### BEFORE THE PUBLIC SERVICE COMMISSION OF THE STATE OF MISSOURI

In the Matter of the First Prudence Review of ) Kansas City Power & Light Company's ) ("KCPL") Implementation of its Cycle 2 Energy ) Efficiency Programs in Furtherance of the ) Missouri Energy Efficiency Investment Act ) (MEEIA).

File No. EO-2018-0363

### STAFF'S REPORT OF MEEIA PRUDENCE REVIEW

**COMES NOW** the Staff of the Missouri Public Service Commission, by and through counsel, and for its *First Prudence Review Of Cycle 2 Costs Related To The Missouri Energy Efficiency Investment Act For The Electric Operations Of Kansas City Power And Light Company* ("Report" or "Report of MEEIA Prudence Review"), respectfully states to the Missouri Public Service Commission ("Commission"):

### Background

1. Kansas City Power & Light Company's ("KCPL" or "Company") tariff provides that "Commission staff shall perform prudence reviews no less frequently than at twenty-four (24) month intervals in accordance with 4 CSR 240-20.093(10)..."<sup>1</sup> This tracks the language of Commission Rule 4 CSR 240-20.093(11) as authorized under § 393.1075.3 and § 393.1075.11 RSMo as supplemented.

2. The Staff's prudence review also complies with KCP&L's Demand Side Investment Mechanism Rider ("DSIM Rider") P.S.C. MO. No. 7, Original Sheet No. 49D <u>Prudence Reviews</u> paragraph which states in part "A prudence review shall be

<sup>&</sup>lt;sup>1</sup> Kansas City Power & Light Company, P.S.C. MO. No. 7, Original Sheet No. 49D, "Prudence Reviews", <u>Demand Side Investment Mechanism Rider, Schedule DSIM</u>. Note the tariff sheet citation of 4 CSR 240-20.093(10) regarding prudence reviews has not been updated to reflect the rule number change to 4 CSR 240-20.093(11) effective October 30, 2017.

conducted no less frequently than at twenty-four (24) month intervals in accordance with 4 CSR 240-20.093(10)..."

3. Rule 4 CSR 240-20.093(11), in part, sets a timeline for certain activities related to the prudence review. It also established the following schedule by which certain events are to take place based on the date the Staff started its prudence review. The Staff filed its notice and began its prudence review of the costs associated with KCP&L's Demand-Side Programs Investment Mechanisms ("DSIM") on June 4, 2018.

| November 1, 2018  | Submission of Staff Recommendation        |
|-------------------|---|
| November 11, 2018 | Request for hearing                       |
| December 31, 2018 | Commission Order, if no hearing requested |

#### Results of MEEIA Prudence Review and Recommendation

4. In accordance with 4 CSR 240-20.093(11)(B), Staff files its Report, including its recommendation, with the Commission regarding the results of its examination and analyses in this case.<sup>2</sup> The Staff's Energy Resources Department is responsible for conducting the prudence review. Staff's Report is attached as Appendix A.

5. Staff reviewed and examined a variety of items including the prudence of KCPL's DSIM program costs, annual energy and demand savings, the Company throughput disincentive ("TD"), and interest for the Review Period of April 1, 2016 through March 31, 2018. This Review Period includes the first program year 2016

<sup>&</sup>lt;sup>2</sup> 4 CSR 240-20.093(11)(B) "The staff shall submit a recommendation regarding its examination and analysis to the commission...."

("PY2016") which ran from April 1, 2016 through March 31, 2017, and the second program year ("PY2017") which ran from April 1, 2017 through March 31, 2018.

6. Staff Based on its review, has identified certain improper entertainment/general expenses and promotional giveaway expenses during the Review Period. Staff recommends that the Commission order an adjustment ("Ordered Adjustment" or "OA") that will flow back to ratepayers an amount of \$48,481, including interest, in KCPL's next Rider DSIM rate adjustment filing to compensate ratepayers for these improper MEEIA expenses. (See Report Section VII. Actual Program Costs, paragraph A. Administrative Cost (Table 4) and paragraph D. (Table 7) for a detailed explanation of the improper expenses that make up the proposed \$48,481 OA.

7. In conclusion, for this Review Period Staff has verified the reported 231,840,625 kWh of energy savings, 69,967 kW of demand savings and \$9,226,856 of actual TD for the MEEIA Cycle 2 Programs. During this review period KCPL incurred program costs of \$39,058,979 for its 16 MEEIA Cycle 2 programs.

WHEREFORE, in accordance with the Commission's rules, the Staff recommends that the Commission approve and order an adjustment of \$48,481<sup>3</sup> to be returned to KCPL's customers in the Company's next DSIM Rider filing and prays the Commission accept its Report of MEEIA Prudence Review.

<sup>&</sup>lt;sup>3</sup> This OA amount includes interest through March 31, 2018.

