ATTACHMENT 13: ANCILLARY FUNCTIONS

1.0 Introduction

- 1.1 This Attachment 13: Ancillary Functions, and its Appendices set forth the Ancillary Functions that SWBT agrees to offer to CLEC under this Agreement, and the requirements associated therewith. SWBT will offer these Ancillary Functions to CLEC on rates, terms and conditions that are just, reasonable, and non-discriminatory and in accordance with the terms and conditions of this Agreement.

2.0 Collocation

- 2.1 Certain provisions applicable to the Parties' rights and obligations pertaining to physical and virtual collocation are set forth in Appendix Collocation, attached hereto.

3.0 Rights of Way (ROW), Conduits and Pole Attachments

- 3.1 The provisions concerning CLEC's access to and use of space on or within a pole, duct, conduit, or right-of-way owned or controlled by SWBT are set forth in Appendix Poles, Conduits, and Rights-Of-Way, attached hereto.

ATTACHMENT 23: OS-FACILITIES BASED**SWBT-PROVIDED LOCAL & INTRALATA
OPERATOR SERVICES**

This Attachment 23: OS-Facilities Based to the Agreement sets forth the terms and conditions under which SWBT agrees to provide local and IntraLATA operator services (Operator Services) for CLEC as a facilities based switch provider. This Attachment applies only to Operator Services provided within a Local Access and Transport Area (LATA).

1.0 Services - SWBT will provide the following three tiers of Operator Services:

- 1.1 Fully-Automated - Allows the caller to complete a call utilizing Automated Alternate Billing Service (AABS) equipment without the assistance of a SWBT Operator, hereafter called Operator. AABS allows the caller the option of using the AABS audio response system. AABS will be offered in areas where facilities exist and where CLEC has Automatic Number Identification (ANI) equipment and TOUCH-TONE service in place. AABS cannot be activated from a rotary telephone and failure or slow response by the caller to the audio prompts will bridge an Operator to the caller for further assistance. The called party must also have TOUCH-TONE service to accept calls that are billed collect or to a third number.
- 1.2 Semi-Automated - Allows the caller to complete a call by receiving partial assistance from an Operator or when AABS cannot be activated due to equipment limitations.
- 1.3 Non-Automated - Allows the caller to complete a call by receiving full assistance from an Operator.
- 1.4 Definition: Operator Services (OS) provides operator and automated call handling and billing, special services and optional call completion services.

2.0 Call Types - SWBT will provide to CLEC the call types in Sections 2.1 through 2.7 below:

- 2.1 Fully Automated Station-to-Station - This service is limited to those calls placed collect or billed to a third number. The caller dials 0 plus the telephone number desired, the service selection codes and/or billing information as instructed by the AABS equipment. The call is completed without the assistance of an Operator. This service may also include the following situations:
 - 2.1.1 The caller identifies himself or herself as disabled and gives the Operator the number to which the call is to be billed (either collect or third number).

- 2.1.2 When due to trouble on the network or lack of service components, the automated call cannot be completed without assistance from an Operator.
- 2.1.3 When an Operator reestablishes an interrupted call that meets any of the situations described in this Section.
- 2.2 Semi-Automated Station-To-Station - This service is limited to those calls placed sent paid, collect or billed to a third number. The caller dials 0 plus the telephone number desired and the call is completed with the assistance of an Operator. This service may also include the following situations:
 - 2.2.1 Where the caller does not dial 0 prior to calling the number desired from a public or semi-public telephone, or from a telephone where the call is routed directly to an Operator (excluding calling card calls).
 - 2.2.2 When an Operator re-establishes an interrupted call that meets any of the situations described in this Section.
- 2.3 Semi-Automated Person-To-Person - A service in which the caller dials 0 plus the telephone number desired and specifies to the Operator the particular person to be reached or a particular PBX station, department or office to be reached through a PBX attendant. This service applies even if the caller agrees, after the connection is established, to speak to any party other than the party previously specified. This service may also include the following situations:
 - 2.3.1 Where the caller does not dial a 0 prior to dialing the number from a public or semi-public telephone, or where the call is routed directly to an Operator.
 - 2.3.2 When an operator reestablishes an interrupted call that meets any of the situations described in this Section.
- 2.4 Operator Handled Station-To-Station - A service provided when the caller dials 0 to reach an Operator, and the Operator dials a sent paid, collect or third number station-to-station call. These calls may originate from a private, public or semi-public telephone. The service may also include when an Operator reestablishes an interrupted call as described in this Section.
- 2.5 Operator Handled Person-To-Person - A service in which the caller dials 0 and requests the Operator to dial the number desired and the person, station, department or office to be reached. The call remains a person-to-person call even if the caller agrees, after the connection is established, to speak to any party other than the party previously specified. The service may also include when an Operator reestablishes an interrupted call as described in this Section.

- 2.6 Operator Transfer Service - A service in which the caller dials 0 and requests to be connected to an interexchange carrier using an Operator's assistance. At the caller's request, the Operator transfers the call to an interexchange carrier participating in SWBT's Operator Transfer Service offering. CLEC agrees to obtain all necessary compensation arrangements between CLEC and participating carriers.

2.7 **Call Branding/Rate Reference**

2.7.1 Call Branding

- 2.7.1.1 The process by which an Operator, either live or recorded, will identify the operator service provider as being CLEC. SWBT will offer Call Branding of Operator Services in the name of CLEC.

- 2.7.1.2 CLEC will provide SWBT with the specific branding phrase to be used to identify CLEC. The standard phrase will be consistent with the general form and content currently used by the Parties in branding their respective services.

- 2.7.1.3 SWBT will brand Operator Services in the name of CLEC starting not later than thirty (30) days after the Effective Date of the Agreement and will complete implementation of this process in all SWBT Operator Assistance platforms not later than five (5) months after the Effective Date of the Agreement. In the interim, SWBT will, if allowed by federal and state law and regulatory rules, unbrand competitive LEC operator services calls that are branded by live operators. CLEC will not request interim unbranding of Operator Services for calls that are branded by automated systems until such time as SWBT's operator services platforms are capable of re-branding. The schedule is dependent upon the ability of SWBT's vendor to meet its current commitment; however, SWBT will use its best efforts to manage the vendor to meet said date.

- 2.7.1.4 An initial non-recurring charge will apply for loading CLEC's Operator Services Call Branding Announcement as well as a charge for each subsequent change to CLEC's Operator Services Call Branding Announcement as provided in Section 7.0 Pricing of Attachment 23 OS-Fac.

2.7.2 **Rate Reference**

- 2.7.2.1 SWBT Operator Services operators will provide Operator Services Rates Reference Information upon request to CLEC's end users as required by Section 226(b)(1)(C) of the Act. Rate Reference information will be provided under the following terms and conditions:

- 2.7.2.2 CLEC will furnish Rate Reference information in a mutually agreed to format or media thirty (30) days in advance of the initial date when they are to be provided by SWBT. If CLEC does not provide the Rate information and branding phrase as required in this

Section, SWBT will brand the OS service provided to CLEC as SWBT OS service and quote SWBT rates. SWBT will no longer brand these calls as SWBT calls nor quote SWBT rates when the appropriate equipment or software is installed.

2.7.2.3 CLEC will inform SWBT, in writing, of any changes to be made to such Rate Reference Information ten (10) working days prior to the effective rate change date. CLEC acknowledges that it is responsible to provide SWBT updated Rate information in advance of when the Rates are to become effective.

2.7.2.4 In all cases when SWBT receives a rate request from an CLEC end user, SWBT will quote the Operator Services rates provided by CLEC, except as provided in 2.7.2.2.

2.7.2.5 An initial non-recurring charge will apply for loading CLEC's Operator Services Rate information as well as a charge for each subsequent change to CLEC's Operator Services Reference information as provided in Section 7.0 Pricing of Attachment 23 OS-Fac.

3.0 Other Operator Assistance Services

3.1 Line Status Verification - A service in which the caller asks the Operator to determine the busy status of an access line.

3.2 Busy Line Interrupt - A service in which the caller asks the Operator to interrupt a conversation in progress, to determine if one of the parties is willing to speak to the caller requesting the interrupt. A Busy Line Interrupt charge will apply even if no conversation is in progress at the time of the interrupt or the parties interrupted refuse to terminate the conversation in progress.

3.3 Handling of Emergency Calls To Operator - To the extent CLEC's NXX encompasses multiple emergency agencies, SWBT will agree to query the caller as to his/her community and to transfer the caller to the appropriate emergency agency for the caller's community. CLEC will provide to SWBT the communities associated with CLEC's NXX(s).

3.4 Calling Card - Calls billed to an CLEC proprietary calling card (0+ or 0- access) will be routed via transfer to the CLEC operator.

4.0 Responsibilities of SWBT

4.1 SWBT will provide and maintain such equipment as is required to furnish the Operator Services as described in this Attachment.

4.2 Facilities necessary for SWBT to provide Operator Services to CLEC will be provided by SWBT using standard trunk traffic engineering procedures to ensure that the objective grade of service is met.

- 4.3 SWBT will provide Operator Services in accordance with the operator methods and practices in effect for SWBT at the time the call is made, unless otherwise agreed in writing by both Parties.
- 4.4 SWBT will accumulate and provide CLEC such data as necessary for CLEC to verify traffic volumes and bill its customers.
- 4.5 SWBT will deliver the call with the required signaling and data to CLEC to complete the call.
- 4.6 SWBT will forward with Operator Services calls from CLEC customers the appropriate line data required by CLEC to identify the type of line for the purposes of call handling and recording.

5.0 Responsibilities of Both Parties

- 5.1 The Party(ies) that provide the circuits between CLEC and SWBT offices will make such circuits available for use in connection with the OS services covered herein. When the total traffic exceeds the capacity of the existing circuits, the Party(ies) will provide additional circuits, to the extent necessary.

