Re: Southwestern Bell Telephone, L.P. d/b/a SBC—Missouri Performance Metric
Results Report For February and March 2005

On April 18, 2005 and May 19, 2005 SBC Missouri (SBC) submitted performance measurement results for the months of February 2005 and March 2005 and the three-month rolling time periods ending February 2005 and March 2005, respectively. The report indicates:

- During the months of February and March 2005, SBC monitored 1,239 and 1,224 submeasurements, respectively.
- Based on activity in February, SBC analyzed 309 submeasurements of which SBC successfully met 297, yielding an all-measures success rate of 96.1%. By way of comparison, in February 2004, SBC monitored 1,454 submeasurements and experienced a success rate of 93.4% for the 378 it analyzed. During the twelve-month period ending February 2005, SBC achieved monthly success rates ranging from 93.2% (November 2004) to 96.8% (October 2004).
- Based on activity in March, 2005 SBC analyzed 333 submeasurements of which SBC successfully met 319, yielding an all-measures success rate of 95.8%. By way of comparison, in March 2004, SBC monitored 1,454 submeasurements and experienced a success rate of 94.8% for the 381 that it analyzed. During the twelve-month period ending March 2005, SBC achieved monthly success rates ranging from 93.2% (November 2004) to 96.8% (October 2004).
- For the December 2004-to-February 2005 period, SBC reported a rolling three-month period all-measures success rate of 96.7%. This percentage indicates that for the submeasurements analyzed, SBC met 96.7% of those submeasurements in at least two of the three months. Eleven submeasurements were missed in at least two the of three months during this three-month reporting period, seven of which

are subject to credits and/or payments to competitive local exchange carriers and/or the State of Missouri. The data reported for the same three-month period last year indicated a success rate of 96.3% and fourteen missed submeasurements in at least two of the three months.

- For the January 2005-to-March 2005 period, SBC reported a rolling three-month period all-measures success rate of 97.6%. This percentage indicates that for the submeasurements analyzed, SBC met 97.6% of those submeasurements in at least two of the three months. Eight submeasurements were missed in at least two of the three months during this three-month reporting period, four of which are subject to credits and/or payments to competitive local exchange carriers and/or the State of Missouri. The data reported for the same three-month period last year indicated a success rate of 97.1% and eleven missed submeasurements in at least two of the three months.
- As a result of missing Tier I performance standards in February and March 2005, SBC credited aggregated amounts of \$4,025 and \$3,075, respectively, to competitors providing service in Missouri. As a result of missing Tier II performance standards for the rolling periods December 2004-February 2005 and January 2005-March 2005, SBC remitted, respectively, \$3,500 and \$500 to the State of Missouri. For the past twelve months Tier I credits to competitors have averaged about \$87,277 per month while Tier II payments to the state have averaged about \$15,625 per month. Since inception of the plan, Tier I credits and Tier II payments total \$7,002,653.

The M2A expired on March 6, 2005. It is SBC's position that for those CLECs negotiating M2A-replacement agreements, M2A terms and conditions, will continue to apply until either a replacement interconnection agreement is reached or July 31, 2005. SBC states that it will continue to file monthly performance monitoring reports, pay Tier I credits to the CLECs and make Tier II payments to the state until there are replacement agreements or July 31, 2005.
