DIRECT TESTIMONY

OF

BRIAN W. LAGRAND

ON BEHALF OF

MISSOURI-AMERICAN WATER COMPANY

AFFIDAVIT

I, Brian W. LaGrand, under penalty of perjury, and pursuant to Section 509.030, RSMo,

state that I am Director of Rates and Regulatory Support for Missouri-American Water Company,

that the accompanying testimony has been prepared by me or under my direction and supervision;

that if inquiries were made as to the facts in said testimony, I would respond as therein set forth;

and that the aforesaid testimony is true and correct to the best of my knowledge and belief.

Brian W. LaGrand

BRIAN W. LAGRAND

I. INTRODUCTION

- 1 Q. Please state your name and business address.
- 2 A. My name is Brian LaGrand, and my business address is 727 Craig Road, St. Louis,
- 3 MO, 63141.
- 4 Q. By whom are you employed and in what capacity?
- 5 A. I am employed by Missouri-American Water Company ("MAWC", "Missouri-
- 6 American" or the "Company") as the Director of Rates and Regulatory Support.
- 7 Q. Please summarize your educational background and business experience.
- 8 A. I received a Master of Business Administration degree from Washington University in 9 St. Louis in 1998, with a concentration in Finance, and a Bachelor of Science in
- Business Administration degree from the University of Dayton in 1993, with a major
- in Accounting. After graduation from the University of Dayton, I was licensed in Ohio
- as a Certified Public Accountant, and was employed as an Auditor by J.D. Cloud and
- Associates until 1996. After graduating from Washington University, I spent two years
- 14 at May Department Stores Company in the Capital Planning & Analysis department,
- focusing on the evaluation of capital investments. In 2000 I began working for
- Anheuser-Busch Companies as a Financial Analyst in the Treasury Group. My
- 17 responsibilities included managing the foreign currency derivative portfolio in Risk
- Management and running the commercial paper and share repurchase programs in
- 19 Corporate Finance. In 2005 I moved into the Business & Wholesaler Development

Group as a Sr. Business Analyst, where I worked on acquisitions of craft breweries and competitive analysis. In 2010 I joined American Water Works Service Company, Inc.

("Service Company") as a Manager in the Corporate Finance Group. My focus has included evaluation of acquisition opportunities across the country and the execution of many acquisitions, including several in Missouri. In November of 2016, I was promoted to my current position as Director of Rates and Regulatory Support for MAWC.

Q. What are your current employment responsibilities?

9 A. My responsibilities as Director of Rates and Regulatory Support include the following: 10 1) preparing and presenting all rate change applications and supporting documents and 11 exhibits as prescribed by management policies, guidelines and regulatory commission 12 requirements; 2) preparing rate analyses and studies to evaluate the effect of proposed 13 rates on the revenues, rate of return and tariff structures; 3) executing the 14 implementation of rate orders, including development of the revised tariff pricing 15 necessary to produce the proposed revenue level; 4) overseeing the preparation of 16 revenue and capital requirements analyses; and 5) providing support for financial 17 analyses, including preparation of applicable regulatory commission filings.

18 Q. Are you generally familiar with the operations, books and records of MAWC?

19 A. Yes.

8

20 Q. Have you previously testified before a regulatory body?

21 A. Yes, I provided testimony before the Missouri Public Service Commission 22 ("Commission") in several cases. Additionally, I have testified before the Illinois 1 Commerce Commission. A list of the cases is attached as Schedule BWL-1.

2	O.	What is the	purpose of your	Direct Testimon	v in this	nroceeding?
_	~•	I I III III CIIC	parpose or jour	Direct restimon	,	proceduring.

- 3 A. The purpose of my Direct Testimony is primarily to support MAWC's proposed 4 revenue requirement. The revenue requirement determines the level of revenues 5 required to pay operating expenses, to provide for depreciation and taxes, and to permit MAWC's investors an opportunity to earn a fair and reasonable return on their 6 7 investment. Related, I will introduce and sponsor the minimum filing requirements, 8 attached as Schedule BWL-2, which are required by Commission Rule 20 CSR 4240-9 3.030. Additionally, I will support capital structure, rate base, rate design, tariff group 10 consolidation, miscellaneous fees, MAWC acquisitions, rate case expense, regulatory 11 treatment of lead service line replacement, property taxes and credit card fees.
- 12 Q. Are you sponsoring any Schedules with your Direct Testimony?
- 13 **A.** Yes. I am sponsoring the Company Accounting Schedules ("CAS"), attached as
 14 Schedule BWL-3. These Schedules support MAWC's revenue requirement calculation
 15 for this case including the following:
- CAS-1: Summary of Revenue Requirement
- CAS-2: Pro Forma Income Statements
- CAS-3: Rate Base summary
- CAS-4: Utility Plant in Service
- CAS-5: Accumulated Depreciation
- CAS-6: Customer Advances and Contributions in Aid of Construction
- CAS-7: Working Capital

1		• CAS-8: Pro Forma Adjustments to Revenue
2		• CAS-9: Summary of Operating and Maintenance Expenses, Depreciation,
3		Amortization and General Taxes
4		• CAS-10: Pro Forma Current State and Federal Income Taxes at Present and
5		Proposed Rates
6		• CAS-11 & CAS 12: Test Year Operating Revenues at Present Rates vs
7		Proposed Rates
8		• CAS-13: Summary of Adjustments to Operations and Maintenance Expenses,
9		Depreciation, Amortization and General Taxes
10		II. COVID-19 EMERGENCY
11	Q.	Have any impacts of the COVID-19 Emergency been included in this filing?
12	A.	There have not been any specific adjustments made to the test period to reflect the
		impact of the COVID-19 emergency. However, the Company anticipates that there

114 115 116 117 118		will be increased O&M expenses and lost revenues beginning in March, 2020, continuing through the end of the COVID-19 emergency, and likely beyond. How does the Company plan to account for these incremental impacts from COVID-19? The Company intends to address the incremental cost and revenue impacts in the Company's request for an Accounting Authority Order in Case No. WU-2020-0417,

1 III. TEST PERIOD 2 0. What test period is MAWC proposing in this case? 3 A. Contemporaneously with the filing of this case, MAWC has filed a Motion requesting 4 future test year consisting of the twelve months ending May 31, 2022. 5 Q. What periods will MAWC be presenting in this case? 6 A. For all schedules, MAWC will provide information for two time periods: 7 1. Historical test year – 12 months ended December 31, 2019; and, 8 2. Future test year -12 months ended May 31, 2022. 9 Q. What methodology did the Company use in preparing the test years? 10 A. In general, the base year expenses (12 months ended December 31, 2019) were updated 11 to include known and measurable changes, adjusted based on Company experience, or 12 adjusted based on an inflation factor annualized, through a verifiable link period ending 13 May 31, 2021. The Company then used a monthly projection for the 12 months ended 14 May 31, 2022 (the "future test year") using known and measurable changes, 15 adjustments based on Company experience, or adjustments based on an inflation factor. 16 Specific adjustments to expense accounts are described in greater detail in the Direct 17 Testimony of Company witnesses Nikole Bowen and Todd Wright. 18 For rate base, the future test year shows an average rate base for the 13 months ended 19 May 31, 2022. Specific adjustments to rate base are described later in my Direct Testimony. 20

Has MAWC supported its proposed future test year in this case?

21

Q.

- 1 A. Yes. Company witness John Watkins supports the proposed fully forecasted future test
- 2 year in his Direct Testimony.

3

IV. COMPANY ACCOUNTING SCHEDULES

- 4 Q. How are the Company's accounting schedules presented?
- 5 A. All CAS are presented for the total Company, total water operations, total sewer
- 6 operations, and for the two proposed sewer districts, Arnold and Small Sewer.
- 7 Q. Please describe CAS-1.
- 8 CAS-1 is a summary Schedule for the overall revenue requirement, rate deficiency and A. 9 the requested rate increase. This Schedule summarizes the financial information needed 10 to calculate the Company's revenue deficiency. The revenue requirement calculation 11 was determined by multiplying the Company's pro forma rate base by the requested 12 rate of return to derive the required operating income. The recommended 7.78% 13 overall rate of return is based upon a 10.50% common equity return requirement, as 14 supported by the Direct Testimony of Company witness Ann Bulkley. The operating 15 income requirement is then compared to pro forma operating income at present rates to 16 determine the Company's operating income deficiency. When the operating income 17 deficiency is multiplied by the gross revenue conversion factor that adjusts for income 18 taxes and uncollectibles, the result is a revenue deficiency. The revenue deficiency is 19 then added to the adjusted operating revenue to arrive at the total revenue requirement.
- 20 O. Please describe CAS-2.
- 21 A. CAS-2 is the pro forma income statement at present rates and at proposed rates.

- 1 Q. Please describe CAS-3.
- 2 A. CAS-3 is a summary of rate base items. The Schedules include Net Utility Plant; less:
- 3 Customer Advances, Contributions in Aid of Construction, Deferred Income Tax
- 4 Credits, Deferred Income Taxes and Pension & OPEB tracker; plus: Cash Working
- 5 Capital, Materials & Supplies, Pension Asset, and Regulatory Deferrals.
- 6 Q. Please describe CAS-4.
- 7 A. CAS-4 is a schedule of Utility Plant in Service, presented in National Association of
- 8 Regulatory Utility Commissioners ("NARUC") Uniform System of Accounts format.
- 9 Q. Please describe CAS-5.
- 10 A. CAS-5 is a schedule of Accumulated Depreciation Reserve, presented in NARUC's
- 11 Uniform System of Accounts format.
- 12 O. Please describe CAS-6.
- 13 A. CAS-6 is a schedule of Customer Advances and Contributions in Aid of Construction,
- presented in NARUC's Uniform System of Accounts format.
- 15 Q. Please describe CAS-7.
- 16 A. CAS-7 is a summary of the Company's cash working capital needs.
- 17 Q. Please describe CAS-8.
- 18 A. CAS-8 is a summary of the test year revenues by revenue classification, the adjustments
- to these amounts, and the pro forma revenue at present rates.
- 20 Q. Please describe CAS-9.

- 1 Α. CAS-9 is a summary of the operating and maintenance expense categories and general 2 taxes for the test year, the adjustments to those amounts, and the pro forma expense 3 levels under present rates. 4 Q. Please describe CAS-10. 5 A. CAS-10 provides the Company's income tax calculation. Please describe CAS-11 and CAS-12. 6 Q. 7 A. CAS-11 and CAS-12 present a summary of the Company's pro forma test year
- 9 Q. Please describe CAS-13.

8

18

10 A. CAS-13 includes a narrative discussion of the various pro forma operating expense 11 adjustments developed for this case.

12 <u>V. ACQUISITIONS</u>

revenues at both present and proposed rates.