6.0 Responsibilities of CLEC

- 6.1 CLEC will be responsible for providing and maintaining the equipment necessary for routing calls and signals to the SWBT serving office and also such equipment as may be necessary to record call volumes from the CLEC serving office, in a mutually agreed upon format and media.
- 6.2 CLEC will furnish in writing to SWBT, thirty (30) days in advance of the date when the OS services are to be undertaken, all end user records and information required by SWBT to provide the Service.
- 6.3 CLEC will furnish all records required by SWBT to provide the Operator Services. Such records, or information, will include CLEC's rate quotation tables and any other information required by SWBT. CLEC will provide the initial data by a date mutually agreed to between CLEC and SWBT. CLEC will keep this data current using procedures mutually agreed to by CLEC and SWBT. CLEC will provide all data and changes to SWBT in the mutually agreed to format(s).
- 6.4 As to any end office where SWBT furnishes the Operator Services provided by this Attachment, CLEC agrees that SWBT will be the sole provider of local and intraLATA toll Operator Services provided to CLEC in such end offices for the period of time mutually agreed to by the Parties. When CLEC desires to customize route Operator

Services and such routing capability is not currently technically available, CLEC agrees that SWBT will be the sole provider of such services for each end office, where such services are provided, until customized routing has been available for three months. In this event, such services will be provided until the Parties mutually agree on a conversion date for the customized routing of such calls. Where customized routing has been available for three months in an end office, and CLEC chooses not to customize route the OS calls, CLEC agrees that SWBT will be the sole provider of OS for one year from the effective date of the provision of Operator Services pursuant to this Attachment OS-Fac.

7.0 Pricing

- 7.1 The rates for the Operator Services provided pursuant to this Attachment will be as follows (term and volume discounts available):

Operator Services Call Completion Services	
Operator Assisted and Semi-Auto per work sec.	\$0.0200
All Fully-Auto per call	\$0.1500

- 7.2 Pricing for branding of CLEC OS calls are as follows:

Call Branding	
Rate per initial load/change per TOPS switch per brand	\$3,000.00
Rate per branded call:	\$0.0250

- 7.2.1 In the event that the phraseology for branding OS calls is the same phraseology for branding DA calls, only one charge will apply per initial loading or subsequent change.

- 7.3 A charge for loading CLEC specific OS rates will apply for initial loads and subsequent changes as follows:

- 7.3.1 Rate for initial load per switch: \$2,200.00
- 7.3.2 Rate per subsequent rate change: \$1,000.00

8.0 Monthly Billing

- 8.1 SWBT will render monthly billing statements to CLEC, and remittance in full will be due within thirty (30) days of receipt.

9.0 Liability

- 9.1 Indemnification and limitation of liability of provisions covering the matters addressed in this Appendix are contained in the General Terms and Conditions portion of the Agreement.

ATTACHMENT 13 - APPENDIX: PHYSICAL COLLOCATION

The rates, rate elements, terms and conditions in this appendix are interim and will be in effect only until the effective date of the Missouri Public Service Commission's order establishing permanent rates, terms and conditions in Case No. TT-2001-298 or another appropriate case established by the Missouri Public Service Commission to establish permanent tariffed rates, terms and conditions for collocation. The use of these rates, rate elements, terms, and conditions on this interim basis is solely for purposes of accommodating the need to establish an interim approach. Upon the effective date of the Commission's order approving SWBT's permanent collocation tariff, the rates, rate elements, terms and conditions of the tariff shall control and govern all requests for physical collocation under this Agreement.

1.0 PURPOSE AND SCOPE

- 1.1 This appendix provides for the placing of Collocator telecommunications equipment and facilities on SWBT property for the purposes set forth in Paragraph 1.3, following.
- 1.2 Physical collocation provides actual space (hereinafter referred to as Dedicated Space) within a SWBT Eligible Structure as defined in Paragraph 2.0 Definitions, following. The Collocator will lease the Dedicated Space from SWBT and install certain of its own telecommunications equipment within the Dedicated Space that is necessary for the purposes set forth in Paragraph 1.3, following. SWBT will provide caged, shared caged, cageless, and other physical collocation arrangements within its Eligible Structures. When space is Legitimately Exhausted inside an Eligible Structure, SWBT will permit collocation in Adjacent Structures in accordance with this agreement so that collocators will have a variety of collocation options from which to choose.
- 1.3 Physical collocation is available for the placement of telecommunications equipment as provided for in this agreement for the purposes of (i) transmitting and routing telephone exchange service or exchange access pursuant to 47 U.S.C. 251(c)(2) of FTA96, or (ii) obtaining access to SWBT's unbundled network elements pursuant to 47 U.S.C. 251(c)(3) of FTA96. The terms "telephone exchange service", "exchange access" and "network element" are used as defined in 47 U.S.C. 153(47), 47 U.S.C. 153(16), and 47 U.S.C. 153(29) of FTA96, respectively.

2.0 DEFINITIONS

Active Collocation Space – Denotes the space within an Eligible Structure that can be designated for physical collocation which has sufficient telecommunications infrastructure systems, including power. Any dispute as to whether administrative space within an Eligible Structure should be available for physical collocation, shall be resolved on a case-by-case basis by the use of the Third-Party Engineer process pursuant to Section 6.2.1 of this appendix. Space within CEVs, huts and cabinets and similar Eligible Structures that can be designated for physical collocation is considered to be Active Collocation Space.

Adjacent Off-site Arrangement - Where Physical Collocation space within a SWBT Eligible Structure is Legitimately Exhausted, and the Collocator's Adjacent On-site space is not within 50 ft. of the Eligible Structure's outside perimeter wall, the Collocator has the option and SWBT shall permit an Adjacent Structure Off-site Arrangement, to the extent technically feasible. The Adjacent Off-site Arrangement is available if the Collocator's site is located on a property that is contiguous to or within one standard city block of SWBT's Central Office or Eligible Structure. Such arrangement shall be used for interconnection or access to unbundled network elements. When the Collocator elects to utilize an Adjacent Off-site Arrangement, the Collocator shall provide both the AC and DC power required to operate such facility. The Collocator may provide its own facilities to SWBT's premises or to a mutually agreeable meet point from its Adjacent Off-site location for interconnection purposes. The Collocator may subscribe to facilities available in the UNE rate schedule of the Collocator's interconnection agreement or, the Collocator may subscribe to the applicable rates established in this agreement for access to unbundled network elements. The interim rates, subject to true up, established in this agreement for adjacent off-site arrangement apply only if collocator's adjacent off-site is located on a property that is contiguous to or within one standard city block of SWBT's Central Office or Eligible Structure.

At the time the Collocator requests this arrangement, the Collocator must provide information as to the location of the Adjacent Off-site facility, the proposed method of interconnection, and the time frame needed to complete provisioning of the arrangement. SWBT shall provide a response to Collocator within ten (10) days of receipt of the application, including a price quote, provisioning interval, and confirmation of the manner in which the Adjacent Off-site Facility will be interconnected with SWBT's facilities. SWBT shall make best efforts to meet the time intervals requested by Collocator and, if it cannot meet the Collocator's proposed deadline, shall provide detailed reasons, as well as proposed provisioning intervals.

In the event that interior space in an Eligible Structure becomes available, SWBT will provide the option to the Collocator to relocate its equipment from an Adjacent or an Adjacent Off-site Facility into the interior space. In the event the Collocator chooses to relocate its equipment into the interior space, appropriate charges applicable for collocation within the Eligible Structure will apply.

Adjacent Structure - A Collocator-provided structure placed on SWBT property (Adjacent On-site) or non-SWBT property (Adjacent Off-site) adjacent to an Eligible Structure. This arrangement is only permitted when space is legitimately exhausted inside the Eligible Structure and to the extent technically feasible. SWBT and CLEC will mutually agree on the location of the designated space on SWBT premises where the adjacent structure will be placed. SWBT will not withhold agreement as to the site desired by Collocator, subject only to reasonable safety and maintenance requirements.

Augment - A request from a collocator to add equipment and/or cable to an existing physical collocation arrangement.

Custom Work Charge – Denotes the charge(s) developed solely to meet the construction requirements of the Collocator, e.g., painting a cage. Custom work may not be charged to

a Collocator for any work performed which will benefit or be used by SWBT or other Collocators. SWBT also may not impose a custom work charge without the Collocator's approval and agreement that the custom work is not included in the provision of collocation as provided for in the rate elements provided in this Agreement. SWBT shall follow the procedures established in Section 20.1 of this appendix for imposition of Custom Work Charges. In the event an agreement between the Collocator and SWBT is not reached regarding the Custom Work Charge, SWBT shall complete construction of the Collocator's space pending resolution of the issue by the Commission and the Collocator may withhold payment for the disputed charges while the issue remains unresolved; however, any disputed Custom Work Charges paid by the Collocator or owed to SWBT shall accrue interest at the rate established by the Missouri Public Service Commission. All Custom Work Charges that are approved by the Missouri Public Service Commission will be the basis for calculating a refund to a Collocator that has overpaid or the amount due to SWBT that was not paid or underpaid. These overpaid or underpaid amounts will accrue at the above-stated interest rate on a monthly basis from the date of completion of the work or the date of payment of the disputed amount, as appropriate. In the event that the requested work will benefit all or most Collocators, such work shall not be considered custom work; instead, SWBT shall file the appropriate agreement amendment. However, SWBT shall not delay completion of such work during the appendix approval process. SWBT shall perform such work based upon interim rates, subject to true up. If the Collocator and SWBT cannot agree on interim rates, either party may seek informal dispute resolution at the Commission.

Dedicated Space - Denotes the space dedicated for the Collocator's physical collocation arrangement located in a SWBT Eligible Structure.

Eligible Structure - Eligible Structure refers to SWBT's central offices and serving wire centers, as well as all buildings or similar structures owned or leased by SWBT that house its network facilities, and all structures that house SWBT's facilities on public rights-of-way, including but not limited to vaults containing loop concentrators or similar structures.

