# Enhanced Daily Process

---

- **New Customer Acquisitions only**
  - **Change in carrier using SBC's switch**
    - UNE-P to UNE-L w/ LNP different CLEC**
    - Resale to UNE-L w/ LNP different CLEC**
    - SBC Retail to UNE-L w/ LNP**
- **Normal Intervals**
- **No daily CLEC LSR limits**
  - **Per end user line limits up to existing "project levels"**
- **FDT Monday – Friday 8:00a.m. – 5:00p.m. excluding holidays**
- **CHC Monday – Friday 8:00a.m. – 5:00p.m. excluding holidays**
- **Loops provisioned over IDLC included**
- **Pre-order IDLC tool**
- **Scheduler**
- **PWS enhancement**
- **Mechanized order flow enhancement**
- **Predefined rates per line**

# Enhanced Daily Process

---

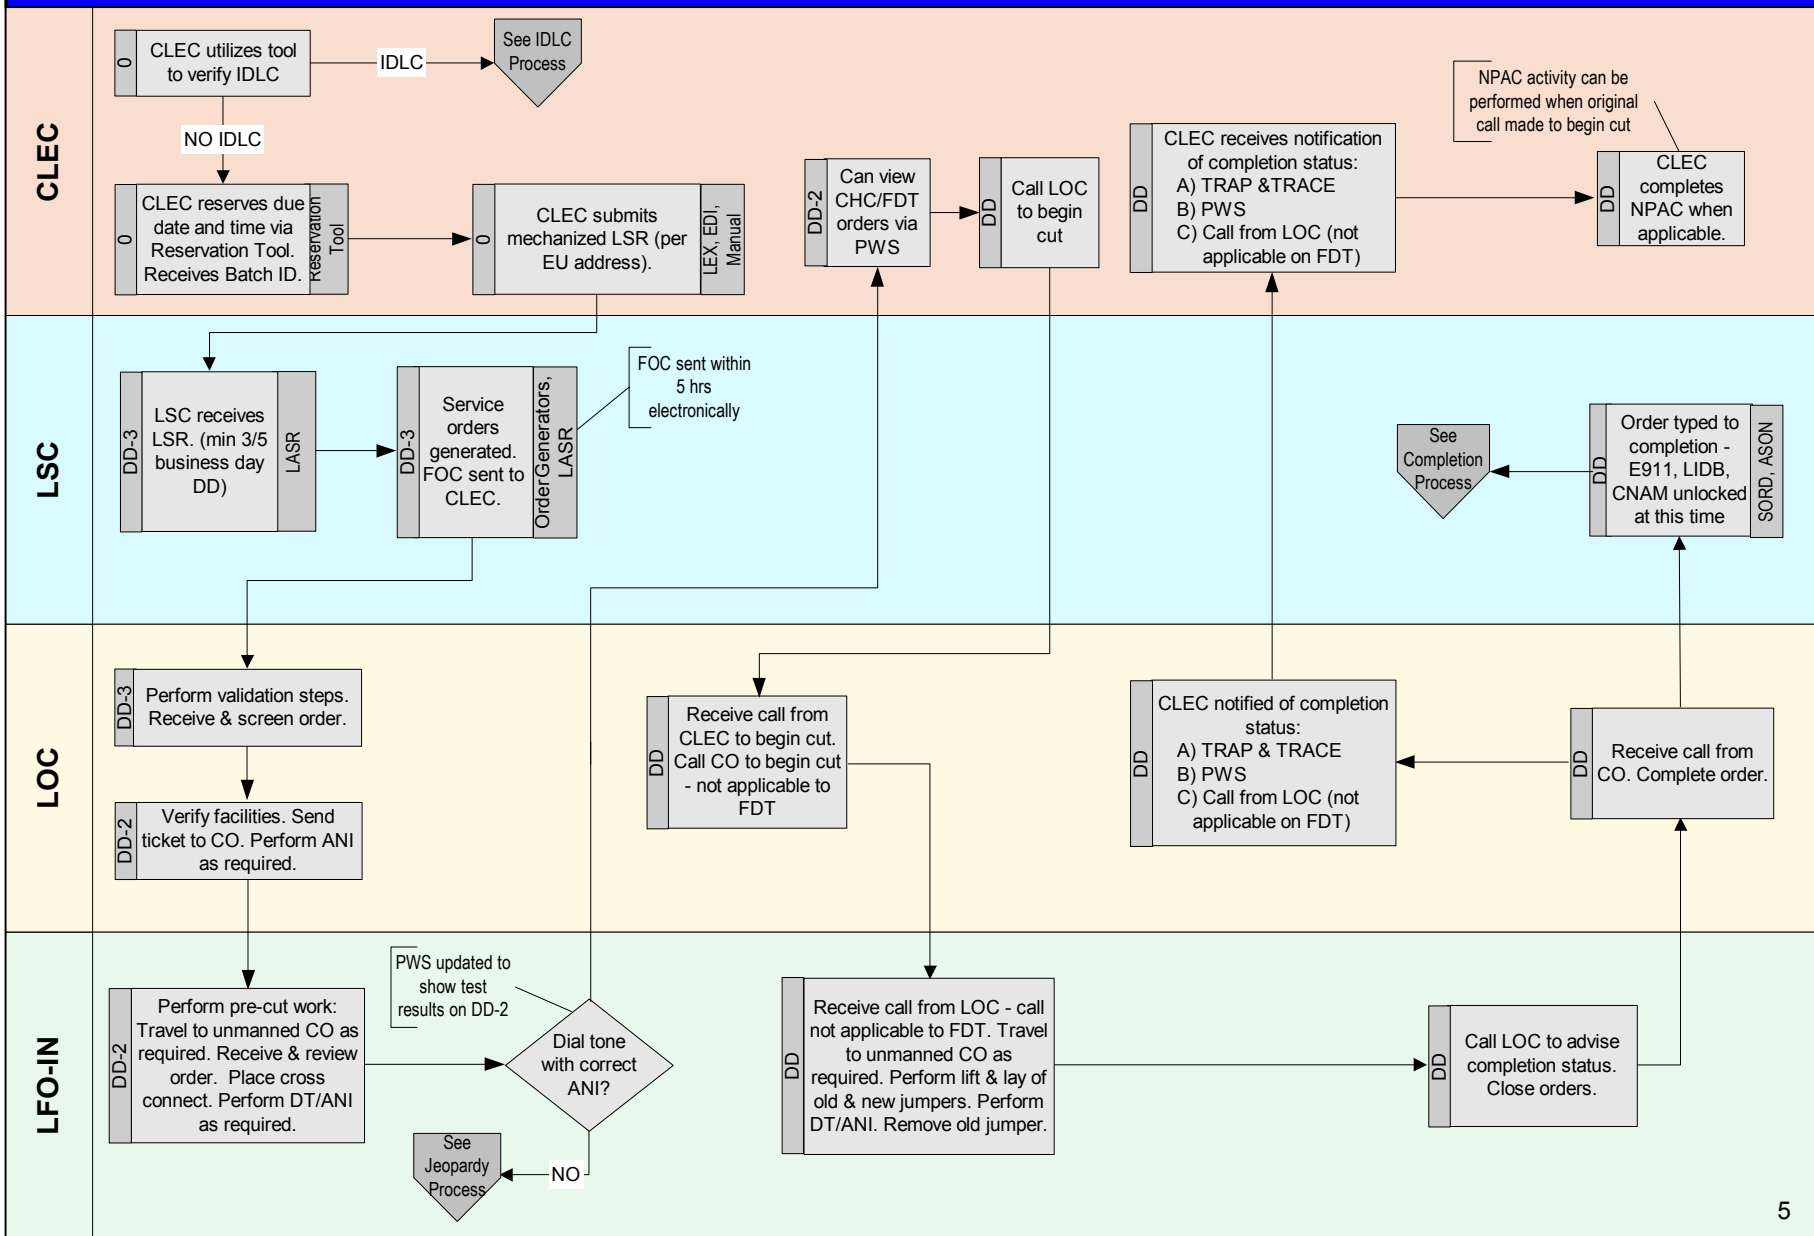

## Current Process

- Established performance measures and work steps
- Existing ordering interfaces
- Exact costs are unknown before order as SBC bills via additional rates.