- Q. During or subsequent to the base year, did MAWC enter into asset purchase agreements with other utilities?
- 15 A. Yes. During and subsequent to the base year, MAWC closed on several small acquisitions that qualified under the small systems legislation (Section 393.320.1(2),
- 17 RSMo) as small systems (less than 8,000 customers). Thus, these small systems shall,

for ratemaking purposes, become part of an existing service area:

- 19 1. Spokane Highlands (WM-2018-0104), closed April 3, 2018
- 20 2. City of Lawson (WA-2018-0222 and SA-2018-0223), closed August 31, 2018
- 21 3. Rogue Creek (WM-2019-0018 and SM-2019-0019), closed December 14, 2018

2		5. Timber Springs (SA-2019-0183), closed May 17, 2019
3		6. El Chaparrel Sewer (PSC approval not required), closed June 10, 2019
4		7. Hillers Creek (SA-2019-0334), closed August 12, 2019
5		8. Austin Trails (PSC approval not required), closed December 10, 2019
6	Q.	Which existing service areas are the small system acquisitions combined with for
7		ratemaking purposes?
8	A.	All water system acquisitions are combined with MAWC's consolidated water tariff
9		group. All sewer system acquisitions are combined with MAWC's small sewer tariff
10		group.
11	Q.	Does the Company expect to close any additional acquisitions before the
	Ž.	
12		completion of this rate proceeding?
13	A.	Yes. The Commission has granted the Company a Certificate of Convenience and
14		Necessity associated with the proposed acquisition of the assets of Clinton Estates
15		Sewer (Case No. SA-2020-0132). The Company expects to close that transaction in
16		mid-2020.
17	Q.	Did the Company also reflect operating revenues and expenses associated with the
	Q.	
18		operation of these assets in its rate filing?
19	A.	Yes. The Company acquired the available financial records of each of these entities,
20		analyzed their accounts, and, to the extent necessary, translated income statement
21		values into accounts to be consistent with MAWC's chart of accounts. These values
22		were included as initial pro forma adjustments to the Company's base year financial
		D. OMAWO DELLORAND

Golden Acres (PSC approval not required), closed February 3, 2019

1

4.

- statements and then further adjusted for any known and measurable changes that will occur under the Company's ownership.
- Q. In making those further adjustments, were the same methods utilized for adjusting the Company's existing financial statements?
- 5 A. Yes, to the extent possible. Where sufficient information was not available to use the same method, an alternative method was employed, or the test year was left unadjusted.
- Q. Have all of the acquisitions previously approved by the Commission closed at the time of the filing of your Direct Testimony?
- 9 A. No. Clinton Estates (Case No. SA-2020-0132) is expected to close in the third quarter of 2020.

VI. REVENUE REQUIREMENT

12 Q. What is the revenue requirement MAWC is proposing in this case?

11

MAWC proposes an overall revenue requirement of \$421,171,698, which is a 13 A. 14 \$102,915,538 (32.3%) increase over the \$318,256,160 revenue level authorized in 15 MAWC's last general rate case (Case No. WR-2017-0285). Pro-forma revenues at current rates are \$313,662,858, and produce a revenue deficiency of \$107,508,840. 16 17 Any Infrastructure System Improvement Surcharges ("ISRS") that have been allowed 18 in Case Nos. WO-2017-0393, WO-2018-0184, WO-2018-393 and WO-2020-0190, 19 will be reset to zero once new rates go into effect per 20 CSR 4240-3.650. This results 20 in a base rate revenue deficiency of \$104,879,812 for the Consolidated Water Tariff 21 Group, (\$196,896) for the Arnold Sewer Tariff Group and \$2,825,924 for the Small 22 Sewer Tariff Group.

- 1 Q. Does the proposed overall revenue requirement include the impact of investments
- 2 that would normally be recovered by the existing ISRS program?
- 3 A. Yes. Since the Company's last rate case, through the period ended May 31, 2022, the
- 4 Company has invested or will invest \$949,650,151 in its water and sewer facilities.
- Investments that are currently included in ISRS are 26.5%, or \$251,915,735 of the total
- 6 amount. The revenue requirement on the ISRS investments currently in rates is
- 7 \$29,420,274. The Company expects to reach the ISRS cap of \$31,825,616 prior to the
- 8 effective date of new rates in this case. Including the annualized ISRS revenues
- 9 collected under that program, the proposed revenue increase over the revenue
- authorized in the last rate case plus authorized ISRS is 20.3%

11 Q. Will the Company still file ISRS cases to recover those investments?

- 12 A. No. If the ISRS-eligible investments through May 31, 2022 are allowed in base rates,
- the Company will not seek recovery of ISRS eligible plant through ISRS until after the
- future test year.

15 Q. What is meant by the term "revenue requirement"?

- 16 A. I refer to the utility's "revenue requirement" as the sum of its operations and
- maintenance expenses, depreciation expense, income taxes and taxes other than income
- taxes, combined with a fair return on the utility's rate base. The revenue requirement
- is determined based on utility revenue and expenses during a "test year", in this case
- the future test year, as well as an average of the utility's rate base during that same
- forecasted year. To the extent the revenue requirement exceeds the utility's test year
- revenues, a revenue deficiency exists, and a rate increase is required.

1 Q. Please describe the basic steps utilized in calculating the revenue requirement.

A.

A. Revenues and most expenses are forecasted for the future test year for each of the proposed tariff groups. Some MAWC expenses that are not directly attributable to the tariff groups, such as some employee benefits, insurance other than group, and state and federal income taxes, are allocated among the three tariff groups. Service Company costs are also allocated to each of the tariff groups. Similar to revenues and expenses, rate base is forecasted for each of the tariff groups for the future test year, adding planned plant additions through May 31, 2022, to actual plant balances as of December 31, 2019. Some plant, such as the Company's administrative office, is allocated to each of the tariff groups. In this manner, we are able to determine revenue requirements for each of the tariff groups, as described previously. Adjustments to rate base are more fully described later in my Direct Testimony.

13 Q. Please discuss the derivation of state and federal income tax expense.

Generally, the amount of state and federal income tax expense included in the revenue requirement are calculated by applying statutory state and federal income tax rates to operating income before income taxes. The calculation of future test year income tax expense is shown on Schedule CAS-10. Income taxes are discussed more fully in the Direct Testimony of Company witness John Wilde.

VII. CAPITAL STRUCTURE AND COST OF DEBT

20 Q. How did you determine the capital structure for MAWC?

A. As a starting point, the MAWC capital structure is based on the actual capital structure as of December 31, 2019. The component balances in that capital structure were then

adjusted to reflect all changes expected to occur by May 31, 2022, because this
proceeding will set rates for future service at this period. The capital component
balances were calculated using 13-month averages for the future test year. The pro
forma changes made to each capital component are discussed below. The weight
average cost of capital ("WACC") for the future test year reflects the use of a thirteenmonth average to compute the cost and balance for each capital component.

Q. What is the pro forma May 31, 2022 capital structure for MAWC?

7

13

14

15

16

17

18

19

20

21

22

A.

A. The pro forma May 31, 2022 capital structure is composed of 47.0% long-term debt and 53.0% common equity, as shown on Schedule BWL-4, page 1. This capital structure should be used to calculate the WACC because it reflects the capital that will be in place to fund the Company's rate base during the period time rates will be in effect.

Q. Were any pro forma adjustments made to MAWC's principal amount of longterm debt?

Yes. The Company's pro forma principal amount of long-term debt at May 31, 2022 reflects four long-term debt issuances that are projected to occur during the forecast period. The first issuance, in the amount of \$110,000,000, was executed on April 14, 2020. This was a thirty-year taxable bond issued through American Water Capital Corp. ("AWCC"), which is American Water's financing subsidiary. The interest rate on this new issuance is 3.45%. The second is a \$10,315,000 issuance with a projected closing date of June 30, 2020. This loan will be through the Missouri Department of Natural Resources ("DNR"), funded by Drinking Water Refunding Revenue Bonds

(State Revolving Funds Program), and secured by a general mortgage indenture. The term of the loan is twenty years, with an expected interest rate of 1.28%, and issuance costs assumed to be 0.5% of the face amount. The third and fourth long-term debt financings are expected to be taxable bonds issued through AWCC. These are planned for mid-May 2021 and mid-May 2022 in the amounts of \$50,000,000 and \$145,000,000, respectively. The assumed interest rates are 3.117% for the May 2021 issuance and 3.163% for the May 2022 issuance. Issuance costs are projected to be 1.04% for each of the new bonds. In addition, MAWC's long-term debt carrying value was adjusted to reflect the amortization of debt issuance expense and debt discount that will occur during the pro forma period. The pro forma carrying value of long-term debt at May 31, 2022 is \$874,458,509, as shown on Schedule BWL-4, pages 1 and 7. This balance reflects the use of 13-month average balances for face amount outstanding, unamortized debt expense, and unamortized debt discount for the future test year ending May 31, 2022.

15 Q. What is MAWC's cost of long-term debt?

- A. MAWC's cost of long-term debt for the future test year ending May 31, 2022 is 4.70%, as shown on Schedule BWL-4, pages 1 and 7. The computation of this cost is shown on Schedule BWL-4, page 7.
- 19 Q. Please explain the pro forma adjustment made to MAWC's preferred stock20 balance.
- A. The calculation begins with the Company's preferred stock balance as of December 31, 2019, which was \$250,000, and is adjusted to reflect the annual sinking fund payment

of \$250,000 that will occur on November 1, 2020. After this sinking fund payment is recorded, the Company's outstanding preferred stock balance will be zero. Thus, the Company's pro forma adjusted preferred stock balance and cost of preferred stock are both zero for the future test year ending May 31, 2022, as shown on Schedule BWL-4, page 11.

Q. Please explain the pro forma adjustments that were made to MAWC's common equity balance.

Starting with the Company's actual common equity balance at December 31, 2019, the pro forma adjustments reflect total equity infusions of \$183,000,000 planned to occur through May 31, 2022. The first of the planned equity infusions, in the amount of \$40,000,000, occurred on May 31, 2020. The table below lists the amount and timing of the equity infusions:

Date	Amount
05/31/20	\$40,000,000
09/30/20	40,000,000
12/31/20	50,000,000
03/31/21	35,000,000
03/01/22	18,000,000
Total	\$183,000,000

A.

These equity infusions will be in the form of paid-in capital from MAWC's parent, American Water. American Water currently owns 100% of the outstanding common stock of MAWC. The funds from this equity infusion will be used to pay down short-term debt that had been employed to temporarily fund additions to utility property.

- 1 Q. Did MAWC refinance some portion of its debt in the third quarter of 2017?
- 2 A. Yes. On September 13, 2017, MAWC refinanced a portion of its 3.40% AWCC Note
- 3 in the amount of \$20,000,000.
- 4 Q. Were the terms of this refinancing presented in the Company's 2017 rate case?
- 5 A. Yes. The terms of the refinancing were provided in the Rebuttal Testimony of Mr. Scott
- 6 Rungren in that proceeding.¹
- 7 Q. Are there factors that should be noted about that refinancing in this proceeding?
- 8 A. Yes, there are. As noted in Mr. Rungren's Rebuttal Testimony in that case,
- 9 \$11,000,000 of the \$20,000,000 AWCC Note was refinanced from the rate of 3.40%
- to the new rate of 2.95%. The face amount of the new AWCC Note was \$12,646,633,
- which included a make-whole premium of \$1,646,633.²
- 12 Q. What is a make-whole provision?
- 13 A. A make-whole provision is a term in the financing agreement that requires a payment
- to be made to bondholders for the ability to call and refund a bond prior to maturity.
- This is a premium that arises from the early retirement of a bond that carries such a
- 16 provision. The make-whole provision associated with a bond requires an upfront
- payment to bondholders when calling and refunding the debt before maturity.
- 18 Q. Why would a company refinance debt and be subject to a make-whole premium?
- 19 A. Typically, the decision would be made to refinance a bond with a make-whole premium

Page 16 MAWC – DT LAGRAND

¹ Case Nos. WR-2017-0285/SR-2017-0286, Rebuttal Testimony of Scott W. Rungren, at pp. 3-4.