Respectfully submitted,

#### /s/ Robert S. Berlin

Robert S. Berlin Deputy Staff Counsel Missouri Bar No. 51709

Attorney for the Staff of the Missouri Public Service Commission P. O. Box 360 Jefferson City, MO 65102 (573) 526-7779 (Telephone) (573) 751-9285 (Fax) bob.berlin@psc.mo.gov

**STAFF REPORT** 1 2 FIRST PRUDENCE REVIEW OF CYCLE 2 COSTS 3 **RELATED TO THE** 4 **MISSOURI ENERGY EFFICIENCY INVESTMENT ACT** 5 FOR THE ELECTRIC OPERATIONS 6 OF 7 KANSAS CITY POWER AND LIGHT COMPANY 8 April 1, 2016 through March 31, 2018 9 FILE NO. EO-2018-0363 I. 10 **Executive Summary** 11 The Missouri Public Service Commission ("Commission") Staff ("Staff") reviewed and analyzed a variety of items in examining whether Kansas City Power & Light ("KCPL" or 12 13 "Company") reasonably and prudently incurred costs associated with its demand-side programs 14 and demand-side programs investment mechanism ("DSIM") which were approved by the 15 Commission's Order Approving Stipulation and Agreement Resolving KCPL's MEEIA Filing in 16 Case No. EO-2015-0240 ("Cycle 2 Plan"). 17 This prudence review report ("Report") reflects Staff's first prudence review for KCPL's Missouri Energy Efficiency Act<sup>1</sup> ("MEEIA") demand-side programs and DSIM Cycle 2 costs in 18 19 File No. EO-2015-0240 for the review period of April 1, 2016 through March 31, 2018 ("Review Period"). This report reflects prudence review costs for KCPL's Cycle 2 program costs 20 21 ("Program Costs"), annual energy and demand savings, throughput disincentive ("TD"), and 22 interest. The total Review Period is comprised of the two (2) time periods. 23 1. The first time period is also called Cycle 2 program year 1 ("PY1") or program year 2016 ("PY2016"). This is the time period beginning April 1, 2016 through March 31, 24 2017. The total amount of program costs for PY1 was \$17,816,194 and the actual TD 25 26 was \$2,426,767. 2. The second time period is April 1, 2017 through March 31, 2018 ("PY2") or 27 28 ("PY2017"). The total amount of program costs reported was \$21,242,785 and the 29 actual TD was  $6,800,089^2$ . <sup>1</sup> Section 393.1075 RSMo 2016.

<sup>&</sup>lt;sup>2</sup> Staff has identified that the March 31, 2018 Quarterly Surveillance Report, 12 month ending total is reported incorrectly. It appears that KCPL used 5 quarterly total and not 4 quarterly totals in the reporting of this balance.

Based on its review, Staff has identified a disallowance of entertainment/general expenses and promotional giveaway expenses during the Review Period, identified in Table 1 below. Staff is recommending an ordered adjustment ("OA") in the amount of \$48,481, including interest<sup>3</sup>, in KCPL's next Rider DSIM rate adjustment filing to adjust for these disallowed promotional and entertainment costs. The recommended OA amount is explained in detail later in this report.

#### BACKGROUND

1 2

3

4

5

6

7

8

17

19

21

9 On August 28, 2015, KCPL filed, in Case No. EO-2015-0240, its application under the MEEIA and the Commission's MEEIA rules<sup>4</sup> for approval of KCPL's second MEEIA 10 application. On November 23, 2015, KCPL, GMO, Staff, Office of the Public Counsel, Missouri 11 Division of Energy, Natural Resources Defense Council, National Housing Trust, Earth Island 12 13 Institute, d/b/a Renew Missouri, United for Missouri, and West Side Housing Organization filed a Non-Unanimous<sup>5</sup> Stipulation And Agreement Resolving KCP&L Greater Missouri Operations 14 15 Company's MEEIA Filing ("First Stipulation").

16 Through its April 6, 2016 Order Approving Non-Unanimous Stipulation And Agreement Resolving Kansas City Power and Light ("KCPL") Company's MEEIA Filing in Case No. EO-2015-0240, the Commission authorized KCP&L to implement its three-year<sup>6</sup> "Plan" 18 including: 1) sixteen (16) demand-side programs ("MEEIA Programs") described in KCP&L's 20 August 28, 2015 MEEIA application and modified to reflect the terms and conditions contained in the First Stipulation, 2) technical resource manual ("TRM") and 3) a demand-side programs 22 investment mechanism. In its March 23, 2016 Order Approving Expedited Tariffs, the

<sup>&</sup>lt;sup>3</sup> Interest calculated on disallowance through March 31, 2018.

<sup>&</sup>lt;sup>4</sup> 4 CSR 240-3.163, 4 CSR 240-3.164, 4 CSR 240-20.093 and 4 CSR 240-20.094.

<sup>&</sup>lt;sup>5</sup> Brightergy was the only party that objected to the stipulation. A hearing was held on January 12, 2016.

<sup>&</sup>lt;sup>6</sup> Starting April 1, 2016 and ending March 31, 2019.

Commission approved rates<sup>7</sup> for the Rider DSIM's<sup>8</sup> and approved a DSIM Charge<sup>9</sup> in Case No. EO-2015-0240 to be effective on April 1, 2016.