Infrastructure Systems - The structural components, such as floors capable of supporting equipment loads, heating, ventilating and air conditioning (HVAC) systems, electrical systems (AC power), high efficiency filtration, humidity controls, remote alarms, compartmentation and smoke purge.

Legitimately Exhausted – Denotes when all space in a Central Office (CO) that can be used or is useful to locate telecommunications equipment in any of the methods of collocation available under this Agreement is exhausted or completely occupied. Before SWBT may make a determination that space in an Eligible Structure is legitimately exhausted, SWBT must have removed all unused obsolete equipment from the Eligible Structure and made such space available for collocation; however, removal of the equipment shall not cause a delay in SWBT's response to a Collocator's application or in provisioning collocation arrangements. Establishing and maintaining a 550 sq. ft. floor space minimum requirement for Caged Common Collocation, where applicable, will not be a basis for a claim that space is Legitimately Exhausted. The determination of exhaustion is subject to dispute resolution as provided in Section 6.2.1 of this appendix.

In making this determination, SWBT may reserve space for transport equipment for current year plus two years. Additionally, SWBT may not reserve space for equipment for itself, for/of advanced or interLATA services affiliates or other SWBT affiliates or for future use by SWBT or its affiliates under conditions that are more favorable than those that apply to other telecommunications carriers seeking to reserve collocation space for their own use. SWBT may reserve space for Switching, Power and Main Distribution Frame (MDF) up to a maximum of 8 years of anticipated growth. SWBT may reserve space for Digital Crossconnect System (DCS) for 5 years of anticipated growth. At the time that SWBT denies a collocation request due to a lack of available space or determines that the space is Legitimately Exhausted, SWBT must provide to the CLEC, upon request, the following information: 1) a detailed explanation of SWBT's determination and all reasons in support thereof; 2) the access line forecast used in making the determination as defined above; and 3) a frame level diagram, which includes detailed floor plans for the Eligible Structure that is the subject of the determination, including the locations, size and current and projected use of all areas reserved for SWBT's future growth or reserved for use by SWBT's affiliates on a frame level basis and the planned date for use of that space. The frame level diagram will also include detail for each frame or area reserved for future use, including a delineation of the type of equipment to be used in the reserved space. In estimating the space requirement for growth, SWBT shall use the most recent access line growth rate and use the space requirement data applicable to any planned changes that reflect forwarding-looking technology as it relates to switching, power, MDF and DCS. In the dispute-resolution process, SWBT shall bear the burden of establishing that its reservation of active telecommunications equipment space is just, reasonable and nondiscriminatory. In addition, SWBT shall not exclusively and unilaterally reserve active space that is supported by existing telecommunications infrastructure space. SWBT shall disclose to CLECs the space it reserves for its own future growth and for that of its interLATA, advanced services and affiliates.

Other (Inactive) Collocation Space - Denotes the space within the central office that can be designated for physical collocation where infrastructure systems do not currently exist and must be constructed. The designation of Other (Inactive) Collocation Space is applicable to space within central offices only; other Eligible Structures such as CEVs, Huts, and Vaults are considered Active Collocation Space for purposes of this Agreement.

Preparation Charges - Denotes those charges associated with the initial preparation of the Collocator's Dedicated Space.

Technically Feasible - A collocation arrangement is technically feasible if, in accordance with either national standards or industry practice, there is no significant technical impediment to its establishment. A collocation arrangement shall be presumed to be technically feasible if it has been deployed by any incumbent local exchange carrier in the country.

Telecommunications Infrastructure Space – Denotes the square footage or linear footage of space, including common areas, used to house telecommunications infrastructure equipment necessary to support collocation space used for interconnection with or access

to unbundled network elements of SWBT's network and/or the network of another CLEC.

3.0 LIMITATION OF LIABILITY

3.1 Limitation

With respect to any claim or suit for damages arising in connection with the mistakes, omissions, interruptions, delays or errors, or defects in transmission occurring either in the course of furnishing service pursuant to this agreement, the liability of either SWBT or the Collocator, if any, shall not exceed an amount equivalent to the proportionate monthly charge to the Collocator for the period during which such mistake, omission, interruption, delay, error, or defect in transmission or service occurs and continues.

Neither SWBT nor the Collocator shall be responsible to the other for any indirect, special, consequential, lost profit or punitive damages, whether in contract or tort.

Both SWBT and the Collocator shall be indemnified and held harmless by the other against claims and damages by any third party arising from provision of the other ones' services or equipment except those claims and damages directly associated with the provision of services to each other which are governed by the provisioning party's applicable tariffs.

The liability of either SWBT or the Collocator for its willful misconduct or gross negligence is not limited by this agreement.

3.2 Third Parties

SWBT also may provide space in or access to the Eligible Structure to other persons or entities ("Others"), which may include competitors of the Collocator's; that such space may be close to the Dedicated Space, possibly including space adjacent to the Dedicated Space and/or with access to the outside of the Dedicated Space within the collocation area; and that if caged, the cage around the Dedicated Space is a permeable boundary that will not prevent the Others from observing or even damaging the Collocator's equipment and facilities.

In addition to any other applicable limitation, neither SWBT nor the Collocator shall have any liability with respect to any act or omission by any Other, regardless of the degree of culpability of any such Other, except in instances involving willful actions by either SWBT or the Collocator or their agents or employees.

4.0 RESPONSIBILITIES OF SWBT

4.1 Right to Use; Multiple Dedicated Spaces

In accordance with this agreement, SWBT grants to the Collocator the right to use a Dedicated Space. Each Dedicated Space within an Eligible Structure will be considered a single Dedicated Space for the application of rates according to this agreement.

4.2 Contact Numbers

SWBT is responsible for providing the Collocator personnel a contact number for SWBT technical personnel who are readily accessible 24 hours a day, 7 days a week. In addition, for all activities requiring verbal and written notification per this agreement, the parties will provide the contact numbers included in the application process. Notwithstanding the requirements for contact numbers, the Collocator will have access to its collocated equipment in the Eligible Structure 24 hours a day, 7 days a week and SWBT will not delay a Collocator's entry into an Eligible Structure.

4.3 Trouble Status Reports

SWBT is responsible for making best efforts to provide prompt verbal notification to the collocator of significant outages or operations problems which could impact or degrade the collocator's network, switches or services, with an estimated clearing time for restoral. In addition, SWBT will provide written notification within 24 hours. When trouble has been identified, SWBT is responsible for providing trouble status reports, consistent with paragraph 4.2, when requested by the collocator.

4.4 Service Coordination

SWBT is responsible for coordinating with the Collocator to ensure that services are installed in accordance with the service request.

4.5 Casualty Loss

4.5.1 Damage to Dedicated Space

If the Dedicated Space is damaged by fire or other casualty, and (1) the Dedicated Space is not rendered untenable in whole or in part, SWBT shall repair the same at its expense (as hereafter limited) and the monthly charge shall not be abated, or (2) the Dedicated Space is rendered untenable in whole or in part and such damage or destruction can be repaired within ninety (90) business days, SWBT has the option to repair the Dedicated Space at its expense (as hereafter limited) and the monthly charges shall be proportionately abated while the Collocator was deprived of the use. If the Dedicated Space cannot be repaired within ninety (90) business days, or SWBT opts not to rebuild, then SWBT shall notify the Collocator within thirty (30) business days following such occurrence that the Collocator's use of the Dedicated Space will terminate as of the date of such damage. Upon the Collocator's election, SWBT must provide to the Collocator, a comparable substitute collocation arrangement at another mutually agreeable location at the applicable nonrecurring charges for that arrangement and location.

Any obligation on the part of SWBT to repair the Dedicated Space shall be limited to repairing, restoring and rebuilding the Dedicated Space as prepared for the Collocator by SWBT.

4.5.2 Damage to Eligible Structure

In the event that the Eligible Structure in which the Dedicated Space is located shall be so damaged by fire or other casualty that closing, demolition or substantial alteration or reconstruction thereof shall, in SWBT's opinion be advisable, then, notwithstanding that the Dedicated Space may be unaffected thereby, SWBT, at its option, may terminate services provided via this agreement by giving the Collocator ten (10) business days prior written notice within thirty (30) business days following the date of such occurrence, if at all possible.

4.6 Construction Notification

SWBT will notify the collocator prior to the scheduled start dates of all construction activities (including power additions or modifications) in the general area of the Collocator's Dedicated Space with potential to disrupt the collocator's services. SWBT will provide such notification to the collocator at least twenty (20) business days before the scheduled start date of such construction activity. SWBT will inform the collocator as soon as practicable by telephone of all emergency-related activities that SWBT or its subcontractors are performing in the general area of the Collocator's Dedicated Space, or in the general area of the AC and DC power plants which support the collocator's equipment. If possible, notification of any emergency-related activity will be made immediately prior to the start of the activity so that the collocator may take reasonable actions necessary to protect the Collocator's Dedicated Space.

4.7 Construction Inspections

During the construction of all forms of physical collocation space required under this agreement, Collocators shall be permitted up to four (4) inspections during the construction in an Eligible Structure during normal business hours with a minimum of two (2) hours advance notification. If the construction interval is extended beyond the agreed upon interval, collocators will be granted two (2) additional visits per thirty (30) day extension. Requests for construction inspections shall be given to the contact number as specified in paragraph 4.2. If any travel expenses are incurred, the collocator will be charged for the time SWBT employees spend traveling and will be based on fifteen (15) minute increments. Rates and charges are as found in paragraph 21.22.

5.0 **OBLIGATIONS OF THE COLLOCATOR**

5.1 Certification

The Collocator requesting physical collocation is responsible for obtaining any necessary certifications or approvals from the Commission prior to provisioning of telecommunications service by using the physical collocation space. SWBT shall not refuse to process an application for collocation space and shall not refuse to provision the collocation space submitted by a CLEC while that CLEC's state certification is pending or prior to a final approved interconnection agreement.

5.2 Contact Numbers

The Collocator is responsible for providing to SWBT personnel a contact number for Collocator technical personnel who are readily accessible 24 hours a day, 7 days a week. In addition, for all activities requiring verbal and written notification per this agreement, the parties will provide the contact numbers included in the application process.