 $^{^{2}}$ Id.

1 if the refinancing cost structure is at a lower interest rate that sufficiently recovers the 2 cost of the make-whole premium.

3 Q. Was the debt that MAWC refinanced in 2017 at a rate that was low enough to 4 make up for the make-whole premium?

15

16

A. Yes. In the case of that 2017 refinancing, the cost of the make-whole premium to retire \$11,000,000 of the \$20,000,000 note was \$1,646,633.³ The refinancing reduced the cost of this debt from 3.40% to 2.95%. The make-whole payment was included in the face amount of the new debt issuance. The new debt was issued by AWCC to MAWC on September 13, 2017 in the amount of \$12,646,633, and at a rate of 2.95%. The amount borrowed equaled the sum of the refunded debt of \$11,000,000, plus the make-whole payment of \$1,646,633. The entire transaction, which included refunding the existing debt and paying the make-whole premium, issuance costs on the new debt, and locking in the reduced interest rate of 2.95% for ten years, had a positive net present value ("NPV").

Q. Has there been a revision to the make-whole amount of \$1,646,633 originally recorded in September 2017?

17 A. Yes. In October 2018, the portion of the make-whole premium allocated to MAWC
18 was reduced to \$262,761. The basis for the adjustment was that the original NPV
19 analysis for the refinancing incorrectly assumed that the interest rate on the existing
20 debt was 5.77%, which was the rate AWCC incurred on the original issuance.

³ The original bond that was issued on July 31, 2013, with a scheduled maturity date of December 21, 2021.

1 However, the rate that MAWC was paying to AWCC for this obligation was 3.40%.

- 2 Q. Why was MAWC paying interest of 3.40% on debt that had an interest rate of 5.77%?
- A. Prior to MAWC assuming the \$20,000,000 obligation in 2013, this debt was held by
 the parent company. In 2013, the parent company redeemed this debt with AWCC,
 and then AWCC reissued the debt to MAWC in 2013 at the then-current estimated
 market rate of 3.40%. Thus, since the benefit of the refinancing to MAWC was not as
 great as it was to the other AWK subsidiaries holding a portion of this debt at a rate of
 5.77%, the share of the make-whole premium allocated to MAWC was adjusted
 downward accordingly.
- 11 Q. Please explain why a make-whole provision is a prudent and reasonable cost that
 12 should be recovered through the cost of long-term debt.
- 13 A. A make-whole provision is a prudent and reasonable cost because it lowered the 14 Company's cost of long-term debt over the life of the new debt. Accordingly, this cost 15 should be eligible for recovery from customers because it was incurred to provide 16 benefits to customers. If this transaction had been determined to have a negative NPV, 17 the Company would not have undertaken the refinancing as it would have been 18 detrimental to customers. Excluding the make-whole amount from the calculated cost 19 of long-term debt would confer benefits on customers without recognizing the costs 20 incurred to produce those benefits, which would clearly be an improper result.
- 21 Q. How is the make-whole provision being treated for accounting purposes?
- A. MAWC is amortizing this cost over the life of the associated debt, which is consistent

- 1 with the treatment for debt issuance costs. The scheduled maturity date of this debt
- obligation is September 1, 2027.

\$201,450.

5

- 3 Q. What is the unamortized balance of the make-whole premium?
- 4 A. As of December 31, 2019, the unamortized balance of the make-whole premium was

6 VIII. REVENUES

- Q. Please explain the development of MAWC's pro-forma revenues as set forth in the revenue related Schedules (CAS-8, CAS-11 and CAS-12).
- 9 A. The process of developing the Company's revenue requirement begins with revenues 10 recorded on the Company's books of account at December 31, 2019, to which various 11 adjustments were made. A summary of the development of pro forma revenues for 12 MAWC's water and sewer operations under present and proposed rates is set forth on 13 Schedules CAS-11 and CAS-12, which show operating revenues by customer 14 classification for the twelve months ending December 31, 2019 (normalized) and May 15 31, 2022. Schedule CAS-8 is a summary of the various adjustments made to book 16 operating revenues to arrive at pro forma operating revenues under present rates for the 17 twelve months ending December 31, 2019 and May 31, 2022 for MAWC's water and 18 sewer operations.
- Q. Please explain the adjustments to the Company's book revenues that were made to develop December 31, 2019 pro forma revenues under present rates as shown on Schedule CAS-8.
- 22 A. Schedule CAS-8 begins with actual Company revenues per the general ledger for the

- 1 12 months ended December 31, 2019. Three adjustments are made to present a pro 2 forma revenue for the 12 months ended December 31, 2019. First, unbilled revenue is 3 eliminated. Second, all revenue related to ISRS for St. Louis County is eliminated. 4 Lastly, the per books revenues were adjusted for the bill analysis normalization as 5 shown in Schedules CAS-11 and 12.
- Q. Please explain the adjustments to determine the Company's May 31, 2022 pro
 forma revenues as shown on Schedules CAS-8 and CAS-11 and 12.
- 8 A. The revenue adjustments are primarily for customer growth and for customer usage. 9 For the customer count, all classes begin with the average number of customers during 10 2019. Additional customers from organic growth are included using a three-year 11 average to project average customers for the future test year ending May 31, 2022 for 12 Residential, Commercial, Industrial, and Other Public Authority customers. All 13 Residential and St. Louis County Commercial water customers receive an adjustment 14 for declining usage. Please see the Direct Testimony of Company witness Gregory 15 Roach for a more detailed discussion of the declining usage projections. The usage 16 levels for Commercial customers outside of St. Louis County, Industrial, Other Public 17 Authority and Sale For Resale customers are based on a three-year average.
 - Q. Please explain any additional information included in Schedules CAS-11 and 12.

18

A. CAS-11 shows a summary by revenue class, and CAS-12 shows the detail by revenue class. In addition to pro forma revenues at current rates, Schedules CAS-11 and 12 show pro forma revenues at proposed rates. The proposed rates are based on a cost of service study and other rate design adjustments that are addressed in the Direct

- 1 Testimony of Company witness Charles Rea. 2 Q. Have you made any adjustments to reflect the loss of any large customers? 3 A. Yes. Adjustments have been made to reflect projected usage reductions for certain 4 large commercial and industrial customers. 5 Q. Does the Company currently have a low income pilot program? 6 Yes. In Case No. WR-2015-0301, a low income tariff was approved which is currently A. 7 available to water customers in St. Joseph, Parkville and Brunswick who qualify for 8 the Low Income Home Energy Assistance Program. Since that time, the Company 9 provided bill inserts, worked with local Community Action Agencies and promoted the 10 program via media opportunities. 11 Q. Does the Company propose in this case to Continue the low income pilot program? 12 Yes. The Company proposes maintaining the existing low income pilot, and expanding A. it to include the Lawson service area, as this program has been of assistance to those 13 14 that have participated. 15 Why is it appropriate to extend the program to the Lawson service area? Q. 16 Lawson is located in close proximity to the other eligible service areas in the northwest A. 17 part of Missouri. Additionally, some residents of Lawson are served by United 18 Services Community Action Agency, which also serves customers in Parkville. The 19 other residents are served by the Missouri Valley Community Action Agency.
- 20 Q. Is the Company proposing any changes to Miscellaneous Fees?

- 1 Α. Yes, the Company is proposing two changes for water customers. First, the Company 2 is proposing elimination of the temporary service charge. The charge is rarely used 3 anymore, and primarily applied to quarterly customers. With the customers in St. Louis 4 moving to monthly billing, this charge is no longer necessary. Second, the Company 5 is proposing a change to the Temporary Water Use From Hydrant Charge. Currently, 6 that charge is a flat \$15.00 per day. The Company is proposing a change that will allow 7 the Company to require customers to meter their usage if it is anticipated that daily 8 usage will exceed 3,000 gallons.
- 9 Q. Is the Company proposing any other changes to its tariffs?
- 10 A. Yes. The Company has proposed provisions in both Rule 4 and Rule 22 to address
 11 how abandoned service connections should be handled.
- 12 Q. Why are these provisions needed?
- A. Abandoned taps connected to the system can cause a variety of problems. These include water quality concerns and the potential for leaks that can cause property damage or create safety issues.
- 16 <u>IX. RATE DESIGN</u>
- 17 Q. Would you please summarize the Company's proposed rate design in this case?
- A. In this case, the Company is proposing to consolidate water tariffs into one statewide tariff group, and to maintain the current two sewer tariff groups. Additionally, the Company is proposing a new large user tariff for water customers.
- 21 Q. What rates will be impacted by the proposed consolidation of the water tariffs?

- 1 A. In this case, MAWC is proposing to consolidate all Rate A customers into one statewide 2 tariff and to consolidate all large user tariff customers into one statewide tariff. Special 3 contract rates will not be impacted by this change.
- 4 Q. Are any of the Company's water customers currently on a consolidated tariff?
- 5 A. Yes. In the MAWC's last rate case all Rate B sale for resale customers and all private
- 6 fire customers were moved to a statewide tariff.
- 7 Q. Why does MAWC feel that consolidated rates are appropriate?
- 8 A. Please see the Direct Testimony of Company witness Charles Rea for a detailed
- 9 discussion about consolidated rates and rate design.
- 10 <u>X. RATE BASE</u>
- 11 <u>a. Utility Plant in Service</u>
- 12 Q. Please explain Schedule CAS-4 Utility Plant in Service.
- 13 A. Schedule CAS-4 Utility Plant in Service shows the UPIS balance as of December 31,
- 14 2019 and May 31, 2022 by account and by consolidated water tariff group and sewer
- 15 tariff groups. Historical information was taken from the Company's fixed asset and
- 16 Enterprise Resource Planning ("ERP") systems. Historical UPIS amounts that are
- 17 recorded at the corporate district location were allocated to the tariff groups.
- Adjustments for projected capital spending, retirements, and transfers/adjustments
- were made through the future test year ending May 31, 2022 by account and by
- 20 consolidated water tariff group and sewer tariff groups. The pro forma UPIS balance
- 21 is the summation of the historical UPIS balance and the adjustments calculated by
- account and by consolidated water tariff group and sewer tariff groups. The Company

- is proposing a 13-month average UPIS balance for the future test year ended May 2022.
- 2 Q. Please describe the MAWC corporate asset allocation.
- 3 A. Missouri-American corporate asset balances as of December 31, 2019, with
- 4 adjustments through May 2022 were allocated to the one water and two sewer tariff
- groups by customer counts as of December 31, 2019. All corporate assets were
- 6 recorded in water utility accounts.