1

2

3 The Commission's April 6, 2016 Order Approving Second Stipulation and Agreement in Case No. EO-2015-0240 approved a Non-Unanimous Stipulation and Agreement ("Second 4 5 Agreement") that was filed March 17, 2016. The Second Agreement was agreed to by the Company, Commission Staff, Office of the Public Counsel, Division of Energy, National 6 7 Housing Trust, West Side Housing Organization, Natural Resources Defense Council, Earth Island Institute d/b/a Renew Missouri, and United for Missouri, Inc.<sup>10</sup> The Second Agreement 8 9 replaced Appendix C of the First Agreement with a new Appendix 1 that modifies the incentive 10 ranges for two programs that were either not complete or inaccurate and it also replaced Appendix I of the First Agreement with a new Appendix 2 that provides a complete list of DSM 11 12 measures for Cycle 2 programs that were inadvertently omitted in Appendix I.

Commission Rule 4 CSR 240-20.093(10) requires that the Staff conduct prudence reviews of an electric utility's costs for its DSIM no less frequently than every twenty-four (24) months approved DSIM Cycle 2. This report documents Staff's first review of the prudence of KCP&L's Cycle 2 Program Costs, annual energy and demand savings, TD, and interest for the Review Period.

Commission Rules 4 CSR 240-20.093(9) and 4 CSR 240-2.163(6) require that KCP&L
file quarterly a Surveillance Monitoring Report. Addendum A to this Report is Page 6 of KCPL's
Quarterly Surveillance Monitoring Reports ("QSMR") including status of the MEEIA Programs
and DSIM cost and savings for the quarter ended<sup>11</sup>, and cumulative total ended March 31, 2018.

<sup>&</sup>lt;sup>7</sup> The residential and non-residential rates for the MEEIA DSIM Charge approved in Case No. EO-2015-0240 are \$0.00335 per kWh and \$0.00550 per kWh, respectively.

<sup>&</sup>lt;sup>8</sup> KCP&L Third Revised Sheet Nos 49 through Original Sheet No. 49P which all have an effective date of April 1, 2016.

<sup>&</sup>lt;sup>9</sup> From KCPL''s Original Sheet No. 49F: Charges arising from the MEEIA Cycle 2 Plan that are the subject of this DSIM Rider shall be reflected in one "DSIM Charge" on customers' bills in combination with any charges arising from a rider that is applicable to post-MEEIA Cycle 2 Plan demand-side management programs approved under the MEEIA.

<sup>&</sup>lt;sup>10</sup> The Second Agreement is non-unanimous in that it was not signed by all parties. However, Commission Rule 4 CSR 240-2.115(2) provides that other parties have seven days in which to object to a non-unanimous stipulation and agreement. If no party files a timely objection to a stipulation and agreement, the Commission may treat it as a unanimous stipulation and agreement. More than seven days passed and no party objected, therefore the Commission treated the Second Agreement as a unanimous stipulation and agreement.

<sup>&</sup>lt;sup>11</sup> The 12 month ended total for Actual Program Costs on the March 31, 2018 QSMR was reported as \$29,559,402 but should be in the amount of \$21,242,785.

Table 2 identifies the line items and Review Period amounts from Addendum A which are the subject of Staff's prudence review.

In evaluating prudence, Staff reviews whether a reasonable person making the same decision would find both the information the decision-maker relied on and the process the decision-maker employed to be reasonable based on the circumstances and information known at the time the decision was made, *i.e.*, without the benefit of hindsight. The decision actually made is disregarded; instead, the review evaluates the reasonableness of the information the decision-maker relied on and the decision-making process the decision-maker employed. If either the information relied upon or the decision-making process employed was imprudent, then Staff examines whether the imprudent decision caused any harm to ratepayers. Only if an imprudent decision resulted in harm to ratepayers, will Staff propose an adjustment. A more detailed discussion of the legal foundation for Staff's definition of imprudence is presented in the next section.

### 16 Staff Expert: Dana E. Eaves

### II. <u>MEEIA Programs</u>

KCPL used various request for proposal ("RFP") processes to contract: 1) implementers for its individual MEEIA Programs, 2) Evaluation, Measurement and Valuation ("EM&V") contractor for its residential and business MEEIA Programs, and 3) comprehensive demand-side programs' data management system Nexant, Inc. ("Nexant").

Table 3 summarizes for each of the sixteen (16) MEEIA Programs: Commissionapproved cumulative annual energy and demand savings targets, program implementers and program EM&V contractor:

| Table 3                                |  |  |                                  |                                |  |  |  |  |  |

#### III. <u>Prudence Review Process</u>

On June 4, 2018, Staff initiated its second prudence review of costs of KCPL's DSIM<sup>12</sup> in compliance with 4 CSR 240-20.093(10) as authorized under Sections 393.1075.3 and 393.1075.1, RSMo. This prudence review was performed by members of the Energy Resource Department of the Staff. Staff obtained and analyzed a variety of documents, records, reports, data request responses and work paper emails, and phone discussion with KCPL personnel to complete its prudence review of costs for the Rider DSIM for the Review Period of April 1, 2016 through March 31, 2018. In compliance with 4 CSR 240-20.093(10), this prudence review was completed within one-hundred-fifty (150) days of its initiation.

