Alliance
Case No.: EA-2014-0207
Date Testimony Prepared: Sept., 2014

MISSOURI PUBLIC SERVICE COMMISSION

CASE NO. EA-2014-0207

REBUTTAL TESTIMONY OF

JOHN CAUTHORN

ON BEHALF OF

MISSOURI LANDOWNERS ALLIANCE

September 15, 2014

Exhibit No. 303
Date 11/13/14 Reporter MG
File No. EA-2014-0207

1 **Q. Please state your name.**

2 A. John Cauthorn

3 **Q. On whose behalf are you testifying?**

4 A. I am testifying for the Missouri Cattlemen's Association (MCA) and the
5 Missouri Dairy Association (MDA), on behalf of the Missouri Landowners Alliance.

6 **Q. Please describe the MCA and the MDA.**

7 A. MCA is a grass roots association of cattle producers formed to provide
8 cattlemen a voice at the state and local level with 82 county affiliates throughout the
9 state. MDA is a group of producers formed to represent and protect the dairy industry in
10 the state.

11 **Q. What is your position with the MCA?**

12 A. I am past president of MCA and now serve on their policy and legislative
13 affairs committee.

14 **Q. How many members does the MCA have?**

15 A. 5,000 due paying members.

16 **Q. How many members does the MDA have?**

17 A. 1,800 members throughout the state.

18 **Q. Are you familiar with the operation of ranches and dairy farms in
19 Missouri?**

20 A. Yes, for the last 50 years I have been raising and feeding cattle in and outside
21 the state of Mo. I have also been a joint-owner in a dairy operation.

22 **Q. Would the transmission line proposed by Grain Belt Express have any
23 impacts on dairy farming and ranching practices in Missouri?**

1 A. Yes, the MCA strongly opposes granting eminent domain to the company for
2 the proposed electrical transmission line which it plans to build across northern Missouri.
3 The association has long been a defender of property rights whether it involved cases of
4 eminent domain or regulatory abuse. The benefits claimed by the developers do not
5 justify the granting of eminent domain to a privately owned company.

6 Furthermore, the use of eminent domain at any time is of great concern to the
7 number one industry in our state - Agriculture. MCA has policy that has been in effect
8 for more than ten years stating that eminent domain should absolutely not be used to take
9 property for profit and that an easement cannot be sold to another entity without due
10 process.

11 In a document prepared by Grain Belt Clean Line, LLC, titled "Transmission Line
12 Easement Agreement," it states that the rights under the easement agreement may be sold,
13 assigned, mortgaged, or leased in whole or in part by Grain Belt at any time. This
14 proposal is in direct conflict with MCA's policy.

15 The impact of this on the cattle industry boils down to a pervasive invasion of
16 private property rights. The United States has the smallest beef cowherd we have seen
17 since 1962 and we absolutely must secure the rights of private property owners in order
18 to ensure family farms remain in business in this state and across the country.

19 Allowing a privately held company to magically operate as a public utility flies in
20 the face of everything we stand for as a state and as a nation. Allowing this for profit
21 company to engage in a land grab in Missouri is blatantly wrong and sets a precedent for
22 other privately owned companies to do the same thing. Where would it stop? How much

1 land currently in agricultural production has to go away before we put an end to this?

2 The concerns in rural America and within the cattle sector are real.

3 We stand firmly in support of protecting our private property rights. If a
4 landowner wants to enter into a partnership with this company or any other company,
5 then that is their right. However, landowners should not be forced to give up their
6 property. That is absurd.

7 Cattlemen like myself also have concerns about the unknown. What don't we
8 know about this project. There are serious concerns about how these lines will impact the
9 health and well-being of our cattle; not to mention our families. There is little to no
10 research that gives us any level of certainty that these lines are safe for livestock or
11 people.

12 **Q. Does this complete your testimony?**

13 A. Yes, it does.