5.3 Trouble Report

The Collocator is responsible for making best efforts to provide prompt verbal notification to SWBT of significant outages or operations problems which could impact or degrade SWBT's network, switches or services, with an estimated clearing time for restoral. In addition, Collocator will provide written notification within 24 hours. When trouble has been identified, Collocator is responsible for providing trouble status reports, consistent with paragraph 4.2, when requested by SWBT.

5.4 Removal

The Collocator is responsible for removing any equipment, property or other items that it brings into the Dedicated Space or any other part of the Eligible Structure in which the Dedicated Space is located within thirty (30) business days after discontinuance or termination of the physical collocation arrangement. After such time, SWBT may remove the abandoned materials and charge the Collocator for any and all claims, expenses, fees or other costs associated with any such removal by SWBT, including any materials used in the removal and the time spent on such removal, at the hourly rate for custom work. The Collocator will hold SWBT harmless from the failure to return any such equipment, property or other items.

5.5 Hazardous Waste & Materials

The Installation Supplier shall adhere to all federal, state and local regulations regarding hazardous material/waste. In addition, the CLEC's Installation Supplier shall adhere to all SBC LEC requirements. The Installation Supplier shall coordinate with the SBC LEC Representative before any activity relating to hazardous material/waste is started. (Refer to Interconnector's Guide for Collocation for further details.)

5.6 Safety

The Installation Supplier shall be entirely responsible for the safety and instruction of its employees or representatives. The Installation Supplier shall take precautions to avoid harm to personnel, equipment, and building (e.g., cutting installed threaded rod) of SWBT or other CLECs. The Installation Supplier shall immediately report to the SBC LEC Representative any accident, outside agency inspection or hazardous condition, such as any accident or injury that occurs to employees or subcontractors of the Installation Supplier while on SBC LEC premises or any OSHA inspection or citations issued to the Installation Supplier while on SBC LEC premises. (Refer to Interconnector's Guide for Collocation for further details.)

5.7 Collocator's Equipment and Facilities

The Collocator is solely responsible for the design, engineering, testing, performance and maintenance of the telecommunications equipment and facilities used in the Dedicated Space. The Collocator will be responsible for servicing, supplying, repairing, installing and maintaining the following within the Dedicated Space or optional POT frame located in the Common Area:

- A. its fiber optic cable(s) or other permitted transmission media as specified in paragraph 8.1.1;
- B. its equipment;
- C. required point of termination cross connects in the Dedicated Space or the optional POT Frame/Cabinet located in the Common Area;
- D. POT frame maintenance, including replacement power fuses and circuit breaker restoration, to the extent that such fuses and circuit breakers are within the Dedicated Space or in the optional POT Frame/Cabinet located in the Common Area and accessible by the Collocator and only if and as required; and
- E. the connection cable and associated equipment which may be required within the Dedicated Space(s) or in the optional POT Frame/Cabinet located in the Common Area to the point(s) of termination.

SWBT neither accepts nor assumes any responsibility whatsoever in any of the areas so designated in this paragraph.

5.8 Insurance

5.8.1 Coverage Requirements

The collocator agrees to maintain, at all times, the following minimum insurance coverages and limits and any additional insurance and/or bonds required by law:

- A. Workers' Compensation insurance with benefits afforded under the laws of the State of Missouri and Employers Liability insurance with minimum limits of \$100,000 for Bodily Injury-each accident, \$500,000 for Bodily Injury by disease-policy limits and \$100,000 for Bodily Injury by disease-each employee.
- B. Commercial General Liability insurance with minimum limits of: \$2,000,000 General Aggregate limit; \$1,000,000 each occurrence sub-limit for all bodily injury or property damage incurred in any one occurrence; \$1,000,000 each occurrence sub-limit for Personal Injury and Advertising; \$2,000,000 Products/Completed Operations Aggregate limit, with a \$1,000,000 each occurrence sub-limit for Products/Completed Operations. Fire Legal Liability sub-limits of \$300,000 are required for lease agreements. SWBT will be named as an Additional Insured on the Commercial General Liability policy.

- C. If use of an automobile is required, Automobile Liability insurance with minimum limits of \$1,000,000 combined single limits per occurrence for bodily injury and property damage, which coverage shall extend to all owned, hired and non-owned vehicles.

SWBT requires that companies affording insurance coverage have a B+ VII or better rating, as rated in the A.M. Best Key rating Guide for Property and Casualty Insurance Companies.

A certificate of insurance stating the types of insurance and policy limits provided the Collocator must be received prior to commencement of any work. The insurance provisions and requirements are reciprocal to SWBT as well. If a certificate is not received, SWBT will notify the Collocator and the Collocator will have 5 business days to cure the deficiency. If the Collocator does not cure the deficiency within 5 business days, Collocator hereby authorizes SWBT, and SWBT may, but is not required to, obtain insurance on behalf of the Collocator as specified herein. SWBT will invoice Collocator for the costs incurred to so acquire insurance.

The cancellation clause on the certificate of insurance will be amended to read as follows:

"SHOULD ANY OF THE ABOVE-DESCRIBED POLICIES BE CANCELLED OR MATERIALLY CHANGED, THE ISSUING COMPANY WILL MAIL 30 DAYS WRITTEN NOTICE TO THE CERTIFICATE HOLDER."

The collocator shall also require all contractors who may enter the Eligible Structure to maintain the same insurance requirements listed above.

5.8.2 Self-Insured

Self-insurance in lieu of the insurance requirements listed preceding shall be permitted if the Collocator 1) has a tangible net worth of Fifty (50) Million dollars or greater, and 2) files a financial statement annually with the Securities and Exchange Commission and/or having a financial strength rating of 4A or 5A assigned by Dun & Bradstreet. The ability to self-insure shall continue so long as the Collocator meets all of the requirements of this Paragraph. If the Collocator subsequently no longer satisfies this Paragraph, Paragraph 5.8.1, Coverage Requirements, shall immediately apply.

6.0 ORDERING AND PROVISIONING

6.1 Dedicated Space

6.1.1 Types of Available Physical Collocation Arrangements

SWBT will make each of the arrangements outlined below available within its Eligible Structures in accordance with this agreement so that collocators will have a variety of collocation options from which to choose:

- A. Caged Physical Collocation - The caged collocation option provides the collocator with an individual enclosure (not including a top). This enclosure is an area designated by SWBT within an Eligible Structure to be used by the collocator for the sole purpose of installing, maintaining and operating the collocator-provided equipment.

SWBT will provide Floor Space (portions of which formerly contained in the Standard Charge), floor space conditioning (portions of which formerly contained in the Infrastructure Area Charge and now addressed as the Telecommunications Site Conditioning Space Charge), Cage Common Systems Materials (formerly contained in the Standard Charge) and Safety and Security charges in increments of one (1) square foot. For this reason, collocators will be able to order space and a cage enclosure in amounts as small as that sufficient to house and maintain a single rack or bay of equipment, (i.e., 50 square feet of cage space for a single bay) and will ensure that the first collocator in a SWBT premises will not be responsible for the entire cost of site preparation and security. Rates and charges are as found in paragraph 21.2 following.

When a collocator constructs its own cage and related equipment, the collocator will not be subject to the Cage Common Systems Materials Charge as set forth in paragraph 21.2 following. The collocator may provide a cage enclosure (not including a top), cable rack and support structure inside the cage, lighting, receptacles, cage grounding, cage sign and door key set. In addition, terms and conditions for contractors performing cage construction activities as set forth in Paragraph 16.3 following will apply.

If the collocator elects to install or requests that SWBT provide and install a point of termination (POT) frame in the dedicated collocation area rather than inside its cage, the floor space rate for cageless collocation found in Paragraph 21.3 following applies.

- B. Caged Shared Collocation - SWBT will provide Caged Shared Collocation as set forth in Section 7 entitled "Use By Other Local Service Providers." Two or more collocators may initially apply at the same time to share a caged collocation space as set forth in Paragraph 7.1. Charges to each collocator will be based upon the percentage of total space utilized by each collocator.
- C. Caged Common Collocation - SWBT will provide Caged Common Collocation as set forth in Section 7.1.1.
- D. Cageless Collocation - SWBT will provide in any collocation space that is supported by the existing telecommunications infrastructure (Active Collocation Space), or in the event that all such space is exhausted or completely occupied, will provide in any collocation space that requires additional telecommunications infrastructure (Other (Inactive) Collocation Space), as further defined in Section 2. Under this arrangement, SWBT will provide space in single bay increments, including available space adjacent to or next to SWBT's equipment. Collocators will have direct access to their equipment 24 hours a day, 7 days a week without

need for a security escort. SWBT will not require collocators to use an intermediate interconnection arrangement such as a POT frame. SWBT may take reasonable steps to protect its own equipment as provided in Section 6.1.2. Accordingly, SWBT will not provide a Collocator's personnel or agents with direct access to SWBT's main distribution frame.

- E. Adjacent Space Collocation – Where Physical Collocation space within a SWBT Eligible Structure is Legitimately Exhausted, as that term is defined in Section 2 of this appendix SWBT will permit Collocators to physically collocate in adjacent controlled environmental vaults or similar structures that SWBT uses to house equipment, to the extent technically feasible. SWBT and CLEC will mutually agree on the location of the designated space on SWBT premises where the adjacent structure will be placed. SWBT will not withhold agreement as to the site desired by Collocator, subject only to reasonable safety and maintenance requirements. SWBT will offer the following increments of power: SWBT will provide a standard offering of 100 AMPS of AC power to the adjacent structure when Central Office Switchboard AC capacity exists. SWBT will provide DC power within two cable options that allow increments of 20, 40, 50, 100, 200 and 400 AMPS to the adjacent structure from the Central Office Power source. At its option, the Collocator may choose to provide its own AC and DC power to the adjacent structure. SWBT will provide physical collocation services to such adjacent structures, subject to the same requirements as other collocation arrangements in this agreement.