7 Q. How were the adjustments calculated?

- 8 A. Adjustments were computed by adding forecasted capital expenditures for assets
- 9 placed into service minus retirements through May 31, 2022. The capital expenditures
- came from the Company's Strategic Capital Expenditure Plan ("SCEP") for the years
- 11 2020-2024 with adjustments related to acquisitions. Asset retirements were forecasted
- using a 3-year average of retirements for the years 2017-2019.

13 Q. Were any other adjustments made to Utility Plant?

- 14 A. Yes. The Company is proposing a rate base deduction associated with an equipment
- discount. Rate base is being decreased by this amount to provide customers the benefit
- of this discount that the Company anticipates. This adjustment is further discussed in
- the testimony of Company witness Nikole Bowen.

18 Q. Are there any other Utility Plant issues to discuss?

- 19 A. Yes. The Company is proposing to capitalize Engineered Coatings in Utility Plant in
- Service.

Q. What are Engineered Coatings?

1

17

As discussed in the Direct Testimony of Company witness Jeffrey Kaiser, Engineered
Coating systems protect the structural steel of elevated water tanks, and significantly
extend their useful life. In many cases, the useful life of the water tank is extended 20
years or longer, which significantly delays the need to invest in the replacement of the
storage tank.

7 Q. What specifically is the Company proposing?

A. The Company is proposing to capitalize investments in Engineered Coatings in NARUC account 342, and to depreciate those assets over 20 years. Through the future test year ended May 31, 2022, the Company intends to invest \$8,044,900 in Engineered Coatings and thus, has included the 13 month average balance of \$4,813,054.

- 12 Q. If the Commission does not approve capitalization of the Engineered Coating
 13 investments, would the Company adjust other components of this filing?
- 14 A. Yes, if the Engineered Coatings are not capitalized, then the Company would need to
 15 increase maintenance expense by \$3,328,924 for the future test year ended May 31,
 16 2022.

b. Accumulated Depreciation Reserve

- 18 Q. Please explain Schedule CAS-5 Accumulated Depreciation Reserve.
- A. Schedule CAS-5 Accumulated Depreciation Reserve shows the reserve balances as of
 December 31, 2019 and May 31, 2022 by account and by consolidated water tariff
 group and sewer tariff groups. Historical information was taken from the Company's
 fixed asset and ERP systems. Historical depreciation reserve amounts that are recorded

at the corporate district location are allocated to the operating districts. Adjustments for projected depreciation were made through the future test year ending May 31, 2022 by account and by consolidated water tariff group and sewer tariff groups. The proforma accumulated depreciation balance is the summation of the historical reserve balance and the adjustments calculated by account and district. The Company is proposing a 13-month average Accumulated Depreciation Reserve balance for the future test year ended May 2022.

8 Q. Please describe the MAWC corporate reserve allocation.

9 A. MAWC corporate accumulated depreciation balances as of December 31, 2019 were
10 allocated to the one water and two sewer tariff groups by customer count as of
11 December 31, 2019. The corporate assets reserve has been recorded using water utility
12 accounts depreciation rates.

Q. How were the adjustments calculated?

A.

Adjustments for the reserve were computed by adding monthly depreciation accruals, and any transfers through May 31, 2022, minus retirements and net cost of removal expenditures. Monthly depreciation accruals are calculated based on monthly UPIS balances projected from the Company's SCEP for the years 2020-2024 as well as the adjustments related to acquisitions. Asset retirements, net salvage and cost of removal were forecasted using a 3-year average of retirements, net salvage and cost of removal for the years 2017-2019. The depreciation accrual rates used for January 2020 through May 2021 are the current approved depreciation rates. For the months June 2020 through May 2022, the calculation uses the proposed rates from the depreciation study

1		included as part of this filing. This proposed change is discussed more below in my
2		Direct Testimony on depreciation expense, and in the Direct Testimony of Company
3		witness Larry E. Kennedy.
4		c. Customer Advances & CIAC
5	Q.	Please explain Schedule CAS-6 Customer Advances and CIAC.
6	A.	Schedule CAS-6 Customer Advances and CIAC shows balances for the base year as of
7		December 31, 2019 and the future test year using the 13 month average balance through
8		May 31, 2022, for the consolidated water tariff group and the sewer tariff groups.
9		Historical information was taken from the Company's fixed asset and ERP systems.
10	Q.	How were the adjustments calculated?
10	Q.	110W Were the adjustments calculated.
11	A.	Adjustments were projected to include additional Customer Advances and CIAC for
12		the period of December 31, 2019 through May 31, 2022 as projected by the Company's
13		approved SCEP with adjustments related to acquisitions. The projection includes
14		advances, contributions and refunds for the stated period. The CIAC balances were
15		amortized over the same period as the corresponding assets at the rates approved in
16		MAWC's last general rate case through May 2021 and the proposed depreciation rates
17		for June 2020 through May 2022.

d. Deferred Income Taxes

19 Q. Please explain deferred income taxes in Schedule CAS-3.

18

20

21

22

A.

Schedule CAS-3, line 16 shows the historical balances for Deferred Income Taxes as of December 31, 2019 by tariff group. Adjustments were made for tax over book depreciation and repair deductions through May 31, 2022. Please see the Direct

Testimony of Company witness John Wilde for a further discussion of deferred income taxes.

<u>e. Working Capital</u>

A.

A.

Q. Please explain Schedule CAS-7 and how it was completed.

Schedule CAS-7 shows the calculation of cash working capital for the consolidated water tariff group and the sewer tariff groups. Cash working capital is included in a utility's rate base to account for the lag between the time expenses are recorded for providing utility service to the customer and the time it takes to collect the revenues associated with that service. In other words, investors sometimes have to provide "upfront" capital to fund the daily operations of providing that service until the revenues are collected, or in some instances, investors may have a net source of cash. The Company has used a lead/lag method to calculate its working capital requirement. The method calculates the net lag between the collection of revenues and the payment of expenses for each category of operating expense as well as Interest Expense and Preferred Stock Dividends to arrive at the cash working capital requirement. This methodology has been utilized by the Company for the last several cases.

17 <u>f. Pension Asset</u>

Q. Please discuss the pension asset.

The pension asset (Schedule CAS-3, line 26) measures the accumulated difference between the pension expense accrued to date and the actual cash contributions to the pension fund to date. Schedule CAS-3 shows the balance for the base year as of December 31, 2019 and the future test year using the 13-month average balance through May 31, 2022. The value for this asset is forecasted by subtracting the

- expected accruals and adding the expected cash contributions, based on documents
 from the Company's professional actuary, Willis Towers Watson.
 - g. Tank Painting Tracker
- 4 Q. Please discuss the tank painting tracker.

3

8

18

The Company's tank painting tracker was eliminated in Case No. WR-2015-0301, and the balance will be fully amortized in June 2020. No additional amounts for the tank painting tracker are included or added in the future test year ended May 31, 2022.

h. Materials and Supplies

- 9 Q. Please discuss materials and supplies.
- 10 A. Materials and supplies (Schedule CAS-3, line 23) include inventory accounts related 11 to plant materials, fuel, chemicals, and other materials, and are reflected for the 12 consolidated water tariff group and each sewer tariff group. MAWC presents the base 13 year as of December 31, 2019 and the future test year using the 13 month average 14 balance through May 31, 2022. All balances are the same and reflect the 13 month 15 average balance during the base year. Any inventories recorded at the corporate level 16 are allocated to the consolidated water tariff group and the two sewer groups using 17 customer count.

i. Regulatory Deferrals

- 19 Q. Please discuss regulatory deferrals.
- A. The Regulatory Deferrals entry on Schedule CAS-3, line 27 represents two regulatory assets acquired by the Company in recent sewer system acquisitions, and deferred costs related to the replacement of customer owned lead service lines. The Company

1		presents the base year as of December 31, 2019 and the future test year using the 13
2		month average balance through May 31, 2022.
3		The first regulatory deferral is related to the Company's purchase of the Emerald Pointe
4		sewer system in March 2014. The asset relates to the costs of a pipeline funded by
5		Emerald Pointe, but owned by the City of Hollister. The Company is amortizing this
6		deferral over a 50 year amortization period.
7		The second regulatory deferral is related to the Company's purchase of the Hickory
8		Hills water and sewer systems in December 2015. The asset relates to amounts paid
9		for receivership fees and loan payoff. The Company is amortizing this deferral over a
10		five year amortization period.
11		The final regulatory deferral is related to the replacement of customer owned lead
12		service lines. The Company is amortizing this deferral over a 10 year amortization
13		period.
14	Q.	Has the Commission addressed the replacement of customer owned lead lines?
15	A.	Yes. In MAWC's last rate case, the Commission authorized the Company to defer any
16		costs related to the replacement of customer owned lead service lines. The unamortized
17		balance was included in the revenue requirement earning the Company's long term
18		debt return, and is being amortized over 10 years. Any new investments are being
19		deferred and accrue carrying costs equal to the Company's long term debt rate.
20	Q.	Is the Company proposing any modifications to the regulatory treatment for the
21		replacement of customer owned lead service line replacements?

- Yes. The Company is proposing to include the unamortized balance in rate base where it would earn the Company's cost of capital. MAWC is not proposing any changes to the 10 year amortization period. In the event the Company is allowed to include the regulatory asset in rate base, we would not seek to continue accruing carrying costs.
- 5 Q. Why is the Company proposing this change?

12

20

A. The Company has significant capital needs, as addressed in the Direct Testimony of

Company witness Jeffrey Kaiser. The Company competes with other American Water

regulated entities for discretionary capital. By treating the investments in replacing

customer owned lead lines the same as company owned assets, at least economically,

the Company would remain project agnostic when allocating limited capital funding to

various investment needs.

XI. DEPRECIATION EXPENSE

- 13 Q. Please describe the adjustments to operating expenses related to depreciation?
- 14 A. Depreciation expense (Schedule CAS-9, line 32) is calculated based on the pro forma
 15 UPIS balance on Schedule CAS-4 by account and by consolidated water tariff group
 16 and sewer tariff groups. This balance, as discussed above, includes adjustments
 17 through May 31, 2022. The depreciation rates used for the calculation are the proposed
 18 rates presented in the Company's depreciation study. The results of this study are
 19 presented in the Direct Testimony of Company witness Mr. Kennedy.

XII. AMORTIZATION EXPENSE

- 21 Q. Please describe the adjustment to operating expenses related to amortization?
- 22 A. The adjustments to amortization expense (Schedule CAS-9, line 33) are the annual

amortization expense on the items included in the base year plus the addition of amortizations for the low income program balance and Rogue Creek balances. The costs associated with the low income program were authorized to be place in a regulatory asset in the Commission order in Case No. WR-2015-0301, with deferral continued in Case No. WR-2017-0285, and the amortization period to be determined in the next rate case. In this case, the Company proposes a 36 month amortization period. In the case of Rogue Creek Water and Sewer, MAWC operated these troubled systems for several months prior to acquisition. Costs incurred during the transition period totaled \$344,380. MAWC has deferred these costs and is proposing to amortize the balance over 60 months.