If the Commission were to order any disallowance of costs as a result of prudence reviews and/or corrections, such a disallowance amount shall be returned to customers through an OA in a Cycle 2 DSIM Rider rate adjustment filing.<sup>13</sup>

13 Staff Expert: Dana E. Eaves

IV. <u>Prudence Review Standard</u>

In State ex rel. Associated Natural Gas Co. v. Public Service Com'n of State of Mo.,
the Western District Court of Appeals stated the Commission defined its prudence standard
as follows:

[A] utility's costs are presumed to be prudently incurred.... However, the presumption does not survive "a showing of inefficiency or improvidence... [W]here some other participant in the proceeding creates a serious doubt as to the prudence of expenditure, then the applicant has the burden of dispelling these doubts and proving the questioned expenditure to have been prudent.

In the same case, the PSC noted that this test of prudence should not be based upon hindsight, but upon a reasonableness standard: [T]he company's conduct should be judged by asking whether the conduct was reasonable at the time, under all the circumstances, considering that the company had to solve its problem prospectively rather than in reliance on hindsight. In effect, our responsibility is to determine how reasonable people would have performed the tasks that confronted the company.

<sup>&</sup>lt;sup>12</sup> The first and second prudence reviews are in File Nos. EO-2016-0183 and EO-2017-0209, respectively.

<sup>&</sup>lt;sup>13</sup> Kansas City Power & Light Company, P.S.C. MO. No. 7, Original Sheet No. 49D: OA = Ordered Adjustment is the amount of any adjustment to the DSIM ordered by the Commission as a result of prudence reviews and/or corrections under this DSIM Rider. Such amounts shall include monthly interest at the Company's monthly Short-Term Borrowing Rate.

954 S.W.2d 520, 528-29 (Mo. App. W.D., 1997) (citations omitted).

In reversing the Commission in that case, the Court did not criticize the Commission's definition
of prudence, but held, in part, that to disallow a utility's recovery of costs from its ratepayers
based on imprudence; the Commission must determine the detrimental impact of that
imprudence on the utility's ratepayers. *Id.* at 529-30. This is the prudence standard Staff has
followed in this review. Accordingly, Staff reviewed for prudence the areas identified and
discussed below for KCPL's Rider DSIM.

### V. <u>Billed Revenue</u>

### 1. Description

For the Review Period, KCPL billed customers through a separate line item on customers' bills titled "DSIM Charge" to recover estimated energy efficiency programs' costs and estimated Company TD. The "DSIM Charge" is based on the customer's monthly consumption and the applicable energy efficiency investment rates approved by the Commission initially in Case Nos. EO-2015-0240, ER-2015-0141, ER-2015-0318, ER-2016-0147, ER-2016-0325, ER-2017-0167, ER-2017-0316, ER-2018-0152 and ER-2018-0357.

KCPL provided a random sample of customer actual bills<sup>14</sup> that Staff reviewed and
determined the appropriate rates were being charged to its customer for the recovery of program
and TD costs.

During PY2016 KCPL billed customers \$11,461,121 to recover its estimated energy efficiency programs' costs. For the same period, KCPL actually spent \$17,816,194 on its energy efficiency programs. Thus KCPL under-collected \$6,355,073 from its customers for programs' costs during the PY2016 with interest on the under-collected amount in the amount of \$27,210. During PY2016 KCPL billed customers \$1,871,681 for estimated Company TD. The actual Company TD for PY2016 was \$2,426,767. Thus, KCPL under-collected \$555,085 from its customers for Company TD during PY2016.

During the PY2017 KCPL billed customers \$22,870,857 to recover its estimated energy efficiency programs' costs. During PY2017, KCPL actually spent \$21,242,785 on its energy

<sup>&</sup>lt;sup>14</sup> KCPL's response to Staff's Data Request No. 0010.

efficiency programs. Thus, KCPL over-collected \$1,628,785 from its customers for programs' costs during the PY2017. During the PY2017, KCPL billed customers \$5,521,086 for estimated Company TD. The actual Company TD for the PY2017 was \$6,800,120. Thus, KCPL undercollected \$1,834,120 from its customers for Company TD during PY2017.

### **Summary of Cost Implications**

If KCPL was imprudent in its decisions relating to the determination of the "DSIM Charge" for customers' bills, ratepayer harm could result in an increase in billed revenue.

3. Conclusion

2.

Staff found no indication that KCPL has acted imprudently regarding the determination of the "DSIM Charge" for customers' bills.