## Proposed Advantages

- Enhances existing process:
  - Mechanized order flow
  - Reservation Tool
  - PWS (Real Time Completion Updates)
  - Pre-order IDLC tool
- Provide predefined per line hot cut rate on Mass Market loops
- Provides each CLEC the ability to request unlimited coordinated hot cuts or frame due time orders per day for new acquisitions.
- Trap and trace process

# Proposed Daily Process

## Batch Hot Cut Process

Day/Step	DAILY DESCRIPTION
Day 0	CLEC uses pre-order tool to identify if IDLC (See IDLC Flow) If IDLC orders can be scheduled with A.M. or P.M. appointments. (4 Hour Window)
Day 0	CLEC reserves due date and time by accessing Scheduler reservation tool
Day 0	CLEC issues LSRs with minimum 3 -5 business day interval.
Day 1	SBC LSR receives CLEC LSR's and mechanized FOC are sent back to the CLEC within 5 business hours if received mechanically and 24 business hours if received manually.
DD minus 3	SBC scheduler load levels and SBC's mechanized services orders are generated with a 3 business day due date minimum.
DD minus 2	SBC's mechanized systems will do internal validation for continued flow through order processing. <ul style="list-style-type: none"> <li>• Reuse Validation</li> <li>• Service Order Accuracy</li> <li>• Send ticket to C.O.</li> <li>• Perform ANI testing as required</li> </ul>
DD minus 2	SBC pre-testing is performed <ul style="list-style-type: none"> <li>• Dial Tone and ANI continuity testing</li> <li>• If dial tone or ANI problems see (Jeopardy Process Flow)</li> </ul>
DD minus 2	CLEC is able to view all recognized CHC/FDT orders on the CLEC Provisioning Website (PWS).

## Batch Hot Cut Process

Day	DAILY DESCRIPTION
DD	On Due Date CLEC contacts SBC LOC to begin cut (CHC only). LOC contacts LFO-In to begin lift and lay of jumpers. (At this time NPAC activity can be processed by CLEC)
DD	<ul style="list-style-type: none"> <li>▪ LFO-In technician performs lift and lay of jumpers, removes old jumpers.</li> <li>• Dial Tone and continuity ANI testing performed</li> </ul>
DD	If TRAP & TRACE is used CLEC will be able to validate completion without phone call. PWS is also updated with real time completion status.
DD	SBC LOC contact CLEC after each request (LSR) to advise completion if not using TRAP & TRACE or PWS. (CHC only)
DD	CLEC receives notification of completion
DD	Orders completed by LSC (See completion flow) <ul style="list-style-type: none"> <li>• E-911 unlocked</li> <li>• LIDB data automatically performed</li> <li>• CNAM data automatically performed</li> </ul>
DD	CLEC NPAC can be completed at this time or could have been performed at beginning of cut.
<b>NOTE:</b>	<ul style="list-style-type: none"> <li>• Order information can be accessed through CLEC Online (<a href="https://clec.sbc.com/">https://clec.sbc.com/</a>) under CLEC Specific Reports (must log on with appropriate access name and password which can be obtained through the CLEC Account Manager), CLEC Provisioning Website.</li> <li>• CLEC Provisioning Website User Names and passwords can be obtained from your LOC Service Manager.</li> </ul>

# Defined Batch Process

---

- Migrations of Embedded Base (Same customer and carrier, new switch)
    - UNE-P to UNE-L w/ LNP same CLEC
    - Resale to UNE-I w/ LNP same CLEC
  - New Acquisitions
    - UNE-P to UNE-L w/ LNP different CLEC
    - Resale to UNE-L w/ LNP different CLEC
    - SBC Retail to UNE-L w/ LNP
  - 1 to 100 lines per, CLEC per day, per C.O
  - 200 line maximum per C.O. per day (e.g., 2 CLEC requesting 100 lines or 4 CLECs requesting 50 per day)
  - 13 day interval to address above and beyond work load
  - Loops provisioned over IDLC can be included (a.m. and p.m. appointments available)
  - Pre-defined rates
-

# Defined Batch Process

---

## ▪ Coordinated Hot Cuts

### Normal Business Hours

M – F

8:00a.m. – 5:00p.m. excluding holidays

### Out of Hours\*\*

M – F excluding holidays

6:00a.m. – 8:00a.m. Min. 25\* –Max. 50 lines

5:00p.m.-12:00a.m. Min. 25\* – Max 100 lines

Sat. excluding holidays

8:00a.m. – 5:00p.m. Min. 50\* – Max 100

## ▪ Frame Due Time

### Normal Business Hours

M - F

8:00a.m. – 5:00p.m. excluding holidays

### Out of Hours\*\*

M – F excluding holidays

6:00a.m. – 8:00a.m. Min. 25\* –Max. 50 lines

No FDT M-F

5:00 p.m.-12:00a.m.

No FDT Sat.