A.

XIII. PENSION AND OPEB EXPENSE

Q. Please describe the adjustment to operating expenses related to pension expense.

Missouri-American provides a defined pension benefit to non-union employees hired before January 1, 2006, and to union employees hired before January 1, 2001. Pro forma pension expense for Missouri-American is comprised of two components. First, consistent with MAWC's calculation of pension expense in its last base rate case, the Company calculated its pension expense claim in accordance with Financial Account Standards Board Accounting Standards Codification Topic 715 or "ASC 715" (formerly Statement of Financial Accounting Standards 87). The Company started with the report furnished by its actuary, Willis Tower Watson, that furnished pension costs for 2020 determined in accordance with ASC 715. From that report, the Company identified \$3,593,943 of service costs and (\$917,657) of non-service costs. The service cost portion was reduced by the capitalization rate of 43.9% to determine the portion

of service costs recorded as an expense. The FAS 87 non-service costs are all expensed.

The second component of Missouri-American's pro forma pension expense is the amortization of the Company's pension tracker. The total forecasted balance of the pension tracker at May 31, 2021 is a credit of \$3. The Company is proposing a five-year amortization of the credit balance, which would reduce expense by \$614,085 annually. Total pro forma pension expense is the sum of these components. For the forecasted twelve months ended May 31, 2022, the sum is \$483,624. Please refer to Schedule CAS-13 for a summary of this adjustment.

9 Q. What is OPEB expense?

A.

10 A. OPEB expenses are costs incurred to provide Other Post Employment Benefits.

11 Q. Please describe the adjustment to operating expenses related to OPEB expense.

Missouri-American provides OPEBs to non-union employees hired before January 1, 2006 and to union employees hired before January 1, 2001. The investments made to fund OPEBs are divided into three Voluntary Employees Beneficiary Association Plans ("VEBAs"): Post-Retirement Medical Benefits/Bargaining Unit, Post-Retirement Medical Benefits/Non-Bargaining Unit, and Life Insurance Benefits. In 2016 and 2018, American Water negotiated a cap on benefits in the Bargaining Unit and Non-Bargaining Unit VEBAs.

Like Pension expense, pro forma OPEB expense for Missouri-American is comprised of two components. This first component of OPEB expense is based on the accrual cost recognized under ASC 715 (formerly Statement of Financial Accounting Standards 106), as projected by Willis Towers Watson for 2020. The Company

adjusted its request to revise the expense associated with the Bargaining Unit VEBA, as currently there is a balance in that account subject to 100% tax if removed from the plan. From that projection, the Company identified \$421,168 of service costs and (\$1,578,041) of non-service costs. The service cost portion was reduced by the capitalization rate of 43.9% to determine the portion of service costs recorded as an expense. The FAS 106 non-service costs are all expensed. The second component of Missouri-American's pro forma OPEB expense is the amortization of the Company's OPEB tracker. The total forecasted balance of the OPEB tracker at May 31, 2021 is a credit of \$10,537,048. The Company is proposing a five-year amortization of the credit balance, which would reduce expense by \$2,107,410 million annually. Total pro forma OPEB expense is the sum of these two components, or a negative \$3,449,274 million for the twelve months ended May 31, 2022. Please refer to Schedule CAS-13 for a summary of this adjustment.

A.

XIV. PENSION AND OPEB TRACKER

Q. Please explain the purpose of the pension and OPEB Tracker and the method for calculating it?

As part of the revenue requirement stipulation and agreement in Case No. WR-2017-0285, the Company agreed to track actual pension and OPEB cost in comparison to the levels included in rates in the same manner as agreed by the parties in Case No WR-2011-0337. The purpose of the tracking mechanisms for pension and OPEB is to protect customers and the Company from the wide variations that can exist in expected costs. Pension and OPEB costs are largely dependent upon market conditions, which can, and have, experienced great volatility. Therefore, a base level of pension and

OPEB expense has been established in the Company's rate proceeding and actual costs above or below that base level are recorded monthly as deferrals on the Company's books. Both excess recoveries and shortages can and have occurred. At the time of the next rate case, the cumulative excess or shortage is included in rate base and amortized. The current amortization period is five years.

The Pension/OPEB Tracker pro forma included in rate base in this case is based upon a projected balance at May 31, 2021. The projected balance includes the amortization of the vintage deferrals, which were based upon balances at December 31, 2017, and authorized to be amortized in the Company's last rate case (WR-2017-0285). The proforma also includes the deferral of actual cost excesses or shortages from January 1, 2018 to December 31, 2019 as well as the projected deferral of cost excesses or shortages from January 1, 2020 to May 31, 2021. The projected cost deferrals for January 1, 2020 to May 31, 2022 are based upon on actuarial studies conducted annually by Willis Towers Watson and reduced by the amounts anticipated to be capitalized which is being supported by Company witness Ms. Bowen.

XV. RATE CASE EXPENSE

- Q. Please describe the adjustment to operating expenses related to Regulatory
 Expense.
 - A. The purpose of this adjustment is to annualize rate case expense for the costs related to this rate filing. Estimated costs related to the rate filing include legal fees, consultant costs, travel expenses, and other expenses. MAWC proposes that these costs be amortized over a three year period. A summary of this adjustment can be found at

1 Schedule CAS-13.

10

11

2 Q. Should reasonable and prudently incurred rate case expense be recovered?

3 A. Yes. The cost of litigating a rate case is a normal and essential cost of service for any 4 regulated public utility and should be treated as such. As a regulated utility, MAWC 5 has a legal obligation to provide safe, adequate, and reliable service to its customers. Periodic rate increases are necessary to keep a public utility financially healthy, and in 6 7 a position to continue to provide customers with safe and adequate service at just and 8 reasonable rates. Currently, the only way that MAWC can change its base rates is 9 through the rate case process.

Q. What types of rate case expense will MAWC incur in this case?

A. Because MAWC does not retain in-house resources necessary to fully support a rate 12 case, MAWC will incur rate case expense associated with outside attorneys, outside 13 consultants, and direct charges from the Service Company associated with the rate case. 14 MAWC strategically leverages its available resources to ensure it retains resources, as 15 needed, with the expertise to analyze and explain the expenses, revenues, and 16 investment that impact customers' rates as well as the often-complicated regulatory and 17 ratemaking issues presented in a rate case. It does so with the goal of presenting the 18 facts and explanations for its requested relief as coherently, effectively and efficiently 19 as possible so the Commission has the information it needs to reach a proper and fair 20 resolution and set just and reasonable rates.

21 Q. What is the nature of the Service Company charges?

22 MAWC uses Service Company to support the preparation and presentation of all A.

aspects of its rate case, including everything from testimony, schedules and workpapers to discovery and hearings and all the way through briefing until a final order is issued by the Commission. Because rate cases are somewhat cyclical, the Service Company employs several persons that work on rate cases in multiple states. By doing this, individual operating companies like MAWC avoid the need to employ such persons every year, given that rate cases will not take place every year.

Q. How is MAWC charged for the work of these Service Company employees?

Service Company employees working on the rate case directly charge MAWC's deferred rate case expense account for the rate case services they provide and do so in accordance with a contract that is a part of the Service Company's Cost Allocation Manual. By charging the deferred rate case expense account, MAWC is able to spread the cost over time, reducing the impact on customers' rates. A more costly alternative would be to increase staffing at Missouri-American to handle rate cases, which would impact the level of O&M expense imbedded into the Company's revenue requirement in this case. Service Company is providing quality and timely service to MAWC and MAWC should not be penalized for rate case related services being charged to rate case expense rather than directly to MAWC's overall O&M expense.

- Q. Are you aware that the Commission has decided to provide utilities in some prior cases something less than 100% of their prudent and reasonable rate case expense?
- 21 A. I am.

A.

22 Q. Do you believe that is good regulatory policy?

A. I do not. I would summarize my reasons for this position as follows:

- As mentioned above, rate case expenses are no different than other costs and should be recovered like other costs to the extent they are reasonable and prudent.
- Rate cases necessarily require attorneys and consultants, and other personnel, who have the expertise to address utility regulatory issues, many of which can be quite complex. MAWC does not retain those experts in-house 100% of the time, so it must rely on non-MAWC resources, including outside consultants and Service Company personnel, to file and prosecute a rate case. This is more cost-effective and efficient than having a full staff on hand at all times.
- The burden of proof lies with the utility in rate cases. The Company's goal is to present the facts and explanations for its requested relief as coherently, effectively and efficiently as possible so the Commission has the information it needs to reach a proper and fair resolution and set just and reasonable rates. It should not be arbitrarily limited in how it presents and supports its rate case so long as it does so reasonably and prudently.
- The cost of meeting its goal and the burden of proof can be driven by more than just Company action. Missouri-American's rate cases historically have included the most complex procedural schedules and protocols among the regulatory jurisdictions where American Water operates. Further, the Company has no control over the amount of discovery or the complexity and number of issues raised by other parties.

- The Company should not be penalized for reasonably and prudently defending

 its rate case or any position it takes on particular issue in the face of opposition.
 - The Company should not be penalized for not retaining full time, in house expertise to prosecute its rate cases, as the approach it takes (effectively leveraging Service Company and outside resources as needed) is less costly for customers.
 - MAWC is price regulated as the result of a system of regulation created by the General Assembly. Prior to the creation of this system of regulation, an investor-owned utility could charge any rate it chose and could change rates at its discretion. As a regulated utility, MAWC must incur some level of expense to seek rate relief from the Commission.

12 Q. How should rate case expense be treated in this case?

16

17

18

19

20

21

13 A. The Commission should allow MAWC to recover its reasonable and prudent rate case 14 expense amortized over a 36 month period.

XVI. PROPERTY TAXES

Q. What is the Company proposing for property taxes in this case?

A. The Company is including projected property taxes of \$30,945,739 for the period ended May 31, 2022. Property taxes are paid in arrears in Missouri, and payment is made in December of each year based on the prior year end plant balances. To develop the estimate the Company included 7 months of property taxes on the year end 2020 plant in service, and 5 months of property taxes on the year end 2021 plant in service.

1 Q. Is the Company proposing anything else related to property taxes?

2 A. Yes. We are requesting the Commission authorize a property tax tracker.

3 Q. How would a property tax tracker work?

A. In this case, the Commission should authorize new rates that include a certain level of property taxes. To the extent the Company's property tax expense is higher or lower than the authorized amount, the difference will be captured in the tracker. In the next rate case, the tracker balance would be amortized over a period to be determined in that case.

9 Q. What causes the Company to incur increased property taxes?

10 A. Property tax increases generally come from two sources. First, the Company is
11 continuing to make capital investments. These investments increase the taxable base
12 on which property taxes are assessed. Second, the property taxes can change due to
13 changes either in the assessment methodology or in the tax rate.