Where Physical Collocation space within a SWBT Eligible Structure is Legitimately Exhausted, and Collocator's Adjacent On-site space is not within 50 ft. of the Eligible Structure's outside perimeter wall, the Collocator has the option and SWBT shall permit an Adjacent Structure Off-site Arrangement, to the extent technically feasible. The Adjacent Off-site Arrangement is available if the Collocator's site is located on a property that is contiguous to or within one standard city block of SWBT's Central Office or Eligible Structure. Such arrangement shall be used for interconnection and access to unbundled network elements. When the Collocator elects to utilize an Adjacent Off-site Arrangement, the Collocator shall provide both the AC and DC power required to operate such facility. The Collocator may provide its own facilities to SWBT's premises or to a mutually agreeable meet point from its Adjacent Off-site location for interconnection purposes. The Collocator may subscribe to facilities available in the UNE rate schedule of the Collocator's interconnection agreement or, the Collocator may subscribe to the applicable rates established in this agreement for access to unbundled network elements. The interim rates, subject to true up, established in this agreement for adjacent off-site arrangement apply only if collocator's adjacent off-site is located on a property that is contiguous to or within one standard city block of SWBT's Central Office or Eligible Structure.

At the time the Collocator requests this arrangement, the Collocator must provide information as to the location of the Adjacent Off-site facility, the proposed method of interconnection, and the time frame needed to complete provisioning of the arrangement. SWBT shall provide a response to Collocator within ten (10)

days of receipt of the application, including a price quote, provisioning interval, and confirmation of the manner in which the Adjacent Off-site Facility will be interconnected with SWBT's facilities. SWBT shall make best efforts to meet the time intervals requested by Collocator and, if it cannot meet the Collocator's proposed deadline, shall provide detailed reasons, as well as proposed provisioning intervals.

In the event that interior space in an Eligible Structure becomes available, SWBT will provide the option to the Collocator to relocate its equipment from an Adjacent On-site or an Adjacent Off-site Facility into the interior space. In the event the Collocator chooses to relocate its equipment into the interior space, appropriate charges applicable for collocation within the Eligible Structure will apply.

- F. Other Physical Collocation Arrangements – SWBT will provide other collocation arrangements that have been demonstrated to be technically feasible. Deployment by any incumbent LEC of a collocation arrangement gives rise to a rebuttable presumption in favor of a CLEC seeking collocation in SWBT's Eligible Structures that such an arrangement is technically feasible.

6.1.1.1 Active/Inactive Space Determination

As provided in Section 6.2.1 of this appendix, SWBT shall notify the Collocator in writing as to whether its request for collocation has been granted or denied within 10 days of submission of the completed application. In its notification, SWBT shall also inform the Collocator if the space available for the requested collocation space will be Active or Other (Inactive) Collocation Space, as those terms are defined in Section 2 of this appendix. If the Collocator's space is placed in Inactive Space, then the notification shall also include rationale for placing the requested space in such category, including all power, switching, and other factors used in making the determination.

In the event that the Collocator disputes SWBT's placement of the space into Inactive Space, then the Collocator may request a tour of the Eligible Structure to verify the Active/Inactive space availability. The request shall be submitted to SWBT's designated representative in writing. The inspection tour will be scheduled within three (3) business days of receipt of the request for a tour and shall be conducted no later than seven (7) days following the request for the inspection tour. At the Collocator's request, the request for inspection tour for determination of Active/Inactive space may be conducted concurrently with a tour involving space availability disputes, as provided in Section 6.2.1.1 of this appendix, thereby modifying the time frame requirements in this paragraph.

Prior to the inspection tour, a Commission-approved "Reciprocal Non-Disclosure Agreement," shall be signed by the designated SWBT representative and the designated agent for the Collocator, who will participate in the tour.

SWBT will provide all relevant documentation to the Collocator agent supporting its placement of Collocator's requested collocation arrangement in Inactive Space, subject to

executing a non-disclosure agreement at the time of the inspection tour. The SWBT representative will accompany and supervise the Collocator agent on the inspection tour. If the Collocator agent believes, based on the inspection tour of the Eligible Structure, that the placement of the collocation space in Inactive Space is unsupportable, the Collocator agent shall promptly advise SWBT orally and in writing. The Collocator and SWBT shall then concurrently prepare a report detailing their findings. The report, along with a request by the Collocator for dispute resolution and requested relief, shall be filed with Central Records at the Public Utility Commission within five (5) business days from the date of the inspection tour. The burden of proof shall be on SWBT to justify the basis for placement of the Collocator's space in Inactive Space. The Commission will use its (expedited) Dispute Resolution Process for resolution of the dispute. If the matter is appealed to the Commission through dispute resolution, the losing party shall reimburse all costs associated with this process.

6.1.2 Security

Protection of SWBT's equipment is crucial to its ability to offer service to its customers. Therefore, SWBT may impose the following reasonable security measures on collocators to assist in protecting its network and equipment from harm. SWBT may impose security arrangements as stringent as the security arrangements SWBT maintains at its own Eligible Structures either for its own employees or for authorized contractors. To the extent existing security arrangements are more stringent for one group than the other, SWBT may impose the more stringent requirements. Except as provided by the FCC's Order released March 31, 1999, in CC Docket No. 98-147 (FCC 99-48), SWBT will not impose more stringent security requirements than these. SWBT will not impose discriminatory security requirements that result in increased collocation costs without the concomitant benefit of providing necessary protection of SWBT's equipment. SWBT will not use any information collected in the course of implementing or operating security arrangements for any marketing or other purpose in aid of competing with collocators.

- A. Collocators will conduct background checks of their personnel and technicians who will have access to the collocation space. Collocator technicians will be security-qualified by the Collocator and will be required to be knowledgeable of SWBT security standards. Collocator personnel and technicians will undergo the same level of security training or its equivalent that SWBT's own employees and authorized contractors must undergo. SWBT will not, however, require collocators to receive security training from SWBT, but will provide information to collocators on the specific type of training required. Collocators can then provide their employees with their own security training. Qualification program and security training details shall be included in SWBT's Technical Publications.
- B. Collocators and SWBT will each establish disciplinary procedures up to and including dismissal or denial of access to the Eligible Structure and other SWBT property for certain specified actions that damage, or place the equipment, facilities, or the network or personnel of the collocators or SWBT in jeopardy. The following are actions that could damage or place the Eligible Structure, or the network or the personnel of the collocators or SWBT in jeopardy and may justify

disciplinary action up to and including dismissal or the denial of access to the Eligible Structure and other SWBT property:

- a. Theft or destruction of SWBT's or collocator's property;
- b. Use/sale or attempted use/sale of alcohol or illegal drugs on SWBT property;
- c. Threats or violent acts against other persons on SWBT property;
- d. Knowing violations of any local, state or federal law on SWBT property;
- e. Permitting unauthorized persons access to SWBT or collocator's equipment on SWBT property; and
- f. Carrying a weapon on SWBT property.

In addition, Collocator and SWBT will take appropriate disciplinary steps as determined by each party to address any violations reported by SWBT or the collocator of SWBT's policies and practices on security, safety, network reliability, and business conduct as defined in SWBT's Interconnector's Collocation Services Handbook for Physical Collocation in Missouri, provided the Handbook and any and all updates to it are timely provided to Collocator at no charge.

- C. Collocators will provide indemnification as set forth in Paragraph 12 of this appendix and insurance as set forth in Paragraph 5.8 of this appendix to cover any damages caused by the collocator's technicians at a level commensurate with the indemnification and insurance provided by SWBT-authorized contractors with equivalent access. The indemnification provisions and requirements are reciprocal to SWBT as well.
- D. SWBT may use reasonable security measures to protect its equipment. In the event SWBT elects to erect an interior security partition in a given Eligible Structure to separate its equipment, SWBT may recover the costs of the partition in lieu of the costs of other reasonable security measures if the partition costs are lower than the costs of any other reasonable security measure for such Eligible Structure. In no event shall a CLEC be required to pay for both an interior security partition to separate SWBT's equipment in an Eligible Structure and any other reasonable security measure for such Eligible Structure.

SWBT's construction of an interior security partition around its own equipment shall not interfere with a CLEC's access to its equipment, including equipment collocated directly adjacent to SWBT's equipment. SWBT's construction of an interior security partition around its own equipment shall not impede a CLEC's ability to collocate within SWBT's space. To the extent that SWBT is required to install additional security measures within its interior security partition because a CLEC has access to its own equipment within the area, such security measures shall be constructed and maintained at SWBT's expense.

SWBT's enclosure of its own equipment will not be a basis for a claim that space is Legitimately Exhausted, nor will it be a basis for a claim that Active Collocation Space is exhausted.

SWBT's enclosure of its own equipment will not unreasonably increase a CLEC's cost nor shall it result in duplicative security costs. The cost of an interior security partition around SWBT's equipment cannot include any embedded costs of any other security measures for the Eligible Structure. If SWBT chooses to enclose its own equipment, SWBT will be entitled to recover the cost of the cage ONLY to the extent that the price of such construction is lower than that of other reasonable security measures. SWBT has the burden to demonstrate that the cost of security measures alternative to its partitioning of its own equipment is higher than the cost of enclosing its own equipment. If SWBT cannot prove that other reasonable security methods cost more than an interior security partition around SWBT's equipment, SWBT cannot elect to erect an interior security partition in a given Eligible Structure to separate its equipment and then recover the cost from collocators.

If SWBT elects to erect an interior security partition and recover the cost, it must demonstrate to the collocator that other reasonable security methods cost more than an interior security partition around SWBT's equipment at the time the price quote is given. Any disputes can be brought before the Commission for resolution through its expedited dispute resolution process.

- E. Collocators will have access to their collocated equipment twenty-four (24) hours a day, seven (7) days a week, without a security escort. SWBT will not delay a collocator's entry into an Eligible Structure or access to its collocated equipment. The collocator will provide SWBT with notice at the time of dispatch of the collocator's own employee or contractor to an Eligible Structure and, if possible, no less than thirty (30) minutes notice for a manned structure and sixty (60) minutes notice for an unmanned structure. SWBT will provide collocators with reasonable access to restroom facilities and parking.