### Cut timeframes:

Normal Business Hours

20 lines per hour – CLEC to be called every hour

Out of Hours

25 lines per hour – CLEC to be called every hour

**\*\*Sundays are exempt due to industry number porting constraints**

**\*Should number of request fall below minimum, the minimum be billed**

# Defined Batch Process

---

## Current Process

**Negotiated Project**

**Volumes are negotiated**

**Due Dates are negotiated**

**Exact costs are unknown before order as  
SBC bills via additional labor rates**

**Geographic limits unknown**

**Primarily used for Enterprise customers**

## Proposed Advantages

**Flexible scheduling**

**Eliminates negotiation steps and time  
involved**

**Provides defined interval to allow for  
CLEC resource planning**

**Provides CLECs an ability to reserve time**

**Provides a pre-defined hot cut rate tied to  
reflect efficiencies gained**

**Volume is sufficient to convert embedded  
base within 27 months TRO  
guidelines.**

**Wire center based to provide CLEC the  
ability to convert multiple central  
offices on the same day**

**Includes requests involving IDLC cuts**

**Enhance existing process**

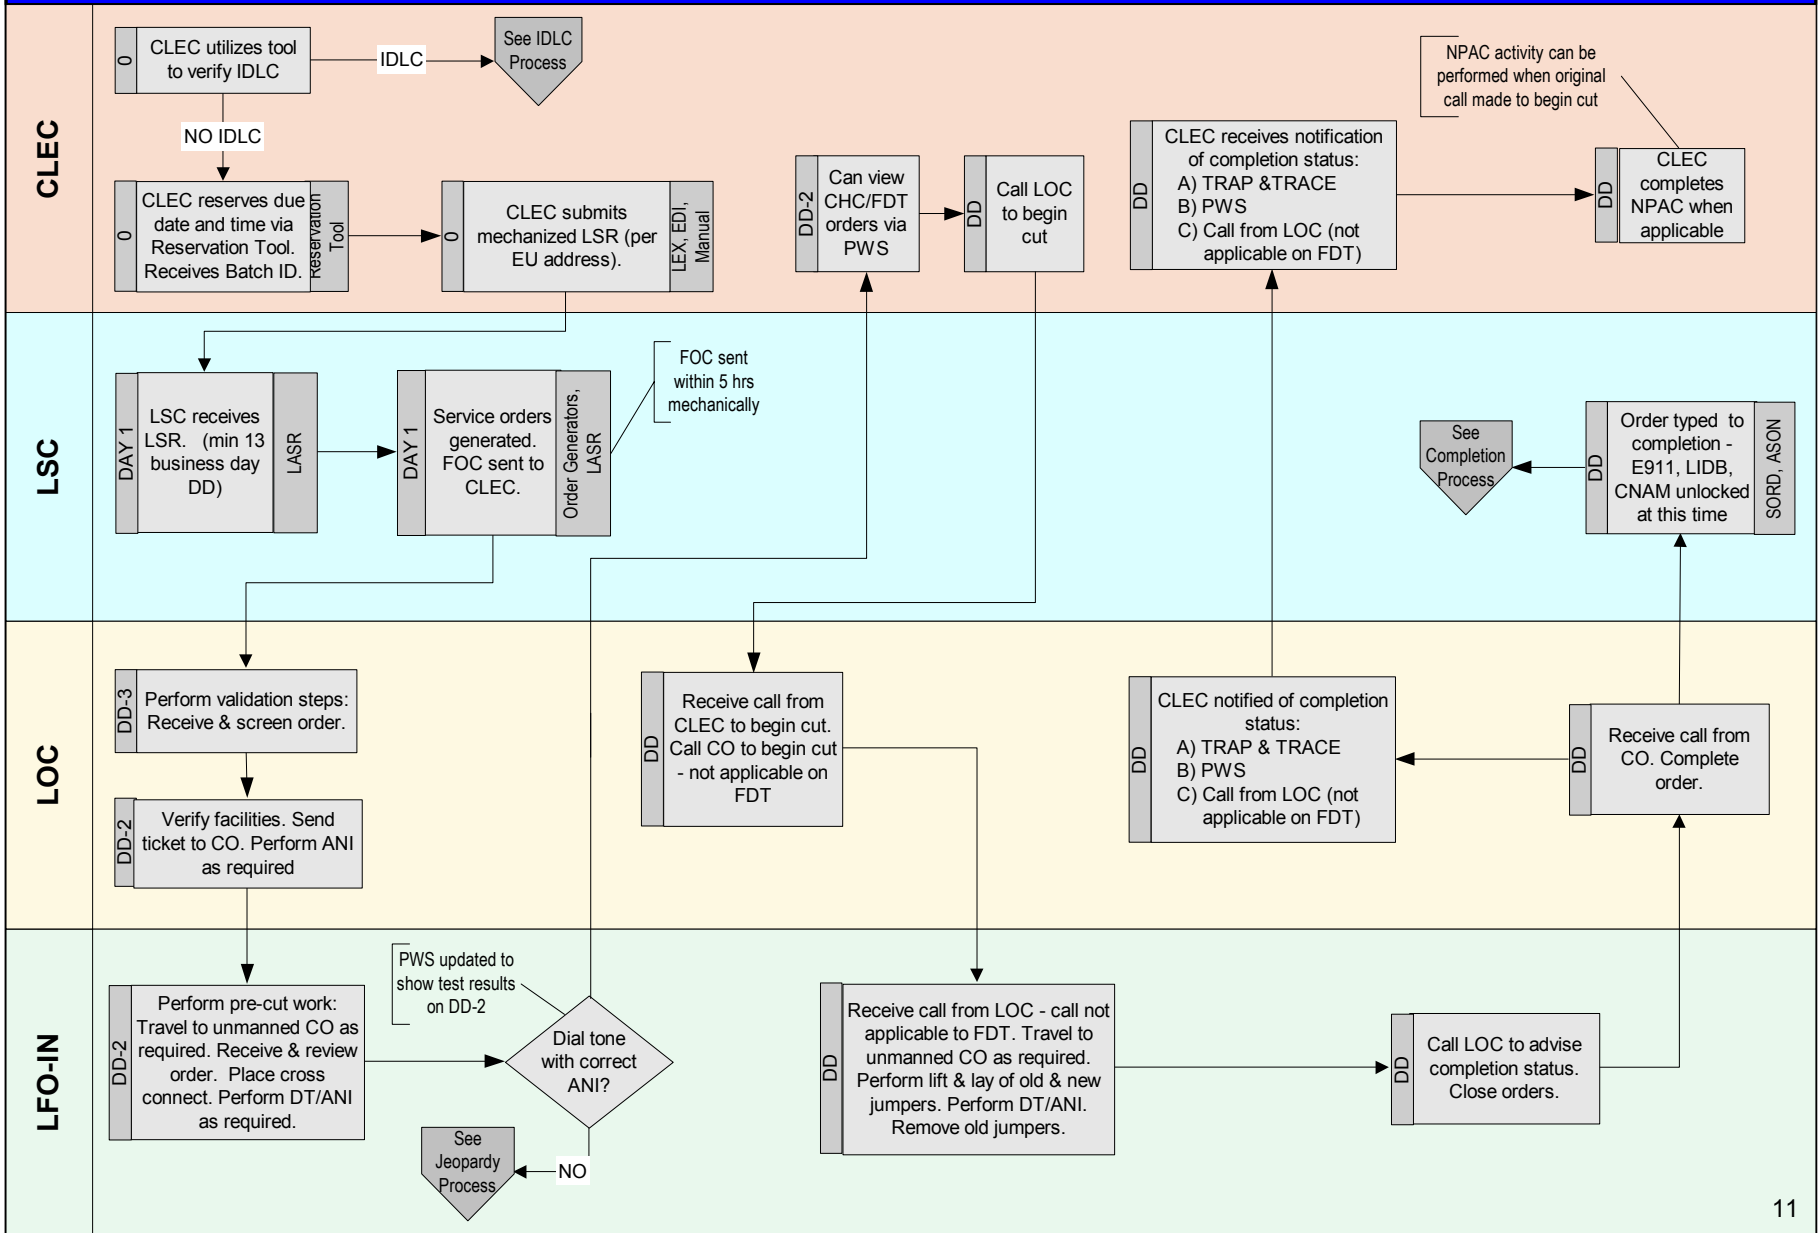

**Mechanized order flow**

**Reservation tool**

**PWS (real time completion updates)**

**Pre-order IDLC tool**

# Proposed Defined Process

## Batch Hot Cut Process

<b>Day</b>	<b>DEFINED DESCRIPTION</b>
<b>Day 0</b>	<b>CLEC uses per-order tool to identify if IDLC (If IDLC – See IDLC Flow)</b> • If IDLC, orders can be scheduled with A.M. or P.M. appointments. (4 Hour Window)
<b>Day 0</b>	<b>CLEC reserves due date and time by accessing Scheduler reservation tool</b>
<b>Day 0</b>	<b>CLEC issues LSRs with minimum 13 business day interval, not to exceed 20 business days.</b>
<b>Day 1</b>	<b>SBC LSC receives CLEC LSR's and mechanized FOC are sent back to the CLEC within 5 business hours if received mechanically and 24 business hours if received manually.</b>
<b>DD minus 3</b>	<b>SBC scheduler load levels and SBC's mechanized service orders are generated with a 13 business day due date minimum.</b>
<b>DD minus 3</b>	<b>SBC's mechanized systems will do internal validation for continued flow through order processing.</b> •Reuse Validation •Service Order Accuracy •Send ticket to C.O. •Perform ANI testing as required
<b>DD minus 2</b>	<b>SBC pre-cut work is performed</b> •Travel to unmanned C.O. as required •Place cross connects on frame • Dial Tone and ANI continuity testing • If dial tone or ANI problems see (Jeopardy Process Flow)
<b>DD minus 2</b>	<b>CLEC is able to view all recognized orders on the CLEC Provisioning Website (PWS).</b>