14 Q. Has MAWC ever experience changes in assessment methodology?

15 A. Yes. In 2017, St. Louis County made a significant change to the way the determined
16 the assessed value of utility property. Previously the County had used a 7 year
17 Modified Accelerated Cost Recovery System ("MACRS") schedule, and changed to a
18 20 year MACRS schedule. This resulted in a much higher assessed value for the
19 Company assets and an increase of several million dollars in property taxes.

20 Q. Why should the Commission authorize a property tax tracker?

21 A. Property tax increases are outside of the control of the Company. The Commission has

previously authorized trackers for the expense incurred by the Company for Pensions and Other Post-Employment Benefits because of their volatility and lack of control management has over such expenses. Lastly, property taxes are set by governmental taxing entities, collected by the Company and paid to the governmental taxing authorities, similar to a franchise fee or sales tax. There is no reason for customers to pay more or less than the amount supplied to such taxing entities.

XVII. CREDIT CARD FEES

- 8 Q. What is the Company proposing in this case related to credit card fees?
- 9 A. The Company proposes including credit card fees in the overall cost of service in this 10 rate case. These costs are currently paid directly by customers on top of their current 11 bill.
- 12 Q. Why is the Company proposing to include credit card fees?
- 13 A. The Company's goal is to provide customers with the most convenient alternatives to
 14 pay their bill. Customers are accustomed to many transactions that are paid with a
 15 credit card, as most online transactions are today. Charging a credit card fee on top of
 16 the customer bill adds friction to the process of paying a bill. Eliminating the direct
 17 payment of the fee will help more customers pay their bill on time and avoid late fees
 18 and potential disconnections.
- 19 Q. How much in credit card fees is the Company including in this rate case?
- 20 A. The Company is including \$700,305 for credit card fees in this rate case.
- 21 **O.** How was that calculated?

7

A. The Company used the number of credit card payments made by customers in 2019 as the basis. Based on experience in other states who recently began including credit card fees in the overall cost of service, we increased the number of credit card payments by 11%, for a total of 466,870 credit card payments. The fee is \$1.50 per credit card transaction. This increase in credit card payments also resulted in fewer electronic check payments, and the reduction to those costs is also included in the cost of service in this case.

A.

XVIII. PROCEDURAL PILOT

Q. What specific process changes does Missouri-American propose for this ratemaking proceeding?

Missouri American proposes that a single case-in-chief, that filed by Missouri-American, be reviewed by all stakeholders; and that the Commission Staff respond to the same, rather than develop a separate rate recommendation or case-in-chief. Development of a case that is independent of the utility filing has resulted in added workloads, lengthier schedule, and often confusion. This change will allow for the combination of Commission Staff's and Intervenors' direct and rebuttal testimony into one filing. In so doing, it will allow for a comparison of recommendations to be focused and meaningful, thereby reducing inefficiency. Parties may then respond to the utility's case-in-chief and propose their own adjustments, using the same test year. This approach will allow for a combination of the testimony on revenue requirements, cost of service, and rate design, which can also improve efficiency of review and rebuttal. This approach is the norm for Public Utility Commissions across American Water's footprint.

1 Q. Why should the Commission conduct a pilot with ratemaking process changes?

2 A. Doing so would supplement the efforts of the Workshop to Explore the Ratemaking 3 Process (Case No. AW-2019-0127). The approach of piloting proposed process 4 changes in individual proceedings before ruling on process changes that apply to all 5 cases would provide the Commission, Commission Staff, and Intervenors with the opportunity to evaluate benefits and provide feedback before ruling on a widescale 6 7 change. Through the existing Workshop case, all stakeholders could have the 8 opportunity to review and observe process change impact, provide feedback on the 9 pilot, and apply lessons learned to development of the ratemaking process changes.

10 Q. Does this conclude your Direct Testimony?

11 A. Yes, it does.

Press Release

Missouri American Water Submits Rate Review Request to Missouri Public Service Commission

Request driven by \$950 million investment in water and sewer systems from 2018 through mid-2022

ST. LOUIS, Mo. (June 30, 2020) – Missouri American Water today filed a request with the Missouri Public Service Commission (MoPSC) to review its water and sewer rates following an extensive examination of investments to provide safe and reliable water and sewer service.

The rate review includes \$920 million in water system improvements and \$30 million in sewer system improvements from January 2018 to May 2022.

"We carefully plan and invest in our water and sewer systems to provide safe, clean, and reliable service to nearly 1.5 million Missourians in more than 200 communities across the state," said Debbie Dewey, president of Missouri American Water. "These investments are key to our commitment to provide outstanding service and reliability, both now and for future generations."

Investments in the rate review include the replacement of approximately 275 miles of aging water and sewer pipelines and the upgrading of treatment plants, storage tanks, wells and pumping stations across the state.

"By making prudent, ongoing investments to maintain and upgrade our water and sewer systems, Missouri American Water is committed to protecting public health and safety in the communities we serve," Dewey stated. "At the same time, we remain steadfastly committed to addressing the needs of our most vulnerable customers."

Dewey stated that Missouri American Water is continuing to respond to financial hardships the COVID-19 pandemic has caused for many residents and businesses. Since March the company has issued a temporary moratorium on shut-offs for non-payment and suspended all late fees, and continues to offer payment arrangements to customers who need assistance. Additionally, the company provides financial assistance to low-income customers through its H2O Help to Others Program™.

"In addition to the company's efforts to provide financial assistance and flexibility to our customers, we are continuing to work hard to control costs and operate efficiently," continued Dewey. "These efforts enable us to invest in our systems while keeping customer rates as low as possible, with high-quality drinking water still less than a penny a gallon."

The MoPSC's review and audit of the company's request is expected to take 11 months. Any new rates set by the MoPSC would not become effective until mid-2021.

For more information on the company's rate review and to find out what actions customers may take, call customer service at 1-866-430-0820 or visit www.missouriamwater.com and select "Your Water and Wastewater Rates" under the Customer Service menu.

Missouri American Water

With a history dating to 1886, American Water is the largest and most geographically diverse U.S. publicly traded water and wastewater utility company. The company employs more than 6,800 dedicated professionals who provide regulated and market-based drinking water, wastewater and other related services to more than 15 million people in 46 states. American Water provides safe, clean, affordable and reliable water services to our customers to make sure we keep their lives flowing. For more, visit amwater.com and follow American Water on Twitter, Facebook and LinkedIn.

###

Item #7 - Summary of Reasons for the Proposed Changes

The proposed changes represent a general rate increase request. The need for an increase in rates is primarily caused by the Company's increasing capital expenditures and revenue loss from declining usage. The rate request is based upon the Company's need to continue to invest in capital improvements and to recognize the impact of declining customer usage. The capital investments are part of an ongoing program to upgrade, expand, and/or replace aging infrastructure and to relocate or replace underground water mains related to highway or other road improvements. These capital and operating increases are necessary in order to maintain system reliability, to keep the water and sewer systems current with environmental and safety standards, and to continue to meet the needs of customers.

⁴¹ Note (1): Rate J to Rate L is the difference between the metered usage and minimum billed usage for Rate J customers identified to qualify in the proposed Rate L. The minimum billed usage will no longer be applicable when switched from Rate J to Rate L.

⁴² Note (2): Rate J to Rate L Base Use is the estimated base metered usage of Rate L customers identified to qualify to proposed Rate L. Refer to Charles Rea's testimony for the definition of Rate L base usage.

⁴³ Note (3): Rate J to Rate L Exta Use is the estimated metered usage of Rate J customers during the summer months (May-Nov). Refer to Charles Rea's testimony for the definition of Rate L extra usage.

⁴¹ Note (1): Rate J to Rate L is the difference between the metered usage and minimum billed usage for Rate J customers identified to qualify in the proposed Rate L. The minimum billed usage will no longer be applicable when switched from Rate J to Rate L.

⁴² Note (2): Rate J to Rate L Base Use is the estimated base metered usage of Rate L customers identified to qualify to proposed Rate L. Refer to Charles Rea's testimony for the definition of Rate L base usage.

⁴³ Note (3): Rate J to Rate L Exta Use is the estimated metered usage of Rate J customers during the summer months (May-Nov). Refer to Charles Rea's testimony for the definition of Rate L extra usage.

27 Note 1: For presentation converted all billing determinants to monthly.

28 Note 2: Normalized Fire Usage using a 3 year average for calendar year 2017-2019.

29 Note 3:Manual Bills were performed in 2019 to correct the annual advance billings made for St. Louis in 2018. These billings were billed under old rates, but should have been prorated between old and new rates effective 5/28/2018.

<sup>46
47</sup> Note (1): Rate J to Rate L is the difference between the metered usage and minimum billed usage for Rate J customers identified to qualify in the proposed Rate L. The minimum billed usage will no longer be applicable when switched from Rate J to Rate L.

⁴⁸ Note (2): Rate J to Rate L Base Use is the estimated base metered usage of Rate L ocustomers identified to qualify to proposed Rate L. Refer to Charles Rea's testimony for the definition of Rate L base usage.

⁴⁹ Note (3): Rate J to Rate L Exta Use is the estimated metered usage of Rate L customers during the summer months (May-Nov). Refer to Charles Rea's testimony for the definition of Rate L extra usage.

47</sup> Note (1): Rate J to Rate L is the difference between the metered usage and minimum billed usage for Rate J customers identified to qualify in the proposed Rate L. The minimum billed usage will no longer be applicable when switched from Rate J to Rate L.

⁴⁸ Note (2): Rate J to Rate L Base Use is the estimated base metered usage of Rate L ocustomers identified to qualify to proposed Rate L. Refer to Charles Rea's testimony for the definition of Rate L base usage.

⁴⁹ Note (3): Rate J to Rate L Exta Use is the estimated metered usage of Rate L customers during the summer months (May-Nov). Refer to Charles Rea's testimony for the definition of Rate L extra usage.

³⁵ Note 1: Normalized Fire Usage using a 3 year average for calendar year 2017-2019.

³⁶ Note 2: Manual Bills were performed in 2019 to correct monthly advance billings made in May 2018. These billings were billed under old rates, but should have been prorated between old and new rates effective 5/28/2018.