6.1.3 Interval

- A. SWBT will provide physical collocation arrangements in eligible structures on a "first-come, first-served" basis. To apply for a dedicated space in a particular eligible structure, the collocator will provide a completed physical collocation application form found in SWBT's Interconnector's Collocation Services Handbook for Physical Collocation in Missouri and will pay an initial application fee. A collocator wishing SWBT to consider multiple methods for collocation in an Eligible Structure on a single application will need to include in each application a prioritized list of its preferred methods of collocating, e.g., caged, shared, common, cageless, or other, as well as adequate information, (e.g., specific layout requirements, cage size, number of bays, requirements relative to adjacent bays, etc.) for SWBT to process the application for each of the preferred methods. If a collocator provides adequate information and its preferences with its application, SWBT would not require an additional application, nor would the collocator be required to restart the quotation interval should its first choice not be available in an Eligible Structure. Collocators who only wish SWBT to consider one collocation method need not provide preferences and associated specific information for multiple methods. However, if SWBT is unable to provide the

collocator's requested collocation method due to space constraints and the collocator determines that it wishes SWBT to consider an alternative method of collocation, the collocator would be required to submit an additional application. This would not result in incremental application costs to the collocator as its initial application fee would be returned due to the denial. However, it would restart the collocation intervals. Upon receipt of the collocator's application and initial application fee payment, SWBT will begin development of the quotation. SWBT will notify the collocator as to whether its request for collocation space has been granted or denied due to a lack of space within ten (10) days of submission of the completed application.

- B. In responding to an application request, SWBT shall advise the collocator which of the requested types of physical collocation is available, provide the quotation of the applicable nonrecurring and recurring rates, and the estimated construction interval no later than as specified in 6.1.3 E. following. SWBT will not select for the collocator the type of physical collocation to be ordered. The collocator has sixty-five (65) business days from receipt of the quotation to accept the quotation. The quotation expires after sixty-five (65) business days. After sixty-five (65) business days, a new application and application fee are required.
- C. Dedicated space is not reserved until the quotation is accepted. When the quotation is accepted, unless otherwise mutually agreed to by the Parties in writing, SWBT will complete construction of all Active Collocation Space requests for caged collocation in 90 days from the receipt of the collocator's acceptance of the quotation. SWBT will complete construction of Active Collocation Space requests for cageless collocation in 55 days from the receipt of the Collocator's acceptance of the quotation where the Collocator is installing all of its own bays. The cageless collocation construction interval ends when roughed in, unterminated DC power and interconnection cabling is provided to the collocation area. SWBT will complete construction of Active Collocation Space requests for cageless collocation in 70 days from the receipt of the Collocator's acceptance of the quotation where SWBT will be installing all or some of the bays. SWBT will complete construction of cageless collocation in Eligible Structures such as CEVs, Huts and Vaults in 55 days from the receipt of the Collocator's acceptance of the quotation where the Collocator is installing all of its own bays. The cageless collocation construction interval ends when roughed in, unterminated DC power and interconnection cabling is provided to the collocation area. SWBT will complete construction of cageless collocation in Eligible Structures such as CEVs, Huts and Vaults in 70 days from the receipt of the Collocator's acceptance of the quotation where SWBT will be installing all or some of the bays. These construction intervals for cageless collocation in Active Collocation Space in all Eligible Structures apply where the Collocator is requesting maximum DC power of 50 AMPs, either in a single or in multiple feeds of 50 AMPs (maximum 50 AMPs per feed). For Cageless Collocation in Active Collocation Space in all Eligible Structures where a Collocator is requesting DC power greater than 50 AMPs (e.g., 100 AMPs) per feed, SWBT will complete construction in 90 days.

Unless otherwise mutually agreed to by the parties in writing, in Other (Inactive) Collocation Space, SWBT will complete construction of requests for caged or cageless collocation in 140 days from receipt of the collocator's acceptance of the quotation. In addition, SWBT will provide a DS1/DS3 Interconnection Arrangement within 5 days after installation of the Collocator's equipment and termination of DC power and completion of interconnection cabling if the Collocator submitted an order with all requisite assignment information with its application for collocation. A collocator may obtain a shorter construction interval than that set forth above by scheduling a meeting with SWBT at least twenty (20) business days prior to submission of the first application to discuss, coordinate and prioritize the collocator applications. If a completion date outside the time period required herein is not agreed to by the parties, the issue may be presented by either party to the Missouri Public Service Commission for determination.

- D. SWBT will provide reduced intervals for collocators with existing physical collocation space that request the following interconnection augments. The collocator must submit to SWBT's Interexchange Carrier Service Center (ICSC) a completed application for a Subsequent Job. For the reduced build-out interval to apply, this application must include an up-front payment of the nonrecurring Application Fee from Section 21.1 of this appendix and 50% of all applicable nonrecurring charges. In addition, the application must include an accurate front equipment view (a.k.a. rack elevation drawing) specifying bay(s) for the collocator's point of termination. Applications received with the up-front payment and meeting the criteria below will not require a quote.

Augments consisting of interconnection cabling arrangements, AC and DC power, lighting, and interconnection conduit: 15 calendar days.

- 28 DS1s (cabling only; panels, relay racks and overhead racking exist)
- 3 DS3s (cabling only; panels, relay racks and overhead racking exist)
- 100 Copper (shielded or nonshielded) cable pairs (blocks and cabling only; panels, relay racks and overhead racking exist)
- Duplex AC convenience outlets and/or
- Additional overhead lighting and/or
- Cage-to-cage interconnection conduit within the same collocation area
- Cable pull within same collocation area
- DC power requirements where only a fuse change is required

The above fifteen (15) calendar day interval will apply only when the collocator provides a complete application. The job must be an augment to an existing collocator cage or area and limited up to and not more than the above quantities.

Augments consisting of additional interconnect panels/blocks, cabling, DC power arrangements (racks are existing): 30 calendar days.

- 84 DS1s (one interconnect panel) and/or
- 48 DS3s (interconnect panel) and/or

- 200 copper (shielded or nonshielded) cable pairs (2 blocks) up to 400 feet
- Ground cable changes within the DC Power arrangement
- Arrange/install fiber cable through innerduct up to 400 feet
- Arrange/install timing leads up to 400 feet
- Arrange and install fiber interconnections up to 12 fiber pairs up to 400 feet

The above thirty (30) calendar day interval will apply only when the collocator provides a complete application. The job must be an augment to an existing collocator cage/area and consisting only of ground cable changes, timing changes, cable pulls through innerduct or Copper (shielded or nonshielded) cable, DS1, DS3 and/or fiber interconnection arrangements limited up to and not more than the above quantities.

Augments consisting of additional interconnect panels/blocks, cabling, power cables, (racks are existing): 60 calendar days.

- 168 DS1s (one interconnect panel) and/or
- 48 DS3s (interconnection panel) and/or
- 400 Copper (shielded or nonshielded) cable pairs (2 blocks) up to 400 feet
- Power cables added to accommodate greater DC amperage requests within existing power panels.
- SWBT will perform a cage expansion of 300 square feet or less immediately adjacent to a collocator's existing cage within the collocation area as long as the collocation area does not have to be reconfigured and does not involve HVAC work
- Arrange/install bay lighting front and back up to three (3) bays
- Arrange and install fiber interconnection up to 12 fiber pairs up to 400 feet

The above sixty (60) calendar day interval will apply only when the collocator provides a complete application. The job must be an augment to an existing collocator cage or area and consisting only of cage expansions as detailed immediately above, power cable additions, bay lighting or copper (shielded or nonshielded) cable, DS1, DS3 and/or fiber interconnection arrangements limited up to and not more than the above quantities.

Other augments such as power requests that exceed current capacity ratings, additional bay spaces, SWBT bays, SWBT cable racks and/or cage expansions within Active Central Office space different than described above will require the collocator to submit an inquiry for quote. The price quote will contain the charges and the construction interval for that application. The construction interval for these other augments will not exceed 90 days. SWBT will work cooperatively with collocators to negotiate mutually agreeable construction intervals for other augments not specifically provided for above.

The parties may negotiate intervals for additional standard augments that, after appropriate notice and comment, will be incorporated into the agreement. In the event the parties are unable to agree on a standard interval, after appropriate

notice and comment, the Commission decision on the interval shall be incorporated into the agreement.

- E. Price quote intervals are as follows and will run concurrent with the ten (10) day notification interval for availability of space:

<u>Number of Applications by One Collocator</u>	<u>Quotation Interval</u>
1 – 5	10 Business Days
6 – 20	25 Business Days

Should the collocator submit twenty-one (21) or more applications within five (5) business days, the quotation interval will be increased by five (5) business days for every five (5) additional applications or fraction thereof. Any material revision to an application will be treated as a new application and will be subject to the time intervals set forth above.

A collocator may obtain a shorter interval for the return of price quotes than that set forth above by scheduling a meeting with SWBT at least twenty (20) business days prior to submission of the first application to discuss, coordinate and prioritize the collocator applications.

A collocator may obtain a shorter interval for the return of price quotes for cageless collocation arrangements when submitting 6 or more applications if the collocator files complete applications, including identification of specific rate elements and the applicable rates contained in the appendix, the exact quantity of the rate elements, and an up-front payment of the nonrecurring application fee from Section 21 of this Appendix and schedules a meeting with SWBT at least twenty (20) business days prior to submission of the first application to discuss, coordinate and prioritize the collocation applications. In addition, the applications must include an accurate front equipment view (a.k.a. rack elevation drawing) specifying bay(s) for the collocator's point of termination. The shortened intervals are:

<u>Number of Applications by One Collocator</u>	<u>Quotation Interval</u>
6-20	20 Business Days

Should the collocator submit twenty-one (21) or more applications within five (5) business days, the quotation interval will be increased by five (5) business days for every five (5) additional applications or fraction thereof. Any material revision to an application will be treated as a new application and will be subject to the time intervals set forth above.