## Batch Hot Cut Process

Day	DEFINED DESCRIPTION
Due Date	On Due Date CLEC contacts SBC to begin cut (CHC only). LOC contacts LFO-In to begin lift and lay of jumpers. (At this time NPAC activity can be processed by CLEC)
DD	<ul style="list-style-type: none"> <li>•LFO-In technician travels to unmanned C.O. as required</li> <li>•Performs lift and lay of jumpers, removes old jumpers</li> <li>•Dial Tone and continuity ANI testing performed</li> </ul>
DD	<p>If TRAP &amp; TRACE is used CLEC will be able to validate completion without phone call.</p> <ul style="list-style-type: none"> <li>•PWS is also updated with real time completion status</li> </ul>
DD	SBC LOC contact CLEC each hour to advise completion (CHC only) if not using TRAP & TRACE or PWS.

DD	CLEC NPAC can be completed at this time or could have been performed at beginning of cut.
<b>NOTE:</b>	<ul style="list-style-type: none"> <li>• Order information can be accessed through CLEC Online (<a href="https://clec.sbc.com/">https://clec.sbc.com/</a>) under CLEC Specific Reports (must log on with appropriate access name and password which can be obtained through the CLEC Account Manager), CLEC Provisioning Website.</li> <li>• CLEC Provisioning Website User Names and passwords can be obtained from your LOC Service Manager.</li> </ul>

# Bulk Project Process

---

- New customer acquisitions
- Embedded base
- 101+ lines
- Single End User with 20 + line Projects
- Negotiated due dates
- Coordinated Hot Cuts
- Frame Due Time
- Flexible Scheduling
- High volume requests coordinated within this process option
- Sundays are exempt due to industry number porting constraints
- EELs will be considered within this process option at a later date