Missouri-American Water Company Summary of Adjustments to Operations and Maintenance Expenses, Depreciation, Amortization and General Taxes For the 12 Months Ended May 31, 2022 Schedule: CAS-13

Case No. WR-2020-0344 Case No. SR-2020-0345 Page 1 of 5

		Total	Company			
					Present Rates	
Line			Base Year Ended	Pro Forma	Pro Forma For the 12 Months Ended	
Number	Description	Schedule	12/31/19	Adjustments	05/31/22	Narrative Discussion of Proposed Adjustment
1	Purchased Water	W/P's	\$1,000,137	\$415,392	\$1,415,529	The Company started with the base year 2019 expense and the applicable rates and fees billed during the year. Any miscoded items were removed from the analysis. Rate increases for each purchased water district were reviewed to determine increase frequency in order to determine applicable rates, adjusted with inflation. A three-year average consumption was calculated for each purchase water district with the
2	Fuel and Power	W/P's	11,062,562	441,663	11,504,225	exception of the KC Water Services and City of Excelsior Springs purchases which used two-years. The fuel and power expense was derived by starting with the 2019 base year and normalizing the expenses, which included removing accrual and other non-relevant amounts. The base year was then adjusted for known rate changes and annualized. The adjusted amount was then divided by the historical system delivery to develop a price per system delivery rate. The price per system delivery is then adjusted for inflation through 2022. The inflated price per system delivery was then multiplied by system delivery utilized in the present rate revenue pro forma for the 12 months ended May 31, 2022.
3	Chemicals	W/P's	9,397,747	75,280	9,473,027	The chemicals expense was derived by starting with the three-year average usage by plant and chemical. The three-year average was then adjusted for known changes in the treatment processes at each plant. The adjusted three-year average was then divided by the corresponding three-year average of system delivery, from the same time period, to develop a chemical usage per system delivery rate. The chemical usage rate per system delivery was then multiplied by system delivery utilized in the present rate revenue pro forma for the 12 months ended May 31, 2022. The chemical prices are based on 2020 prices for each chemical, adjusted for inflation through 2022. In order to calculate the pro forma amount for chemicals expense, the chemical usage by projected system delivery is then multiplied by the corresponding chemical price for each year.
4	Waste Disposal	W/P's	2,482,895	381,589	2,864,484	The expense for waste disposal includes costs incurred and accrued-for based on the scheduled frequency of cleanings as the result of current operations. The Company started with the base year 2019 and normalized costs based on waste disposal costs incurred and the frequency of the cleanings. The expense levels for current and future periods were analyzed and calculated by individual locations, adjusted for inflation through 2022.
5	Labor	W/P's	31,001,296	4,805,335	35,806,631	Base Pay - In order to calculate the base pay, the wage levels in effect during the 2019 period were applied to 2,088 and 2080 hours, for hourly non-CBU and exempt employees respectively for each full-time position and then were added together. The hours for the 12 temporary summer positions were based on adjusted work hours, each position reflecting .25 hours of a full-time employee. Wages for CBU employees were based on the CBA wage rates through 2021. If a contract rate has not been negotiated through this date, an hourly rate was calculated using a three-year average increase for each CBU. Non-CBU and exempt employees' wage rates were based on actual rates effective at April 1, 2020, to derive the 2020 expense levels. In order to calculate the expense for the future test year, the salaries and wages for each non-CBU and exempt position were inflated using a three-year average increase percentage. Overtime - The second component of the labor expense is overtime expense. Overtime was calculated based on a three-year average of actual over time dollars from 2017, 2018 and 2019. The actual regular labor dollars were divided by the overtime dollars to determine an overtime percentage. This percentage was then applied to the wages for the future test year to calculate the overtime dollars for each pro forma period respectively. Premium Pay - The third component of the labor expense is the wage rate premiums required by the CBAs for employees who obtain special licenses, who work particular shifts, who operate backhoes, or who work scheduled holidays such as Thanksgiving, Christmas, and the Fourth of July. The premium pay expense is based on the 2019-dollar amount by employee. Performance Pay - The fourth component of labor expense is the annual and long-term performance compensation for eligible employees. Performance Pay - The fourth component of labor expense is the annual and long-term performance to position for the labor expense is based on each position's target percent for both the Annual Performance P
6	Pensions	W/P's	2,767,661	(2,284,037)	483,624	Missouri-American provides a defined pension benefit to non-union employees hired before January 1, 2006, and to union employees hired before January 1, 2001. Pro forma pension expense for Missouri-American is comprised of two components. First, consistent with MAWC's calculation of pension expense in its last base rate case, the Company calculated its pension expense claim in accordance with Financial Account Standards Board Accounting Standards Codification Topic 715 or "ASC 715" (formerly Statement of Financial Accounting Standards 87). The Company started with the report furnished by its actuary, Willis Tower Watson, that furnished pension costs for 2020 determined in accordance with ASC 715. From that report, the Company identified \$3,593,943 of service costs and (\$917,657) of non-service costs. The service cost portion was reduced by the capitalization rate of 43.9% to determine the portion of service costs recorded as an expense. The FAS 87 non-service costs are all expensed. The second component of Missouri-American's pro forma pension expense is the amortization of the Company's pension tracker. The total forecasted balance of the pension tracker at May 31, 2021 is a credit of \$3. The Company is proposing a five-year amortization of the credit balance, which would reduce expense by \$614,085 annually. Total pro forma pension expense is the sum of these components. For the forecasted twelve months ended May 31, 2022, the sum is \$483,624.

Missouri-American Water Company
Summary of Adjustments to Operations and Maintenance Expenses, Depreciation, Amortization and General Taxes
For the 12 Months Ended May 31, 2022
Schedule: CAS-13

Line Number	Description	Schedule	Base Year Ended 12/31/19	Pro Forma Adjustments	05/31/22	Narrative Discussion of Proposed Adjustment
7	OPEB	W/P's	(2,359,906)	(1,232,764)		Like Pension expense, pro forma OPEB expense for Missouri-American is comprised of two components. This first component of OPEB expense is
,	O'LD	W)F3	(2,333,300)	(1,232,704)	(۱۰۱۵)عدوری	based on the accrual cost recognized under ASC 715 (formerly Statement of Financial Accounting Standards 106), as projected by Willis Towers Watson for 2020. The Company adjusted its request to revise the expense associated with the Bargaining Unit VEBA, as currently there is a balance in that account subject to 100% tax if removed from the plan. From that projection, the Company identified \$421,168 of service costs and (\$1,578,041) of non-service costs. The service cost portion was reduced by the capitalization rate of 43.9% to determine the portion of service costs recorded as an expense. The FAS 106 non-service costs are all expensed. The second component of Missouri-American's pro forma OPEB expense is the amortization of the Company's OPEB tracker. The total forecasted balance of the OPEB tracker at May 31, 2021 is a credit of \$10,537,048. The Company is proposing a five-year amortization of the credit balance, which would reduce expense by \$2,107,410 million annually. Total pro forma OPEB expense is the sum of these two components, or a negative \$3,449,274 million for the twelve months ended May 31, 2022.
8	Group Insurance	W/P's	6,147,663	782,484	6,930,147	Basic life, short- and long-term disability and AD&D. The 2020 pro forma expense for this category was calculated based upon the current 2020 plan rates. The resulting plan costs and contributions rates were used to calculate costs for each employee, according to the insurance stipulations and applying any differences for CBU and non-CBU or exempt employees. An inflation factor was applied to the 2020 pro forma expense to derive the annualized 2021 expense. The respective inflation factor was then applied to 2021 expense to calculate the future test year expense amounts. Medical, dental, vision insurance, and HSA. This category of insurance involves a Company cost net of employee contributions for medical, dental and vision and Company contributions for HSAs. The costs and contributions vary by plan type (e.g. family, employee, or employee plus spouse). Costs and contributions were calculated on a position-by-position basis, considering actual employee plan selections. The 2020 pro forma plan costs and employee contributions were based on current 2020 rates. An inflation factor was applied to the 2020 pro forma expense to derive the annualized 2021 expense. Similarly, an inflation factor was then applied to 2021 expense to calculate the future test year expense amounts.
9	401K	W/P's	784,204	111,029	895,233	Missouri-American incurs 401k expense when it matches employee contributions to 401k retirement accounts. The matching amounts are determined by each employee's benefit group or hire date. For employees whose benefit group falls into an "original" category (including CBA employees hired before 2001 and non-CBA and exempt employees hired before 2006), the Company matches 50% of the first 5% of the employee's contribution (for a maximum of 2.5%). For the remaining employees, the Company matches 100% of the first 3%, and 50% of the next 2% of the employee's contributions (for a maximum of 4%). The 2020 pro forma 401k costs were calculated for each employee based on his or her 2020 wages, his or her current employee contribution levels, and the corresponding match for his or her benefit group. The future test year expense amount was calculated using the same methodology; however, based on the employees' future test year pro forma wages.
10	DCP	W/P's	813,565	157,511	971,076	DCP is a retirement savings program for employees not eligible for the defined benefit pension program. Under the DCP, Missouri-American contributes an amount equal to 5.25% of an employee's base pay into a retirement account. The 2020 pro forma DCP expense was calculated by multiplying the 2020 pro forma regular time pay of each eligible employee by 5.25%. The future test year expense amounts were calculated using the same methodology; however, they were based on the employees' future test year pro forma wages.
11	ESPP	W/P's	170,435	11,840	182,275	ESPP expense relates to the Company funded 15% discount of American Water stock purchases made through payroll deductions by enrolled employees. The expense was calculated based on the 2020 wages for each employee who participates in the plan. The employees 2020 base wage, times their individual contribution amount, applied to the fifteen percent company discount, was used to calculate the 2020 expense. The future test year expense amount was calculated using the same methodology; however, they were based on the employee's future test year proforma wages.
12	VEBA	W/P's	144,300	378	144,678	CBU employees who are not eligible for PBOP, are entitled to Company-provided retiree medical benefits. Missouri-American has set up a trust (referred to as the Voluntary Employee Benefits Association, or VEBA) to fund this benefit in the amount of \$600 per eligible employee. In an effort to control costs, the Company excludes those employees from PBOP coverage.
13	Other Benefits	W/P's	761,178	45,797	806,975	The purpose of this adjustment is to annualize the Company's expense associated with other employee benefits. These benefits include certain employee related expenses associated with training, tuition reimbursement, employee rewards, and other such benefits. The expense was based on actual 2019 expense, which is then inflated to derive the 2020 expense.

Missouri-American Water Company
Summary of Adjustments to Operations and Maintenance Expenses, Depreciation, Amortization and General Taxes
For the 12 Months Ended May 31, 2022
Schedule: CAS-13