#### VI. **Nexant Tracking Software**

#### 1. Description

KCPL contracted in January 2016 for an integrated software tracking system called 22 Nexant to allow KCPL to store, manage and process data for its DSM portfolio over each 23 programs' life-cycles for KCPL's Cycle 2 Plan. Nexant specifically allowed KCPL to develop operating rules for its approved energy efficiency programs, process customers' applications, 24 support processing and payment of incentives (rebates)<sup>15</sup> and provide regulatory compliance and 25 management reporting. Before KCPL contracted with Nexant it considered four vendors, and 26 27 Nexant was selected based on the best overall score for the criteria of meeting core requirements,

<sup>&</sup>lt;sup>15</sup> Incentives that are paid by the utility can be in the form of a fixed amount rebate, either direct payment to customers or through a store buy-downs.

company experience and performance, growth opportunity, pricing, diversity participation, and KCPL Information Technology involvement needed.

4

5

6

7

8

9

10

11

Staff reviewed the controls KCPL has developed to assure demand-side program incentive payments are accounted for properly. Staff also reviewed the incentive amounts paid to customers to make sure they complied with incentive levels for individual measures approved for each energy efficiency program. Data management and recordkeeping is critical for the proper administration of Rider DSIM. Staff found during its review that while some programs in Nexant reporting did match the incentives reported in the general ledger from Table 3, other programs did not match total incentives reported. However, KCPL provided in Data Request No. 0022 a reconciliation of incentives paid to residential and commercial customers for the Review Period.

The primary implementers that are able to use this tracking system are CLEAResult and ICF. CLEAResult uses all of the business programs and the Thermostat Programs, and ICF uses Home Lighting, Whole House Efficiency, and Income Eligible Multi Family Programs. For the low volume programs the incentive amounts and energy and demand savings amounts are manually put into the Nexant system.

17 KCPL granted Staff remote on-line access to the Nexant system for Staff's use in 18 conducting Staff's MEEIA prudence review. Staff reviewed a sample of customer data, incentive 19 levels, and annual energy and demand savings for all of KCPL's approved energy efficiency 20 programs. Staff found the Nexant system does not provide a complete auditable trail of costs 21 from time of application to time of payment of incentives. Staff had to rely on KCPL's general 22 ledger to accurately review program costs. Nexant allowed Staff to verify deemed annual energy 23 and demand savings at a total program level of detail. Staff had to request annual energy and 24 demand savings detail for each program to verify savings reported in Nexant matched the 25 savings in the Company's workpapers and Quarterly Surveillance Reports. Staff found there 26 were two programs, Business Thermostat and Residential Thermostat, which did not report 27 accurate savings in Nexant.

The Company has stated it has not utilized Nexant as much as it had hoped, but it continues to use a method of tracking and accounting for the savings and incentives for the thermostat programs. While the Company was able to verify and reconcile incentive levels and annual energy and demand savings for the programs, Staff recommends KCPL continue to develop the Nexant tracking system in such a manner to allow for all data associated with installed measures to be tracked through Nexant so KCPL can eliminate the current need of additional manual tracking processes outside of Nexant.

3

### 2. Summary of Cost Implications

If KCPL was imprudent in its decisions relating to the administration and implementation of the Nexant system, ratepayer harm could result in an increase in future DSIM Charge amounts.

#### 3. Conclusion

9 Staff found no indication that KCP&L has acted imprudently regarding the 10 implementation and administration of the Nexant system.

18 VII. <u>Actual Program Costs</u>

KCPL's program costs include incentive payments; program administration costs for
 residential and business programs; and strategic initiative program costs for general, accounting,
 regulatory, administrative, implementation, and marketing costs.

Staff reviewed all actual program costs KCPL is seeking to recover through its "DSIM Charge" to ensure only reasonable and prudently incurred costs are being recovered through the Rider DSIM. Staff reviewed and analyzed for prudency KCPL's adherence to contractual obligations, adequacy of controls, and compliance with approved tariff sheets. KCPL provided Staff with accounting records for all programs' costs it incurred during the Review Period. Staff categorized these costs by program and segregated them between incentive payments and program administrative costs. The results are depicted in Table 4 shown below.

#### rograms' Costs Anril 1, 2016 through March 31, 20

2

KCPL incurs administrative costs that are directly related to the implementation of its approved energy efficiency programs. Staff uses the term "administrative" to mean all costs other than incentives<sup>16</sup>. Staff reviewed each administrative category of cost to determine the reasonableness of each individual item of cost and if the costs being sought for recovery were directly related to energy efficiency programs and recoverable from customers through the "DSIM Charge".

KCPL provides incentive payments to its customers as part of its approved energy
efficiency programs. Incentive payments are an important instrument for encouraging investment
in energy efficient technologies and products by lowering higher upfront costs for energy
efficiency measures compared to the cost of standard measures. Incentive payments can also
complement other efficiency policies such as appliance standards and energy codes to help
overcome market barriers for cost-effective technologies.

KCPL has also developed internal controls that allow for review and approval at various stages of the accounting of costs for its energy efficiency programs. KCPL has developed internal procedures that provide program managers and other reviewers a detailed and approved method for reviewing invoices. KCPL provided a flowchart to explain the invoice receipt, approval, and payment process. KCPL also provided Staff with their policies related to reimbursement of employee-incurred business expenses and approval authority for business transactions.