# Bulk Project Process

---

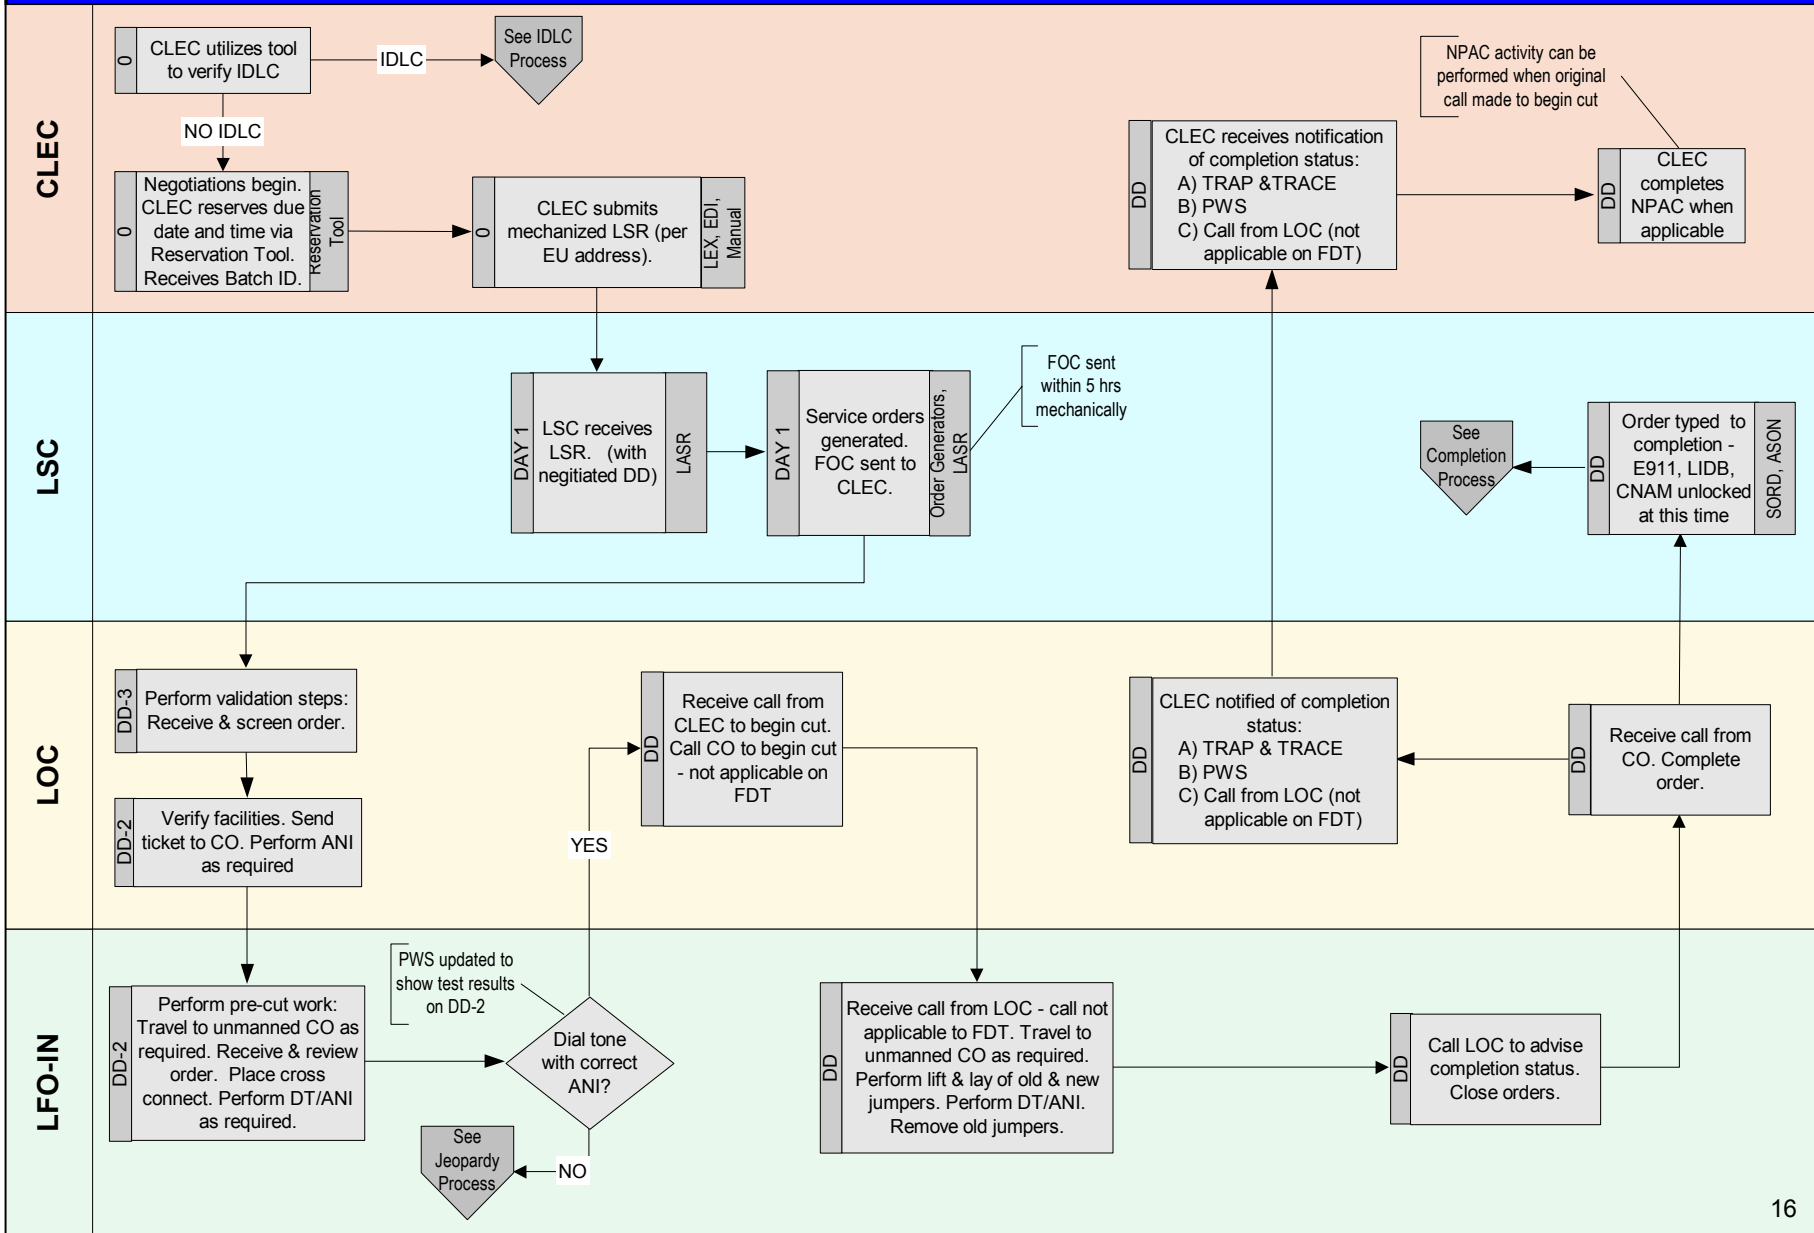

## Current Process

- All aspects of project are negotiated
- Enterprise focused
- Rates based on additional labor rates

## Proposed Advantages

- Provides CLEC the ability to request more than 100 coordinated hot cuts per day
- Flexible scheduling
- Provides a pre-defined hot cut rate to reflect efficiencies gained
- Streamlined request process
- Ability to include Enterprise customers along with other type conversions.

# Proposed Bulk Project Process

## Batch Hot Cut Process

<b>Day</b>	<b>BULK DESCRIPTION</b>
<b>Day 0</b>	<p>CLEC contacts SBC LSC for Negotiation of request.  CLEC uses pre-order tool to identify if IDLC (If IDLC – See IDLC Flow)  • If IDLC, orders can be due dated with A.M. or P.M. appointments. (4 Hours Window)</p>
<b>Day 0</b>	<p>CLEC reserves due date and time by accessing Scheduler reservation tool.</p>
<b>Day 0</b>	<p>CLEC issues LSRs with negotiated due date. Good LSRs must be received by 3:00p.m. business day 2</p>
<b>Day 1</b>	<p>SBC LSC receives CLEC LSR's and mechanized FOC are sent back to the CLEC within 5 business hours if received mechanically and 24 business hours if received manually.</p>
<b>DD minus 3</b>	<p>SBC scheduler load levels and SBC's mechanized Services Orders are generated with the negotiated due date.</p>
<b>DD minus 3</b>	<p>SBC's mechanized systems will do internal validation for continued flow through order processing.</p> <ul style="list-style-type: none"> <li>▪Reuse Validation</li> <li>▪Service Order Accuracy</li> <li>▪Send ticket to C.O.</li> <li>▪Perform ANI testing as required</li> </ul>
<b>DD minus 2</b>	<p><b>SBC pre-cut work is performed</b>  DD-2 the SBC pre-cut work is performed  Travel to unmanned C.O. as require  Place cross connects on frame  Dial Tone and ANI continuity testing  If dial tone or ANI problems see (Jeopardy Process Flow)</p>
<b>DD minus 2</b>	<p>DD-2 CLEC is able to view all recognized CHC orders on the CLEC Provisioning Website (PWS).</p>

## Batch Hot Cut Process

Day	BULK DESCRIPTION
Due Date	On Due Date CLEC contacts SBC to begin cut. LOC contacts LFO-In to begin lift and lay of Jumpers. (At this time NPAC activity can be processed by CLEC)
DD	LFO-In technician processes Lift and Lay of jumpers. •Dial Tone and continuity ANI testing performed
DD	If TRAP & TRAC is used CLEC will be able to validate completion without phone call. •PWS is also updated with real time completion status
DD	SBC LOC contact CLEC each hour to advise completion if not using TRAP & TRAC or PWS.
DD	TRAP & TRAC provides real time completion see (3.3)
DD	Orders completed by LSC (mechanized) • E-911 unlocked •LIDB data automatically performed •CNAM data automatically performed
DD	CLEC NPAC can be completed at this time or could have been performed at beginning of cut.
<b>NOTE:</b>	<ul style="list-style-type: none"> <li>• Order information can be accessed through CLEC Online (<a href="https://clec.sbc.com/">https://clec.sbc.com/</a>) under CLEC Specific Reports (must log on with appropriate access name and password which can be obtained through the CLEC Account Manager), CLEC Provisioning Website.</li> <li>• CLEC Provisioning Website User Names and passwords can be obtained from your LOC Service Manager.</li> </ul>

# Incremental Hot Cut Demand

---

- **Total Embedded UNE-P lines by state**
- **Highest inward monthly UNE-P volumes**
- **Total Embedded UNE-L lines by state**
- **New customer acquisitions**
  - **Based on highest UNE-P inward**
- **Embedded Base Conversion**
  - **TRO transition timetable**
  - **Accelerated timetable**
- **State specific analysis attached**