6.1.4 Revisions

All revisions to an initial request for a physical collocation arrangement submitted by the Collocator must be in writing via a new application form. A new interval for the physical collocation arrangement will be established which shall not exceed two months, if the revision is major. A major revision will include: adding telecommunications equipment that requires additional electrical power; changes in the configuration of the cage; an increase of 10% or more of the square footage of the cage area requested; adding design and engineering requirements above those which SWBT normally deploys and practices (i.e., redundancy of certain mechanical and electrical systems); and accelerating the project schedule. However, minor revisions will not require that a new interval be established. Examples of minor revisions include: adding bays of equipment that do not significantly impact the existing/proposed electrical systems; adding light fixtures and outlets which do not exceed the capacity of the existing/proposed electrical system; changes in the configuration of the cage which do not significantly impact the overall design of the space; and adjustments to the heat release projection which do not cause a change in the proposed/existing mechanical system. The Collocator will be required to pay any applicable application fees as found in Paragraph 21.1, if the revision is major. No additional application fees shall be applicable if the revision is minor. All engineering design work that is determined not to be major is deemed to be minor.

6.2 Space Availability Determination and Resolution

6.2.1 There shall be a rebuttable presumption that space is available for physical collocation in an Eligible Structure.

SWBT shall notify the Collocator in writing as to whether its request for collocation space has been granted or denied due to lack of space within 10 days of submission of the completed application. The notification will also include a possible future space relief date, if applicable. At that time, any charges collected with the application will be returned to the Collocation Applicant.

SWBT will, at the same time, file a copy of the letter at the Central Records of the Missouri Public Service Commission. In the event of a denial of a Collocator request for collocating, SWBT shall also concurrently submit the following information both to the Collocator and to the Commission in support of its denial provided under seal and subject to proprietary protections:

1. Central Office Common Language Identifier, where applicable;
2. The identity of the requesting Collocator, including amount of space sought by the Collocator;
3. Total amount of space at the premises;
4. Detailed Floor plans, accompanied with proper legend and scale to assist in the interpretation of the floor plan and sufficient measurements to interpret size and spacing, including measurements of SWBT's premises, showing:
 - a. Space housing SWBT network equipment, non-regulated services space and administrative offices;
 - b. Space housing obsolete unused equipment;
 - c. Space occupied by SWBT affiliates;

- d. Space which does not currently house SWBT equipment or administrative offices but is reserved by SWBT for future use by SWBT or its affiliates;
 - e. Space occupied by and/or reserved for Collocators for the purpose of network interconnection or access to unbundled network elements (including identification of each Collocator);
 - f. Space, if any, occupied by third parties for other purposes, including identification of the uses of such space;
 - g. Identification of turnaround space for switch or other equipment; removal plans and timelines, if any;
 - h. Planned Central Office rearrangement/expansion plans, if any; and
 - i. Remaining space, if any, and
5. Description of other plans, if any, that may relieve space exhaustion including plans showing any adjacent space not technically considered as part of Eligible Structure. Other relevant information requested by the Third Party Reviewer.

6.2.1.1 In the event that SWBT denies a collocation request and the Collocator disputes the denial, the Collocator may request a tour of the Eligible Structure to verify space availability or lack thereof. The request shall be submitted to SWBT's designated representative in writing. The inspection tour shall be scheduled within 5 business days of receipt of the request for a tour.

Prior to the inspection tour, a Commission-approved "Reciprocal Non-disclosure Agreement" shall be signed by the designated SWBT representative and the designated agent for the Collocator who will participate in the tour.

SWBT will provide all relevant documentation to the Collocator agent including blueprints and plans for future facility expansions or enhancements subject to executing a nondisclosure agreement. A SWBT representative will accompany and supervise the Collocator agent on the inspection tour. The inspection tour shall be conducted no later than 10 days following the filing of the request for the tour. If the Collocator agent believes, based on the inspection tour of the Eligible Structure, that the denial of collocation space is unsupportable, the Collocator agent shall promptly so advise SWBT. The Collocator and SWBT shall then each concurrently prepare a report detailing its own findings of the inspection tour. The Collocator and SWBT reports shall be concurrently served on each other and submitted to the Commission Central Records and to a Third Party Engineer.

The burden of proof shall be on SWBT to justify the basis for any denial of collocation requests. A Collocator that contests SWBT's position concerning the denial of a collocation request shall pay 50% of the fee associated with the Third Party Engineer review and SWBT shall pay the remaining 50%. A Third Party Engineer shall be assigned on a rotating basis from a list maintained by a neutral third party. The neutral third party shall be selected and the process for Third Party Engineer selection shall be designed by the Commission with input from SWBT and CLECs. However, until the neutral third party process is in place, the list shall be maintained and the Third Party Engineer shall be assigned by the Commission. The Collocator does not have to obtain agreement from SWBT on the selection of the Third Party Engineer from the list maintained by a neutral third party or the Commission. The Third Party Engineer shall

review not only the reports by SWBT and the Collocator, but shall also undertake an independent evaluation to determine whether collocation space is available in the Eligible Structure. The scoped work will request that the Third Party Engineer provide an independent evaluation of the use and reservation of Collocator space as well as SWBT space. The Third Party Engineer shall examine the factors listed in Section 6.2.1 above, as well as any other factors that are specified elsewhere in this Appendix (e.g., Section 2 definition of (“Legitimately Exhausted”) and any other information the Third Party Engineer deems to be relevant to his determination. The Third Party Engineer shall also conduct its review under the presumption that the burden of proof shall be on SWBT to justify the basis for any denial of collocation requests. After determination by the Third Party Engineer and, if appealed, determination by the Commission, the losing party shall reimburse all costs associated with the Third Party Engineer process.

In the event a third party engineer or the Missouri Public Service Commission determines that space is not available, SWBT will not be required to conduct a review of floor space availability in the same central office more frequently than once every six months.

- 6.2.2 At SWBT's option in central offices and at SWBT's option in other Eligible Structures where physical (including cageless) collocation space is available or at the collocator's option in CEVs, huts and cabinets where physical collocation space is not available, SWBT will provide one or more of the alternate types of virtual collocation consistent with the terms of SWBT's virtual collocation appendix for interconnection to SWBT under 47 U.S.C. 251 (c) (2) or access to SWBT's unbundled network elements under 47 U.S.C. 251 (c) (3) of the FTA 96.
- 6.2.3 SWBT will make every attempt to provide the Collocator with contiguous space for any subsequent request for physical collocation space, but makes no assurances that contiguous space will be available.
- 6.2.4 SWBT will submit to a requesting carrier a report indicating SWBT's available collocation space in a particular SWBT Eligible Structure upon request. This report will specify the amount of collocation space available at each requested Eligible Structure, the number of collocators, and any modifications in the use of the space since the last report. The report will also include measures that SWBT is taking to make additional space available for collocation. The intervals for delivering the reports are as follows:

Number of Report Requests By One Collocator	Report Delivery Interval
1 - 5	10 Business Days
6 - 20	25 Business Days

Should the collocator submit twenty-one (21) or more report requests within five (5) business days, the report delivery interval will be increased by five (5) business days for every five (5) additional report requests or fraction thereof.

SWBT will maintain a publicly available document, posted for viewing on its website indicating all premises that are full, and will update such a document within ten days of

the date at which a premises runs out of physical collocation space. In addition, for central offices where collocators are currently located or applications for collocation are pending, if space availability information is readily available to SWBT, such information will be placed on the website. SWBT will update the public document on the first day of each month to include all newly available information. To the extent SWBT has the information readily available, the public document should specify the amount of active and other (inactive) collocation space available at each Eligible Structure, the number of collocators, any modifications in the use of the space since the last update, and should also include measures that SWBT is taking to make additional space available for collocation.

- 6.2.5 SWBT will apply the same space reservation policies to Collocators as it applies to itself. In order to increase the amount of space available for collocation, SWBT will remove obsolete unused equipment from its Eligible Structures that have no space available for Physical Collocation upon reasonable request by a Collocator or upon Order of the Commission. In those offices where SWBT does not have adequate space to meet forecasted collocation demand, SWBT agrees to remove obsolete unused equipment located in that office necessary to meet forecasted demand in advance of a reasonable request from a CLEC or Order from the Commission. SWBT shall reserve space for switching, MDF and DCS to accommodate access line growth as outlined in Section 2.0 under the definition of the term “Legitimately Exhausted Space”.

6.3 Relocation

When SWBT determines because of zoning changes, condemnation, or government order or regulation that it is necessary for the dedicated space to be moved within an eligible structure to another eligible structure, from an adjacent space collocation structure to a different adjacent space collocation structure, or from an adjacent space collocation structure to an Eligible Structure, the collocator is required to move its dedicated space or adjacent space collocation structure. SWBT will notify the resident collocator(s) in writing within five days of the determination to move the location. If the relocation occurs for reasons other than an emergency, SWBT will provide the resident collocator(s) with at least 180 days advance written notice prior to the relocation. If the Collocator is required to relocate under this Section, the Collocator will not be required to pay any application fees associated with arranging for new space. The Collocator shall be responsible for the preparation of the new Telecommunications Equipment Space and Dedicated Space at the new location or an adjacent space collocation structure if such relocation arises from circumstances beyond the reasonable control of SWBT, including zoning changes, condemnation or government order or regulation that makes the continued occupancy or use of the Dedicated Space or the Eligible Structure in which the Dedicated Space is located or the adjacent space collocation structure for the purpose then used, uneconomical in SWBT's reasonable discretion. In addition, a collocator's presence in SWBT central offices or adjacent space collocation structures should not prevent SWBT from making a reasonable business decision regarding building expansions or additions the number of central offices required to conduct its business or their locations. If SWBT determines that a collocator must relocate due to any of the above reasons, SWBT will make all reasonable efforts to minimize disruption of the

collocator's services. In addition, the costs of the move will be shared equally by SWBT and the collocator, unless the parties agree to a different financial arrangement.