Staff requested the Company provide invoices related to travel costs and promotional expenses. After reviewing these paid invoices, Staff finds that invoices and reimbursements which total \$3,036.97, as identified in the table below, were not related to the implementation of MEEIA programs and should not be recoverable through the KCPL's Rider DSIM.

<sup>&</sup>lt;sup>16</sup> Incentives are program costs for direct and indirect incentive payments to encourage customer and/or retail partner participation in programs and the costs of measures which are provided at no cost as part of a program.

### 3. Conclusion

Staff has identified entertainment/general expenses which are non-MEEIA related and should not be recoverable through the DSIM Charge. Staff is proposing the Commission order an Ordered Adjustment ("OA") for Staff's proposed disallowance of \$3,036.97 plus interest of \$79.80 through October 31, 2018, for a total disallowance of \$3,116.77.

#### **C.** Implementation Contractors

#### 1. Description

KCPL hired business partners for design, implementation and delivery of its portfolio of residential and business energy efficiency programs to customers. Contracting with competent, experienced and reliable program implementers is extremely important to the success of KCPL's energy efficiency programs and for affording KCPL's customers the greatest benefits.

KCPL issued RFPs for program implementers to directly administer one or more of KCPL's energy efficiency programs. KCPL selected and contracted with the organization identified in Table 2 to implement individual MEEIA Programs. All of the implementers identified on Table 2 are nationally recognized contractors that have credible histories of energy efficiency programs' design and implementation.

Staff reviewed KCPL's relationship with its implementers to gauge if KCPL acted prudently in the selection and oversight of its program implementers. Staff examined the contracts between KCPL and the implementers in an effort to determine if the terms of the contract were followed during the implementation of the residential and business programs. Staff also reviewed a large sample of over 400 invoices paid to the implementers identified in Table 2, and reconciled these costs to the general ledger, program costs in Data Request No. 0018.

Comparing actual cumulative deemed annual energy and demand savings relative to the
planned cumulative annual energy and demand savings for the same period is important to
understanding the overall performance of KCPL's energy efficiency programs and its
implementation contractors.

Table 6 below provides a comparison of achieved energy and demand savings and planned deemed energy and demand savings for KCPL's residential and business programs for the Review Period. If KCPL was unable to achieve its planned energy and demand savings levels, that could be an indication the programs were not being prudently administered by the implementers and by KCPL. Although some of KCPL's individual programs did not meet energy savings targets, the programs total achieved performance allowed KCPL to meet and exceed its overall energy efficiency portfolio annual energy saving and demand savings targets.

### **D.** Marketing

### 1. Description

KCPL provided Staff with its general ledger of all MEEIA related program costs for April 1, 2016 – March 31, 2018, and Staff reviewed these costs for prudency. Staff was able to sort costs by program. KCPL also provided Staff with invoices to support marketing payments. From these invoices, Staff reviewed KCPL's marketing related expenses from April 2016 through March 2018. During the Review Period, KCPL spent a total of \$1,794,693.45 on marketing related to its MEEIA Programs. The Company used various media sources and third party vendors to promote its MEEIA Programs. KCPL's advertising vendors included Global Prairie, ICF Resources, Harvest Graphics, and Clearesult Consulting. For the determination of prudence in this case the Staff utilized the Kansas City Power and Light advertising standard that was adopted by the Commission in Case No. EO-85-185 et al. The commission has recognized the following five categories to determine the treatment of allowing or disallowing advertising expenses:

- 1. General: informational advertising that is useful in the provision of adequate service;
- 2. Safety: advertising which covers the ways to safely use electricity and to avoid accidents;
- 3. Promotional: advertising used to encourage or promote the use of electricity;
- 4. Institutional: advertising used to improve the company's public image; and
- 5. Political: advertising associated with political issues.

The Commission utilized these categories of advertising expenses to explain that a utility's revenue requirement should always include the reasonable and necessary cost of general and safety advertisements; never include the cost of institutional or political advertisements; and include the cost of promotional advertisements only to the extent the utility can provide costjustification for the advertisements.

The Commission utilized these categories of advertising expenses to explain that a utility's revenue requirement should always include the reasonable and necessary cost of general and safety advertisements; never include the cost of institutional or political advertisements; and include the cost of promotional advertisements only to the extent the utility can provide cost-justification for the advertisements.

Based on Staff's application of the Commission's past treatment of advertising in previous general rate cases, Staff is proposing a disallowance of costs contained in Table 7 because they fall into the Institutional category and are non-MEEIA related.

|                    |                   | TOTAL                   | \$82,062.56                                      |   | \$44,355.89            |

### 2. Summary of Cost Implications

If KCPL was imprudent in its decisions related to management of its marketing for the MEEIA Programs, ratepayer harm could result in an increase in future DSIM Charge amounts.