# OSS Enhancements

---

## Pre-Order

- IDLC validation

- Inquiry reservation

## Ordering

- Flow-thru

- Batch Identification

- Provisioning Website

# Common Operational Process Issues

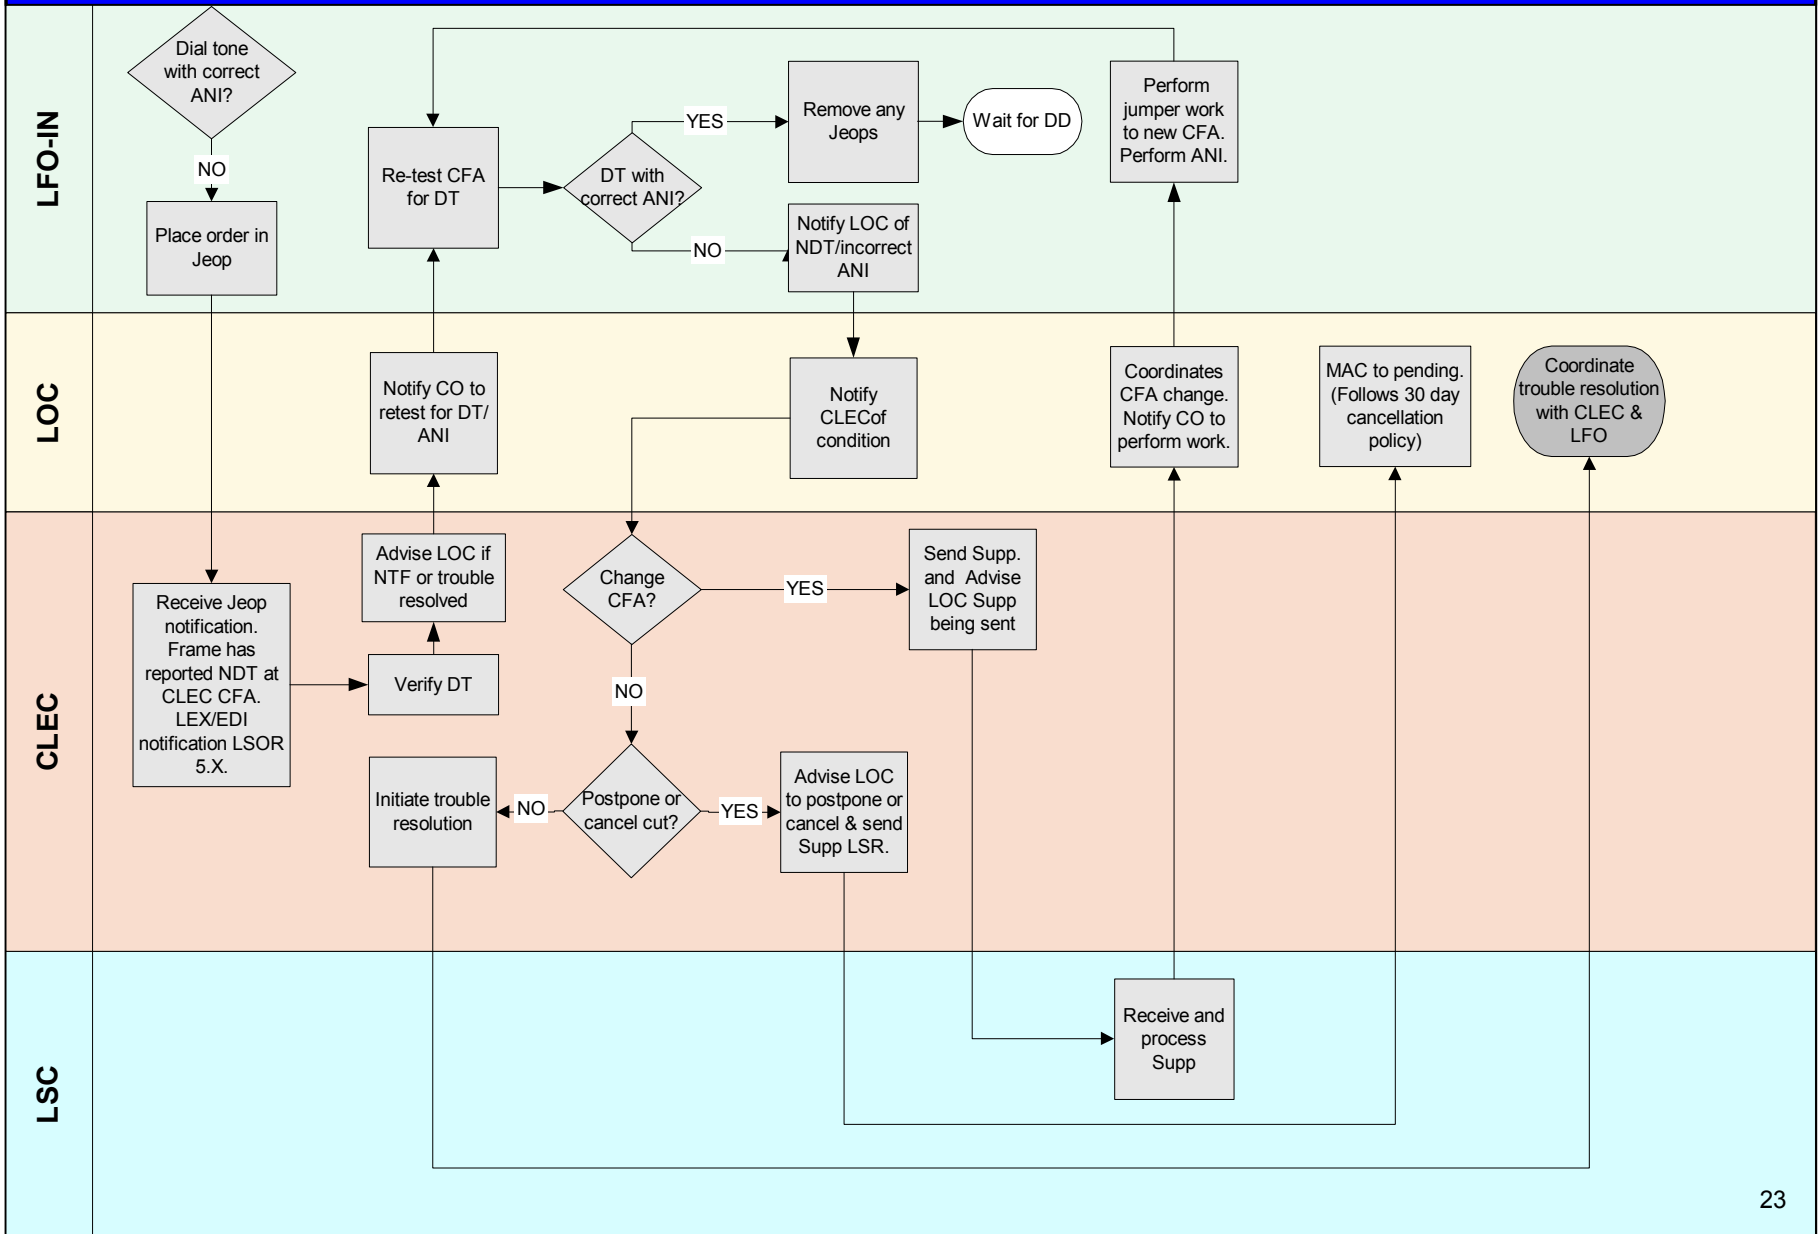

---

- IDLC
- Pre-cut Jeopardy
- Completion
- Throw-back

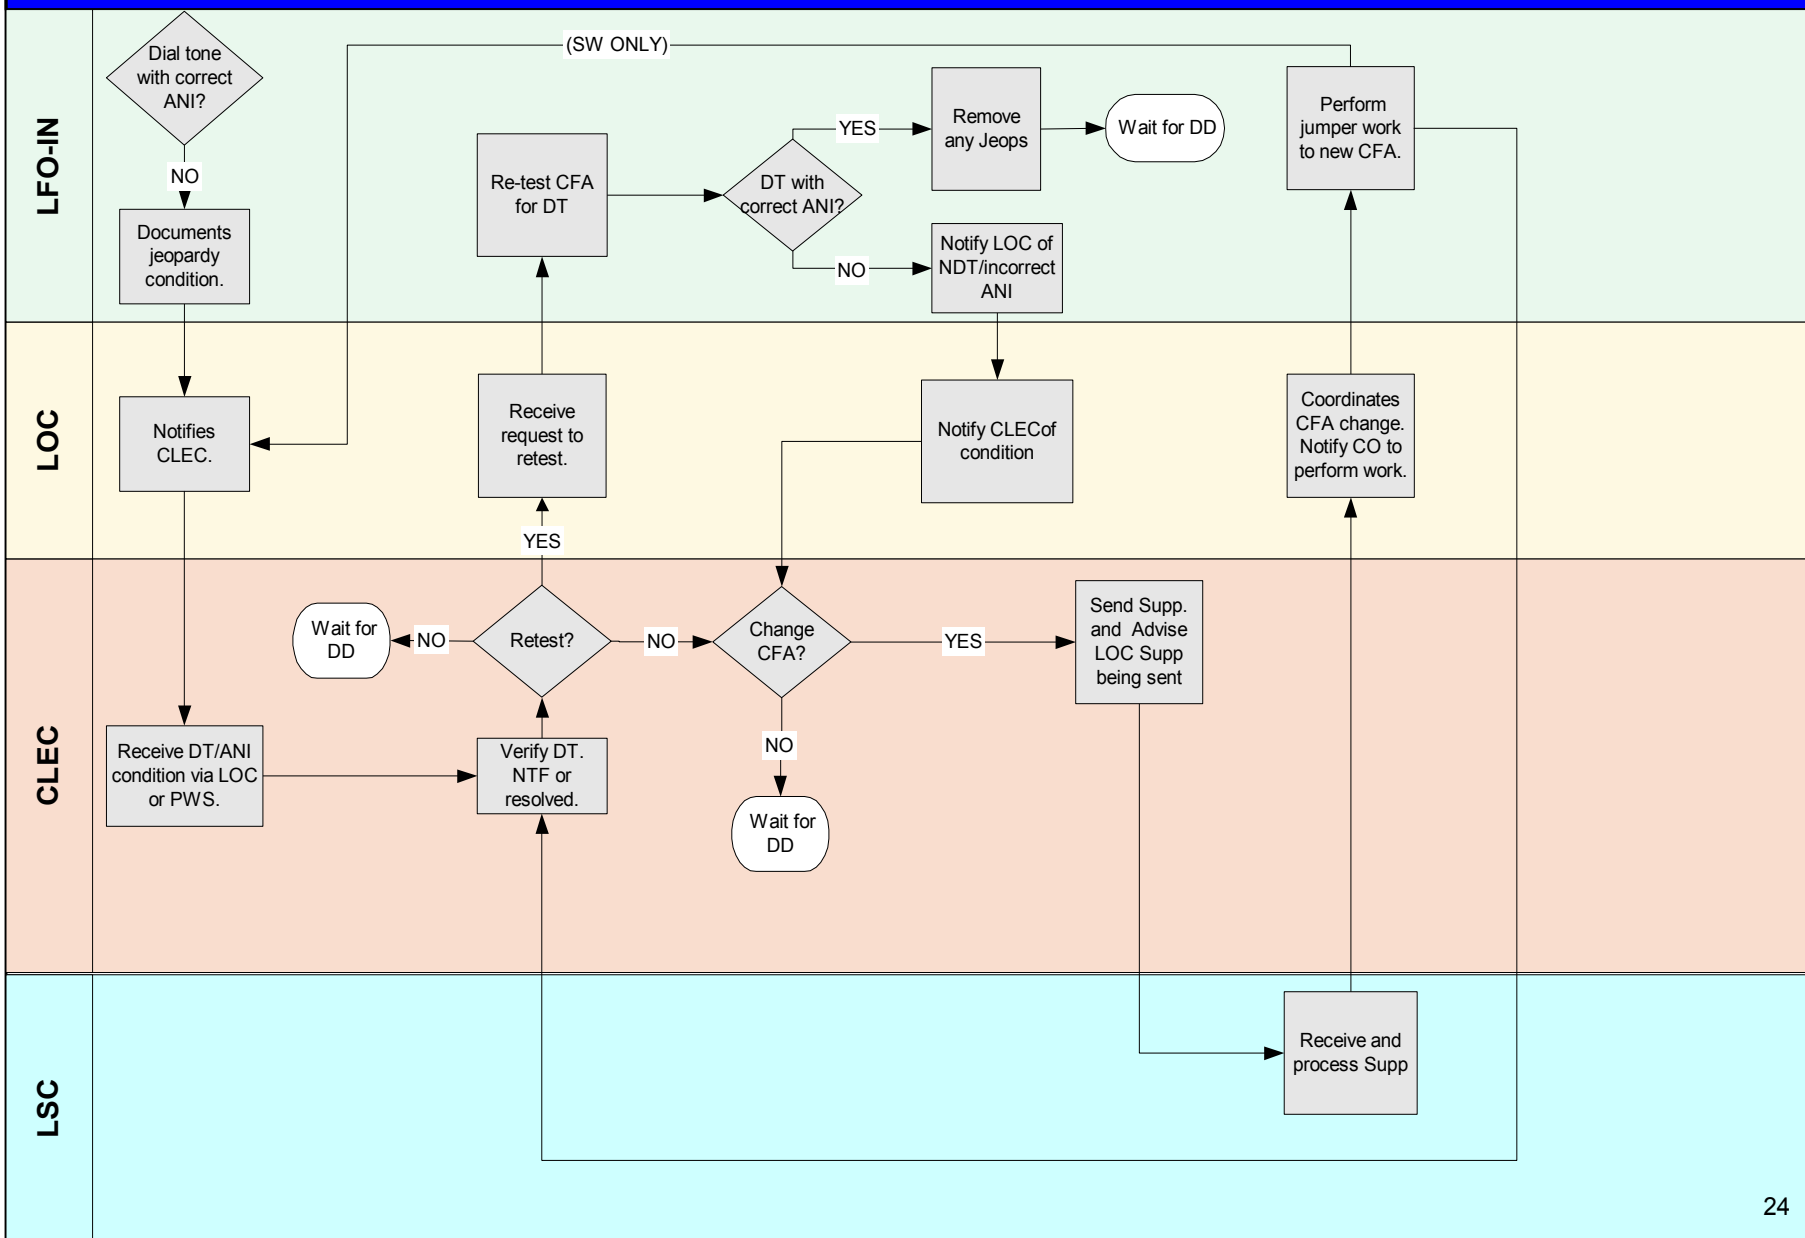

# Proposed IDLC Process

# Pre-Cut Jeopardy Notification Process - CHC - SBC West

# Pre-Cut Jeopardy Notification Process - CHC - SBC Midwest & Southwest

## Completion Process for E911/CNAM/LIDB/Directory Listing

(DD- 2) A flag is added to the dispatch management system (WFA) for the related disconnect service orders to prevent automatic completion.

(DD) After UNE-L conversion work is completed the UNE-L work step is completed by the Central Office technician (WFA/FWS).

The completion of the CO work step in the provisioning system (WFA) sends the LOC notification to complete the UNE-L service order.

UNE-L service order is completed and the flag is removed from the disconnect service order (WFA). Translations are removed by the MW LOC.

The disconnect service order is completed. (SORD/ASON). Translations are removed via the 10 digit trigger in SW.

Completion of the disconnect service order triggers the E911, CNAM, LIDB and Directory Listing ownership.

