

A small, single-story utility building with a stone block exterior and a white door. The building has a gabled roof with a white vent on the peak. A white downspout runs along the side of the building. A white electrical meter is mounted on the wall near the door. A large yellow and black Kohler generator is mounted on a concrete pad in front of the building. The generator has "KOHLER" and "KOHLER POWER SYSTEMS" printed on it. A black exhaust pipe is visible on top of the generator. The building is situated on a gravel pad next to an asphalt driveway. A chain-link fence with a gate is visible in the foreground.

A large yellow and black Kohler generator mounted on a concrete pad. The generator has "KOHLER" and "KOHLER POWER SYSTEMS" printed on it. A black exhaust pipe is visible on top of the generator. The generator is situated on a gravel pad next to an asphalt driveway. A chain-link fence with a gate is visible in the foreground.

A chain-link fence with a gate visible on the left. The fence is made of metal posts and chain-link mesh. The gate is partially open, showing the asphalt driveway leading to the building. The fence is situated on a gravel pad next to an asphalt driveway.

A chain-link fence with a gate visible on the right. The fence is made of metal posts and chain-link mesh. The gate is partially open, showing the asphalt driveway leading to the building. The fence is situated on a gravel pad next to an asphalt driveway.