#### 3. Conclusion

Staff finds that some promotional giveaway expenses are non-MEEIA related (i.e., promotional give-away items and should be disallowed: wristbands, pens, mini-fans, antistress spinners). Costs of these items should not be recoverable through the DSIM Charge. Therefore, Staff is proposing an adjustment of \$44,355.89 plus interest of \$1,008.38 through October 31, 2018, for a total proposed disallowance of \$45,364.27.

### E. Evaluation, Measurement and Verification Contractors

### 1. Description

KCPL is required to hire independent contractor(s) to perform and report EM&V of each Commission-approved demand-side program. Commission rules allow KCPL to spend approximately 5% of its total program costs budget for EM&V.<sup>17</sup> Navigant Consulting, Inc. ("Navigant") conducted and reported the EM&V results for KCPL's Cycle 2 demand-side programs.

B During the Review Period, KCPL expended \$1,433,186 for EM&V, which represents
3.67% of the \$39,058,980 total programs' costs. Thus, the costs associated with the EM&V did
not exceed the 5% maximum cap.

11

1 2

3

4

5

6

7

### Summary of Cost Implications

If KCPL was imprudent in its decisions relating to the selection and supervision of its
 EM&V contractors then ratepayer harm could result in an increase in future DSIM Charge
 amounts.

3. Conclusion

2.

4.

Staff found no indication that KCPL has acted imprudently regarding the selection andsupervision of its EM&V contractors.

### 24 VIII. <u>Throughput Disincentive</u>

- A. Actual TD
- 1. Description

For a utility that operates under a traditional regulated utility model a "throughput incentive" is created when a utility's increase in revenues is linked directly to its increase in

<sup>&</sup>lt;sup>17</sup> 4 CSR 240-20.094(7)(A) Each utility's EM&V budget shall not exceed five percent (5%) of the utility's total budget for all approved demand-side program costs.

sales. This relationship between revenues and sales creates a financial disincentive for the utility to engage in any activity that would decrease sales, such as utility sponsored energy efficiency programs.

The TD allows the utility to recover its lost margin revenues associated with the successful implementation of the MEEIA programs. The TD calculation is described in KCPL's tariff Sheet Nos. 49I through 49L and tariff Sheet No. 49P (for the net margin revenue rates). Generally the TD for each program is determined by multiplying the monthly energy savings<sup>18</sup> by the net margin revenue rates and by the initial net to gross factor of 0.85 for contemporaneous TD recovery.

10 Staff has verified each component of the TD calculation that was provided by KCPL in the Quarterly Surveillance Reports, Page 6. Staff has also verified the TD calculation 11 12 workpapers, and compared the kWh savings impact and TD with the MEEIA rate adjustment 13 filings, along with the Quarterly Surveillance Reports. Staff found no discrepancies in the 14 reconciliation between KCPL's TD calculation workpapers, Quarterly Surveillance Reports, and 15 the MEEIA rate adjustment filings. The MEEIA rate adjustment filings and the Quarterly 16 Surveillance Reports both demonstrate TD that customers are responsible for paying is \$9,226,856. 17

#### **B.** Gross Deemed Annual Energy and Demand Savings

#### 1. Description

Staff reviewed the monthly calculation of kWh savings from KCPL's MEEIA Programs calculated with the Nexant software. KCPL provided Staff its Nexant software program files to show how the kWh savings were calculated during the Review Period. Staff chose a sample of monthly measure counts actually installed for each program. From this sampling Staff was able to verify KCPL's actual gross deemed annual energy savings calculations for the Review Period.

To begin its review of KCPL's calculations of its monthly kWh savings for the Review Period, Staff reviewed the version of Nexant that KCPL provided to Staff to verify that it is the same version of the TRM specified in the First Stipulation. The version used in the Nexant software does agree to the TRM values used in the First Stipulation<sup>19</sup>.

The Company provided tab "TRM comparison" which supports the kWh savings based on standard measures. This tab has a pivot table of the detail project savings pulled from Nexant with a calculation of the kWh and kW savings per measure set alongside a pivot of measures from the TRM. Staff was able to match every line of measure savings reported to the TRM.

To review the usage of the same values for calculated kWh savings, Staff compared the "TRM comparison" tabs in each Nexant's programs' batch files located in the CD provided for supplemental Data Request No. 0012. The programs' batch files provided was only for the programs based on standard measures. Staff did not find any incorrect values for kWh savings for the programs with standard measures. However, Staff did find different values for the Thermostat programs when reconciling the Data Request No. 0012 TD calculation and Nexant. The Company told Staff the Nexant data is not complete for the Thermostat programs, and the TD calculation workpapers are correct.

Then, Staff performed KCPL's monthly programs benefits calculations using Nexant software the Company provided in Data Request No. 0012 supplemental response. In these files, Staff was provided with the kWh per unit, kW per unit, the library measure name, and the quantity installed. Staff was able to calculate the kWh calculated savings by using this

29

1

2

<sup>&</sup>lt;sup>19</sup> The TRM was updated April 7, 2017.

information. Staff was then able to verify this information to the original Data Request No. 0012, TD calculation kWh savings at the meter. Staff was also able to verify the kWh per unit and kW per unit, for each measure, with the updated TRM the Company also provided on the CD for supplemental Data Request No. 0012.