## Batch Cut Process

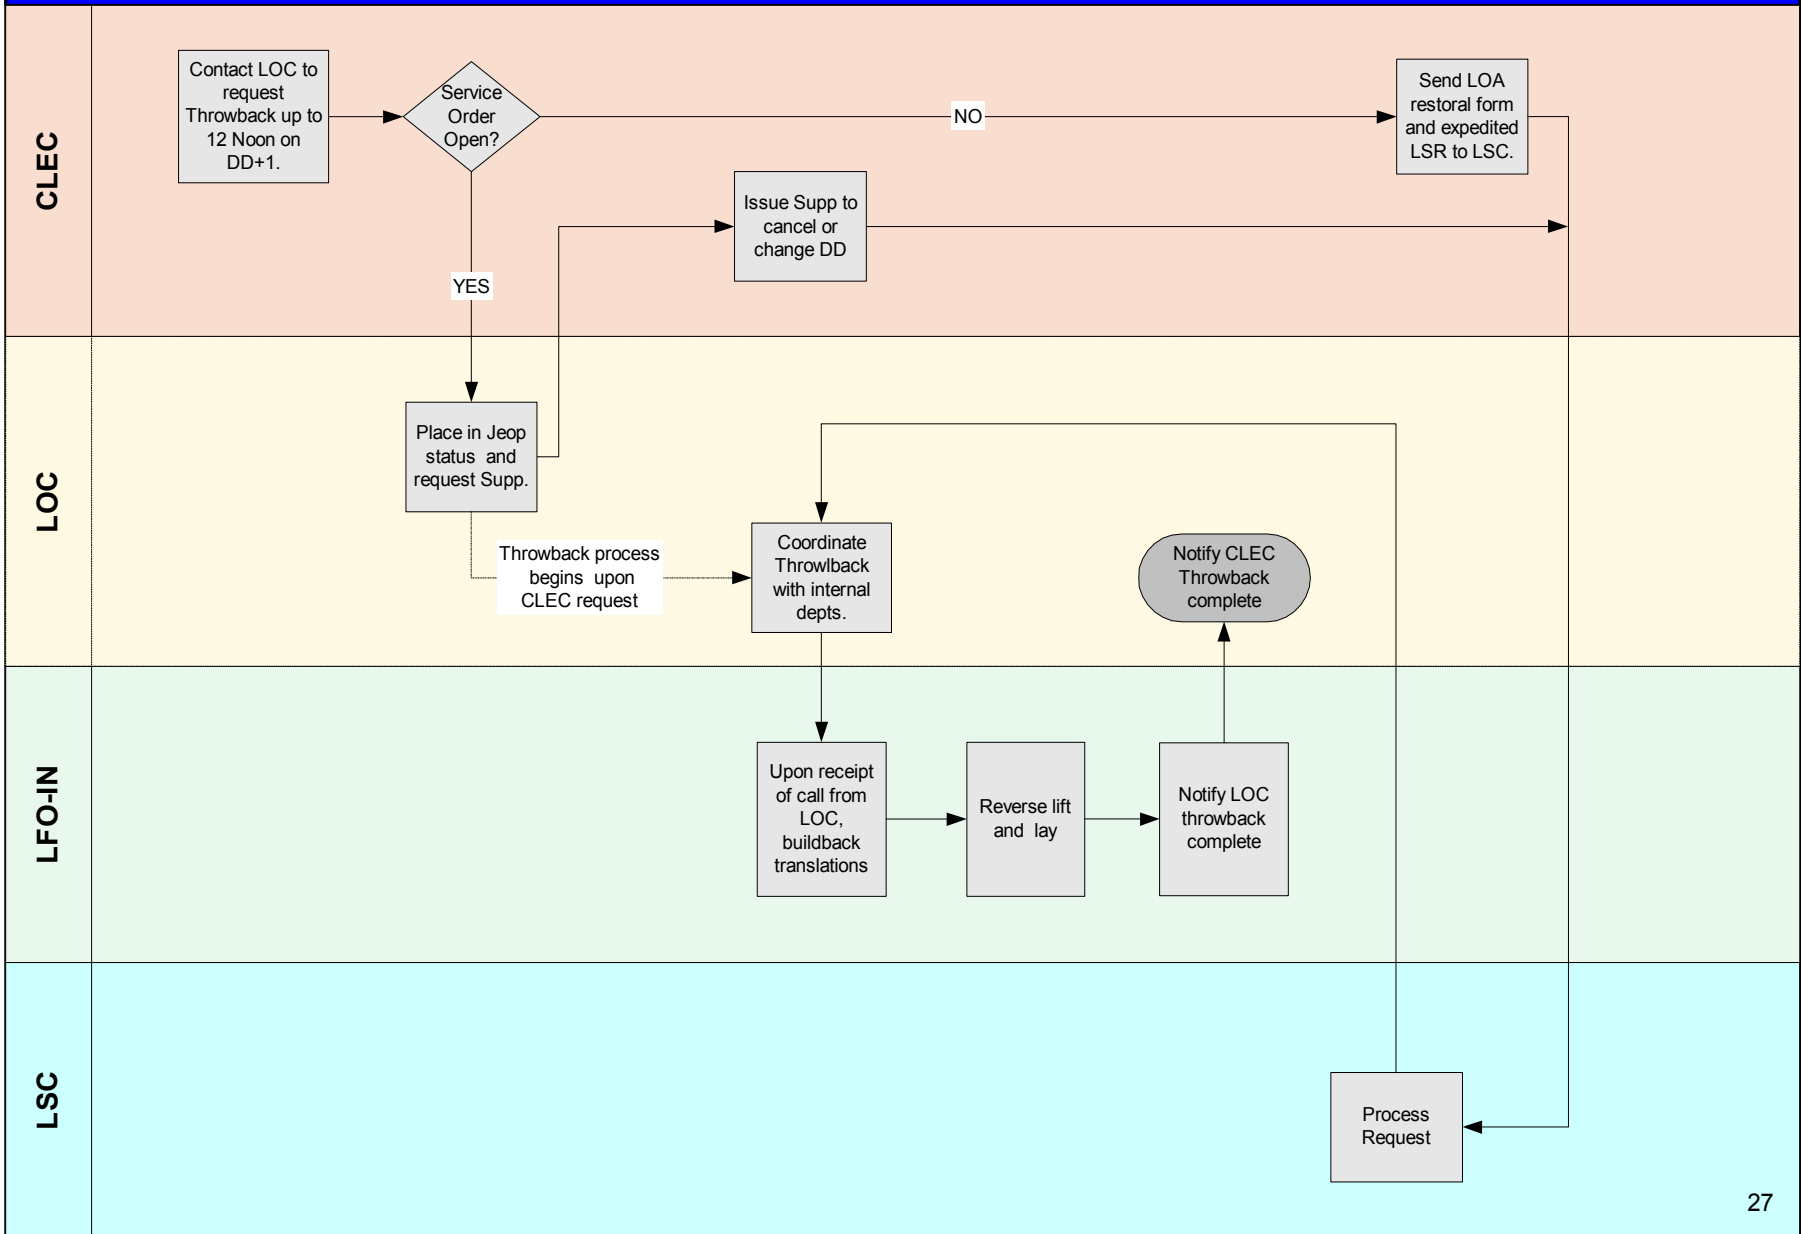

### **COMPLETION PROCESS**

---

SBC's provisioning systems trigger completion of the service order immediately after the technician notifies the LOC that the "lift and lay of the jumpers is complete. In the Midwest region, the downstream systems are updated in batch mode.

CLECs have the ability to activate NPAC, if the trap and trace option is used, immediately after the "lift and lay" is complete, which minimizes the duration the end user is unable to receive incoming calls.
