. Watch who buys and sells UCU stock. Record keeping for stockholders. Responsible for all dealings with the annual meeting. Deal with the individual smaller shareholders and respond to any issues they may have.
4183	Corporate Financial Reporting	Perform external reporting for consolidated Aquila, Inc. Also includes external audit fees.

2

3 **Q. HOW DID YOU DETERMINE THAT ONE-HALF OF THE ABOVE-**  
4 **LISTED ESF DEPARTMENT COSTS SHOULD BE ELIMINATED**  
5 **FROM COST OF SERVICE DEVELOPMENT?**

6 A. From the description of activities and functions of the noted ESF departments, I  
7 believe it is intuitively obvious that these departments will remain staffed, and  
8 devote significant efforts, to support the continuing exit from, and divestiture of,  
9 non-regulated business operations. I do not believe it is possible to precisely  
10 determine the efforts that each of the noted departments has been, and will be,  
11 devoting to such efforts. Therefore, I have simply used professional judgment  
12 when employing the assumption that 50% of such costs should be assigned to  
13 non-regulated divestiture activities

14

15 **Q. DON'T ESF DEPARTMENT PERSONNEL DIRECTLY ASSIGN THEIR**  
16 **TIME TO DIVESTITURE ACTIVITIES WHEN WORKING ON SUCH**  
17 **SPECIFIC TASKS?**

18 A. Yes. According to the Company's response to OPC-832, the time and efforts  
19 devoted to the sale of *specific* properties is supposed to be assigned to such

1           *activity*. However, the internal payroll and benefits cost associated with  
 2 employees' time assigned to a specific-sale-of-property activity would typically  
 3 be allocated to various business units unless the Company issued a specific  
 4 directive to "retain" such costs at the corporate level or direct assigned such  
 5 costs to the business unit being sold.

6  
 7 It is important to note that during the 2002 historic test year the vast majority of  
 8 each noted ESF departments' cost was not direct-assigned to any business unit.  
 9 Specifically, as evidenced by the table below, the majority of these ESF  
 10 departments' costs were simply allocated to business units and divisions within  
 11 business units utilizing general Massachusetts-formula allocation methods:  
 12

Dep't No.	Department Description	Total 2002 Dep't Costs	Allocable 2002 Dep't Costs	Allocable Costs as % of Total Dep't
4031	General Counsel	4,802,187.25	1,597,271.17	33.26%
4040	Executive	3,027,231.50	2,737,910.34	90.44%
4043	Board of Directors Management	911,775.56	911,775.56	100.00%
4120	External Communications	2,452,339.17	2,450,922.52	99.94%
4130	Finance	6,284,054.60	5,576,814.80	88.75%

1       **Q.     PLEASE SUMMARIZE YOUR TESTIMONY ON THIS ISSUE.**

2       A.     Aquila has voluntarily recognized that three ESF departments will be  
3             significantly involved in the selling and winding down of a number of business  
4             operations, and accordingly, has eliminated costs from such ESF departments  
5             that were allocated to MPS during the historic test year. While this Company  
6             adjustment is a step in the right direction, I believe it does not go far enough.  
7             Accordingly, I am proposing that one-half of the costs of eight additional ESF  
8             departments that remain included within the Company's proposed MPS and  
9             SJLP cost of service also be eliminated from test year operating expense. By  
10            the Company's own admission in testimony, resources will continue to be  
11            devoted to selling properties and remaining solvent. Captive regulated utility  
12            ratepayers should not be required to bear the cost of such activities.  
13            Accordingly, the adjustment discussed above, which is *incremental to* the  
14            Company's proposed adjustment to eliminate three ESF departments' costs,  
15            should be adopted as presented on attached Schedule JRD-2

16

17       **20 West 9<sup>th</sup> Building Costs**

18       **Q.     PLEASE CONTINUE BY DESCRIBING YOUR NEXT ADJUSTMENT.**

19       A.     As shown on attached Schedule JRD-3 and Schedule JRD-4, I am proposing to  
20             eliminate a portion of the cost of Aquila's corporate headquarters building  
21             located at 20 West 9<sup>th</sup> Street in downtown Kansas City, Missouri. The  
22             discontinuation of Aquila's energy trading operations in conjunction with the  
23             sale of many of its unregulated and international business operations has left the

1 Company with significant unused and unneeded excess office space at its  
2 corporate headquarters. Accordingly, I am proposing to eliminate the cost of  
3 “unused” or “excess” office capacity that was allocated to MPS and SJLP  
4 electric operations during the historic test year.

5  
6 As shown on attached Schedule JRD-3, I am proposing to eliminate  
7 approximately 35% of the 20 West 9<sup>th</sup> Building operating costs that were  
8 allocated to MPS and SJLP electric operations during the test year. Further, as  
9 shown on attached Schedule JRD-4, I am similarly proposing to eliminate  
10 approximately 35% of the 20 West 9<sup>th</sup> Building net plant costs that were  
11 allocated to, and included within, MPS’ and SJLP’s electric operations rate  
12 base.

13  
14 **Q. HOW DID YOU ARRIVE AT THE “UNUSED” OR “EXCESS”**  
15 **CAPACITY PERCENTAGE OF APPROXIMATELY 35%?**

16 A. Following a walking tour of the headquarters facility in which I observed  
17 significant areas of space that were not being utilized, I asked the Company in a  
18 data request for the “planned” employee capacity of the 20 West 9<sup>th</sup> Building as  
19 well as the current employee occupancy. In response to OPC Data Request No.  
20 OPC-865 the Company indicated that the building had been designed to  
21 accommodate 847 cubicles (i.e., employee spaces), but that as of October 17,  
22 2003 only 544 employees were working in the building. In other words, in mid-  
23 October 2003 there were 303 unused workstations. I therefore calculated that

1           35.77% of the Company's corporate headquarters was unused (303 unused  
2           workstations divided by 847 total work stations equals 35.77%).

3

4       **Q.    DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?**

5       A.    Yes, it does.