If the Collocator requests that the Dedicated Space be moved within the Eligible Structure in which the Dedicated Space is located, to another Eligible Structure, from an adjacent space collocation structure to a different adjacent space collocation structure or to an Eligible Structure, SWBT shall permit the Collocator to relocate the Dedicated Space or adjacent space collocation structure, subject to availability of space and technical feasibility. The Collocator shall be responsible for all applicable charges associated with the move, including the reinstallation of its equipment and facilities and the preparation of the new Telecommunications Equipment Space, and Dedicated Space, or adjacent space collocation structure as applicable. In any such event, the new Dedicated Space shall be deemed the Dedicated Space and the new Eligible Structure (where applicable) shall be deemed the Eligible Structure in which the Dedicated Space is located and the new adjacent space collocation structure shall be deemed the adjacent space collocation structure.

6.4 Occupancy

Unless there are unusual circumstances, SWBT will notify the Collocator that the Dedicated Space is ready for occupancy within five (5) business days after SWBT completes preparation of the Dedicated Space. Operational telecommunications equipment must be placed in the Dedicated Space and interconnect to SWBT's network or obtain access to SWBT unbundled network elements within one hundred eighty (180) days after receipt of such notice. In the event that SWBT has refused to interconnect with the Collocator, the 180 day deadline shall be extended until SWBT allows the Collocator to interconnect. SWBT, however, may extend beyond the one hundred eighty (180) days provided the Collocator demonstrates a best effort to meet that deadline and shows that circumstances beyond its reasonable control prevented the Collocator from meeting that deadline. If the Collocator fails to do so and the unused collocation space is needed to meet customer demand (filed application for space, accompanied by all fees) for another collocator or to avoid construction of a building addition, collocation in the prepared Dedicated Space is terminated on the tenth (10) business day after SWBT provides the Collocator with written notice of such failure and the Collocator does not place operational telecommunications equipment in the Dedicated Space and interconnect with SWBT or obtain access to SWBT unbundled network elements by that tenth (10) business day. In any event, the Collocator shall be liable in an amount equal to the unpaid balance of the applicable charges.

For purposes of this Paragraph, the Collocator's telecommunications equipment is considered to be operational and interconnected when connected to either SWBT's network or interconnected to another collocator's equipment that resides within the same structure, provided the Collocator's equipment is used for interconnection with SWBT's network or obtain access to SWBT's unbundled network elements, for the purpose of providing this service.

If the Collocator causes SWBT to prepare the Dedicated Space and then the Collocator does not use the Dedicated Space (or all the Dedicated Space), the Collocator will pay

SWBT the monthly recurring and other applicable charges as if the Collocator were using the Dedicated Space.

6.5 Cancellation Prior to Due Date

In the event that the Collocator cancels its order after SWBT has begun preparation of the Telecommunications Infrastructure Space and Dedicated Space, but before SWBT has been paid the entire amounts due under this appendix, then in addition to other remedies that SWBT might have, the Collocator shall be liable in the amount equal to the nonrecoverable costs less estimated net salvage, the total of which is not to exceed the Preparation Charges. Nonrecoverable costs include the nonrecoverable cost of equipment and material ordered, provided or used; the nonrecoverable cost of installation and removal, including the costs of equipment and material ordered, provided or used; labor; transportation and any other associated costs. SWBT shall provide the Collocator with a detailed invoice showing the costs it incurred associated with preparation.

6.6 Billing

Billing shall occur on or about the 25th day of each month, with payment due thirty (30) days from the bill date. SWBT may change its billing date practices upon thirty (30) day's notice to the Collocator.

6.6.1 Billing Dispute Resolution

In the event of a bona fide dispute between a Collocator and SWBT regarding any bill for anything ordered from this appendix, Collocator shall, prior to the Bill Due Date, give written notice to SWBT of the amounts it disputes ("Disputed Amounts") and include in such written notice the following information: (a) the date of the bill in question, (b) the Billing Account Number (BAN) number of the bill in question, (c) any USOC information questioned, (d) the amount billed, (e) the amount in question and (f) the reason that Collocator disputes the billed amount. To be deemed a "dispute" under this Section 6.6.1, Collocator must provide proof (in the form of a copy of the executed written agreement with the financial institution) that it has established an interest bearing escrow account that complies with all of the requirements set forth in Section 6.6.2 of this appendix and proof (in the form of deposit slip(s)) that Collocator has deposited all unpaid charges into that escrow account. Failure to provide the information and proof of compliance and deposit required by this Section 6.6.1 not later than twenty-nine (29) days following the Bill Due Date shall constitute Collocator's irrevocable and full waiver of its right to dispute the subject charges.

6.6.2 Collocator shall pay all undisputed amounts to SWBT when due and shall pay all Disputed Amounts when due into an interest bearing escrow account with a Third Party escrow agent mutually agreed upon by the Parties. To be acceptable, the Third Party escrow agent must meet all of the following criteria:

- a. The financial institution proposed as the Third Party escrow agent must be located within the continental United States;

- b. The financial institution proposed as the Third Party escrow agent may not be an affiliate of Collocator; and
- c. The financial institution proposed as the Third Party escrow agent must be authorized to handle Automatic Clearing House (ACH) (credit transactions) (electronic funds) transfers.
- d. In addition to the foregoing requirements for the Third Party escrow agent, the Collocator and the financial institution proposed as the Third Party escrow agent must enter into a written agreement that the escrow account meets all of the following criteria:
 - i. The escrow account is an interest bearing account;
 - ii. All charges associated with opening and maintaining the escrow account will be borne by the Collocator;
 - iii. That none of the funds deposited into the escrow account or the interest earned thereon may be subjected to the financial institution's charges for serving as the Third Party escrow agent;
 - iv. All interest earned on deposits to the escrow account shall be disbursed to Collocator and SWBT in the same proportion as the principal; and
 - v. Disbursements from the escrow account shall be limited to those: authorized in writing by both Collocator and SWBT (that is, signature(s) from representative(s) of Collocator only are not sufficient to properly authorize any disbursement); or made in accordance with the final, non-appealable order of the arbitrator appointed pursuant to the provisions of Section 6.6.7 of this appendix; or made in accordance with the final, non-appealable order of the court that had jurisdiction to enter the arbitrator's award pursuant to Section 6.6.7 of this appendix.

6.6.3 Disputed Amounts in escrow shall be subject to Late Payment Charges as set forth in Section 6.7 of this appendix.

6.6.4 Upon receipt of the notice and both forms of proof required by Section 6.6.1 of this appendix, SWBT shall make an investigation as shall be required by the particular case, and report the results to the Collocator. Provided that Collocator has furnished all of the information and proof required by Section 6.6.1 on or before the Bill Due Date, SWBT will report the results of its investigation within 60 calendar days following the Bill Due Date. If the Collocator is not satisfied by the resolution of the billing dispute under this Section 6.6.4, the Collocator must notify SWBT in writing within thirty days following receipt of the results of SWBT's investigation that it wishes to invoke the informal resolution of billing disputes afforded under Section 6.6.5 of this appendix.

6.6.5 Informal Resolution of Billing Disputes

Upon receipt by SWBT of written notice of a billing dispute from Collocator made in accordance with the requirements of Section 6.6.1 of this appendix, each party will appoint a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any billing dispute arising under this agreement. The location, form,

frequency, duration and conclusion of these discussions will be left to the discretion of the representatives. Upon agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and the correspondence among the representatives for purposes of resolution are exempt from discovery and production and will not be admissible in the arbitration described below or in any lawsuit without the concurrence of both parties. Documents identified in or provided with such communications that were not prepared for purposes of the negotiations are not so exempted, and, if otherwise admissible, may be admitted in evidence in the arbitration or any lawsuit.

6.6.6 Formal Resolution of Billing Disputes

If the parties are unable to resolve the billing dispute through the informal procedure described in Section 6.6.5, then either party may invoke the formal dispute resolution procedures described in this Section 6.6.6. Unless agreed by both parties, formal dispute resolution procedures, including arbitration or other procedures as appropriate, may be invoked not earlier than sixty (60) calendar days after receipt of the notice initiating dispute resolution required by Section 6.6.4 of this appendix and not later than one hundred eighty (180) calendar days after receipt of the notice initiating dispute resolution required by Section 6.6.4 of this appendix.

Billing Disputes Subject to Mandatory Arbitration – If not settled through informal dispute resolution, each unresolved billing dispute involving one percent (1%) or less of the amounts charged to Collocator under this agreement during the twelve (12) months immediately preceding receipt of the notice initiating Dispute Resolution required by Section 6.6.4 of this appendix will be subject to mandatory arbitration in accordance with Section 6.6.7, below. If the Collocator has not been billed for a minimum of twelve (12) months immediately preceding receipt of the notice initiating Dispute Resolution required by Section 6.6.4 of this appendix, the parties will annualize the actual number of months billed.

Billing Disputes Subject to Elective Arbitration – If not settled through informal dispute resolution, each unresolved billing dispute involving more than one percent (1%) of the amounts charged to Collocator under this appendix during the twelve (12) months immediately preceding receipt of the notice initiating Dispute Resolution required by Section 6.6.4 of this appendix will be subject to elective arbitration pursuant to Section 6.6.7 if, and only if, both parties agree to arbitration. If the Collocator has not been billed for a minimum of twelve (12) months immediately preceding receipt of the notice initiating Dispute Resolution required by Section 6.6.4 of this appendix, the parties will annualize the actual number of months billed. If both parties do not agree to arbitration, then either party may proceed with any remedy available to it pursuant to law, equity or agency mechanism.

6.6.7 Arbitration

Disputes subject to mandatory or elective arbitration under the provisions of this appendix will be submitted to a single arbitrator pursuant to the Commercial Arbitration Rules of the American Arbitration Association or pursuant to such other provider of