Line Number	Description	Schedule	12/31/19	Pro Forma Adjustments	05/31/22	Narrative Discussion of Proposed Adjustment
14	Support Services	W/P's	32,578,064	6,429,776		The services provided by the Service Company include customer service, water quality testing, innovation and environmental stewardship, human resources, communications, information technology, finance, accounting, payroll, tax, legal, engineering, accounts payable, supply chain, and risk management services. The Service Company operates customer service centers in Alton, Illinois and Pensacola, Florida that handle customer calls, billing, and collection activities for MAWC and its regulated utility affiliates. The customer service centers respond to customer inquiries and correspondence, and process service order requests. In addition, the Service Company operates two Field Resource Coordination Centers responsible for tracking and dispatching service orders for our field representatives and distribution crews. The Service Company also operates the Central Laboratory, located in Belleville, Illinois—one of the most advanced water quality laboratories in the United States. The increase in expense is due in large part to the transfer of postage and customer accounting expenses from MAWC to Service Company. This adjustment decreases customer accounting expense, while increasing Service Company Expense. In addition, the Company has included an adjustment that projects an increase in Service Company expense related to the pending sale of the New York-American Water system, anticipated to occur at the end of 2020.
15	Contracted services	W/P¹s	3,966,723	422,195	4,388,918	The contracted services expense includes costs associated with landscaping, Missouri one call, accounting, audit and legal fees that are performed by a contracted third party. In order to calculate the appropriate expense levels, the Company took the 2019 actual expenses and adjusted for acquisitions, and removed engineered coatings. The Company's proposal to capitalize investments in engineered coatings, as such the amounts were removed as an expense item. An adjustment was then made to account for costs associated with the Aclara system to derive the 2020 level of expense. The 2020 levels were inflated for an annualized 2021 period. The future test year expense was calculated by applying an inflation factor to the January through May 2021 expense levels.
16	Building Maintenance and Services	W/P's	1,066,078	50,607	1,116,685	The Company leveraged the 2019 expense as the basis for the going level of expense. This expense was then inflated to derive the 2020 expense levels. The 2020 levels were inflated for an annualized 2021 period. The future test year expense was calculated by applying an inflation factor to the January through May 2021 expense levels.
17	Telecommunication expenses	W/P's	1,197,099	56,810	1,253,909	The operating expense for telecommunications expense includes those expenses associated with office phone services, wireless services, and other data lines used by the Company. The 2019 actual expense levels were inflated for an annualized 2020 period. The 2020 expense levels were then inflated to derive the 2021 expense levels. The future test year expense was calculated by applying an inflation factor to the January through May 2021 expense levels.
18	Postage, printing and stationary	W/P's	29,459	1,456	30,915	The pro forma amount for these costs started with base year 2019 and was adjusted for inflation through 2022.
19	Office supplies and services	W/P's	1,279,611	60,759	1,340,370	The operating expense for office supply and services are those expenses related to various software licenses, bank fees and other various office supplies. In order to calculate the projected expense, the Company first took the most recent monthly license fee amounts and annualized the expense through the end of the amortization period. The Company then removed any accrued expense. The 2019 expense was inflated using the 2020 inflationary factor. The Company then took the remaining expense items for bank fees and other miscellaneous office fees and inflated the 2020 levels inflated for an annualized 2021 period. The future test year expense was calculated by applying an inflation factor to the January through May 2021 expense levels.
20	Employee related expense travel & entertain	W/P's	419,932	398,014	817,946	The operating expense for employee expense includes those expenses associated with employee travel and relocation expense. In order to calculate the projected test year expense for the period ending the Company used the base period ending December 31, 2019. The 2019 base year expense was adjusted for inflation to derive the expense amount for 2020. The 2020 expense amount was subsequently inflated to derive the current and future test year expense amounts.
21	Rents	W/P¹s	335,990	170,100	506,090	In order to calculate the appropriate rents expense, the Company took the 2019 actual expenses and removed items such as the Woodcrest early termination accrual reversal and the ASC 842 accounting entries. The lease for the El Chaparrel lagoon was annualized and added to the other lease amounts based on the lease terms for 727 Craig Road and 1050 Fox Chase. Since the 727 Craig Road lease term expires in August 2021, inflation was added to estimate rental payments through May 2022. The copiers and miscellaneous expense items were annualized for 2020 and then inflation was added through May 2022 as well to estimate future payments.
22	Transportation	W/P's	1,410,299	800,974	2,211,273	The Company first calculated its annualized 2019 pro forma transportation lease expense based on changes in leased vehicle and equipment levels as of December 2019, and twelve-month average fuel rates as of the end of February 2020. The maintenance expense was calculated based on the 2019 test period expense, adjusted for inflation. The labor O&M percentage was applied to the expense to obtain the O&M expense portion of the adjustment. The test year pro forma expense was then calculated by taking the adjusted 2019 lease expense and inflating specific maintenance items and gasoline expense through 2022.
23	Charitable Contribution	W/P's	283,380	(175,127)		Refer to Miscellaneous expense
24 25	Lobbying Expenses Penalties, Com Rel, & Mem dues	W/P's W/P's	94,930 499,856	(94,930) (924)		Refer to Miscellaneous expense Refer to Miscellaneous expense

Missouri-American Water Company
Summary of Adjustments to Operations and Maintenance Expenses, Depreciation, Amortization and General Taxes
For the 12 Months Ended May 31, 2022
Schedule: CAS-13

					Present Rates	
					Pro Forma For the	
Line			Base Year Ended	Pro Forma	12 Months Ended	
Number	Description	Schedule	12/31/19	Adjustments	05/31/22	Narrative Discussion of Proposed Adjustment
26	Miscellaneous Expenses	W/P's	2,321,436	329,921	2,651,357	The operating expense described as miscellaneous expense includes expenses for charitable contributions, lobbying, penalties and membership dues, as well as other miscellaneous expenses; such as telephone, cell phone, shipping, uniforms, and customer education expenses. The miscellaneous expense adjustment removes expenses for charitable contributions, certain penalties and membership dues, lobbying, and engineered coatings. The Company is proposing to capitalize investments in engineered coatings, therefore the amounts were removed as an expense item. The remaining expense levels for 2019 are then inflated to derive the 2020 expense levels. In a similar fashion the 2020 expense levels are inflated to derive the 2021 expense, and finally the 2022 expense levels.
27	Uncollectible accounts expense	W/P's	1,844,114	1,238,669	3,082,783	The Company calculated an uncollectible rate for the years 2017-2019 by taking actual net charge-offs over annual billed revenue. Any adjustments for the recording an allowance for doubtful accounts have been removed from the calculation. From 2017 – 2019, the uncollectible rate has been trending upward, increasing each year over the three-year period. Due to the upward trend, a 3-year average was calculated and applied to present rates and proposed rate revenues to develop the level of expense that will be incurred for the test period ended May 31, 2022.
28	Customer Accounting	W/P's	3,795,546	(2,466,215)	1,329,331	In order to derive the proforma for customer accounting expense, the Company started with the base year 2019 and normalized the costs. The Company then removed the customer accounting expenses that were transitioned over to support services and added the proposed credit card and e-check fees. The normalized customer accounting expense was then adjusted for inflation through 2022.
29	Regulatory Expense	W/P's	416,440	166,552	582,992	The purpose of this adjustment is to annualize rate case expense for the costs related to this rate filing. Estimated costs related to the rate filing include legal fees, consultant costs, travel expenses, and other expenses. MAWC proposes that these costs be amortized over a three year period.
30	Insurance Other than Group	W/P's	4,974,749	1,863,784	6,838,533	The majority of the Company's IOTG premiums renew on January 1 of each year (Directors & Officers Liability insurance renews in April each year). Development of the pro forma expense begins with adjustments to the 2019 base year, which remove certain credits and remove capitalized credits for certain insurance premiums not capitalized by other MAWC affiliates. In addition, an equipment discount credited against IOTG expense in 2019 has been eliminated and is reflected as a deduction from rate base, as discussed by MAWC witness Brian LaGrand. The Company then leverages the annual premiums owed as of early 2020. The 2020 level of IOTG expense is inflated to arrive at the annualized expense level for 2021. The 2021 expense is then inflated to arrive at a forecast expense for the twelve months ending May 31, 2022. The proforma capitalized labor percentage was multiplied by the new Worker's Compensation premium, to reduce the expense.
31	Maintenance supplies and services	W/P's	7,957,017	(186,003)	7,771,014	The Company leveraged the 2019 expense as the basis for the going level of expense. This expense was then inflated to derive the 2020 expense levels. The 2020 levels were inflated for an annualized 2021 period. The future test year expense was calculated by applying an inflation factor to the January through May 2021 expense levels. An adjustment was made to annualize main break expense to a normalized, pro forma level based on a review of historical main breaks and the cost to repair the breaks in St Louis County. In order to calculate the appropriate expense levels, the Company took a three-year average count of main breaks and expense from 2017, 2018, and 2019 actual expenses. The three-year average expense was then inflated to derive the annualized 2020 expense levels. The 2020 levels were inflated for an annualized 2021 period. The future test year expense was calculated by applying an inflation factor to the January through May 2021 expense levels.
32	Total Operations and Maintenance		128,644,460	12,777,915	141,422,375	
33						
34	Depreciation	W/P's	47,455,673	24,907,747	72,363,420	Depreciation expense (Schedule CAS-9, line 32) is calculated based on the pro forma UPIS balance on Schedule CAS-4 by account and by consolidated water tariff group and sewer tariff groups. This balance, as discussed above, includes adjustments through May 31, 2022. The depreciation rates used for the calculation are the proposed rates presented in the Company's depreciation study.
35	Amortization	W/P's	1,403,365	2,353,362	3,756,727	The adjustments to amortization expense (Schedule CAS-9, line 33) are the annual amortization expense on the items included in the base year plus the addition of amortizations for the low income program balance and Rogue Creek balances. The costs associated with the low income program were authorized to be place in a regulatory asset in the Commission order in Case No. WR-2015-0301, with deferral continued in Case No. WR-2017-0285, and the amortization period to be determined in the next rate case. In this case, the Company proposes a 36 month amortization period. In the case of Rogue Creek Water and Sewer, MAWC operated these troubled systems for several months prior to acquisition. Costs incurred during the transition period totaled \$344,380. MAWC has deferred these costs and is proposing to amortize the balance over 60 months.
36 37	Total Depreciation and Amortization		48,859,038	27,261,109	76,120,147	

Missouri-American Water Company
Summary of Adjustments to Operations and Maintenance Expenses, Depreciation, Amortization and General Taxes
For the 12 Months Ended May 31, 2022

Line			Base Year Ended	Pro Forma	12 Months Ended	
Number	Description	Schedule	12/31/19	Adjustments	05/31/22	Narrative Discussion of Proposed Adjustment
38	Property Taxes	W/P's	25,619,522	5,326,217	30,945,739	The Company is including projected property taxes of \$30,945,739 for the period ended May 31, 2022. Property taxes are paid in arrears in
						Missouri, and payment is made in December of each year based on the prior year end plant balances. To develop the estimate the Company
						included 7 months of property taxes on the year end 2020 plant in service, and 5 months of property taxes on the year end 2021 plant in service.
39	Payroll Taxes	W/P's	2,420,153	297,053	2,717,206	Payroll tax expense is directly related to salaries and wages. Two types of taxes are required to be paid in accordance with the Federal Insurance Contributions Act - Old Age Survivors & Disability Insurance ("OASDI," or more commonly "FICA"), and Hospital Insurance (or more commonly "FICA Medicare"). Federal Unemployment Tax ("FUTA") and State Unemployment Tax ("SUTA") must also be paid. Pro forma payroll taxes were calculated on a position-by-position basis, using current 2020 tax rates and pro forma wages for the future test year. The tax rates include 6.2% FICA on up to \$137,700 of wages, 1.45% FICA Medicare on all wages, 0.176% SUTA on the first \$12,000 in wages, and 0.6% FUTA on the first \$7,000 in wages.
40	PSC Fees	W/P's	2,486,069	(27,096)	2,458,973	The purpose of this adjustment is to normalize the PSC Assessment fee. The proforma amount is based on the three-year average expense derived from 2017, 2018 and 2019 actual expense paid. The three-year average expense is then inflated to determine the current and future test year expense amounts.
41	Other General Taxes	W/P's	(125,430)	0	(125,430)	Pro forma equals 2019 base year expense
42	Total Taxes Other Than Income Taxes		\$30,400,314	\$5,596,174	\$35,996,488	-