To calculate an aggregated deemed energy and demand savings for the MEEIA programs, Staff followed the procedures as detailed for each program in the First Stipulation. With these procedures, Staff was able to verify the reported 231,840,625 kWh of energy savings and 69,967 kW of demand savings for the MEEIA Programs during the Review Period. Staff was able to verify this by reconciling the Quarterly Surveillance Reports, the Nexant data base, and the Company's workpapers provided.

#### 2. Summary of Cost Implications

If KCP&L was imprudent in its decisions related to calculating the gross energy and
demand savings of each program, ratepayer harm could result in an increase in future DSIM
Charge amounts.

15

3. Conclusion

4.

Staff found no indication that KCPL has acted imprudently regarding the calculation ofthe gross energy and demand savings.

### 25 IX. Earning Opportunity ("EO")

1. Description

KCPL's EO is designed to provide a substitute for earnings lost on physical plant that
was not built by KCPL because of KCPL's MEEIA DSM programs. In KCPL's First Stipulation,
EO will be determined at the conclusion of the current MEEIA cycle and upon full retrospective
EM&V. Also, KCPL's Original Sheet No. 49H defines EO as:

| 1<br>2<br>3<br>4<br>5<br>6<br>7 | Commission b<br>planned target<br>targets are acl<br>for TD verifie<br>are described | ings Opportunity" (EO) means the incentive ordered by the<br>based on actual performance verified through EM&V against<br>s. The Company's EO will be \$7.4M if 100% of the planned<br>nieved. EO is capped at \$15.5M, which reflects adjustment<br>ed by EM&V. Potential Earnings Opportunity adjustments<br>on Sheet No. 49M. The Earnings Opportunity Matrix<br>bayout rates, weightings, and caps can be found in 49P. |
|---------------------------------|--|---|
| 8                               | For this review period an EO   | has not been awarded, therefore a review of the EO component was  |
| 9                               | not performed.   |   |
| 10                              | 2. Summary of  | Cost Implications   |
| 11                              | If KCPL was imprud   | lent in its reporting and/or calculating of the EO ratepayer harm   |
| 12                              | could result in an increase in   | future DSIM Charge amounts.   |
| 13                              | <b>3.</b> Conclusion   |   |
| 14                              | Staff has verified that  | t KCPL is not seeking any recovery of an earnings opportunity in  |
| 15                              | this Review Period.  |   |
| 16                              | 5 4. Documents R   | eviewed   |

|                                 |  |   |
| 21                              | X. <u>Interest Costs</u>   |   |
| 22                              | 1. Description   |   |
| 23                              | During the Review Pe   | eriod KCPL reported the interest amount accrued for the Company's   |
| 24                              | Cycle 2 program costs and T  | D as reported on Page 6 of KCPL's March 31, 2018 QSMR had a   |
| 25                              | cumulative balance of \$264  | ,849 and \$54,831 <sup>20</sup> , respectively. Because KCPL under-recovered  |
| 26                              | program costs and TD from  | customers, the cumulative interest amount as of March 31, 2018  |

27 would be included by KCPL in its DSIM Rider.

<sup>&</sup>lt;sup>20</sup> Staff found that ending interest balance March 31, 2018 balance was correct, however some period totals were not reported correctly or did not contain the appropriate footnote describing the error and subsequent correction in KCPL's Quarterly Surveillance Monitoring reports.

The First Stipulation provides that for program costs and TD: "To the extent that KCP&L/GMO has over-recovered, such over-recoveries shall be returned to customers with interest at KCP&L/GMO's short-term borrowing rate. To the extent that KCP&L/GMO has under-recovered, such under-recoveries shall be recovered from the customers with interest at KCP&L/GMO's short-term borrow rate"<sup>21</sup>

Because KCPL under-recovered program costs and TD from customers, the interest amount as of March 31, 2018 would be included in regulatory liability balance (with interest) as of the end of the last period used to update or true-up the test year used for setting new electric rates in such a general electric rate proceeding shall be amortized over three years and the resulting annual amount included in the revenue requirement used to determine base rates in that general electric rate proceeding.

11

### Summary of Cost Implications

If KCPL was imprudent in its reporting and/or calculating of the interest associated to
 over- or under-recovery of energy efficiency programs' costs and/or Company TD, ratepayer
 harm could result in an increase in future DSIM Charge amounts.

16

2.

4.

### 3. Conclusion

Staff has verified that KCPL interest calculations and interest amounts for inclusion in its March 31, 2018, SMR are correct and are calculated properly on a monthly basis as provided in the response provided in Staff Data Request No. 0004 for the review period.

Footnotes:

(1) Actual program costs incurred.

(2) Target energy savings (kWh) savings.

(3) Target demand savings (kW) savings.

(4) Actual demand and energy savings.

(5) Throughput disincentive on kWh savings at NTG Factor of 85%.

(6) Under- or (over) collection.

(7) Carrying costs on under- or over-collection at short-term borrowing rate.
